QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the second calendar quarter of 1985 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor*
	(*"Period"* from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

SENATE—*Thursday, October 31, 1985*

(Legislative day of Monday, October 28, 1985)

The Senate met 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, it has occurred to me that it would be a great blessing if Senator Hubert Humphrey could spend a few moments on the floor at this time. Thank You for the memory of this jolly, loquacious, tender, thoughtful, loving, friendly, uncommon gentle man. As the pressure builds, emotions heat up, feelings run high, and harsh words come too easily, help us to cool it, patient Father, and experience Your presence and love. Thank Thee for the excitement of honest disagreement—what monotony, if we all agreed about everything, what insufferable boredom. Give the leadership special wisdom and patience, work Your will in our midst, and give us love for one another. In the name of the Prince of Peace. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each.

THE FARM BILL

Mr. DOLE. Let me indicate, as I did last evening, that I think we are making progress on the farm bill. It seems to me that there is a consensus building on both sides that we need to pass the farm bill and do it very quickly. I regret that we took so much time on the cargo preference issue. Hopefully, that has been resolved. I now hope that we can move into the other areas on commodities and a number of other issues dealing with peanuts and rice, sugar and honey, dairy, and the other commodities. Also, there are issues with reference to checkoff by cattlemen and hog producers on which there is some dispute.

I guess that sometime this afternoon, I shall be offering a package of spending reductions and changes in the program to see if we can move this bill. We tried to bring it up in July, tried to pass the bill in July and we were frustrated in our efforts. Now it is late October and we believe it is time to pass legislation.

Farmers in my State, in many cases, long since have sown their wheat, and I regret that we were not able to pass a bill in July, but nobody wanted to talk about the cost of the bill. We will be reviewing some of the statements made in July on this subject later in the debate.

It is my hope that we can bring together Democrats and Republicans, farm State Senators, between now and sometime early afternoon to see if we can put together a package of substantial reductions in the cost of the bill but still pass a bill that contains good farm policy, realistic farm policy, more flexibility on loan rates and some income protection for farmers.

I have discussed this with Members on both sides of the aisle. In my view, there is a willingness to try to work something out. Otherwise, I think we can spend probably a couple more weeks in the amendment process.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I would also ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond 10 a.m., with statements limited therein to 5 minutes each.

The PRESIDING OFFICER (Mr. HATFIELD). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Does the Senator from Alaska need time?

Mr. MURKOWSKI. Yes. Mr. President, I had a special order pending last night. The disposition was somewhat in question as a consequence of what happened later on in the evening. But it was my intent to request about 9 or 10 minutes.

Mr. DOLE. After the distinguished minority leader has been recognized, perhaps we can work that out in morning business because we were not able to make requests for special orders last night.

It is our hope that after morning business we can turn to the Interior appropriations bill. I understand both Senators MCCLURE and JOHNSTON will be ready about 10 o'clock. I also understand that there are a number of opening statements and some amendments which can be accepted. I have been assured by Senator MCCLURE that the concern Senator DECONCINI expressed last night to both the minority and majority leader can be protected. There will not be anywhere near final passage of the Interior appropriations bill by 1 or 2 o'clock. So we will bring it up, do what we can, and then hopefully be able to set it aside. I would guess that at about 1 or 2 o'clock we will be back on S. 1714, the farm bill.

I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the Democratic leader is recognized.

THE FARM BILL

Mr. BYRD. Mr. President, the distinguished majority leader said something a moment ago about the frustrations earlier this year when the farm credit bill was up before the Senate, frustrations by Members on the other side. I do not know——

Mr. DOLE. I did not mean the farm credit bill. It was in July we were trying to get to the farm bill, but the Senator from Montana and others were not disposed to let us bring it up.

Mr. BYRD. Very well. We, too, will look at the RECORD to see what is meant by that. I do not know.

ANOTHER OF SENATOR PELL'S MANY INTERESTS

Mr. BYRD. Mr. President, our distinguished colleague, the senior Senator from Rhode Island, CLAIBORNE PELL, has long been recognized as a leading national voice for education and the arts. Through the institution of the Pell grant, Senator PELL has enabled countless American young people to pursue higher education. Through his support of the National Endowment of the Arts, Senator PELL has helped to advance music, drama, literature, and other forms of artistic expression throughout the country.

In the Monday issue of the Washington Post, another of Senator PELL's concerns was underlined. According to a story in the style section of the Post, at Senator PELL's instigation a symposium was held last weekend at Georgetown University on the general subject of the after-life. The symposium, entitled "Consciousness and Survival,"

delved into multifaceted areas of man's experience beyond life—for example, survival consciousness, the possibility of reincarnation, the immortality of the soul, the mind-spirit relationship, and possible connections between physical and mental phenomena, to name but a few areas of interest. The symposium, which grew out of a dinner-party discussion held at Senator PELL's house some 4 years ago, attracted well over 500 people to the Georgetown campus to share and to listen to a wide range of perspectives on the shape of life after death, or the absence of that experience.

Again, our distinguished colleague from Rhode Island has demonstrated the breadth and depth of his original mind and creative spirit. I found the report in the Post stimulating and interesting. I commend Senator PELL for the role that he played in bringing together such a large assembly of experts and inquiries on such a profound subject, and I ask unanimous consent that the article from the Post, entitled "Matters of Life After Death," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MATTERS OF LIFE AFTER DEATH

(By Michael Kernan)

I believe that primal attitudes toward life and death set the ethical environment and range of peace and violence in which we all live.—Sen. Claiborne Pell.

Four years ago, at a dinner party given by the senior senator from Rhode Island, the guests got into a discussion on whether consciousness survives our death. The subject proved so intriguing, with so many different facets, that all the guests agreed it would make a most exciting symposium.

And unlike most great dinner-table ideas, this one was bullied and sweated into reality. This past weekend "Consciousness and Survival," sponsored by the Institute of Noetic Sciences and the ubiquitous Smithsonian, drew well over 500 people to the Georgetown University campus for a series of talks by international experts—including a Tibetan lama—in an amazing variety of fields.

Someone called the symposium "the most historic event of the century for survival-after-death research," and while that might be something of an overstatement, sponsors and listeners alike seemed to feel it was a landmark in the growing general recognition that life after death is worth serious attention and scientific study.

Pell outlined four broad points of view on the subject: "the possibility of reincarnation, where the soul remains, with or without memory"; the idea of the Great One "that the soul and its accompanying memory joins"; simple oblivion; and "the idea that the individual soul with its accompanying memory lives on eternally."

He also listed a fifth approach: that "what will happen is what you believe will happen."

The audience had come from all over the Northeast to hear about such increasingly popular subjects as out-of-body experiences, near-death experiences, memories of "past lives," parapsychology and assorted ways of communicating with the absent and the dead. What they got was a deadly serious, scholarly examination of how mainstream science is responding to the mounting pile of evidence and speculation on these things.

In the Saturday sessions, various positions on the question were outlined. Antony Flew, an Oxford educator now with the Social Philosophy Center in Bowling Green, Ohio, led off with a frontal attack on the notion that mind and brain are separate entities. He questioned the very idea that a mind or soul could be considered an "entity" or substance while remaining incorporeal.

Some scientists and philosophers, he said, tend to be confused among "the words 'minds' or 'souls" or 'selves' construed as referring to a peculiar kind of substance, and the same words interpreted as referring to aspects or capacities or dispositions of quite ordinary people.

"We are by this got into Wonderland, where grins are said to survive the disappearance of the faces of which they are a sort of configuration," said Flew.

Charles Tart of the University of California at Davis discussed altered states of consciousness from emotional peaks and troughs to dreams and beyond, to telepathy, clairvoyance and precognition. Stanislav Grof, a Czech scholar now at Esalen Institute in Big Sur, Calif., delved further into various transpersonal experiences "that transcend normal perceptions."

From his 30 years of research into unusual states of consciousness, he said, he perceived four categories: ability to identify profoundly with other people and with all creatures, plants and every aspect of the universe; the transcendence of linear time; an experience of the cosmos itself; and finally a perception of archetypal ideas, as C.G. Jung has suggested.

Paul Davies of the University of Newcastle in England showed how the uncertainty principle of quantum physics could lead scientists to the concept of two or more worlds superimposed on each other, and Candace Pert of the National Institute of Mental Health related the ambiguities in DNA research to the new ways of seeing the "body-mind." Kenneth Ring of the University of Connecticut discussed the significance of the innumerable near-death accounts he has researched, and John Hick of Claremont Graduate School in California cited the work of spiritualists and mediums from the 19th century on.

"At bodily death," he said, "the empirical self, with its culture-bound personality and time-bound memories, begins gradually to fade away, our consciousness becoming centered in the moral-spiritual attitudes which constitute the soul; and that soul, or dispositional structure, is then able to be embodied again to engage once more in the creative process."

He mentioned the puzzle of the millions who die in infancy, the unfairness of life's vagaries, the fact that few people "seem fitted for eternal bliss or eternal torment."

It remained for the Cambridge-educated Tibetan scholar, Sogyal Rinpoche, to caution those preoccupied with life after death that "the main point of life and death is how we live now. What you will be is what you do now. The next minute is a reincarnation of this minute."

Laughing heartily at the notion of reducing the teachings of the East to a 40-minute talk, he reminded the audience of Buddha's teaching that the point of life is the understanding of ourselves and that we should try to view life and death as a complete whole.

Surely the most original contribution was from Rupert Sheldrake, the British botanist whose hypothesis of formative causation—the notion that the sheer repetition of phenomena makes them easier to learn, that all experiences are somehow transmitted throughout the world—created a sensation in the scientific establishment a few years ago.

Sheldrake questioned the assumption that memories are stored in the brain. They could, he said, be contained in a sort of force field around the body, with the brain acting like a television receiver that tunes in on them.

The main think, he added, is that these ideas can be tested. Actual physical experiments can tell us, he said, whether, for instance, the common "feeling of being watched" is a real phenomenon. He urged more testing of the apparent resonances that enable pigeons to return to their nests. He suggested that we examine prayer, that ancient and respected belief that one can influence others far distant and even communicate with the dead.

"These things can be tested, it's perfectly feasible," he concluded. "These questions are completely open."

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve the remainder of my time throughout the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business, not to extend beyond 10 a.m.

THE 10TH ANNIVERSARY OF PUBLIC LAW 94-142 AND THE IMPORTANCE OF S. 873

Mr. CHAFEE. Mr. President, in November we will celebrate the 10th anniversary of the Education for All Handicapped Children Act—Public Law 94-142. I am a cosponsor of Senate Concurrent Resolution 71 to commemorate this revolutionary law.

When this act was originally proposed it was subject to great debate and controversy. There was disagreement about many of the basic premises of the proposal. When I refer to the act as revolutionary, I do so with sincerity.

We are watching the first generation of handicapped children leave public schools after 10 years of education in what is known as the "least restrictive setting"—that is, whenever possible, handicapped and nonhandicapped children being educated together, each getting the education they need.

It is time that we reform the Medicaid funding stream to offer the same level of support to promote lifelong integration of handicapped and nonhandicapped children and young adults. We must not allow the gains we have made through Public Law 94-142 to be lost due to a funding mechanism that

allows support services only in the most restrictive settings.

I have offered legislation, S. 873, the Community and Family Living Amendments of 1985, that proposes precisely the sort of reform this system needs. It is the logical followup to Public Law 94-142.

The 10th anniversary of Public Law 94-142 is indeed a time to celebrate our accomplishments, but it is also a time for us to reflect upon the changes that still must be made to ensure a better quality of life and widespread opportunities for the developmentally disabled.

Handicapped children have become accustomed to learning and playing with nonhandicapped children. Nonhandicapped children have grown to accept children with handicaps as friends and classmates. But Mr. President, we are in danger of eroding these achievements.

As handicapped children leave school at age 18 or 21, they are offered few options for remaining in their own communities—with their families and friends.

Although it has been shown that people with severe handicaps can live, learn, work, and play in the community, as they become young adults our system of funding the services they need forces too many people into segregated residential systems.

We have demonstrated in our educational process that severely handicapped people can be supported in the community given a properly supported environment. Public Law 94-142 provides this type of environment to students in the educational process.

My bill offers many of the same types of reforms introduced in the educational field by 94-142. It calls for greater parental involvement in placement decisions and formal due process procedures. My bill reforms Medicaid funding to encourage less restrictive residential settings, to allow handicapped and nonhandicapped children and adults to continue to live their lives together. My bill says that just as segregated schooling is unwarranted, so too are many of our segregated residential settings.

The Community and Family Living Amendments of 1985 offers those with disabilities the chance to receive support services in community settings, which is where so many of our citizens with disabilities live now and want to stay.

So, Mr. President, while I join my colleagues in celebrating our achievements over the past 10 years, I also remind them that there is a great deal left to be done.

RECOGNITION OF SENATOR MURKOWSKI

The PRESIDING OFFICER. The Senator from Alaska is recognized.

THANKS TO VETERANS

Mr. MURKOWSKI. Mr. President, I rise to bring to the attention of my colleagues an excellent and moving article in the November issue of the American Legion magazine. Written by the Legion's National Commander, Dale L. Renaud, it is entitled "A Time to Give Thanks to Our Veterans and Our God."

Commander Renaud, with the compassion so typical of a man of his great service to America, and a pride in his fellow veterans that is also typical of a good leader, has managed to lay out the meaning of citizenship simply, succinctly, and with no apologies for good, old-fashioned patriotic values.

His article reminds us that there are no limits to what we can accomplish when we join together in pursuit of a just and selfless goal. He also reminds us that the future of our democracy rests on our responsibilities to help our children understand and meet the challenges of that future.

Mr. President, I should like to read into the RECORD Commander Renaud's article:

This month, as we observe yet another Veterans Day and another Thanksgiving, it seems that the two are unavoidably intertwined.

We offer our heartfelt thanks to millions of men and women who answered the call to duty, took up arms and rallied to our nation in her time of need. And, on a single day of the year set aside as a national day of thanks for the bounty of our great nation, we break bread together in gratitude that God has blessed America with the spirit, will and means to unify in common endeavor—whether it is for the good of the community or the safety of the nation.

Veterans Day is a public demonstration of tribute of our national defenders who united to preserve freedom and democracy for their generation and for generations of Americans to come. On the battlefield, they banded together for common defense and in common dedication to victory.

When they returned—particularly at the end of this century's second Great War—the unity continued and they swelled the ranks of The American Legion and American Legion Auxiliary and other organizations because they wanted to preserve that union of fellowship and dedication to a common purpose.

They unified for active service to their fellow veterans and their communities. They built upon a heritage that began with our organization's founding, and they were on the leading edge of a movement which swept the country; one in which Legionnaires and their neighbors got back to the work of reshaping their lives and of setting a course for this nation's future.

Veterans Day is more than an appreciative nation thanking American patriots for putting their lives on the line to defend the United States and her allies from tyranny and suppression. It is an observance of what those same veterans did to unify an American spirit of dedication to a secure nation, and to safe, energetic and prosperous communities across the land.

The veterans come from every walk of life and have had an effect on every part of American society, because all veterans have seen what the act of one person can mean to the lives of others.

And, because our nation's history shows that a united effort consistently has made the difference on the battlefield, today it takes unity to meet the challenges that face America's next generations—her youth.

As a rededication to that spirit, and as a tribute to the wartime and peacetime sacrifices of veterans throughout America, this year The American Legion and American Legion Auxiliary have launched a unity campaign which we hope will symbolize in a joint effort the mutual regard communities and veterans hold for each other.

We ask that American Legion posts and their affiliated Auxiliary united accomplish together a community service project in which each community's youngsters benefit. Those posts and units which successfully complete the project, and achieve a 100-percent 1986 membership by April 15, 1986, will be eligible to compete on a national level for a $1,000 first-place prize in each of the five membership categories.

The award will be given to the winning post-unit combination for donation to a local, community-based children and youth program of its choice.

We can't think of a better way to emphasize to our communities and to our nation that the volunteer spirit of America's veterans remains as strong and active as at any time in our history. I urge you and your affiliated Auxiliary units to join National President Josie Melgard and me in this key project.

In the end, not only will America's communities and their children and youth benefit, but also The American Legion and Auxiliary. The prospect of achieving a 100-percent 1986 membership goal so early in the year leaves open a myriad of possibilities for accomplishment during the remainder of the year.

It creates horizons that truly will recall for all Americans the sacrifice of each generation of veterans and will serve as a rallying point for other veterans to join us in a continuing crusade to further the goals and aspirations of a prosperous nation.

Let's use this coming Veterans Day as a focal point for a fitting tribute to past loyalty, devotion and service, and as a statement of our purpose for the future.

Just as we will give thanks this month for the bounty, freedom and justice we enjoy in America, we must also give thanks for veterans able and willing to work for the peace, security and betterment of our nation.

Mr. President, I know everyone will agree that this statement of one man's commitment to challenge his organization to reach out to the children of America not only reflects exceedingly well on Dale Renaud, our National Commander, but speaks eloquently, also, of the American Legion's continuing commitment—long after war—to serve the best interests of this Nation.

Of course, the Legion does not stand alone in its efforts to assure a bright future for America. Legionnaires, Veterans of Foreign Wars, Disabled American Veterans, AMVETS, Paralyzed Veterans of America, Vietnam Veterans of America, members of the Military Order of the Purple Heart, and all other veterans' organizations and America's 28 million veterans stand

united in this goal. Commander Renaud speaks for all of them, in principle and in spirit, and I again commend him for this timely and eloquent statement.

EXPORT OF ALASKA COOK INLET OIL

Mr. MURKOWSKI. Mr. President, with the approval and strong support of the White House, the U.S. Commerce Department will soon issue a permit to allow the export of Alaska Cook Inlet oil to foreign nations.

This is the breakthrough we have long sought in our effort to begin exporting Alaska oil abroad.

And even though the ruling only pertains to the 60,000-barrel-a-day Cook Inlet production, we should not underestimate the significance of this action.

This small beginning can be a catalyst to overcome the previously unpenetrable barriers to the eventual export of our Alaska store house of resources.

Revenues from exporting Cook Inlet oil can be used by the producers to explore and develop new oil fields. They will have an added incentive to invest in new exploration because new markets in the Pacific rim are now available.

Thus far, the State's royalty oil—about 6,000 barrels per day—is the only Cook Inlet oil available for sales overseas. However, the other owners of Cook Inlet oil will now have the same option assuming willing buyers are available.

So far our office has been approached by South Korean, Taiwanese, and Japanese interests about the possible purchase of Cook Inlet oil.

The Alaska congressional delegation has worked closely together in convincing the administration to lift the ban on Cook Inlet oil, which is both in our national interest and in the interest of Alaska. Now it is our Governor's turn to take the issue and negotiate proposed sales agreements with our Pacific rim neighbors.

When the White House made the announcement, spokesman Larry Speakes said that the President, in making his decision, sought nothing in exchange. However, he noted:

We have made it clear to our friends in Asia that we would like to see them move more rapidly in opening their markets to U.S. products.

I believe the President's decision is consistent with the administration's policy of removing barriers to trade and encouraging other nations to do likewise.

President Reagan made a courageous decision because it signifies his willingness to do what's best for the Nation and stand up to those that have fought Alaska on the export issue for the past several years.

His support will go a long way toward countering the national hysteria and misinformation campaigns that have surrounded the Alaska oil export issue.

I believe all parties have worked in concert to achieve this milestone, which is a great victory for all Alaskans. It leaves our State poised to move into its challenging role as a resource supplier to the Pacific rim.

Mr. President, I would like to submit for the RECORD two news items.

The first is a New York Times editorial of October 30 that supports the export of Alaska oil.

The second is an Associated Press story on a study done by the Institute for International Economics which concludes that—

In addition to the $5 billion to $8 billion reduction in the U.S. deficit that would come from elimination of Japanese barriers, another $2 billion to $5 billion could be pared if the U.S. prohibition on exporting Alaska oil to Japan were lifted.

Mr. President, I could not agree more with that analysis.

I ask unanimous consent that the articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 30, 1985]

OIL LEAK

President Reagan's decision to authorize limited exports of Alaskan oil opens a small but welcome crack in a self-defeating barrier. Export control legislation empowers him to release oil from the Cook Inlet pool, near Anchorage. That isn't much—60,000 barrels a day, at most—when compared with the 1.6 million barrels pumped from Alaska's North Slope each day. Exports from the North Slope, however, require Congressional as well as executive approval.

Opponents of exports argue that America should keep all its oil, to lessen dependence on imports. American companies also have a large financial stake in shipping and refining Alaskan oil in the United States. At this point, the only assured exports will be the 6,000 barrels a day allocated to the state government.

Actually, exporting Alaskan oil would be good public policy. It would make America's Pacific allies less dependent on Middle East oil. America's enormous trade deficit with Japan would be reduced. And Eastern consumers would benefit from the substitution of cheaper oil from the nearby Caribbean.

The President has properly found that exports from Cook Inlet are in the national interest. Having taken that step, let him take the next—pushing Congress to let North Slope oil be exported, too.

STUDY BY INSTITUTE FOR INTERNATIONAL ECONOMICS

WASHINGTON (AP).—Even if Japan were to remove all trade barriers, its $50 billion trading surplus with the United States would be pared by only $5 billion to $8 billion, say private analysts.

The study by C. Fred Bergsten and William R. Cline of the Institute for International Economics concludes that the U.S. trade deficit with Japan will never sink below $20 billion to $25 billion a year, regardless of whatever steps either government takes to correct the imbalance.

That is partly because Japan's economy requires that it run surpluses with countries where it sells manufactured goods to offset its huge deficits with oil-producing nations, the authors said.

The study by the institute, a private, nonprofit research organization, recommended that the two governments concentrate on lowering the value of the dollar against the yen.

Bergsten and Cline said the exchange rate gap between the two currencies is the major culprit behind the U.S. trade deficit with Japan, which totaled $31.6 billion in the first eight months of 1985. That accounted for more than one-third the total U.S. trade deficit of $91.1 billion in that period.

The study said "protectionist" bills being considered by Congress are misdirected and stem from a mistaken impression that Japanese trade barriers and unfair practices are a major factor in the trade imbalance.

Actually, Japan is second only to Canada as the biggest world market for U.S. goods, the report said.

Accounts of difficulties faced by U.S. companies in selling goods in Japan are exaggerated, Cline told a news conference. "They poison the atmosphere and discourage U.S. businessmen from even trying to penetrate the Japanese market," he said.

Actually, Japanese and U.S. trade barriers are about the same, he said.

While direct and indirect Japenese trade barriers restrict U.S. exports by $5 billion to $8 billion annually, U.S. restrictions limit Japanese sales in the United States by $4 billion to $5 billion.

This is "hardly a difference large enough to justify retaliatory protection against Japan on grounds of reciprocity," the report said.

It urged both governments to set a goal of further strengthening the yen against the dollar from its current ratio of 214:1 to 190:1. That would chop $17 billion a year off the U.S. trade deficit with Japan, the report said.

To do this, the United States must act far more decisively in trimming its budget deficits and in encouraging a higher rate of savings. Japan, in turn, should create more investment opportunities at home and perhaps act to reduce its high rate of savings.

Both countries should act to eliminate trade barriers, the report said. In addition to the $5 billion to $8 billion reduction in the U.S. deficit that would come from elimination of Japanese barriers, another $2 billion to $5 billion could be pared if the U.S. prohibition on exporting Alaska oil to Japan were lifted, the authors said.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

STOP MISSILE FLIGHT TESTING AND FORGET STAR WARS

Mr. PROXMIRE. Mr. President. recently this Senator contended on this floor that the surest way Congress could begin to bring the Federal budget deficits under control is to stop the arms race. In the course of that speech I pointed out that if Congress continues to support the President's

SDI or star wars antimissile defense project, the cost of that program alone would easily exceed a trillion dollars. And even the trillion dollars would simply be a beginning as the Soviets rushed to develop their offensive nuclear missiles to penetrate the star wars defense, and their own star wars defense to stop U.S. offensive missiles. Meanwhile the United States would push far beyond the trillion-dollar initial star wars cost to keep pace with the surging Soviet offensive nuclear missile technology. What would that mean? It means this country would also pour huge sums into refining and improving its own offensive missiles to overcome the Soviet's star wars. There would be two results from all this:

First, both superpowers would suffer enormous increasing doubt about the capability of their national security system to insure their survival.

Second, both superpowers would suffer huge increases in spending. In the United States either the present $200 billion deficits would be dwarfed by devastating mega-deficits or we would suffer a huge increase in taxes.

What can the defenders of star wars answer to all this? No one—except possibly President Reagan—really believes that the SDI would provide a safe and certain protection, an impenetrable dome through which no hostile nuclear weapon could find its way. but some informed SDI advocates argue that this anti-missile defense would create a sufficient doubt in the Soviet Union about the capability of their vast ICBM arsenal and that the doubt, the uncertainty, would help prevent the Soviets from contemplating an attack. Would it? Maybe. We do not know for sure. We do know for sure that the cost of SDI will be gargantuan.

Suppose there were a system of achieving an even greater degree of uncertainty by an attacker—in the reliability of his nuclear offense—and suppose we could do this without spending any significant amount of money at all. Is that possible? It is indeed. In a recent letter to the New York Times, Herbert Lin, a researcher at MIT's Defense and Arms Control Program, contends that a comprehensive ban on the flight testing of all ballistic missles "would invariably lead to doubts about their reliability. Since a first strike requires missiles of certifiably high reliability, these doubts would induce Soviet caution regarding in a decision to launch a first strike in much the same way that missile defense would." Mr. Lin points out that it will take a number of years for such a ban on flight testing to affect the confidence of the Soviets in the reliability of their ICBM's. How long? Maybe 10 years. But, Mr. President, how long will it take this country to finish research on star wars, and then test it, and then produce the hardware and then deploy the hardware? No realistic time table would call for the complete deployment of SDI before the turn of the century. And it could be well into the next century before SDI were fully deployed. How high would the American national debt be by the year 2000 if we proceed with star wars? How many trillion? How high would the interest the Government would have to pay on that debt be? Yes, indeed we could avoid the fiscal nightmare by a huge increase in Federal taxes. What heros in this body are about to choose that option? I have yet to hear any champion of star wars including President Reagan say he would pay for it with a big tax increase. I challenge any Member of Congress to make such a public commitment. But we could achieve the same objective—create the same doubt in the minds of the Soviets about the reliability of their nuclear offense by simply banning missile flight tests. And here, Mr. President, is a test that we know we could verify effectively through satellites and other means already deployed.

Mr. Lin also rightly contends that a flight test ban has another clear advantage over the SDI. To put it mildly many experts seriously question the capacity of SDI to provide any significant protection of our population. On the other hand almost everyone agrees that the inability to test ballistic missile flight over time would certainly erode Soviet confidence in the reliability of ICBM's. No sane Soviet leadership would launch an attack with a missile that had had no flight testing for 10 or 15 years or more.

Mr. President, when we consider our survival in this nuclear world, any discussion of dollar cost seems ridiculous. Obviously any cost is worthwhile if it saves our Nation from overwhelming destruciton. This appears to be the reason that so little concern has been expressed about the overwhelming cost of SDI. On the other hand SDI is a system that the independent scientific community generally believes will not work. Now we know there is a way to achieve the same end SDI at its best can achieve without spending the enormous sums SDI would cost. And it is beautifully simple. That is an agreement to end the flight testing of nuclear missiles. Why not?

Mr. President, I ask unanimous consent that the letter to the New York Times to which I have referred by Herbert Lin be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

A MISSILE TEST BAN CAN DO WHAT "STAR WARS" CAN DO

To the Editor:

The Pentagon's response to the Congressional Office of Technology Assessment report on ballistic missile defense that "effective defenses would greatly increase an attacker's uncertainties as to whether his weapons would penetrate the defenses" (news story, Sept. 26) is a hopeful sign for the proponents of arms control. Specifically, the statement suggests that the desired goal is increased uncertainty. The Strategic Defense Initiative (S.D.I.) is only one of several methods to that goal.

Another method would be a comprehensive ban on the flight testing of all ballistic missiles. Over time, the inability to test missiles would invariably lead to doubts about their reliability. Since a first strike requires missiles of certifiably high reliability, these doubts would induce Soviet caution regarding a decision to launch a first strike in much the same way that missile defenses would.

It would take time for a ban on flight testing to affect significantly Soviet confidence in the reliability of its missiles. Most military planners would not want to rely on a weapon operationally untested for even a few years. However, if it took as long as 10 years, it would still achieve the desired result before operational weapons resulting from the S.D.I. could be deployed.

A flight-test ban has other advantages over the S.D.I. For example, the technical risk is much lower. While argument exists over the technology feasibility of ballistic missile defenses intended to protect populations, virtually all analysts agree that the lack of flight testing would over time erode confidence in the performance of these missiles. Moreover, the cost of implementing a flight-test ban is very small compared with that of the S.D.I. Verification of such a ban would be possible today, through satellites and other means already deployed.

Of course, a flight-test ban would also affect American confidence in the performance of its weapons. But no less an authority than President Reagan has suggested that sharing defensive technology with the Soviets would be a good thing; a mutual ban on flight testing achieves the very same result.

More importantly, it would have little effect on our capabilities for retaliation, since only a fraction of our nuclear arsenal can cause unacceptable damage to the Soviet Union. Thus, Soviet leaders, having no assurance of our inability to carry out a retaliatory strike, would not know whether they could act with impunity.

A ban on missile flight testing would be a way to achieve the stated goal of the S.D.I. at much lower cost and technical risk. It would build upon past arms control achievements and contribute to improved Soviet-American relations.

In light of Soviet desires to limit sharply the S.D.I. program and United States desires to increase Soviet uncertainty, a mutual ban on flight testing in exchange for sharp limits on ballistic missile defense research on both sides should be a prime topic for discussion at the upcoming summit.—Herbert Lin, Cambridge, Mass., Sept. 26, 1985.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day today is that the way to reduce the deficit is to cut taxes. Mr. President, that is such a crazy, obviously contradictory statement that I will repeat it. The myth of the day is that the way to reduce the deficit is to cut—that's right cut—taxes. Do you

say, wait a minute, PROXMIRE. No idiot will believe that you can reduce the deficit by cutting taxes. No one believes that. What kind of a myth are you talking about? Well just listen. The New York Times reported as its "Quotation of the Day" the following:

Let me suggest that over the long haul, the Federal Government simply can't raise revenue any faster than by cutting tax rates and then cutting them again. So it doesn't make much sense to blame the deficit on tax cuts, and even less to ask for economy busting tax hikes as a cure. The deficit is quite clearly, caused by overspending.

Who made that statement? Was it some comedian making a parody of supply side economics? No, Mr. President, that statement was made by the President of the United States, Ronald Reagan. He made the statement on Tuesday in endorsing the Gramm-Rudman 5-year balanced budget proposal.

Now this Senator voted for Gramm-Rudman. Heavens knows it is flawed. But it does move this irresponsible Federal Government down the road toward fiscal responsibility and a more reasonable, if not a balanced budget. It will be a long, painful path, not just a 5-year path. It will be a journey that we must travel throughout this century. And, we must, along the way, recognize that we are going to have to cut spending until it hurts and hurts badly. Then we will have to cut spending some more. But however successful we may be in cutting spending it will not be enough. We must also increase taxes. Why? Because we are going to need more revenue. And the President couldn't be more wrong. We cannot increase revenues over the long haul—as he puts it—by cutting tax rates. Oh, would that we could. What a marvelous world this would be. How gloriously easy it would be to be a U.S. Senator in a world in which all you had to do to bring the deficit under control was to raise revenues by cutting taxes. What a super way to win elections. Think of it. I can see the slogan now—"Vote for Smith for the Senate. Smith promises to balance the budget. Smith will end Federal deficits. How will Smith do it? Best of all Smith will do it by cutting your taxes."

President Reagan's insistence that we can reduce the deficit by reducing tax rates is a myth that puts Aesop, the fabulous fablist to shame. Aesop had a lot in common with the President. Aesop's Androcles and the Lion is a delightfully impossible fantasy, almost as delightful but not as impossible as President Reagan and tax cuts. In Aesop's fable, Androcles pulls a thorn out of the paw of a wild and hungry Lion. Years later Androcles who was also probably known among his feline pals as Andy, was tossed into an arena to be devoured by a starving lion. Andy lucked out when the lion recognized Andy as the same Androcles who pulled the thorn out of his pedal extremity. At first Andy looked like just what the ravenous lion had in mind for dinner. But as Aesop tells it the lion recognized Androcles as his old buddy, Andy, the same sweet fellow who had so graciously relieved him of that thorn. So the lion sidles up to Andy, nuzzles him, licks his face and murmurs a "Thanks old buddy."

Mr. President, it would be easier to believe that Aesop myth about Androcles and the lion than it would be to believe today's remarkable fable spinner in the White House, President Reagan, when he spins out that old Teflon magic about how we can get rid of the $200 billion deficit "by cutting tax rates and then cutting them again."

Worst of all the notion that we can solve the massive $200 billion deficit by cutting tax rates is a cruel deception. When it is believed by the President of the United States, it prevents the kind of tough, unpopular action we must take.

Mr. President, this is a myth that we should squelch and squelch right now, for good. There is no easy, painless way to reduce the deficit. We must cut popular spending programs. We must raise taxes. In the process we probably will lose elections. But there isn't any other way.

CAMBODIA: THE RETIREMENT OF POL POT

Mr. PROXMIRE. Mr. President, in September Khmer Rouge guerrillas announced the retirement of Pol Pot, the ruler of Cambodia from 1975 until the Vietnamese invasion of 1979. Pol Pot will remain as a "senior military adviser."

The official reason for his retirement was that he had reached the retirement age of 60. Unfortunately, the announcement may be a ruse. Pol Pot symbolically stepped down in 1979 in what some people suspect may be a precedent for the latest change.

Prince Norodon Sihanouk describes the retirement as a "tactical move designed to spare the Cambodian resistance some blushes at a United Nations debate on Cambodia later this month."

Mr. President, Pol Pot managed what no other leader anywhere has accomplished. The Wall Street Journal reports that:

He emptied the cities, destroyed the currency, pulverized places of worship, drove hospital patients into the fields, ended the use of electricity, wiped out vestiges of education, created a famine, oversaw a resurgence of malaria, and killed 1 to 3 million Cambodians.

Pol Pot's savagery offends the conscience. No mind can comprehend the magnitude of his horror. No pen can chronicle the pain and suffering inflicted upon millions of Cambodians by Pol Pot and his henchmen. Yet, Pol Pot retires a free man. How can this be?

Mr. President, the history of mankind is marred by tragic accounts of man's wanton disregard for his fellow man's human rights. On December 9, 1948, the international community pledged to outlaw acts of genocide and punish their perpetrators by ratifying the Genocide Treaty; 37 years later some 96 nations have signed the treaty.

The U.S. Senate must ratify the Genocide Treaty making clear to the world that the most fundamental of all human rights is the right to life.

Our ratification can have a profound influence on people all over the world by demonstrating that the United States is adamantly opposed to the heinous crime of genocide.

Mr. President, by ratifying the Genocide Treaty we can serve notice to the Pol Pots of the world that we shall hold them accountable for their actions.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana is recognized.

THE FARM BILL

Mr. MELCHER. Mr. President, a few moments ago the distinguished majority leader referred to an attempt to bring up the farm bill in July. It would have been a neat time to bring up the farm bill—I would agree with the majority leader—providing we had a farm bill on the calendar.

Of course, the Agriculture Committee simply did not have a farm bill completed. In July we were still meeting trying to go through the various titles to this 20- to 22-title bill and we were having a difficult time getting quorums at the meetings, that is, just a working quorum of six out of 17 members.

The usual procedure was day after day that Senator ZORINSKY, myself, and the distinguished chairman, Senator HELMS, would be at the hearing room over in the Russell Building ready to do business, and we would have to wait until 10:30 or 10:45 a.m., or a little bit later to get a working quorum so we could start marking up. That went on day after day.

It is fair to say that the preponderance of the attendance to make that working quorum of six was provided invariably by the Democratic side of the committee. It is an unfortunate circumstance that the other members on the Republican side were busy doing other things but that was something that we as Democrats could not correct.

We continually asked members from our side to be present as early as possible in order to get the working quorum.

The distinguished majority leader refers to amending something on the calendar with a bill that had been half worked on and was not by any means ready.

I know the charges made by the majority leader and the distinguished chairman of the committee that somehow the Democrats were holding up the bill in committee. We certainly had no intention of holding up the bill. We did have intentions of voting on key parts of that bill and insisted that we be allowed to do that in the committee.

It boiled down to one of the key parts that became more significant as the weeks rolled by, that the 4-year target price freeze would be a significant part of the bill. We finally succeeded in the committee on putting that in the bill and held on to it.

I might say that that is just one part of the bill. It has become a significant part of the bill, but there are many parts of the bill that are very important.

We are faced now with having the bill reported out of the committee that is over the budget resolution. That should be corrected.

We are directly in the position right now of attempting to get up an amendment that I and others have prepared that would reduce the cost of the bill over the coming year by $7.6 billion.

Mr. President, that is necessary if we are going to live within our budget resolution and I earnestly seek recognition to offer such an amendment. The majority leader has stated that he will probably have a package of amendments to reduce the cost and he always has the advantage of gaining recognition, and we will be anxious to see that when he offers it.

What we are attempting to do is to avoid a piecemeal adjustment of the bill to get within the budget resolution $1 billion here, $2 billion there, by doing this or that to the bill itself.

We would hope to hold the major scope of the bill in one piece. There are various programs involved and we would hope to hold all of these programs together.

The effort to get under the budget resolution to cut the bill so it will be under the budget resolution is a very sincere effort on our part. Seeking recognition to offer the amendment at this time is key before we start deciding at some other point where we would take out of the bill doing great damage perhaps to one program or two or three programs and making it more difficult for agriculture producers to live under the bill for the next 4 years.

The improvement that we can make for prices of commodities for agricultural producers comes only in one section of the bill and that deals with are we going to improve export of our products. It is very discouraging to me to learn that the export of agricultural commodities declined a total of 12 million metric tons of wheat, for example; that is a decline in exports of 12 million metric tons of wheat between the years of 1983 and the end of the marketing year for wheat in 1985. The end of the marketing year for wheat is in June.

So during that period of time we declined over 12 million metric tons. We have declined about 30 percent in exports of wheat during that period.

In looking at whether that trend is continuing, we find that so far in the marketing year, just in this first 5 months of this marketing year for wheat, the decline is 9 million metric tons below the point that we were at just a year ago. And I remind you, Mr. President, we were down a year ago. In other words, in a bad year, the last marketing year, reflecting the overall 12-million-metric-ton decline from 1983, at this point last year, we had exported 18, almost 19 million metric tons of wheat from the United States.

This year, at this point in time comparable to that 19 million metric tons exported this time last year, we have only exported 9 million metric tons of wheat. In other words, so far this year, the drop has been disastrous. Last year was a bad year, this year is even more disastrous.

Of the other commodities that we export large quantities from the agricultural sector, let me point out that, for corn, the difference from where we were last year at this time compared to this very point this year is down almost 100 million metric tons. That decline has not been as precipitous, but nevertheless it is a decline.

For cotton, the difference for exports so far in this marketing year for cotton as compared to last year is a drop of one-half; 50 percent has been exported in the same period of time this year as compared to last year.

For rice, there is not good news there, either. We have exported one-half the amount as we did last year.

Now this is a major problem that the country faces. It comes to roost right back at the farms that produce these commodities. It is a very serious situation. We would hope to correct some of that decline by amendments that are in the bill. And on several major points, there is no argument between the majority and the minority.

But in order to get price improvements for these producers, we are going to have to have improvement in exports. In the meantime, what are these producers supposed to do? We want them to survive. It is in the national interest that the basic commodity producers in agriculture in this country are able to survive. The target price, while we may think it is just symbolic, is very important for the survival of as many as possible of those producers. It is a question of cash-flow; a question of their creditors believing that there will be cash-flow. In order to look at cash-flow, you are going to have to peg it to something. We peg it to the target prices. That is why the question of whether or not the target prices remain equal to what they are right now for the coming 4 years is extremely important.

I hope that as we proceed through this bill that we will find that we can offer this amendment to reduce the costs of various segments of the bill so that we can maintain the basic structure of agriculture in the basic commodities and attempt to work our way out. Part of that attempt will be through increasing American agricultural exports, particularly from these basic commodities.

Mr. President, I do have a description of the amendment I am attempting to offer and I ask unanimous consent at this point that that be printed in the RECORD.

There being objection, the description was ordered to be printed in the RECORD, as follows:

DESCRIPTION OF MELCHER AMENDMENT

This amendment accomplishes a goal that many Senators have sought to achieve. The amendment reduces the budgetary cost of S. 1714 by some $7.6 billion during fiscal years 1986 through 1988, bringing the cost of the bill into line with the outlays for agricultural programs contemplated under S. Con. Res. 32. The amendment is fiscally responsible, and I urge my colleagues to support it.

The amendment reduces budget outlays by making a number of modifications to S. 1714.

First, the amendment modifies the required amount of land that must be placed in the conservation reserve during crop years 1986 through 1990. Under the amendment, eligible cropland will be added to the conservation reserve at a less rapid rate than required under S. 1714—essentially, the amendment provides for fewer acres to be placed into the reserve in the first few years. However, the total acres of eligible erosion-prone land that will be placed in the conservation reserve under the amendment remains not less than 25, nor more than 30 million acres.

The amendment modifies the terms of payment of obligations incurred by the Secretary of Agriculture under a contract for placing land into the conservation reserve. Under the amendment, the annual rental payment obligation shall be paid as soon as practicable after October 1 of each calendar year. However, the Secretary has the discretion to make such payments at any time prior to that date during the year in which the obligation is incurred.

During the first year in which a contract is in effect, the annual rental payment must be made in cash. For any subsequent year under a contract, the Secretary will make rental payments in in-kind commodities in such amounts as are agreed on and specified in the contract. If such commodities are not available, the rental payment will be made in cash.

The modifications to the conservation reserve program are estimated to reduce the budgetary cost of S. 1714 by $2.3 billion.

The amendment also reinstates the Producer Owned Reserve Program for wheat and feed grains. Under S. 1714, provisions that specifically authorize the Producer Owned Reserve were repealed. The repeal of the grain reserve would place additional grain onto the market and depress prices. As a result, under S. 1714 as reported, an additional cost to the government of some $230 million would occur. Under the amendment, the reserve would remain as a viable program that provides for long term storage of surplus grains. And the bill will be $230 million less costly.

The amendment also strikes a provision of the bill that would make eligible for payments certain acreage not planted to the relevant corp. Under the bill, any portion of an eligible crop acreage not planted to the eligible crop of wheat or feed grains that is devoted to conserving uses or nonprogram crops is considered as part of the individual program acreage, and producers would receive payments for such acreage. Under the amendment, producers are eligible for payments for crop acreage planted for harvest—as is the case in existing law. This provision in the amendment is estimated to reduce the cost of S. 1714 by about $800 million.

The amendment modifies the basis for computation of deficiency payments for wheat, feed grains, and rice. Under existing law, the average price of these crops during the first five months of the marketing year determine the basis for deficiency payments. Under the amendment, the basis for the calculation is the season average price for the entire marketing year for these crops. Generally, the season average price will exceed the average price during the first five months of the marketing year and the exposure to the Commodity Credit Corporation for deficiency payments is reduced. This provision of the amendment reduces the cost of deficiency payments projected to be made under the bill by about $1 billion.

The amendment also increases, by two perentage points, the maximum amount of acreage reduction that the Secretary can require under the wheat and feed grains programs. Under S. 1714, as reported, the maximum acreage reduction that could be required by the Secretary is 20 percent under the wheat program and 15 percent under the feed grains programs. The amendment allows the Secretary to require a 22 percent acreage reduction under the wheat program and 17 percent under the feed grains programs. The amendment also requires a 10 percent paid land diversion for the 1986 through 1989 crops of wheat and feed grains. The combination of these two modifications will achieve savings of about $2 billion during fiscal years 1986, 1987, and 1988.

The amendment also establishes new minimum amounts of direct export credits under the intermediate export credit program authorized under S. 1714. The effect of this modification is to redirect funding from direct export credit to export credit guarantees. The modification under the amendment will reduce outlays by some $500 million.

S. 1714 authorized certain amounts of loans and loan guarantees for the Agricultural Credit Insurance Fund. Outlays under ACIF are for real estate and operating loans. Under S. 1714, the Secretary can transfer amounts authorized for loan guarantees to amounts authorized for direct insured loans. The Secretary may not transfer more than 25 percent of the amounts authorized for guarantees. Under the amendment, the Secretary may not transfer more than 20 percent of the amounts authorized for guaranteed loans to amounts authorized for insured loans.

The amendment also provides for additional commodities to be used for targeted export assistance, and specifies that such commodities will be used for an additional purpose: to allow export assistance to be used to offset losses in the volume of agricultural exports due to adverse economic conditions in importing countries. Under S. 1714 as reported, not less than $325 million in each of fiscal years 1986, 1987, and 1988, or an equivalent value of commodities owned by the Commodity Credit Corporation, must be provided for targeted export assistance. The funds or commodities are to be used for export assistance only in connection with agricultural commodities or the products of such commodities for which exports have been adversely affected by price subsidies, credit subsidies, or unfair trading practices used by other nations that compete with the United States in world markets.

Under the amendment, this export assistance is broaded and expanded. The amendment provides that, in addition to the funds or commodities made available under S. 1714, as reported, the Secretary of Agriculture shall use at least:

100 million bushels of wheat;
100 million bushels of corn;
10 million hundredweight of rice; and
75 thousand bales of cotton.

The additional commodities made available are to be used both for the original purposes specified in S. 1714—to counter subsidies and unfair trading practices used by competitor nations—and to regain lost market sales that can be attributed to adverse economic conditions in importing nations.

I consider this provision of the amendment to be a significant improvement to S. 1714, as reported. Many countries buy much less of U.S.-produced agricultural products than were purchased only a few years ago. We must reverse this trend.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MELCHER. Mr. President, what is the pending business?

The PRESIDING OFFICER. We are in morning business.

Mr. MELCHER. How much time is left in morning business?

The PRESIDING OFFICER. Morning business will expire in 5 minutes, at 10 a.m.

A REMARKABLE FIGHT TO SAVE SHIPPING IN THE GREAT LAKES

Mr. PROXMIRE. Mr. President, last night we made a decision on a measure that very, very seriously affected the State of Wisconsin. It was a matter that, without last night's action, might have closed our ports in Green Bay and the ports in Milwaukee, Superior, and Kenosha would have been in very great jeopardy and we would have lost many, many jobs.

I believe the people of our State do not realize it as yet, but they owe a great debt to Senator ALAN DIXON and Senator RUDY BOSCHWITZ, who carried on a remarkable fight to save shipping in the Great Lakes.

Let me explain that when the Senate decided to require that the portion of the U.S. Government-provided cargo carried by American-flag vessels should be increased from 50 percent to 75 percent, it sharply increased the costs of transporting that cargo. Of course, it also enhanced the incentive for building and improving our American merchant marine, but, as I say, it struck what appeared to be at that time a fatal blow to shipping on the Great Lakes.

Our ports depend very heavily on cargo provided by the Federal Government. Most of the cargo, the overwhelming proportion of it, is cargo that the Federal Government provides and, therefore, the cargo preference decision had a profound effect. The reason for that is because American-flag vessels simply do not come into the Great Lakes. With one except, the only vessels that come into the Great Lakes are foreign vessels.

The Great Lakes is a most efficient, low-cost means of transportation. It also, of course, is immensely important to the States of Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

It appeared that we had absolutely no chance of winning on this issue. Senator DIXON stood up time and time again offering amendments, as we recall, that were defeated overwhelmingly. Finally, through the very, very helpful intervention of Senator TED STEVENS, of Alaska, to whom I shall always be greateful for this, and Senator DAN INOUYE of Hawaii, who was another real hero as far as we are concerned, this proposal that the Great Lakes ports to be spared, to some extent, was drafted, was cleared with the merchant marine interests, with the labor unions, with management, and with enough Senators on the floor so that we squeezed through.

What the amendment provided was not any kind of bonanza for the Great Lakes. We had a bad year in 1984, when the Great Lakes got their lowest overall share in many years of U.S. Government cargo. So we took that year, 1984, and we said, "Over the next 4 years the amount the Great Lakes gets will not fall below that level." And the decision, by a reasonably close vote of the Senate, to go along with that compromise is immensely important to my State and to the other Great Lakes States. In the long run, because it keeps this most efficient seacoast and shipping system alive, it will mean lower costs to the American people.

But I wish to pay tribute to ALAN DIXON, RUDY BOSCHWITZ, DANNY INOUYE, and TED STEVENS, who, in my view, did such a great job.

I had given up hope. I thought we were losing, for sure. They really did a great job for the State of Wisconsin

and for the other Great Lakes States. I wish to thank them.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

THE FARM BILL

Mr. HATFIELD. Mr. President, during the past year we have heard a great deal about the plight of the American farmer. The stories of farm foreclosures are all too common and I am afraid they are going to continue into the foreseeable future. The hardship of many farmers was crystallized for me when I read of the reaction of the first grand prize winner in the newly created Oregon lottery.

Most of the Members of this body are aware of my distaste for legalized gambling in any form, and I will not burden you with a recitation of the reasons for my opposition today. Suffice it to say that I voted against the creation of the Oregon lottery when it appeared on the ballot last November. Instead of detailing my beliefs on the merits of the lottery system, let me acquaint you with the first winner of that lottery as a way of illustrating the desperate state many farmers find themselves in today.

Dick Anderson has been a farmer since he was in high school, and now, 25 years later, he raises field crops near Canby, OR. In June, he purchased his lottery ticket at the local 7-Eleven and was later notified that he was 1 of 10 Oregonians selected to spin the jackpot wheel for a chance to win $7.4 million. On July 6, at a television studio in Salem, Anderson came up a winner.

Like many lottery winners in this Nation, Dick Anderson vows that his new found fortune will not change his life. He now reaffirms what he said a week prior to winning the jackpot. When asked what he is going to do with the $298,406.20 he will receive every July for the next 20 years, he replies with a smile, "I'll probably just keep farming 'til its gone." Such is the quandary many American farmers find themselves in: they love working the land but are seeing their labors go unrewarded in the form of financial return on their investment.

Mr. President, as we work on the 1985 farm bill, I urge my colleagues to keep in mind the circumstances thousands of farmers find themselves in today. I hope that we have the wisdom to write legislation which will enable the family farmer, who may not be lucky enought to win the State lottery or the Irish sweepstakes, to continue a way of life which has contributed so much toward making the United States a great nation.

A HORRIFYING STORY OF CHILD ABUSE

Mr. HATFIELD. Mr. President, as elected officials we receive hundreds of letters each day and at times it is easy to become hardened emotionally to the concerns of each communication. Just about that time, however, I find that I receive a letter that so moves me that I am jolted from any emotional callousness which may have developed. Such was the case with a letter I received the other day from a dedicated Oregon schoolteacher. In this letter she unfolded a horrifying story of a first grade student who had been subjected to gross sexual abuse. So severe was the abuse that the girl continues to suffer severe physical and emotional disorders. To compound the tragedy of the story, those responsible for these heinous acts of abuse will not be brought to justice because of the complex legal questions which surround the prosecution of child abusers.

I commend the commitment and dedication of this schoolteacher. Her frustration is certainly shared by all of us involved in attempting to address the disturbing and difficult issue of child abuse. Although laws to protect children from abuse and to facilitate the prosecution of child abusers fall primarily under the jurisdiction of the States. Congress has the responsibility to help facilitate the development of State programs and the dissemination of information related to this critical problem.

Mr. President, I ask unanimous consent that the text of the letter be printed in the RECORD. It provides a powerful reminder to us of the suffering and ill-treatment which thousands of helpless children are subjected to daily. Because the prosecution of the offender did not result in a conviction, I have redacted from the letter references which could indentify the accused offender.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 12, 1985.

Senator MARK O. HATFIELD,
U.S. Senate,
Washington, DC.

DEAR SENATOR HATFIELD: I am a special education teacher with the Portland Public School district, and currently teach a classroom for seriously learning disabled or educable mentally retarded children aged six to eight. As a teacher I am responsible for observing and notifying the authorities should I suspect child abuse. It is this responsibility that has led me to feel extreme concern, frustration, and has led me to write this letter (my first such letter to any Congressional office holder.) I respect your integrity, humanity, and ability to express your concerns and now ask you to consider the following situation.

In September, 1984 a student entered my classroom as a first grader. She had been identified as severely language impaired, was a significant behavior problem within the classroom environment, demonstrated extreme delays in acquisition of basic readiness skills, and was obviously a very upset little girl. For purposes of this letter I will call her Mary, although this is not her true name.

By the end of two weeks in my classroom I began to suspect that Mary was under some emotional stress from the home environment, although at that time I could not identify the source of the problem. She began to tell anyone who would listen that "I love my daddy and he loves me. He kisses me and I kiss him." Those statements taken at face value would be acceptable, but within the context of this child's behavior, and other statements she was making I began to suspect some form of sexual abuse. As the months progressed I continued to be on the alert for signs of abuse, and then in January, 1985, Mary told me that an elderly neighbor man was "doing bad touching on me." She went on to describe events in which this 70 year old man was using Mary for sexual touching when her parents were out of the home. I reported this to the school principal and together we contacted the police. The parents were contacted, denied all knowledge, defended the elderly man's innocence, and later took the same man into their home as a resident. Mary continued to live in the home, and was quite upset when the older man moved in. I have been told that the man since died.

In March, 1985, Mary began to lose control of her bowels, having frequent and embarrassing "accidents" in the classroom. This had not been a problem before March. As she often was sent to school without underclothes this was even more of a problem. When I contacted her parents regarding the need to come and get her so she could go home and clean up her mother became irate and explained that she knew we just didn't want to teach Mary, thus we let these things happen. I hope you can appreciate the difficult position this placed me in. I cared very much for this child. The school district finally decided that, in view of Mary's significant behavior problems, extreme need for one-to-one instruction, and the fact that my classroom contained several other "hard to teach" students, Mary would have her own one-to-one teacher's aide full-time each day. This began in the first week of April.

On the very same day that Mary's new aide started work Mary became frightened while on the bus-ride home after school. Her bus driver noticed her fear and asked if she could help. Mary said she did not want to go home, daddy was angry. It later turned out that daddy was, in fact, very upset when the driver drove up in front of Mary's house, and the driver felt very deep concern about leaving Mary with him that afternoon. The following morning Mary arrived at school quite upset, and when I asked her if I could help she obviously needed to talk, so we went into a private room and Mary unfolded a story of sexual abuse involving her father. She indicated that her mother knew of the father's acts, but couldn't make him stop. Again the police were called, this time resulting in Mary's removal from the home, with placement in foster care.

Mary returned to my classroom about two weeks later and was noticeably calmer, better able to learn, and obviously happier. She did not discuss the problems she had endured at first, but as she became more secure in her new home environment she began to spontaneously come to me with more and more information that indicated the lengths to which her father had gone in sexually abusing his daughter. She had decided, apparently, that I was her confidant and would only tell these things to me, although she did so in front of several other people, including the Children's Services caseworker. Between late April and mid-June Mary revealed that her father had engaged in oral and anal penetration (which explained the onset of loss of bowel control due to anal damage), frequent inappropriate touching, and forcing her to reciprocate. Bear in mind that this girl is seven years old, somewhat limited intellectually, and by this time quite emotionally upset. She described times when she asked daddy to stop, told me she was crying because it hurt, and he told her that he could do it if he wanted to. Mary was unprotected by her mother who knew of the incidents.

After Mary was removed from the home and finished school last year in my class, she was placed in residential center for emotionally disturbed children, where she remains. She continues to be unable to control her bowels due to the damage done by father's penetration. Following further diagnosis and assessment she has been identified as "seriously emotionally disturbed" per PL 94-142.

The Multnomah County District Attorney's office initiated felony proceedings against Mary's father, and I received a subpeona as a witness for the prosecution. By this time I was feeling relief that Mary was receiving help, was no longer with her parents, and that her father would face prosecution for his acts. Now I find that this is not the case. Mary's father will not be held responsible for the destruction of his daughter's physical and mental health under a new Supreme Court ruling requiring the child's testimony. Apparently my testimony and the testimony of others to whom Mary revealed her plight is "hearsay" and thus not of sufficient weight to convict this man. His case was dismissed. He is right—he can do whatever he wants to Mary and no one will be able to stop him. Granted she no longer resides in the home (although there is some uncertainty as to whether removal will be long term—Children's Services Division will be the sole determiner), but she endured indignities even the strongest adult would find impossible to live with, she must continue to live with the embarrassment of losing control of her bowels, and she can never forget the emotional trauma she endured month after month at the hands of her father.

I will admit to some emotional involvement in this case, as I care for each of my students very much, and had to endure a degree of emotional stress as Mary's teacher. I knew what was happening almost from the start, but was powerless to help until she felt comfortable enough to confide in me. When she did tell me of her plight I sought help, first in January to no avail, and then in April was successful in getting Mary into a new living environment. It is difficult to live daily with the knowledge that you are sending a child home to abuse. It is also difficult to sit with a child in such pain and listen to her explain how her father performed his sexual acts and remain calm and comforting, instead of becoming angry. The anger is there, but suppressing it only adds to the stress.

On Thursday when I learned that my testimony would not be needed because Mary was unable, due to her emotional problems, to testify, and that Mary's father had not been held accountable for his actions, I decided to ask you to help. I realize that you are unable to do anything about this particular case, but this should not be allowed to happen again. Isn't there any way the Congress of the United States can help these children? Teachers are required to observe and report suspicions of abuse, and yet little or nothing happens when we do. Mary was removed from her home, but so late in her experiences that she will not easily recover from the trauma. Teachers are with the child six hours or more each day, become their confidant, are often their sole source of help and support during such a crisis in the child's life. I would ask that something be done to allow a teacher's testimony to carry the weight it deserves to help protect the child, and later to make the perpetrators of such acts pay a penalty for their behaviors.

I apologize for the length of this letter as I realize you are extremely busy, however, I feel so many things right now, ranging from compassion and affection for Mary and her plight to frustration and anger that her father will not be held responsible for his acts. He is free to live his life while Mary is in an emotional trap which may never be sprung. As responsible adults it is our duty to assist these children more than we do at this point in time, and it is our further duty to hold those who damage children responsible for the pain and damage they cause.

I ask that you consider some sort of legislation that would elevate the testimony of responsible adults (especially teachers) in a child's life so that the child is not placed in the position of having to face her father in court, telling strangers of her indignities and pain, and without this nothing happens to the abusers of the child. When the Deputy District Attorney told me that the facts in this case made her "sick inside" and when the investigator for the Public Defender's Office told me that he was appalled by this case as both a parent and an investigator I realized that I am not alone in my outrage that Mary's father is freed of responsibility, and now I hope you can help. You are in a position to do more than we are obviously able to do. Please make our frustration yours.

Thank you for your time and consideration of this matter. I feel relieved to be able to share my concerns with someone of dignity and humanity. Whatever you can do will be appreciated.

IMMUNIZE THE CHILDREN

Mr. KENNEDY. Mr. President, as the world's leaders congregated last week in New York to commemorate the 40th anniversary of the United Nations, the Secretary General, Perez de Cuellar, chose the occasion to give a much needed boost to the U.N.'s campaign to get every member state to immunize all its children against some of the world's most deadly diseases by 1990.

I would like to call the attention of my colleagues to a recent Washington Post editorial commending this vital work of the United Nations. While several organizations such as the World Health Organizations, the United Nations Children's Fund, and the Pan American Health Organization have already done excellent work in promoting continuing health care for people most in need of it, much remains to be done in coordinating the vaccines, trained personnel and the local networks of primary health care.

The editorial makes the essential point that the responsibility for caring for the poor, and especially for the children of the poor, also falls on those international financial institutions involved in promoting the belt-tightening measures for many of the debt-ridden countries.

The International Monetary Fund, the World Bank, and other funding sources must do their part to ensure that crucial financial adjustments are not made at the expense of the poor.

As these financial institutions grapple with the massive foreign debt problems of the recipient countries of their aid, I urge them to monitor closely the minimal levels of health and nutrition of the poor. The burden of economic adjustment must not fall on those least able to endure such hardship.

I ask unanimous consent that the text of the editorial may be printed in the RECORD.

[From the Washington Post, Oct. 23, 1985]

IMMUNIZE THE CHILDREN

It's always being said about the United Nations that, however vexing its political forums, the specialized agencies do vital work. It's often true, and some of that work comes into deserved focus Thursday. As part of the world organization's 40th anniversary, the secretary general has arranged to have the General Assembly give a ceremonial boost to the campaign to get every member state to immunize all its children against diphtheria, tuberculosis, poliomyelitis, whooping cough, measles and tetanus by 1990. The six diseases are estimated to take millions of lives a year, and they hover over families in the Third World like a dark cloud.

The startling thing about the immunization campaign, launched in 1974, is how quickly it has become feasible to end a scourge that has marked the whole of man's recorded history. Just in the last few years the requisite medical, informational and organizational resources have become widely enough available to make possible the provision of life-saving services to people and to sectors of society who never previously thought to expect them.

Much needs to be done both to spread an awareness among parents that their children can be saved and to put together the vaccines, trained personnel and the local networks of primary health care. Much is being done, however, by the World Health Organization and the United Nations Children's Fund and such regional bodies as the Pan American Health Organization, by public authorities drawn by the political benefits as well as the social benefits of caring for their people (El Salvador broke off its war for three days earlier this year to

let the children be immunized), and by the providers of the funds. Up front is the immunization of children. Behind is the strategy of using that popular cause as the peg on which to organize comprehensive and continuing health care for people who have not had it.

Inevitably, the poorer and more debt-ridden countries face special difficulties in applying their scarce energies and foreign exchange to a program whose principal benefits flow to people with little political power. The International Monetary Fund, the World Bank and other funding sources must do their part to ensure that crucial financial adjustments are not made at the expense of the poor. Horn-tooting sessions like the one planned tomorrow at the U.N. can help toughen up the politicians who are on the front line.

S. 477—CONSUMER RAIL EQUITY ACT

ORDER FOR STAR PRINT

Mr. ANDREWS. Mr. President, I ask unanimous consent for a star print of S. 477 to reflect certain changes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, a number of the Members of the Senate have been concerned for a long time about the implementation of the Staggers Rail Act by the Interstate Commerce Commission. We have heard innumerable complaints from our constituents that the Commission is not protecting captive shippers against unreasonably high rail rates and is not assuring maximum competition between the railroads.

A year or so ago, I held a hearing in the Transportation Subcommittee of the Senate Appropriations Committee in which it was revealed that the Commissioners had not even met together for 18 months. They did all their voting by memorandum. Perhaps, most compelling of all, the Commission has adopted principles for implementing the Staggers Rail Act under which the Commission has yet to find a major railroad to be financially healthy and under which no captive shipper rate has been ordered to be reduced by the Commission. I certainly agree with my constituents when they complain that the Interstate Commerce Commission has not implemented the Staggers Act in the balanced fashion intended by Congress.

On February 20, 1985, I introduced the Consumer Rail Equity Act, S. 477, on behalf of myself, Senator LONG, Senator STEVENS, Senator FORD, Senator DECONCINI, Senator JOHNSTON, Senator MELCHER, Senator GORE, and Senator BENTSEN. In the months since the introduction of this legislation, we have been joined in our cosponsorship by our colleagues, Senators SIMPSON, BOREN, EXON, and ROCKEFELLER.

On behalf of all the cosponsors of S. 477, I am today introducing text for the bill that will henceforth embody the substance of this proposed legislation. We are making these changes in our bill to simplify and clarify certain provisions of our legislation and to reflect the one positive action taken by the Commission since February 20.

The new text that we are introducing today makes three changes in the introduced version of the Consumer Rail Equity Act. First, we are modifying the revenue adequacy test that would be applied by the ICC to the railroads to assure that the new test will be the test that public service commissions apply to investor-owned utilities. Second, we are changing the market dominance provisions of our introduced legislation to codify the market dominance rule adopted by the Commission on July 31, 1985, pursuant to an agreement between the American Paper Institute and the Association of American Railroads. Third, we are changing the rate reasonableness test we provided in our original legislation to simply reject the rate reasonableness test adopted on September 3, 1985, in the Coal Rate Guidelines and to direct the Commission to start over again in this area.

The concept of revenue adequacy is extremely important in the regulation of captive shipper rates. One goal of the Staggers Act is to assist railroads to achieve revenue adequacy or, to use words more familiar to most of us, to achieve financial health. the Commission has indicated consistently that those railroads that are revenue inadequate will be allowed to charge captive shippers higher rates until revenue adequacy is achieved. The Commission has never, since 1980, determined a major railroad to be revenue adequate.

I find it very difficult to understand how a railroad system like the Norfolk Southern can be financially healthy when it comes to buying Conrail, but financially unhealthy when it comes to a question of captive shipper rates. While Norfolk Southern is a holding company, its 1984 annual report shows that 90 percent of its pretax income comes from its two railroad operating companies, both of which are considered to be revenue inadequate by the ICC.

We believe it is fair to apply to the railroads the same revenue adequacy test that is applied to investor-owned utilities by the public service commissions of America. If the railroads are revenue inadequate under that test, then so be it. However, if they are revenue adequate under that test, then the ICC should assure more moderate rates for the railroad's captive shippers.

The concept of market dominance is also important in the regulation of captive shipper rates. The Staggers Act provides that the Commission has no jurisdiction to decide if a rate is unreasonable unless the shipper first proves that it is a captive shipper. Captive shippers are those shippers that are paying rates over a certain jurisdictional threshold and who are subject to "market dominance." When the Consumer Rail Equity Act was introduced, the ICC test for market dominance was the absence of transportation options, the absence of a product alternative and the absence of any geographic alternatives. Under the ICC rules, the captive shipper was forced to prove all of these elements. Not only did captive shippers believe that proving the absence of product and geographic competition was unfair, the burden of proving these negatives was enormous.

On July 31, 1985, the Commission adopted a new market dominance rule that provides that shippers must provide that they have no transportation alternatives, but the railroads must then prove that product or geographic alternatives are available to the shipper. In addition, for the first time, the ICC stated that it would determine the captivity of the originator of the shipment as well as the captivity of the receiver of the shipment.

The text we submit today will codify this July 31 rule and will clarify that when the originator's captivity is determined, the possibility of product or geographic alternatives will not be considered. As a practical matter, it would be nearly impossible to consider such alternatives anyway. While we would have prefered the consideration of transportation alternatives only, the ICC's July 31 rule is consistent with the resolution that Senator DANFORTH and nine other Members of the Senate cosponsored in June 1984. Therefore, we have decided to modify our legislation to be consistent with this provision of the Danforth resolution and the action of the Commission on July 31.

Finally, once a shipper proves that he is a captive shipper, then the Commission is under an affirmative obligation to determine that the rate being charged the shipper is "reasonable." On September 3, 1985, the ICC adopted a rate reasonableness test in the Coal Rate Guidelines decision. The Commission has indicated strongly that this or a similar rate reasonableness test will be applied to all captive commodities, including grain, fertilizer, sugar, corn syrup and other commodities that are extremely important to American agriculture. The Commission's rate reasonableness test provides that a rate is not unreasonable unless the rate exceeds "stand alone cost"—the cost that would be incurred if a group of shippers built and operated their own railroad today to compete with the railroad in question. The Commission has admitted that no other regulatory body in America uses this test. Moreover, the burden of

proving what this hypothetical railroad would cost is all on the shipper.

Knowledgeable ICC practitioners and other experts have informed us that only the largest shippers moving large quantities of freight annually over very densely populated rail corridors would have any chance of succeeding under the "stand alone cost" test. The cost of putting on a case concerning stand alone cost will be so high that small shippers, in particular, will have no opportunity under this test to show that the rate they are being charged are unreasonable. The amendment we are introducing today directs the Commission to adopt a new rate reasonableness test within a year following the enactment of this act and directs that the test consider the revenue needs of the railroads, the cost of the railroad to provide the haulage in question and other relevant factors, but directs finally that the test adopted by the Commission cannot be "stand alone cost."

Mr. President, our text retains the other provisions of the original Consumer Rail Equity Act, including:

Shifting the burden of proving rate reasonableness from the shipper to the railroads;

Providing that the rail cost adjustment factor must reflect costs and productivity gains, not just price increases, and must operate to reduce tariffs as well as increase tariffs as it does currently;

Amending the National Rail Transportation Policy to promote the competitiveness of domestically produced commodities;

Constraining the Commission's exemption authority in certain circumstances;

Enhancing the availability of railroad to railroad competition for shippers;

Improving the record on which the Commission makes abandonment decisions; and

Streamlining procedures respecting State jurisdiction over intrastate rail transportation.

Mr. President, tomorrow the Senate Commerce Committee will begin its second series of oversight hearings on the Staggers Act since the enactment of this landmark legislation. I encourage the Senate Commerce Committee to move past its oversight hearings into legislative hearings on this legislation, then to markup and floor action this Congress.

The captive shippers of America have waited 5 years for the Commission to adopt a fair and balanced implementation of the act. Yet, the Commission still asks for more time to complete its work. Meanwhile, captive shippers continue to pay unreasonable rates. We enacted the Staggers Rail Act only 4 years after we enacted the Railroad Revitalization and Regulatory Reform Act of 1976. More than enough time has passed for the Commission to implement the Staggers Act in a balanced fashion. The time has come for this Congress to redirect the actions of the Commission in order to provide the protection we intended for our constituents who are captive to railroad monopoly pricing power. I might add, Mr. President, that the number of shippers who find themselves in the captive shipper category is growing as the railroads continue to consolidate, merge, and acquire each other in an effort to increase their efficiency and market power.

Mr. President, I ask unanimous consent that this legislation, a section-by-section analysis, and a list of the supporters of this legislation be printed in the RECORD. I would ask further that this legislation be printed for and made available to our colleagues at the earliest possible time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONSUMER RAIL EQUITY ACT—SECTION-BY-SECTION ANALYSIS

INTRODUCTION AND OVERVIEW

The Consumer Rail Equity Act is a mid-course adjustment in the operation and implementation of the Staggers Rail Act of 1980. The purpose of this legislation is to reaffirm the balance that was carefully stuck in the Staggers Rail Act of 1980 between the needs of large and small railroads, shippers, receivers and consumers, while preserving the fundamental structure and permises of the current law. The legislation's goal is to continue and enhance the Staggers Act's emphasis on permitting competitive market forces to govern the terms and conditions of rail freight service wherever possible, while providing a measure of practical protection for those shippers who remain subject to railroad monopoly power—as Congress also intended in enacting the Staggers Act.

The bill does not change the present statutory threshold for Interstate Commerce Commission jurisdiction over maximum rail rates, and thus does not seek to extend regulatory authority to any rates that are not subject to Commission review under present law. This legislation does not extend regulation to rates that are below the Commission's present jurisdictional threshold and continues the deregulation of contract rates that was established by the Staggers Act.

The most significant changes from present Commission practice and law that are proposed in the bill include a more realistic test of railroad revenue adequacy than the test being employed by the Commission, the codification and clarification of the Commission's July 31st market dominance test, a shifting of the burden of proof with respect to rate reasonableness from the captive shipper to the railroad, and directing the Commission to adopt a rate reasonableness test that will assure that those shippers, receivers and consumers who must bear most of the burden of helping the railroads achieve revenue adequacy are treated equitably.

The bill also enhances the availability of competitive rail opportunities for shippers and receivers, and makes several procedural improvements, including improvements in abandonment proceedings and the standard for ICC review of State commission rulings on intrastate rail rates. Finally, the bill assures that the national rail transportation policy which is embodied in the Staggers Act is consistent with other national goals of assuring competitive transportation rates for domestic commodities.

Section 1—Short Title

This section provides that the bill may be cited as "The Consumer Rail Equity Act."

Section 2—Purpose

This section reaffirms the goals of the Railroad Revitalization and Regulatory Reform Act of 1976 (the 4R Act) and the Staggers Rail Act of 1980, and declares the intent of Congress that this bill shall assure that the previous two Acts are administered in a balanced manner that both provides adequate protection for those subject to railroad monopoly pricing power and maximizes the opportunities for intramodal competition.

Section 3—Market Dominance

Under the Staggers Act, the ICC has jurisdiction to determine the reasonableness of only those rates that are charged to "captive shippers". The act defines a "captive shipper" as a shipper that (1) is paying a rate that exceeds the jurisdictional threshold established in the Act and (2) is subject to railroad "market dominance".

On July 31, 1985, the Commission adopted a new "market dominance" test under which the shipper must prove that it has no transportation alternatives, but the railroad could allege and prove that the shipper has a "product" or "geographic" alternative. These "product" alternatives might be the use of fuel oil instead of coal in the case of a utility or one type of grain instead of a second type of grain in the case of a bakery or feed lot. These "geographic" alternatives might be Pennsylvania coal instead of West Virginia coal or eastern coal instead of western coal in the case of a utility, or midwestern grain instead of North Dakota grain in the case of a bakery or feed lot. Shifting the burden of proving the existence of "product" and "geographic" competition is a substantial improvement in the Commission's market dominance test. It should be emphasized that in codifying this improvement, the amendment in the nature of a substitute intends that the railroad bear the burden of proving not just that product or geographic competition exists, but also that such competition effectively constrains the railroad's ability to charge high rates.

Second, the Commission for the first time, on July 31st, stated that it would analyze the captivity at the origin of the shipment as well as the captivity at the destination of the shipment. This is also a substantial improvement over prior Commission action. Previously, a country grain elevator or a coal mine could be completely captive, but be denied access to the Commission because the ICC focused only on captivity at the destination. This bill will clarify the unsettled point in the July 31st ruling concerning whether the ICC would consider "product" and "geographic" competition at the origin. Applying these concepts to an originating coal mine, grain elevator or manufacturing facility would be inappropriate. Therefore, the amendment in the nature of a substitute provides that "product" and "geographic" competition will not be considered in determining captivity at the origin.

Section 4—Rate Reasonableness

A presistent complaint about the present administration and interpretation of the law

has been the Interstate Commerce Commission's standard for determining the reasonableness of a rate that is being charged a captive shipper. The Commission has embraced a philosophy of maximum rate reasonableness based almost entirely on demand for rail freight service, rendering the cost to the railroad of providing the transportation nearly irrelevant as a ratemaking consideration. No other regulated industry enjoys such freedom from cost scrutiny. In almost all other instances in which a company possesses monopoly power—and Congress recognized in the Staggers Act that railroads continue to possess monopoly power with regard to captive shippers—some consideration of cost is included in the disciplining of abuses of that monopoly power.

The Consumer Rail Equity Act, as amended, will not impose utility-type rate of return-based regulation upon market dominant carriers. The conclusive presumption that no market dominance can be found for a rate yielding revenues between 170 and 180 percent of variable cost, which precludes the Commission from even entertaining a complaint about a rate below that level, represents a fundamental policy judgment of the Staggers Rail Act that some shippers and receivers will be required to pay a greater share of the revenues needed to develop and sustain a sound national rail transportation system.

This bill does not revisit that policy decision of the Congress. This legislation does not quarrel with the jurisdictional threshold of the Staggers Act or with the judgement that some shippers and receivers, and by extension some consumers, should pay more than others for rail transportation. Section 4 of the bill does, however, alter the method by which the Commission has been reviewing the reasonableness of rates of carriers possessing monopoly power. The Consumer Rail Equity Act requires the Commission to give careful attention to the railroads' costs and revenue needs.

On September 3, 1985, the ICC adopted the Coal Rate Guidelines which contain the rate reasonableness standards for captive coal. The Commission has indicated strongly in several pending cases that all or part of the coal rate guidelines will apply to other captive commodities, including: aluminum (Anaconda v. Burlington Northern, Docket 37550 and other cases), wheat and barley (McCarty Farms v. Burlington Northern, Docket 37809), phosphates (Mobil Chemical v. Seaboard Coast Line, Docket 37583 and other cases), soda ash (Allied Chemical v. Ann Arbor, Docket 38412S), sugar (Amstar v. Alabama Great Southern, Docket 37478), clay (International Minerals & Chemicals v. Burlington Northern, Docket 38084), pulpwood and wood chips (Consolidated Papers v. Chicago & North Western, Docket 37626), magnesium ingots (Aluminum Co. of America v. Burlington Northern, Docket 37699), and spent nuclear fuel (United States Department of Energy v. Aberdeen & Rockfish, Docket 38376 and other cases).

In the pending ICC proceeding McCarty Farms, Inc. v. Burlington Northern Inc. (Docket Nos. 37809 and 37809 (Sub-No. 1)), the ICC asked for comments on whether it should apply the coal rate guidelines to captive grain. On November 10, 1983, in its answer, Burlington Northern stated:

There is no conceptual or legal justification for regulating market dominant coal traffic differently than other market dominant traffic under the statutory scheme of the Interstate Commerce Act. The Congress has chosen to make no distinction between maximum rate regulation on coal as compared with grain, as it has done, for example with recyclables. Thus, the defendant sees no economic or legal justification for finding these grain rates unreasonable.

The final coal rate guidelines provide three alternative "constraints" for captive coal rates. Under all three, the captive shipper has the burden of proof. (A fourth "constraint," phasing, is so ill defined at present as to be of little practical use.)

First, if the railroad is revenue adequate, the coal transportation rate is constrained in some unspecified fashion. However, in light of the ICC's failure to reform its revenue adequacy test, this type of constraint has little significance. This is particularly true since the ICC has indicated that this constraint—which is not defined—will apply only after the rail carrier has been revenue adequate for several years.

Second, according to the ICC, proof that a carrier's revenue inadequacy is due entirely to management inefficiency will constrain the rate. This imposes an unprecedented burden of proof on the shipper, especially in light of the magnitude of overstatement of revenue need built into the ICC's current revenue adequacy test. Thus, even if the ICC keeps its promise to allow adequate discovery to the shipper, it is still unlikely that shippers will attempt this approach to rate relief.

Third, the new guidelines retain "stand alone cost" as an upper limit on rates. Stand alone cost is the cost to a shipper or group of shippers of building and operating their own railroad at today's prices. In other words, if a shipper thinks the quoted rate is unreasonably high, the ICC requires the shipper to demonstrate the cost to build and operate a substitute transportation facility at current prices. While the Commission appears to have clarified some ambiguities in its initial proposal, many important questions concerning the application and implementation of the stand alone cost constraint are left unanswered.

No matter how these questions are resolved, however, two things are clear. First, only a very few shippers will ever be able to afford to attempt the application of stand alone cost. Second, even for those few who can afford it, only those who are moving tremendous volumes of traffic over densely traveled rail corridors will have any hope of success. In short, the Commission's final coal rate guidelines do not constitute a fair and workable standard of rate reasonableness for captive coal traffic or for any other commodity.

The amendment in the nature of a substitute provides that the Commission, within one year after the enactment of the Act, must adopt a rate reasonableness test that applies to all captive commodities (except recyclables that are subject to a statutory rate test). The new test must consider, among other factors, the railroad's need for revenues, the relationship of the rate to the railroad's cost of providing the service (including, where relevant, the fact that the shipper is helping to relieve the railroad's cost burden by supplying cars, paying for loading facilities or the like), and whether and to what extent the railroad's revenue needs require captive shippers to pay rates that exceed the jurisdictional threshold. The test adopted by the Commission cannot, however, be "stand alone cost" which was adopted in the September 3rd Coal Rate Guidelines. The amendment in the nature of a substitute also requires that the Commission affirmatively inquire into and make affirmative findings respecting the Long-Cannon factors. Thus, the Commission can no longer avoid implementing the factors, either by suggesting that the complainant has to show that the railroad would be revenue adequate but for its inefficiencies before a rate reduction will be ordered, or by ignoring the third factor altogether.

Section 5—Amendments to Rail Transportation Policy

The amendment in the nature of a substitute expands one of the fifteen national goals to be achieved in the implementation of the Staggers Rail Act of 1980, to provide that the Commission must consider the competitive positions of domestically produced coal and other commodities. The amendment in the nature of a substitute also clarifies another of the national goals to ensure that rates must be reasonable even if a railroad is revenue inadequate.

Section 6—Inflation Based Rate Adjustments

The Rail Cost Adjustment Factor that is caused by the Commission today does not reflect cost and productivity gains, but reflects only increases in the prices paid by the railroads for goods and services. The index operates to increase tariff rates when the index increases, but does not operate to decrease tariff rates when the index decreases. The amendment in the nature of a substitute will require the index to reflect cost, increases in actual costs, not just prices, and productivity gains and will adjust tariff rates down when the index declines as well as up when the index increases.

Section 7—Standards and Procedures for Determining Revenue Adequacy

A critical goal of both the Railroad Revitalization and Regulatory Reform Act of 1976 and the Staggers Rail Act of 1980 was the attainment, by our nation's railroads, of "revenue adequacy." Section 10704 thus directs the Interstate Commerce Commission to determine regularly which carriers are receiving adequate revenues, that is, revenues that are sufficient "under honest, economical, and efficient management," to recover operating expenses, including depreciation and the replacement of obsolete assets, together with a "reasonable and economic profit or return (or both) on capital employed in the business."

The administrative standard now used to determine whether a railroad is revenue adequate—the current cost of capital measured against the railroad's investment base—does not realistically measure the true financial condition of a railroad, and tends to materially understate the "adequacy" of the railroad's revenues. The perhaps inevitable result is that the Commission currently finds all major railroads to be revenue inadequate, including some railroads which by other, more realistic measures and by the recent acquisition history of their holding companies appear to be financially secure. This is a matter of substantial concern to captive shippers since a judgment of the Congress in the Staggers Act was that a railroad's captive traffic must make the total contribution to the attainment of revenue adquacy that a railroad's competitive traffic cannot realistically make.

Accordingly, this section of the amended bill seeks to asure that revenue adequacy determinations are based upon realistic

measurements of a railroad's financial health. This very well may be the most important element in the Consumer Rail Equity Act because this analysis will determine the extra burden that must be carried by captive shippers. This is accomplished by requiring the Commission to use the same kind of analysis used by public service commissions in regulating investor-owned utilities.

In making revenue adequacy determinations and applying them in administering the law, the Commission shall identify revenues, expenses and the investment base reasonably related to providing rail service, and place railroads on the same footing as any other industry by valuing assets at original cost reduced by straight line depreciation. In determining the cost of capital, the Commission shall use actual or embedded cost of debt (rather than the present practice of using current cost of debt, which gives a railroad a windfall for all of its debt for which it is paying less than the current rate) and reasonable estimates of the cost of equity, based on the kinds of measurements applied by public service commissions.

The revenue adequacy determination is to be made annually and shall allow for adequate public comment on the nonproprietary information submitted by the railroads.

The first two Long-Cannon factors are to be applied in making revenue adequacy determinations. If a railroad is pricing an excess of its traffic inefficiently, the revenue shortfall attributable to that practice should not be considered in deciding whether the carrier is otherwise revenue adequate.

These broader inquiries do not dictate any particular outcome, but they should assist in producing more complete assessments of revenue adequacy.

Finally, to assist the Commission in its rate reasonableness proceedings, the revenue adequacy determination is to include a specific Commission finding on the extent of revenues required to achieve or maintain revenue adequacy.

Section 8—Exemptive Authority

The Commission is directed in 49 USC § 10505 to pursue exemptions from regulation where the regulation is not necessary to carry out the transportation policy set out in section 10101a, and is either (a) of limited scope or (b) no longer needed to protect shippers from abuse of railroad market power. This section would provide that an exemption "may" be issued if the Commission finds there is no market dominance (within the meaning of section 10709, as amended by Section 3 of the bill) over the transportation involved in the exemption. This section also provides that the Commission should consider whether persons other than shippers (including receivers and consumers) require protection from abuse of railroad market power sufficiently to deny issuance of an exemption.

These changes are intended to prevent the use of the exemption power in circumstances where competitive forces do not exist to discipline railroad monopoly power effectively.

Section 9—Enhancement of Competition

A sound national rail transportation system involves a great amount of interdependence among carriers. The majority of rail freight shipments travel over the lines of at least two carriers, and thus require some interchange of switching arrangement between the participating carriers. The carriers also have a variety of methods of quoting one single rate—called a joint rate, with individual rates for each carrier's share of the movement.

In many major metropolitan areas or terminal areas, two (or more) carriers with long haul lines into the area can serve shippers on each other's lines if they agree to allow one another access to each other's lines in the area of if one carrier otherwise agrees to act as a switching agent for the other carrier. Thus, the carriers can enter into a reciprocal switching agreement, allowing mutual access to each other's shippers, or a terminal facilities agreement, where the carriers are permitted to operate on other carriers' lines to reach shippers located throughout the terminal area.

The widest possible use of these various inter-railroad practices is essential to providing shippers and receivers with competitive alternatives and is essential to the maintenance of efficiency. Current law contains several provisions to assure that rail carriers do not cancel or refuse to enter into these arrangements for anticompetitive reasons. This section of the Consumer Rail Equity Act would strengthen these provisions.

This section would amend 49 USC 10705 to provide that, on request of a connecting railroad or a shipper or receiver, a railroad shall quote a competitive joint rate or proportional rate if interchange of the traffic is practicable. The quoted rate will be deemed conclusively to meet the "competitive" standard if the carrier's revenue to variable cost ratio for the quoted rate is no greater than the ratio for the carrier's existing joint rate or single line rate. Neither the intention nor the effect will be to force any carrier to carry traffic at non-compensatory rates, because section 10705a permits a carrier to unilaterally cancel or surcharge any non-compensatory joint rate. Rather, the intent and effect will be to assure that carriers do not use pricing techniques such as cancelling a joint rate or refusing to quote a joint rate to close off a competitive alternative to the shipper or receiver.

This section would also modify existing law regarding reciprocal switching and use of terminal facilities. The Commission's current discretion to order such arrangements is changed to a mandatory direction that the Commission shall order such arrangements when it finds they would be either practicable and in the public interest, or necessary to provide competitive rail service. The effect on competition should be salutary, giving a shipper or receiver in a major metropolitan or terminal area the option of choosing between two or more carriers providing line haul service.

Section 10—Abandonment Procedure

A railroad line (or other facility) that is proposed to be abandoned is typically a line that is of little interest to the abandoning carrier, perhaps because the line is not profitable. However, the facility to be abandoned is often of great importance to the shippers and communities served by the line. Because the impact on a community and its economy can be devastating, an abandonment decision deserves the most careful consideration.

The changes in this section make no change in substantive law. The railroad must continue to carry the burden of proving that the line to be abandoned in (1) uneconomic and (2) that the abandonment is in the public interest. This section is intended to give the Interstate Commerce Commission the most accurate record on which to base its abandonment decision, consistent with the obvious need to permit railroads to discontinue service expeditiously on truly money-losing facilities that lack commitment from the affected communities.

Three procedural changes are made. First, in order to clarify the abandonment proceedings are not to be instruments in a war of attrition, a railroad must wait one year after denial of an abandonment application before refiling to abandon the same facility, unless it can show that circumstances have materially changed since the unsuccessful application was denied. Second, if the abandonment is contested, the Commission must allow a hearing on the impact of the proposed abandonment on community or rural development (the standard set by current law) in one or more of the communities affected. The Commission may contract with outside parties to preside at the hearing, and the railroad proposing the abandonment must pay the expenses of the hearing. Third, the financial data used in deciding whether to permit the abandonment must be based on the revenues from and cost of operating the facility at issue, rather than system-wide or industry-wide averages.

Section 11—State Authority

This section will streamline procedures respecting State jurisdiction over intrastate rail transportation. The fundamental goal of present law is unchanged: a state commisson exercising regulatory jurisdiction over intrastate rail transportation pursuant to state law must do so consistently with the provisions of federal law governing interstate rail transportation. This section would simplify the achievement of this goal by eliminating the time-consuming process of Interstate Commerce Commission certification that a state's law, rules and practice are consistent with the federal law. Instead, this section eliminates bureaucratic delays and protects the dignity of the state process by relying upon ICC review of state decisions to assure uniformity of implementation. The ICC's review is limited to an appellate function analogous to that of a court reviewing an administrative agency decision under the Administrative Procedure Act, including a provision for remand of any inconsistent decision to the state agency. The ICC is given 120 days to dispose of any appeal from a state agency decision, thus assuring prompt and effective review.

Section 12—Transitional Provisions

This section addresses one transitional issue. Section 229 of the Staggers Rail Act provides that any rate not challenged within 180 days after enactment of the Act, or any rate so challenged and found by the Commission to be either reasonable or not subject to market dominance, would be deemed forever lawful and not subject to challenge. Over 800 so-called "Section 229" challenges were filed, very few if any of them successfully, and some rates were not challenged because they were covered by a contract entered into or in effect during the 180 day period. This section will not affect any railroad contract covering the tariff in question. However, many of these contracts are expiring and, under present law, many of these tariffs would become operative again. Any rate not challenged under section 229 because of a contract can be reviewed under this bill's standards. The contract itself and the rates under the contract are to remain in full force and effect; only the underlying rate which will apply on expiration of the contract is subject to challenge.

Mr. ROCKEFELLER. Mr. President, I am pleased to join my colleagues in sponsoring the Consumer Rail Equity Act, S. 477. This legislation will assure that the Interstate Commerce Commission provides the protection to captive shippers that was intended in the Staggers Rail Act.

The Staggers Rail Act was enacted during my service as Governor of West Virginia. My State's leading natural resource, as you know, is coal. Strong, financially healthy railroads are vital to my State's economic health. But at the same time, reasonable railroad coal haulage rates are critical to the ability of the coal producers in my State to market coal to domestic electric utility and industrial plants as well as in foreign markets. Due to West Virginia's mountainous terrain and relatively few rivers, many of our State's coal producers find themselves captive to a single railroad for their coal transportation. In such situations, the railroad has the power to squeeze the last nickel out of the coal producer's profits through unreasonably high rail rates and can actually prevent the coal from reaching certain of its natural markets if the rates become too high.

For these reasons, the Staggers Act was a compromise that attempted to balance the railroads' need for additional revenues and freedom from unnecessary regulation with the need to assure that rates to captive shippers are reasonable. Throughout my service as Governor and since my service in the Senate began earlier this year, I have received numerous complaints that the Interstate Commerce Commission is ignoring its responsibility to assure that captive shipper rates are reasonable and focusing totally on increasing the revenues of the railroads. In 1983, I led a successful effort to obtain a resolution by the National Governors Association that strongly encouraged the ICC to protect captive shippers and called on Congress to act if the Commission failed to act. The National Governors Association has continued to stand by that resolution.

Mr. President, the Commission has not yet acted to protect captive shippers. Despite an intense national debate and self-initiated proceeding to review its implementation of the Staggers Act, the Commission continues to focus on a perceived need for even more railroad revenues. I say perceived because the ICC presently considers all of the Nation's major railroad to be revenue inadequate or financially unhealthy. At the same time, Mr. President, the Commission has yet to find any captive shipper rate to be unreasonably high when it applies the principles it has adopted under the Staggers Act. In fact, my smaller coal producers complain to me that the standards and procedures

that the ICC has adopted are so complex and burdensome and the chance of obtaining relief is so slim that the Staggers Act captive shippers protections are unavailable to them.

Mr. President, I do not believe that all major railroads in this Nation are financially unhealthy. The Conrail debate has made that point clear to me. Nor do I believe that every rate the railroads have charged captive shippers since 1980 has been reasonable. The conclusion I reach is that something is wrong in the way the ICC is exercising its authority under the act.

Tomorrow, the Senate Commerce Committee will begin 2 days of oversight hearings on the implementation of the Staggers Act. These will be the second such oversight hearings the committee has conducted since 1980. Mr. President, I encourage the chairman of our Commerce Committee and the chairman of our Surface Transportation Subcommittee to schedule legislative hearings on the Consumer Rail Equity Act in the very near future and then to provide an opportunity for the committee to markup this legislation which is of great importance to my constitutents. I invite each of our colleagues to join us in cosponsoring the Consumer Rail Equity Act.

Mr. President, the time has come for us to act. We have each spent a good deal of time this year considering whether and to whom Conrail should be sold. Both the administration and the Senate Commerce Committee have recommended Conrail's sale to another major railroad system. At the same time that we are considering this major issue of railroad ownership, we owe it to the captive shippers of our Nation that we deal with their problems under the Staggers Act.

Mr. JOHNSTON. Mr. President, I am pleased to be a cosponsor of the Consumer Rail Equity Act, which will assure that captive shippers are protected from railroad monopoly pricing power and will assure that railroads cannot avoid competition between themselves.

Mr. President, I have been concerned for a number of years about the unreasonable rates that were being charged captive shippers by our Nation's railroads. My constituents in Louisiana suffered under these rates as our electric utilities shifted from gas-fired electric generation to coal-fired electric generation as was required by Federal policy. As our electric utilities shifted from gas to coal, they found themselves captive to railroads for coal haulage and the railroads took full advantage of their situation. In the last Congress, I led an effort to provide competition to the railroads by granting Federal eminent domain authority for the construction of coal slurry pipelines. The Senate Energy and Natural Resources Committee reported that legislation, but before the Senate could act, the companion legislation was defeated on the floor of the House. The railroads led the lobbying effort against coal slurry pipeline legislation and cited a number of reasons for rejecting the legislation. The basic reason, however, was that the railroads did not want competition.

Mr. President, if the railroads are not going to have competition from new modes of transportation for the haulage of coal, then we must assure that the ICC protects captive shippers from unreasonable railroad rates and ensures competition between railroads. We intended for the Commission to do this when we enacted the Staggers Rail Act of 1980. Unfortunately, this Commission has implemented the Staggers Act in such a fashion that no captive shipper rate has been found by this Commission to be unreasonable. Mr. President, such a result defies logic and is unacceptable.

Earlier this year, the Department of Energy appeared before the Senate Energy and Natural Resources Committee to testify concerning the impact of rail rates on coal production and utilization. During that hearing, an assistant secretary of the Department testified that the Department had found no evidence of unreasonable rates in an interim staff working draft of a study that was then released by the Department. This preposterous finding does not square with the reports I have received from constituents over the past few years and did not square with the content of the body of the Department's report. Moreover, evidence was submitted to us by the Edison Electric Institute that indicates that the Department's staff did not attempt to determine how the costs incurred by the railroads in the coal haulages that were studied compared with the prices the railroads were charging for their services. The EEI study of 19 captive utilities indicated that the pretax returns on investment of the 19 tariffs in question range from a low of 51 percent to a high of 157 percent. Every one of the dollars paid to these railroads came directly from the electric ratepayers of these 19 utilities. Unlike the Department's staff, many of us would conclude that such rates of return on rail rates charged to shippers without market power to protect themselves are certainly unreasonable and should not be tolerated. Yet none of these 19 utilities have been able to obtain rail rate relief from the ICC.

Mr. President, I think the time has certainly come to assure that the ICC is implementing the Staggers Rail Act in a balanced and fair manner. The railroads must not be allowed to obtain both freedom from regulations and freedom from competition. We have allowed the railroads to escape competition from new modes of transportation. We must not now allow the railroads to escape the protections for captive shippers that we included in the Staggers Act of 1980.

Mr. GORE. Mr. President, I welcome the opportunity to join in sponsoring S. 477, the Consumer Rail Equity Act.

The Staggers Rail Act of 1980 has worked well in many respects. The Interstate Commerce Commission has not, however, fulfilled all of the goals of the act as Congress intended.

Protection for captive shippers is one goal that the ICC has largely ignored. Another is the preservation of competition between railroads, which is fostered by arrangements like joint rates and reciprocal switching agreements. With the growing consolidation of America's railroads, it seems to be increasingly difficult for railroads to obtain competitive access agreements to compete with other railroads.

Of particular concern in Tennessee is the problem of abandonments. I recognize that some lines may be legitimate candidates for abandonment because of changed business conditions. However, some lines which railroads seek to abandon may be of great importance to the shippers and communities which they serve. Because the impact on a community and its economy can be devastating, some abandonment decisions deserve the most careful consideration. Unfortunately, this has not been the case under the ICC's implementation of the Staggers Act.

The proposed Consumer Rail Equity Act addresses the abandonment problem in the responsible way it deals with other issues. It makes no change in substantive law, but three important procedural changes are made.

First, in order to clarify that abandonment proceedings are not to be instruments in a war of attrition, a railroad must wait 1 year after denial of an abandonment application before refiling to abandon the same facility, unless the railroad can show that circumstances have materially changed since the unsuccessful application was denied.

Second, if the abandonment is contested, the Commission must allow a hearing on the impact of the proposed abandonment on community or rural development—the standard set by current law—in one or more of the communities affected.

Third, the financial data used in deciding whether to permit the abandonment must be based on the revenues from and cost of operating the facility at issue, rather than systemwide or industrywide averages.

The railroad, as under existing law, continues to carry the burden of proving that the line to be abandoned is one, uneconomic, and two, that the abandonment is in the public interest.

These simple procedural changes will not interfere with the abandonment of facilities that are genuinely uneconomic and lack real support from the affected communities. With respect to abandonment of lines where the economics are not clearcut and the community interest is great, then our proposed changes go far toward assuring that a fair evaluation of the proposed abandonment takes place.

Mr. President, as a member of the Commerce Committee I intend to work hard for action on the Consumer Rail Equity Act in this Congress. The problems at the ICC which are addressed by this proposed legislation will not go away. Congress must act both to fulfill the original intent of the Staggers Act and restore the integrity of proceedings at the ICC.

Mr. STEVENS. Mr. President, I am pleased to be an original cosponsor of the Consumer Rail Equity Act and support the amended version we are introducing today. These changes will apply to railroads the same test of financial health that is applied to utilities by public service commissions; codify the market dominance test adopted by the Commission on July 31, 1985; reject the stand alone cost test adopted by the Commission as a rate standard; and direct the Commission to adopt a more realistic rate reasonableness test.

The debate in Congress over the Conrail sale has focused the attention of many of us on a variety of railroad issues, including the standards the ICC applies for determining railroad financial health, the protection afforded captive shippers by the ICC, the ability of the railroads to avoid competition by canceling or refusing to engage in switching agreements, joint rate agreements, and other agreements relating to the use of railroad facilities, and finally, the problem of railroad abandonments.

Over the past couple of years, it has become apparent to me that the Staggers Rail Act is working well to assure financial health of the railroads, but is not adequately protecting captive shippers from unreasonable railroad rates or ensuring the maximum level of competition between the railroads. In the 5 years since the enactment of the Staggers Rail Act, the Commission has been unable to produce the fair and balanced relationship between railroads and shippers that Congress intended when it passed the Staggers Rail Act in 1980.

A strong and effective act that provides protection to captive shippers and assures maximum competition between the railroads becomes increasingly important as our Nation's railroads continue to merge and consolidate. As the Congress considers one major proposed railroad consolidation and the ICC considers a second, the time is most appropriate for Congress to act to protect captive shippers from railroad monopoly princing power.

Mr. President, I invite and encourage each of my colleagues to join us in cosponsoring the Consumer Rail Equity Act, as amended. I look forward to Commerce Committee action on this legislation in the near future.

Mr. CRANSTON. Mr. President, I want to call my colleagues' attention to an extraordinary event that is being organized by an extraordinary American. The event is called "Hands Across America," and it is designed to raise $100 million to help feed hungry Americans. The organizer is Ken Kragen, the man who brought together musicians and vocalists from across our land to record the "We Are the World" record album for the benefit of African famine victims.

Ken Kragen's new goal is for thousands of Americans to join hands on May 25, 1986, in a 3,000-mile chain across the length of our continent. The idea is for people to join hands in singing "America the Beautiful" and "We Are the World" in a commitment to fight hunger in America. The donations for joining the human chain will be given to food distribution organizations across our country.

If Ken Kragen's recent fundraising record is any guide for the future, "Hands Across America" should be a colossal success. His genius for motivating people has helped to raise the consciousness of the entertainment industry and millions of other Americans to the suffering in Africa. The record album, "We Are the World," has sold over 5 million copies and raised over $50 million to prevent starvation in Africa. Ken's continued work as president of U.S.A. for Africa has him very involved in making sure that the African relief contributions get to people most in need of help.

Ken Kragan is no stranger to the antihunger movement. He has been on the board of World Hunger Year since 1981, when the organization's founder, singer-songwriter Harry Chapin, died tragically in a car accident. Since then, Ken Kragen and World Hunger Year have continued Harry's work to educate Americans about how each of us can help in the campaign against hunger.

I met Ken over 10 years ago, when, as Harry Chapin's agent, he helped to organize Harry's antihunger benefit concerts across America. Besides being one of America's most talented musicians, Harry Chapin was a moral crusader, who traveled from city to city, holding over 100 benefit concerts a year. I'm very proud that my friend from California has continued Harry's cause to end hunger here and abroad.

We need Ken Kragen's energy, his dynamism, and his idealism now more than ever. After years of work by the Congress and the American people to chase hunger from America's doorstep, we have witnessed a steady rise over the last 5 years in the number of malnourished Americans. Some 400 food banks have opened across our country in the last 4 years to handle the needs of 20 million hungry Americans—roughly 14 million of whom are children.

There is no better time for all of us to hold hands across America in the campaign to end hunger. Along with Ken Kragen, many other musicians, actors, and athletes—including Kenny Rogers, Pete Rose, and Bill Cosby—have been working to make "Hands Across America" a success. I hope all of us can join hands with them on May 25, 1986.

VISIT TO THE SENATE BY MEMBERS OF THE PARLIAMENT OF CANADA

Mr. McCLURE. Mr. President, we have the honor of being visited by some distinguished members of the Parliament of Canada, who are visiting today.

I want to take this opportunity to not only invite them to the Chamber, but to present them to the Senators present. And I invite Senators to meet our guests.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

OPERATIONS OF THE SENATE

Mr. PRYOR. Mr. President, for the information of our colleagues and also their wives, families, friends, and relatives and the country at large, I would like to give a very brief summary of how the Senate of the United States, the world's greatest deliverative body, has used its time in 1985.

Mr. President, we have had as of the close of business October 25, 1985—that was last Friday—258 rollcall votes. We have had 6 votes on Monday, 31 votes on Friday, 26 votes before 12 noon, 74 votes after 6 p.m., 4 votes on Saturday, and 2 votes on Sunday.

Mr. President, the total time consumed in rollcall votes has been, as of the close of business last Friday, 100 hours. The amount of time on rollcall votes in excess of the regular order, or 15 minutes per rollcall vote, has amounted to 36 hours and 25 minutes in 1985; 13 votes have been excess of 30 minutes. The longest rollcall vote of 1985 has been 61 minutes. Mr. President, the average time for each rollcall vote, notwithstanding a 15-minute

rule, has been 23.6 minutes. Mr. President, I hope you will file this next one. The amount of time that we have spent in the U.S. Senate in quorum calls in 1985 has been 247 hours and 48 minutes.

Mr. President, over the course of the last few weeks, I have detected a growing sense of frustration on the part of many Members of this great body. This frustration is seemingly the result of our continued inability to deal, in any form of expeditious manner, with pressing issues and get on with the Nation's

I would like to take just a few minutes today, Mr. President, to review where we stand thus far in 1985, and raise certain procedural changes that we should consider in an effort to streamline the operations of the Senate.

At the outset, I want to strongly emphasize that my remarks are not a criticism of any Senator or the activities of the leadership on either side of the aisle. In fact, I feel reasonably sure that the leadership on both sides of the aisle would probably express some of the same frustrations.

My remarks are designed for a very simple purpose—to show all of my colleagues how we spend our time on the Senate floor and to urge all Senators to consider proposals which will allow us to do our work in a more efficient manner.

I realize, Mr. President, that part of the problem is not necessarily due to deficiencies in the Senate rules. The Standing Rules of the Senate are designed to govern floor procedure and debate, and the overriding concern is the right of unlimited debate by an individual Senator.

Part of the problem, quite frankly, is due to the attempt of the leadership, on both sides of the aisle, to accommodate the schedules of individual Senators and to recognize that right of free debate on the Senate floor. I suppose at one time or another each Member of the Senate has asked to have his or her situation taken into account when votes are scheduled. This Senator has been accommodated in this regard. I suppose some of this is necessary. But, Mr. President, when the efforts to accommodate Members reaches the point where the legislative train runs off the track and we cannot do our work, I believe it is time to look at the way we do business and see what changes can be made.

Within the last few days, Mr. President, I looked at the rollcall votes thus far in the 99th Congress, and I also looked at several other procedural matters. The statistics are interesting.

Once again, as of the close of business last Friday, October 25, 1985, 258 rollcall votes had been conducted; 6 votes occurred on Monday; 31 votes occurred on Friday; 26 votes occurred before the hour of 12 noon; and 74 votes occurred after 6 p.m. This means that fully 30 percent of the votes in the Senate were in the evening.

The total time consumed on rollcall votes so far this year is exactly 100 hours through October 25. Most distressing is the fact that of this 100 hours, 36 hours and 25 minutes is attributable to votes lasting longer than the mandated 15 minutes. Therefore, 36 percent of the time we spend voting is due to waiting on Members to come to the floor and cast their vote. The average length of rollcall votes this year is 23.6 minutes. And, we have had 13 votes that lasted in excess of 30 minutes—one vote went 61 minutes.

At this point, Mr. President, I might add that last week the distinguished majority leader, Mr. DOLE, did start holding votes to 15 minutes only, and I believe this is a good step toward the more efficient working of the Senate.

Finally, Mr. President, in 1985 we have spent 247 hours on quorum calls. If we assume, for purposes of this discussion, that we work 8 hours per day, then we have spent almost 31 days in quorum calls. Since the Senate has been in session 136 days, through last Friday, about 23 percent of our time has been in quorum calls. When the time spent on rollcall votes is added in, this amounts to almost 32 percent of the time we have been in session. Put another way, Mr. President—and still using 8-hour days—we have had 6 weeks worth of quorum calls this year, and 2½ weeks of rollcall votes.

These figures are astonishing. It seems to me that we should consider changes in the conducting of Senate business and attempt to be more efficient.

For example, let me pose these questions:

First. Should there be any limitation on the length of quorum calls before the Senate either recesses, or some legitimate business is transacted? The so-called Pearson-Ribicoff report (Senate Print 98-242) proposed that the Presiding Officer should ensure that a quorum is present to conduct the business of the Senate, and that if a quorum could not be obtained within 30 minutes then the Senate should adjourn or recess.

Second. Should we consider having a live quorum at the start of each day? I have noticed that once most Senators are on the floor, things start happening. Amendments are offered, and we get time agreements on most issues.

Third. Should motions to proceed to a bill or resolution be limited to a short period of debate? I am aware of the work of the Senator from Indiana, Mr. QUAYLE, and others in this area, and I believe it is something we should address.

Fourth. Should we provide for rules dealing with germaneness of amendments? The distinguished Democratic leader, Mr. BYRD, proposed this in the 98th Congress in Senate Resolution 63. That resolution, which, to the best of my knowledge, was never formally considered by the Senate, provided for a motion to be in order, two times each day, to require amendments to pending bills to be germane. I applaud the distinguished Democratic leader for that resolution, and I hope we can resurrect that resolution and look at it again. The motion would have been limited to 2 hours of debate equally divided, and if three-fifths of the Senate agreed, then a strict germaneness rule would apply. Further, any appeals from the ruling of the Chair on the question of germaneness would have required a two-thirds vote to overturn the Chair's ruling. I believe this resolution, and similar proposals, should be seriously considered.

Mr. President, these are just a few of the issues I hope Members will begin discussing. I think if we seriously consider some of these proposed reforms, we can make the workings of the Senate more efficient without jeopardizing in any way the rights of individual Senators to use the rules as they see fit. This is a cherished right in this body, and it should be. But I believe there are certain procedural reforms that can be made without sacrificing this in any significant manner.

Finally, Mr. President, for the benefit of all Members, I ask unanimous consent that an excerpt from the so-called Pearson-Ribicoff report be printed at this point in the RECORD, together with a summary of the figures to which I have referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Committee Print]

(S. RPT. 98-242)

REPORT OF THE STUDY GROUP ON SENATE PRACTICES AND PROCEDURES, TO THE COMMITTEE ON RULES AND ADMINISTRATION, UNITED STATES SENATE

INTRODUCTION

This report to the Committee on Rules and Administration by the Senate Study Group is made in pursuance of S. Res. 392, submitted by Senator Mathias and agreed to by the Senate on May 11, 1982. The resolution, in part, reads as follows:

Resolved, That the President of the Senate shall appoint a Study Group on Senate Practices and Procedures (hereinafter referred to as the "Study Group") which shall consist of two former United States Senators, one of whom shall be appointed upon the recommendation of the Majority Leader of the Senate and one of whom shall be appointed upon the recommendation of the Minority Leader of the Senate.

SEC. 2. It shall be the duty and function of the Study Group to make a full and complete study of the practices and procedures of the United States Senate with a view to recommending to the Senate such revisions thereof as may be necessary or appropriate to preserve and enhance the traditions, customs, functions, forms, and spirit of the United States Senate while enabling the

Senate to conduct debate which is focused on major issues of national policy.

* * * * * *

SEC. 5. The Study Group shall conclude its study and submit a report thereon to the Committee on Rules and Administration not later than June 1, 1983, which report shall set forth the results of such study together with the Study Group's findings and recommendations resulting from such study.

After adoption of the resolution, the President of the Senate, on the recommendations of the Majority and Minority Leaders, appointed former Senators James B. Pearson and Abraham Ribicoff as members of the Study Group. The Parliamentarian Emeritus, Dr. Floyd M. Riddick, and staff of the Rules and Administration Committee, were designated to assist the Senate Study Group in their deliberations and report.

After lengthy consideration by the Study Group, the following subjects were agreed upon to be discussed and further explored; after several meetings, the Study Group agreed that specific recommendations would center around the following outline:

SENATE STUDY GROUP—AN OUTLINE OF RECOMMENDATIONS

I. SENATE LEADERSHIP ISSUES

A. Through agreement by both bodies to a concurrent resolution, establish an annual agenda of major legislative issues, in coordination with the House leadership, for each Congressional session. Require a premium vote (an absolute three-fifths majority) to change the agenda. Televise Senate debate on these major issues.

B. Provide for a permanent Presiding Officer of the Senate who shall establish the presence of a quorum for purposes of legislative and executive business of the Senate. Require the Presiding Officer to enforce strictly rules regarding quorums and votes, and, with full support of the party caucuses, impose restraints on the exercise of each individual Senator's rights regarding:

1. Record votes;
2. Quorum calls; and, in addition,
3. Abolish the practice of individual holds on the consideration of matters before the Senate.

C. Maintain a week in advance schedule for those weeks the Senate is in session. Allow these weekly schedules to be modified on motion by the leadership. Require premium votes to change the weekly schedule.

D. Do not bring up new Senate bills on the same subject more than once during the same session (or, require a premium vote decided without debate to do such).

Add to Rule V of the Standing Rules the following provision:

"When a bill or amendment has been passed, or has been rejected, no bill or amendment of the same substance shall be considered during that same session on objection by any member unless proposed by the Majority and Minority Leaders or on motion without debate by a two-thirds majority vote."

E. Use recess periods during a daily session for the purpose of caucusing by the Majority and Minority Leaders in resolving differences during debate on legislative and executive matters.

F. Reestablish the old procedure for the disposition of measures on the call of the calendar. This would require no change to the Rules.

G. Restore the old practice of the Leaders' requesting unanimous consent for the absence of any Senators on official business or for other reasons. (All other Senators would be deemed in or around the Capitol and such presence could be established as a measure of diligence.)

H. Adopt new procedures for each daily session of the Senate. These new practices would restore previous Senate traditions and would include:

1. The Senate shall fix a time certain for its legislative and executive sessions. Each session shall be for one calendar day, during which time the Senate may recess for brief periods at the request of the Majority and Minority Leaders. At the beginning of each session, the Presiding Officer shall determine the presence of a quorum. If no quorum is present within thirty minutes of the time fixed for the session, the Presiding Officer shall adjourn the Senate to the next day's session, as set by previous order or Rule. (Differing quorums may be established for different types of sessions, but final action on any proposed legislation or executive business must be taken by quorums of full membership. The Presiding Officer shall strictly enforce rules regarding the presence of a quorum.)

2. Once the Presiding Officer has established the presence of a quorum, the session shall begin with the deliverance by the Chaplain of the customary prayer.

3. After recognition of the Majority and Minority Leaders, the Senate shall immediately proceed to the day's business, the call of the consent calendar, or other matters so established by motion, without debate, of the Majority and Minority Leaders.

4. Speeches or remarks not related to the day's session shall be delivered only at the end of that day's business, if time remains for such extraneous matters.

5. No speech shall be read in its entirety; rather, Senators shall speak extemporaneously using notes to refresh their memories, except for those matters of a complex or technical nature, or matters containing executive or judicial policy statements or proclamations, which may be read in their entirety.

H. FLOOR PROCEDURE AND PRACTICE

A. Debate:

1. Require debate to be relevant at all times during the discussion of legislation and executive business. The Pastore rule, requiring debate to be germane, has been ignored.

2. Amount of debate.

(a) too much on all of the following:

Motion to proceed to consideration (limit motions on legislative matters to one hour of debate.)

Consideration of measure itself (leave as is.)

After cloture is involved (tighten the existing time limits in Rule XXII.)

(b) not enough on amendments when time limits have expired as in the case of reconciliation measures (amendments called up and no time for debate), as well as when operating under unanimous consent agreements for time limits and amendments can be called up with no time for debate. Abolish the reconciliation process, and require that amendment not be acted on unless time is provided for debate.

B. Amending process:

1. Require germaneness of amendments after a certain amount of debate by a premium vote. (The goal should be a germaneness requirement for not less than the last half of time for debate.)

2. Require a statement of purpose on the face of the amendment as to:

(a) statute being amended

(b) agency or program affected

(c) subject matter of amendment

Do this by standing order.

3. Require that amendments, except for one-paragraph minor amendments no longer than ten lines, be printed a day in advance (or permit by a premium vote.)

4. Require that modifications of amendments be made available to all Senators prior to the start of a vote.

5. Do not consider any contested amendments on controversial subjects more than once during a session (or, require a premium vote decided without debate to do such).

C. Amend Rule XVI to correct abuses in the use of germaneness when a point of order is raised against an amendment as being legislation on a general appropriations bill.

D. After passage of a measure, require within five days a committee chairman's résumé of differences between the committee reported bill and the bill as passed by the Senate.

III. SENATE COMMITTEES

A. Their actions should be in accordance with the Senate agenda and their committee jurisdictions (which does not prohibit hearings on any matters within committee jurisdictions).

B. Use subcommittees only for investigations and hearings; do not establish standing subcommittees or any separate staff groups for legislative purposes.

C. Make Congressional budgeting a simplified two-year process.

D. Consolidate standing, select, and special committees of the Senate. Further limit the number of committee assignments for each Senator.

E. Amend the Senate Standing Rules with the following provision:

Any bill or resolution proposing Senate procedures different from the existing or established procedures, after having been reported by any other Senate committee, shall not be eligible for Senate consideration until that measure has been referred to the Committee on Rules and Administration for a period not in excess of sixty days for its review and report to the Senate with possible proposed amendments in such a measure dealing with Senate procedure.

The recommendations are concerned with the following specific subjects, each of which will be discussed separately in detail:

MAJOR RECOMMENDATIONS

17.	Any measures involving procedure should be referred to Rules Committee before Senate acts thereon.	22
18.	There should be some control over the number of roll call votes.	22

1. Establish an agenda for the Senate

The Study Group recommends that the Congress establish an agenda at the early part of each session and that such agenda be announced publicly so that the people of the United States may know what the Congress plans to consider during the current session. This agenda should be followed as closely as possible but could be changed by a premium vote, say, for example, a two-thirds vote.

The agenda should be prepared and proposed by the Leaders of both Houses, after consultation with the President of the United States and officials of his Administration, at the very beginning of each session for adoption by each House, if such cooperation between the two Houses can be obtained.

If it is not possible for both Houses to accomplish this end, then it is proposed that the Senate undertake such a procedure alone by adopting a simple resolution at the beginning of each new session. This would give a guideline to the House and inform the President as to what the Senate expects to do during that year, even without a combined agreement in the form of a concurrent resolution.

Such a resolution on the part of the Senate, presented and adopted in the form of a simple Senate resolution, would not give bill numbers but would merely specify the subjects with which the Senate would be concerned. The bills would be introduced at subsequent dates by Senators, as under regular procedure.

This specification of proposed legislation to be considered by the Senate during a session would in no way restrain or restrict Senate committees in holding hearings on any subject they saw fit to conduct, but it would forewarn the standing committees that the Senate had no intention of considering any legislation reported by them which did not fall within the spheres of this agenda.

Each committee would be authorized to make a motion to be agreed to by a two-thirds vote of the Senate after very limited debate to take up a measure which had been reported but which did not come within the scope of the agenda. If such a motion were agreed to, it would have the effect of suspending the agenda in this regard and adding the said proposed piece of legislation to the agenda.

The discussion above is concerned basically with proposed legislation. Obviously a great portion of the year might be devoted to the consideration of executive business, namely nominations and treaties. But on both of these the Senate must await recommendations of the President, since under the Constitution the President "shall nominate, and by and with the advice and consent of the Senate" appoints Ambassadors, Ministers, Judges and all other officers of the United States, and the President under the Constitution "shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur." Therefore, the Senate would be in no position to announce ahead of time what would be coming up in the form of nominations and treaties.

Listed below is a sample of the way the subject matter would be presented in any such resolution adopted by the Senate:

Agriculture and rural affairs,
Appropriations,
Armed Forces and Uniformed Services,
Atomic energy and power,
Aviation,
Banks and banking,
Business and commerce,
Claims and Government liability,
Communications and broadcasting,
Consumer affairs and protection,
Courts and civil procedure,
Crimes and crime prevention,
Education and schools,
Elections and voting,
Environmental protection and conservations,
Expiring legislation,
Federal employees and officials,
Foreign relations and policy,
Government agencies' records, documents, and information,
Health and medical facilities,
Housing and housing finance,
Public finance and budgets,
Taxation,
Treaties and international agreements,
Veterans.

2. Provide for a permanent Presiding Officer of the Senate

The Constitution stipulates that the Vice President of the United States shall be the President of the Senate, and therefore becomes the official Presiding Officer of that body. In modern times the practices and responsibilities of the Vice President have become such that this officer is infrequently present in the Senate. Seldom is the Chair occupied by the Vice President, unless it is expected there will be a tie vote which, under the Constitution, the Vice President is authorized to break if and when the Senate is "equally divided", if the Vice President sees fit to vote, or when the President feels that the matters under consideration are of such nature that the presence of the Vice President would be helpful to the Administration while such debate or discussion is under way. For more than twenty years rarely is the Vice President to be found presiding in the Senate for any extended length of time.

The Constitution also provides that in the absence of the Vice President the Senate shall elect a President pro tem to serve as its Presiding Officer. Since in practice the President pro tem is usually one of the senior Members, the duties of that official have become so manifold and complex that this person is seldom able to preside for more than a short period of time each day. This situation in practice has required the service of many Senators as the Presiding Officer. In recent years there has been a constant rotation of Senators in the Chair, who are scheduled so as to share that responsibility for an hour or so at a time.

Such procedure does not lend itself to establishing a Presiding Officer of sufficient standing to convince the Senate that he or she is completely familiar with all of the procedures, nor has the occupant of the Chair become sufficiently impressive that the membership gives proper deference to the Chair's control and direction of the Senate. The Presiding Officers of the Senate today in no way command the respect, impartiality, and prestige essential to the command of an orderly procedure by the Senate, as compared to that of presiding officers of various parliaments throughout the world.

It is, therefore, proposed that the Senate create the Office of a Deputy President pro tem, and that a Senator be elected to that post, whose responsibility it will be to preside at all times when the Vice President or the President pro tem is not present. This officer, if created, should be given sufficient compensation to justify his presence in the Chair for most, if not all, of every day's proceeding, in the absence of the two Constitutional Presiding Officers. The Deputy President pro tem would become the real Presiding Officer of the daily sessions of the Senate, subordinate, of course, to the two Constitutional officers, the Vice President and the President pro tem. The Constitutional Presiding Officers (the Vice President and the President pro tem) would in no way be replaced nor sheared of their existing authority; they would have the right, respectively, to bump the Deputy President pro tem at any time they saw fit.

With such a permanent Presiding Officer, supplemented at any time by the Vice President or the President pro tem, it would appear that the Rules could then be amended to provide that the Presiding Officer be authorized and held responsible to determine at any time or at all times when a quorum was present, and if not present no business would be proceeded with until a quorum was obtained. If a quorum could not be obtained within a specified period of time, for example thirty minutes, then the Presiding Officer should be authorized to recess for a time certain or recess or adjourn the Senate until the next day, as the case might require.

3. Controversial matters should not be considered more than one time in the same session

The Rules should be amended to prohibit the consideration of any controversial matter more than once in the same calendar year, unless on motion without debate or after a limited debate, the Senate by a three-fifths or two-thirds vote, agrees that the matter should be brought up for consideration once again. This prohibition should be enforced whether it be presented to the Senate in the form of an amendment or in the form of a bill, joint resolution, or resolution. Such a restriction would not mean that if the Senate had considered, amended, and concluded the consideration of a Senate bill up to and including the third reading, that it could not then take up a companion House bill on the calendar, and strike out all after the enacting clause, and then substitute all of the language of the Senate bill therefor. Such procedure would be in order.

The purpose of this restriction is to avoid the waste of time on the part of the Senate from having to be confronted many times with the same issue during a single session (year). At the same time, however, to protect the membership of the Senate itself some provision should be made to allow the renewed consideration of a bill or subject, even if it is controversial, when a motion to that effect is made and approved by a two-thirds vote without debate or after a very limited debate. The number of times such a motion could be entertained during a session would have to be limited to two or three; otherwise too much time would be wasted by continually renewing such motions.

In the case of amendments, the same restrictions would be applicable, even though the amendment is offered to a completely different bill. The same controversial amendment could be presented to the Senate a second time in the same year if a motion to that effect were made and adopted by a three-fifths or two-thirds vote without any debate or after a very limited amount of debate.

The criterion of whether a bill or an amendment is controversial includes the inability of the Majority Leader or any Member offering an amendment to get unanimous consent to proceed with the consideration of the bill or amendment. It could be provided that if two or more Senators oppose consideration of a bill or an amendment, it may not be presented to the Senate a second time during the same session. Whether a proposed amendment or a bill involves the same subject matter as an amendment or a bill previously acted on during that session would have to be determined by the Chair when a point of order was made to the effect that the amendment or bill, as the case might be, being proposed to be considered, involves the same subject matter as that previously acted on by the Senate during that same session. The decision of the Chair, of course, would be subject to an appeal.

A carefully drawn amendement to the Rules prohibiting the consideration of the same subject matter, be it a bill or amendment, more than once during the same session, unless pursuant to a two-thirds or three-fifths vote, could take care of this situation.

4. Utilization of certain established procedures

It is proposed that the Senate should return to certain of its established procedures, previously used for many years but which have in many respects been abandoned for the last two or three decades. First, the Senate should return to morning business and morning hour procedures as stipulated in Rules VII and VIII, immediately following statements by the Majority and Minority Leaders who are now recognized at the beginning of each day's sitting under an Order of the Senate for a period of five or ten minutes. The recognition of the Leaders at the beginning of each meeting of the Senate gives them an opportunity to discuss the anticipated problems which might be confronting the Senate that date, or any other significant observations that the Leaders feel should be called to the attention of the membership at that time. If certain proposed changes concerning the agenda and scheduling of the program, weekly or monthly, are adopted, the Leaders could use the time allowed on Monday morning to announce what the program for the week will be, as well as have it printed in the CONGRESSIONAL Record. With this information available in the CONGRESSIONAL RECORD, the Senators would have a record of the week's program to which they could always turn.

The morning business should be transacted without any debate at all, with the Chair calling for "the presentation of petitions and memorials," followed by filing of "Reports from Committees," a call for the "Introduction of Bills and Joint Resolutions," and lastly, "The Submission of Other Resolutions," as set forth in Rule VII. There should never be any debate allowed during the transaction of morning business.

Following the conclusion of the morning business, as provided for in Rule VIII, the Senate should have a daily call of the calendar when there are any "unobjected to bills" ready for disposition.

To make this procedure operate efficiently, it is proposed that each party appoint a Calendar Committee from its membership. These committees, to consist of three or five members each, would be charged with the responsibility of compiling information from all Members of their respective party as to their opposition to passing any bills on the call of the calendar.

Each committee should be allowed a small staff and office. This would give all Senators a specified place to call to register their concern as to the disposition of any business on a calendar call.

With the compilation of any such data at hand, the members of the Calendar Committee should be present in the Chamber whenever there is a call of the calendar and make known any opposition to the passage of any measure when it is laid before the Senate to be passed "without objection."

It is recommended that the call of the calendar procedure be amended to eliminate debate now provided for in the existing rule. If a bill cannot be passed "without objection" with the indulgence of reservation of objections, it should not be passed under this procedure at all. Such bills falling in this category, as well as any bill against which objection is made, should be left on the calendar for the next call or held until it is motioned up for Senate consideration. Under such established procedure, the need for what is referred to now as "hold" would be eliminated. If it is not possible to pass a bill on the call of the calendar "without objection" or, if objection is made, all such bills will be left on the calendar, and the Leader should then feel free to move to take up any bills on the calendar at any time he sees fit if it comes within the purview of the established agenda and is scheduled for consideration. The idea of a "hold," when developed, only meant not to allow the bill to be passed "without objection." In later years the word "hold" has been expanded to mean that as long as the Leader was willing to indulge a Member, he would allow no action to be taken on such proposed legislation.

After the call of the calendar is disposed of until the end of the morning hour, any resolutions coming "over under the Rule" would be laid before the Senate automatically by the Presiding Officer. When laid before the Senate it remains the pending business until disposed of or the morning hour is concluded, when it goes back to the calendar. Any bill not disposed of which has been laid before the Senate automatically goes back to the calendar at the close of the morning hour and remains there until the leadership or the Senate sees fit to proceed further with its consideration.

After morning business and the conclusion of the morning hour, the unfinished business is laid down for further consideration, and if there is no unfinished business, the Senate would proceed to the consideration of any measure that the Majority Leader saw fit to call up.

The Study Group also proposes that when it appears the Senate has become stalemated over what to do about a particular bill or pending piece of business, the leadership should find it advantageous to move a recess of the Senate, subject to the call of the Chair. This is particularly recommended when it is evident that further debate would be futile at that time and that no progress could be made. A recess subject to the call of the Chair would allow all concerned Members a chance to retreat to their respective cloakrooms or respective groups for discussion and exchange of opinions with the idea of working out any of the differences over which the Senate had become stalemated. An informal discussion among the Members might be able to accomplish much more than just further talk on the floor of the Senate.

The Senate should only recess from day to day instead of adjourning when it appears essential to the leadership that a call of the calendar and morning business should be bypassed either because there is no need for such business or because the leadership wants to get to the unfinished business immediately.

With the Chair having authority to count quorums, if a quorum did not stay on the floor, the Senate would be adjourned or recessed by the Chair, as the case might be. Adjourning or recessing for the lack of a quorum would soon become serious business as far as the public is concerned, and pressure would be brought to bear on the membership to be present so that business might be transacted. Likewise, if a quorum was constantly in attendance, Members who might otherwise waste the time of the Senate would be less likely to take the time of the membership to discuss unessential matters or to discuss matters too long unless they had something worthwhile to offer.

If the Majority Leader, who usually makes motions to proceed to the consideration of a bill, is unable to get unanimous consent to proceed to the consideration of a bill or resolution, it is proposed by this Study Group that it be in order to make a motion to proceed to the consideration of a bill and that that motion be debatable for one hour, to be equally divided. This motion is discussed further on page 12.

If certain reasonable restrictions were placed on debate, the length of debates might become shorter, and if Senators were restrained from reading long debates their presentations would become more intimate to the other Senators present. For example, if some restriction, in the form of a rule if necessary, were placed on reading speeches, the debates would obviously become more effective and shorter. A requirement that no speech be read in its entirety would certainly shorten the length of time each Senator spoke. Senators would be permitted to use their notes, read quotations and part of their speeches, which might be of great benefit to the Senate. Of course, when a Senator is discussing a very complex matter with involved data, etc., or discussing delicate issues where precision is imperative, permission should be allowed for that Senator to read the speech in its entirety.

5. Television

The Study Group feels that broadcasting the entire legislative proceedings of the Senate would not be helpful to either the Senate or the public. At the same time, the Group feels that if the leadership could work out a program for the debate of major issues confronting the country and televise them, as opposed to the day-to-day legislative business, it would be a good idea.

The Leaders could be authorized to work out a program that would schedule debate on a major issue or issues one or two times each week for a period of two or three hours each time. Such broadcasts would occur only when Congress was in session and the Senate was meeting all or most of that week.

51-059 O-87-48 (Pt 21)

This would give the Senators an opportunity to present their views to the country on the issues debated and for the Senate as a whole to provide further leadership for the country—without altering the fundamental and unique nature of the United States Senate.

6. Debate to be relevant to the pending business

The Senate has seen fit in recent years to adopt what is known as the "Pastore Rule." This rule requires that debate be germane to the pending business at the beginning of each new daily session for a three hour period, once the Senate has turned to the unfinished business, pending business, or any new legislative business brought before the Senate during that day. It is doubtful if the Senate would ever concede that all of its debates should be germane to some legislation, but your Study Group recommends that debate be germane to the pending business when the Senate has legislation under consideration unless unanimous consent is granted or a motion without debate is agreed to, to allow a Senator to speak on non-germane matters.

The germaneness requirement should be defined so that it would not have to be too strictly construed, giving all Senators general leeway in developing their speeches. If made too restrictive, much time would be lost in making points of order that the Senator or Senators were not confining their remarks to the pending question. As long as the speech was devoted to the overall pending business, it should be deemed to be relevant or germane to that pending business. Such restriction, although general, would at least keep the debate focused on the general subject with which the Senate was concerned and give the membership a broader background for formulating opinion on the pending business as to whether it should or should not be amended or passed.

After the close of legislative business for the day, speeches could be made on any subject by those who cared to wait around to speak on subjects for home consumption.

7. Debate on motion to consider

It is evident that the Senate is very sensitive to any restrictions placed on debate, particularly when a controversial proposed piece of legislation is at stake. On the other hand, if debate is to be germane to the pending business, it would appear that the debate of the motion to consider a piece of business would be restrictive in nature on how much worthwhile debate could be given to that motion. Besides, once the Senate has agreed to proceed with the consideration of a piece of business, that proposed legislation is wide open for debate in every detail, unless cloture should be involved or a unanimous consent could be reached providing for the contrary. Therefore, the Study Group recommends that some restrictions be placed on the length of debate of a motion to proceed to the consideration of a proposed piece of legislation. If the Senate, in its wisdom, should decide to place a restriction on the debate of a motion to consider, it could place a limit of two hours, to be equally divided and controlled by the two Leaders or persons acting in their behalf.

8. Cloture rule

The cloture rule has been amended to place a 10 hour cap on the time for the consideration of a bill once cloture has been invoked, and while the 100 hours places a definite time to conclude the consideration of any business on which cloture has been invoked, it does not assure that that time will be used wisely. Likewise, while the amendments must be germane once cloture is invoked, there is no assurance that these amendments will have been drafted for the purpose of giving constructive legislation to the country. Too often amendments have been submitted solely for the purpose of delaying final action on the pending business on which cloture has been invoked. The procedure for invoking cloture might be satisfactory and sufficient for the needs of the Senate, but possible delay in post cloture is evident and needs some changes in order to overcome that weakness. There is no limit to the number of amendments that each Senator may call up, and while each Senator, with a few exceptions, is limited to one hour of debate, a single Senator may contrive to use much or most of the 100 hours with little or no accomplishment by calling up amendments and getting roll call votes on which it was evident to begin with that they would not be agreed to; this is possible as long as one-fifth of the Senators present, a quorum being present, are willing to order a roll call vote. There is no limit on how long an amendment may be. Any Member may draft a 1,000-page amendment, submit it, and have it considered, as long as it is germane. A demand for the reading of such long amendments would take a great deal of the Senate's time.

To overcome some of the post cloture filibuster, certain restrictions should be placed in the rule which would certainly aid in shortening, if not eliminating, much of the post cloture filibuster. For example, it is recommended that no Senator, except the Leaders and the managers of the bill, be allowed to offer more than two amendments to be considered after cloture is invoked. It could be required that all amendments to be considered be read between the time the cloture motion is fiied and cloture in invoked. This would keep exceedingly long amendments from being presented. If this were not sufficient, there could be a stipulation that no amendment be in excess of so many words.

Likewise, the Study Group recommends that when an amendment is called up under cloture, even though it be very long, and involve many independent questions, a division of the question should not be permitted. When an individual Member calls up a very long amendment involving many independent parts, under present procedure he can, if he can get the yeas and nays seconded, get thirty or forty roll call votes on a single amendment, when the question is divisible. Placing such a restriction prohibiting a division of the question under cloture procedure would save a great deal of the Senator's time in post cloture consideration of a bill.

Set forth below is a draft of certain provisions of the cloture rule with proposed amendments to accomplish the ends described above:

Notwithstanding the provisions of rule II or rule IV or any other rule of the Senate, at any time a motion signed by sixteen Senators, to bring to a close the debate upon any measure, motion, other matter pending before the Senate, or the unfinished business, *whether or not it is pending before the Senate at that time,* is presented to the Senate, the Presiding Officer, or clerk at the direction of the Presiding Officer, shall at once state the motion to the Senate, and one hour after the Senate meets on the following calendar day but one, he shall lay the motion before the Senate and direct that the clerk call the roll, and upon the ascertainment that a quorum is present, the Presiding Officer shall, without debate, submit to the Senate by a yea-and-nay vote the question:

"Is it the sense of the Senate that the debate shall be brought to a close?" And if that question shall be decided in the affirmative by three-fifths of of Senators duly chosen and sworn—except on a measure or motion to amend the Senate rules, in which case the necessary affirmative vote shall be two-thirds of the Senators present and voting—then said [measure, motion, or other matter pending before the Senate, or the unfinished business,] *proposal on which cloture was voted,* shall be the unfinished business to the exclusion of all other business until disposed of.

Thereafter no Senator shall be entitled to speak in all more than one hour [on the measure, motion, or other matter pending before the Senate, or the unfinished business, the] *on the proposal on which cloture was invoked, and* amendments thereto, and motions affecting the same, and it shall be the duty of the Presiding Officer *or his designee* to keep the time of each Senator who speaks. Except by unanimous consent, no amendment shall be proposed after the vote to bring the debate to a close, unless it had been *read to the Senate after filing of the cloture motion and* submitted in writing to the [Journal Clerk] *Presiding Officer* by 1 o'clock p.m. on the day following the filing of the cloture motion if an amendment in the first degree, and unless it had been *read and* so submitted at least one hour prior to the beginning of the cloture vote if an amendment in the second degree. *No Senator, except the leaders or managers of the proposal may propose or call up more than two amendments. Any amendments when called up may be modified upon request of the proposer to correct errors in lineation and pagination.* No dilatory motion, or dilatory amendment, or amendment not germane shall be in order. *Notwithstanding any other provisions of any standing rule, no request for a division of the question on any amendment called up after cloture is invoked shall be in order.* Points of order, including questions of relevancy, and appeals from the decision of the Presiding Officer, shall be decided without debate, *and the Chair shall enforce these restrictions on his own initiative when no point of order is forthcoming. When the absence of a quorum is suggested, the Chair is authorized to determine if a quorum is present, by counting instead of by roll call.*

After no more than one hundred hours of consideration, *with all time consumed except for time of debate to be calculated at the amount of double time* [of the measure, motion, or other matter on which cloture has been invoked,] *of the proposal on which cloture had been invoked,* the Senate shall proceed, without any further debate on any question, to vote on the final disposition thereof to the exclusion of all amendments not then actually pending before the Senate at that time and to the exclusion of all motions, except a motion to table, or to reconsider and one quorum call on demand to establish the presence of a quorum (and motions required to establish a quorum) immediately before the final vote begins. The one hundred hours may be increased, or *decreased in the case of a national emergency or the last 10 days of a session announced by the Leader,* by the adoption of a motion, decided without debate, by a three-fifths affirmative vote of the Senators duly chosen and sworn. *In the case of any increased* time

thus agreed upon shall be equally divided between and controlled by the Majority and Minority Leaders or their designees. However, only one motion to extend *or limit* time, specified above, may be made in any one calendar day.

[If, for any reason, a measure or matter is reprinted after cloture has been invoked, amendments which were in order prior to the reprinting of the measure or matter will continue to be in order and may be conformed and reprinted at the request of the amendment's sponsor. The conforming changes must be limited to lineation and pagination.

[No Senator shall call up more than two amendments until every other Senator shall have had the opportunity to do likewise.]

Notwithstanding other provisions of this rule, a Senator may yield all or part of his one hour to the majority or minority floor managers of the measure, motion, or matter or to the Majority or Minority Leader, *for their use,* but each Senator specified shall not have more than two hours so yielded to him and may in turn yield such time to other Senators *to be counted against their assigned hour.*

Notwithstanding any other provision of this rule, any Senator who has not used or yielded at least ten minutes, is, if he seeks recognition, guaranteed up to ten minutes, inclusive, to speak only.

[After cloture is invoked, the reading of any amendment, including House amendments, shall be dispensed with when the proposed amendment has been identified and has been available in printed form at the desk of the Members for not less than twenty-four hours.]

Amendments considered under cloture shall not be read, only identified by number and the proposer, when available in printed form for not less than 24 hours.

9. Required germaneness of amendments after a specific time of debate

It is questionable if the Senate would ever concede to a restriction that all amendments offered to proposed legislation must be germane. This Study Group, however, proposes that the Senate give consideration to amending its rules so that after a bill has been under consideration for a specified period of time, that any amendment thereafter be required to be germane, if a motion to that effect is offered and agreed to by a three-fifths vote. Such a motion to require amendments to be germane after that period had expired could not be offered more than once a day and not until some amendments to the bill had been voted on between the time of the vote on the first motion to require the amendments to be germane and the time the next one is offered. Debate of such a motion should either be restricted to one or two hours or be determined without debate. (On this subject, S. Res. 63 by Mr. Byrd was submitted and ordered to lie over under the rule.)

10. Amendments and statement of purpose

The Study Group feels that there should be some requirement, under orders of the leadership or amendment to the rule, that all amendments offered for printing have a capsule résumé at some place under the title of the amendment setting forth a statement of its purpose, and that all major amendments be printed a day in advance of their consideration unless the Senate orders otherwise by unanimous consent. It is also proposed that when any major amendment is modified during its consideration, the amendment, as modified, be made available in written form to all Senators prior to the start of a vote thereon, unless unanimous consent to the contrary be granted.

11. Disallow consideration of amendments when no further time is left for debate

It is recommended that the rules should be amended so that under any circumstances—whether the Senate is operating under a unanimous consent agreement, whether or not any further time is allowed for debate under the Congressional Budget Act, whether further time is prohibited by "Fast Track" legislation, or any other binding order on the Senate—all amendments offered be allowed at least ten minutes or more for debate, if any Members choose to debate them or further amendments after all time for debate has expired should be barred, unless, of course, the amendments are acted on by unanimous consent. One of the basic principles of parliamentary procedure is to allow amendments to any pending business so as to put it in an acceptable form before having a vote on its adoption or rejection. Therefore great consideration should be given not necessarily to shut out further amendments but to develop some formula that would allow at least a very limited amount of debate on any amendment that the Senate is called upon to act on before that vote is taken.

12. Amendment to Rule XVI—Germaneness of amendments to general appropriation bills

There has been considerable criticism of the use of Rule XVI to get amendments added to general appropriation bills which would not otherwise be in order because it proposed legislation to a general appropriation bill, which, under the rule, is not in order, or adds something to a general appropriation bill that is not germane. Under the established procedure of the Senate, if a Member makes a point of order against a pending amendment because it proposes general legislation to a general appropriation bill, or because it proposes to add new subject matter, even though there is nothing in the bill as then pending before the Senate on that subject, if another Member raises the question of germaneness before the Chair rules on the point of order, which must be determined without debate, the Chair must put the question to the Senate. If the Senate votes that the amendment is germane, the point of order falls and the amendment is held to be in order. This procedure has been used a great deal to get matters attached to a general appropriation bill, that otherwise could not be adopted under the rules unless done by a two-thirds vote to suspend the rule after a one-day notice, informing the membership exactly what is proposed to be done.

It is proposed by your Study Group that if the membership wishes to eliminate this procedure without doing too much harm to the will of a majority of the Senate, an amendment to Rule XVI could be drafted that would eliminate such procedure, unless there were actually something in the bill as passed by the House which was proposing such legislation or that the bill contained an item of the exact nature of the amendment being offered.

It is further recommended that the Appropriations Committee be permitted to retain this right to raise the question of germaneness which is now in vogue when the amendment is actually proposed by the Committee on Appropriations, when the amendment is proposed by the legislative committee having jurisdiction over such legislation, or when the amendment is called up by the two Leaders or by someone in their behalf.

This would give considerable protection to the general membership and still allow enough avenues to permit the Senate to work its will by a majority vote. (On this subject, S. Res. 14 by Mr. Byrd was submitted and ordered to lie over under the rule.)

13. Senate committees

Since it is proposed that the Senate itself operate pursuant to an announced agenda agreed to at the beginning of each session, it would appear only natural to require all of the committees of the Senate to act accordingly. This should be further elucidated. The purpose of restricting Senate committees in the transaction of their business is to prohibit the committees from loading the Senate calendar of business with proposed pieces of legislation not within the agenda agreed to by the Senate and which the Senate did not expect to consider during that session. Therefore, the only restriction against what business the Senate committees could transact would be directed against the committees reporting legislation. The committees would be totally free to hold hearings on any subject they would see fit to conduct as long as they did not meet when the Senate was in session. Any prohibition would be against the committees' marking up proposed legislation and ordering it reported to the Senate. The committees would be permitted to file written reports recommending legislation that the Senate should consider but not the bill itself. The report would be solely for the information of the Senate in making up its future agenda. It is also proposed that some provision be made for a motion to be made in the Senate to authorize a committee to report a matter not included in the Senate agenda and that it be eligible for later consideration, if debate of the motion were limited to a short period of time and a vote of three-fifths or two-thirds were required for its adoption. Some limitation could be placed on the number of motions that each committee could offer during a session of the Senate.

14. Prohibit all staffed subcommittees

It is proposed by this Study Group that a prohibition be placed against all staffed subcommittees. Subcommittees would have their activities and responsibilities restricted to the conduct of hearings, compilation of data, and résumés of proposed legislation. The work of Senate committees has become so complicated and extended to such a broad scope of activities that the subcommittees' work has almost become equal to that of the full committees; consequently the reports of subcommittees are seldom reviewed in detail by the full committee. This results in extreme specialization, with the proposed legislation by subcommittees being submitted to the Senate with no Senators knowing anything about the problem except the four or five members of the subcommittee preparing it.

If the activities of the subcommittee were restricted as suggested above, there is no question but what the work load of the Senate would automatically be decreased and the Senate itself would have much more time to conduct its business since it would not have as much legislation confronting it. This would give all of the Senators an opportunity to acquaint themselves with the legislative proposals, more than is possible now with the workload that the Senate undertakes, having so many subcom-

mittees in effect making reports to the Senate with nominal approval of their parent committee.

If a subcommittee wanted to offer an amendment, as opposed to reporting a bill, to some bill pending before the Senate involving the subject with which the Senate was concerned, the responsibilities would fall on that subcommittee to convince the full Senate that such an amendment were essential to the needs of the country.

15. Consolidation of Senate committees

The committee system of the Senate has presented that body with a constant problem. Until 1946 there was no rule which named the standing committees of the Senate and also specified the jurisdiction of each. Prior to 1946, the rule on standing committees only named the committees to be established and stipulated the number of members of each—nothing about the jurisdiction of each. Previous to that time, Senators would submit bills and request that they be referred to a specific committee, or they were referred pursuant to the previous practices of the Senate. In 1946 the Legislative Reorganization Act was passed, which specified the name of each standing committee, the number of members of each, and the jurisdiction of each spelled out in detail. The number of committees was reduced to fifteen. Not long thereafter some special committees were created, but it was not until 1977 (S. Res. 4, 95th Congress, 1st Session) that permanent select committees and special committees were created, along with fifteen standing committees, and both standing and special committees were given legislative jurisdiction of one kind or another.

This picture is becoming more and more cumbersome and it appears that it is time that the Senate attempt once again to do something to consolidate its standing committees into twelve or thirteen in number without eliminating completely the identity of the existing committees. For example, it is proposed that the Intelligence Committee be absorbed by the Appropriations, Armed Services, and Foreign Relations. These are the standing committees, all of which are immediately concerned with the intelligence of our Government. It is thus proposed to authorize these three committees to appoint members from their respective groups to make up a joint subcommittee of these three committees to handle intelligence matters, and this subcommittee would keep their respective full standing committees informed of all information on intelligence that they needed to know. Likewise, it is proposed that the duties and responsibilities of the Budget Committee be absorbed by the Finance and Appropriations Committees, and that these two committees appoint members of their respective committees to make a joint subcommittee to handle the responsibilities and activities of the Budget Committee. The Committees on Finance and Appropriations should be as much concerned about the receipts and expenditures as the Budget Committee itself, and this would give the two committees, combined with the activities and duties of the existing Budget Committee, the opportunity to work closely together and be able, in the opinion of the Study Group, to accomplish the objectives to which all of this had been directed.

Other standing, select, and special committees would be consolidated by merging them with the committees of appropriate jurisdiction. The Veterans' Affairs Committee, once a subcommittee of the Armed Services Committee, would be returned to that Committee; the Small Business Committee would be returned to the Banking, Housing, and Urban Affairs Committee; the Aging Committee would be merged with the Labor and Human Resources Committee; the Ethics Committee would be merged with the Rules and Administration Committee; and the Indian Affairs Committee would be merged with the Committee on Energy and Natural Resources; and all joint committees would be abolished, with the Senate functions of such joint committees being transferred to the Senate standing committee of legislative jurisdiction. The functions of the Joint Committees on the Library and Printing would be assigned to the Committee on Rules and Administration; Joint Taxation to the Finance Committee; and Joint Economic to Banking, Housing, and Urban Affairs.

Committee Assignment Limitations

The remaining 13 committees would be organized into three groups for purposes of assignment limitations. Senators would be allowed to serve on only one committee in each of the three groups of these committees:

I. Appropriations; Armed Services; Finance; Foreign Relations.

II. Banking, Housing and Urban Affairs; Commerce, Science, and Transportation; Environment and Public Works; Energy and Natural Resources; Judiciary.

III. Agriculture, Nutrition, and Forestry; Governmental Affairs; Labor and Human Resources; Rules and Administration.

Part of the purpose of this suggestion is found in the fact that Senators now have too many committee assignments to do their work successfully. At the same time, the distribution of assignments for each Senator should be such that each gets appointments to committees that would give all States and regions of the United States an across-the-board representation on the committees handling legislation with which the whole country would be concerned.

At the present time these great numbers of committee and subcommittee assignments to each Senator prohibit (since frequently so many are meeting at the same time) the Senators from even attending the meetings of many of the committees to which they are assigned. To show this vividly, there follows a table pointing up this problem. This table is organized alphabetically by Senator's name with categories of committee membership listed in individual columns. The last column gives total committee membership for each Senator.

16. Congressional budget process

As indicated in the preceding recommendation (No. 15), the Congressional budget process has upset the committee balance in the Senate. The scope of the Senate Budget Committee has been expanded by unanimous consent, by interpretation, and by precedents and practices to the point that it is actually taking over the responsibilities and jurisdiction of the other standing committees, a purpose which the Senate did not have in mind when it originally adopted the Congressional Budget Act. This should be corrected.

The Study Group first proposes that the Senate give serious consideration to the enactment of a program that would establish a biennial budget and appropriating process. The workload is becoming too great for the Congress to pass all of the general appropriation bills in one year, if it is to give each such bill due consideration. In order to do its job well, the number of general appropriation bills should be divided into two groups, with only half of the general appropriation bills being passed each year. This would give the Appropriations Committees of the two Houses more time to examine their appropriation bills more carefully; there is nothing in the Constitution that would prohibit or restrict this type of procedure.

As already stated, this new role for the Budget Committee was mentioned in recommendation No. 15. It appears to be a very sound idea for the Budget Committees of the two Houses to be subcommittees, in the House of its Appropriations Committee and the Ways and Means Committee, and in the Senate of its Appropriations Committee and the Finance Committee, since these four committees are most vitally concerned with the receipts and expenditures of our Government. If only the Senate moves in that direction, it would be a good start. Not only would such procedure give the major committees concerned with this role of the Congress, or the Senate, as the case might be, in levying taxes and expending money, but the number of the Members of the Senate would be tremendously increased, giving the whole Senate more knowledge and control of the receipts and expenditures by our Government.

17. Any measures involving procedure should be referred to Rules Committee before Senate acts thereon

Because of the experience of the Congress in the last one or two decades in enacting legislation involving specific procedures in the transaction of legislative business, the Senate should take a closer look at some of these problems. It is proposed that any bill or resolution reported to the Senate by a legislative committee having jurisdiction over the general subject matter, which specifically involves a Senate procedure, should be re-referred for a certain period of time to the Committee on Rules and Administration. This would give the Committee on Rules and Administration a chance to determine how such proposed changes would affect Senate procedures. Such a proposal would not have to allow the Committee on Rules and Administration to have any concern with any other part (other than the proposed procedural changes) of the proposed pieces of legislation. The period for reference could be limited to twenty days, thirty days, or sixty days, or whatever the Senate, in its wisdom, should decide.

So many variables in procedure have become evident in the special procedures enacted in the public laws that they only complicate the transaction of legislative business. If all such measures were referred to the Rules Committee for a short period of time, the provisions concerned with procedure only would be studied and, if essential, the variable procedures in the different bills could be brought into more uniformity with other like procedures, or an accepted boiler plate or formula could be designed to fit all such situations so that there would not be such variable procedures in nearly each such public law enacted.

18. There should be some control over the number of roll call votes

Under the Constitution, a roll call vote can be ordered on any question when one-fifth of the Senators present, a quorum being present, sees fit to second such a request. This provision of the Constitution, therefore, would prohibit any rule placing a restriction, contrary to the Constitution, on the number of roll call votes. Therefore, while it is the opinion of many or most of the Senators that the Senate is indulging in too many roll call votes, any attempt to regulate the number must be accomplished some way other than by an amendment to the rules. The leadership of each party might see fit to prevail upon their respective membership to refuse to participate in seconding roll call votes unless the leadership feels that there should be a roll call on a particular subject. For example, when Senators Robinson of Arkansas and McNary of Oregon were the Majority and Minority Leaders of the Senate, it was often noticeable when a roll call vote was requested, if the two Leaders did not favor the request, the request was not sufficiently seconded.

Some such restraints could and should be formulated by the Leaders to eliminate an extraneous number of roll call votes, particularly when the request is made on some issue that is not worthy of the time of the Senate to vote by roll call.

Also, it is noticeable when requests for roll call votes are made, that often not more than seven or eight hands, if that many, are shown, and the Chair states that the request is sufficiently seconded.

Under the established precedents, the seconding of a request for the yeas and nays is not that casual. Such a demand for the yeas and nays under the precedents must be seconded by at least one-fifth of the presumptive quorum, a minimum of eleven with the present membership of 100 Members. Under the precedent, a demand for the yeas and nays immediately following a call of the Senate is seconded by one-fifth of those answering such call or immediately following a yea and nay vote a request must be seconded by one-fifth of those voting. Thus, if these precedents are followed and the Chair is required to determine that one-fifth of those who answered the last quorum call or the last roll call vote in which 80 or 90 Senators participated, eleven would no longer be enough to order the yeas and nays.

SUMMARY OF SENATE VOTES AND USAGE OF TIME—1985

I. TOTAL VOTES: 258 AS OF OCTOBER 25, 1985

A. Votes on Monday, 6 (2%).
B. Votes on Friday, 31 (12%).
C. Votes before 12:00 noon, 26 (10%).
D. Votes after 6:00 p.m., 74 (28.6%).
E. Votes on Saturday, 4 (1.5%).
F. Votes on Sunday, 2 (0.7%).

II. TIME SPENT ON ROLLCALL VOTES AND QUORUM CALLS

A. Total time consumed on rollcall votes: 100 hours.
B. Amount of time on rollcall votes in excess of the regular order: 36 hours and 25 minutes.
C. Votes in excess of 30 minutes: 13.
D. Longest rollcall vote: 61 minutes.
E. Amount of time spent in quorum calls: 247 hours 48 minutes.
F. Average time for each rollcall vote: 23.6 minutes.

Mr. PRYOR. Mr. President, in conclusion, I simply state that this report—even though I do not necessarily support each of the recommendations—which was before this body 2 years ago, merits our attention and certainly our strongest consideration.

Mr. BYRD. Mr. President, will the distinguished Senator yield?

Mr. PRYOR. I am happy to yield to the distinguished Democratic leader.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Arkansas.

I commend him on the service he has rendered.

With reference to rules changes, and in particular the one to which the distinguished Senator has alluded, several rules changes have been offered by me in a proposal which also encom-

passes the coverage of Senate debate by television and by radio broadcast.

I hope we can implement the rule changes I have proposed. Most of them are needed, anyhow, whether or not we have television or radio coverage, but I believe some of them especially are very much needed if there is coverage at a later date by television and radio.

I think that television and radio coverage should come to the Senate. I believe debates should be televised from gavel to gavel. I have had a change in my attitude toward this subject over the years.

It seems to me that once we have television in the Senate, and the American people are looking at the proceedings and debates of this body, it is going to shape up. The Senate will get its act together. I think Senators will like the idea, once it is implemented. I believe Senators will say we should have done it long ago.

However, I hope that, along with that coverage, there will be certain Senate rules changes.

I thank the distinguished Senator again. I think that what he has said should be one of the best arguments for televised and radio coverage of Senate debate. I commend him and look forward to our working together to implement both these goals—namely, certain Senate rules changes that are needed, and TV and radio coverage of the Senate debates.

Mr. PRYOR. I thank the distinguished Democratic leader for his comments.

I say to the Democratic leader that there is no Member of this body who cherishes the rules, the procedures, and what this institution is all about, and what it has been about since 1789, more than the very distinguished Senator from West Virginia.

For example, even as recently as last week, the Senator from West Virginia proposed and had adopted—I believe on a unanimous vote or a nearly unanimous vote margin—a procedural change in the reconciliation process that I think was extremely well stated. Without question, the leader cared very much about proposing that amendment, not only to prevent these activities from occurring in the future, but also to make the Senate more efficient.

I applaud the Senator from West Virginia, who probably knows more about the rules and the history and the procedures and the precedents of the Senate than any other Member of this body.

I did not come prepared to talk about radio or television in the Senate, but I hope our colleagues in the Senate will recognize what a serious situation we have, of being almost incapable of dealing with many of these measures that are going to require much more expeditious treatment and certainly much more efficient proceedings, as we go into the coming years.

Mr. BYRD. Mr. President, I thank the distinguished Senator, and I again commend him.

Mr. PRYOR. I thank the Democratic leader.

Mr. President, I yield the floor.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

ORDER OF BUSINESS

Mr. McCLURE. Mr. President, we have been in some discussion with the distinguished Democratic leader and this request has been cleared by Senator DOLE.

I ask unanimous consent that the pending matter, the farm bill, be temporarily laid aside until the hour of 1 o'clock today and that the Senate proceed to the consideration of Calendar No. 318, H.R. 3011, making appropriations for the Department of the Interior and related agencies for fiscal year 1986.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Idaho?

Mr. MELCHER. Mr. President, reserving the right to object, I ask the distinguished chairman if he will yield.

Mr. McCLURE. I am happy to yield.

Mr. MELCHER. What will the pending business be at 1 o'clock?

Mr. McCLURE. At 1 o'clock the farm bill in its current status would again become the pending business.

Mr. MELCHER. Might I further inquire, Mr. President, what point in the farm bill?

The PRESIDING OFFICER. The Chair advises the Senator that the amendment of the Senator from Alaska as modified by the Cochran amendment will be the pending amendment.

Mr. MELCHER. Will the chairman permit me to direct my inquiries, without his losing his right to the floor, to the desk?

Mr. McCLURE. Surely.

Mr. MELCHER. Mr. President, when we arrive at that point is an amendment in the second degree in order for further consideration on the farm bill?

The PRESIDING OFFICER. The amendment is open for amendment in the second degree.

Mr. MELCHER. Might I further inquire whether the Chair can advise me if the amendment such as I attempted to offer last night would be in order?

The PRESIDING OFFICER. The amendment offered last night by the Senator from Montana was drafted so as to address parts of the bill not addressed by the pending amendment, and was therefore not in order.

Mr. MELCHER. I thank the Chair and further inquire if remedied would my amendment be in order at that time?

The PRESIDING OFFICER. A properly drafted amendment, the Chair advises the Senator, could be offered to the pending amendment.

Mr. MELCHER. Mr. President, I tell my distinguished friend from Idaho, our chairman of the Energy and Natural Resources Committee, that I have no qualms about taking the next 2 hours and 5 minutes to go into the Interior appropriations bill, and it is obvious that we should get on with doing what we can during this interim. So while I seek recognition at 1 o'clock to call up my amendment, I have no objection to this request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I thank the distinguished Senator from Montana and also all Members on both sides of the aisle for allowing us to use this time to advance this bill.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1986

The PRESIDING OFFICER. The bill will be stated by title. The assistant legislative clerk read as follows:

A bill (H.R. 3011) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1986, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.R. 3011

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of the Interior and related agencies for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, including maintenance of facilities, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, including the general administration of the Bureau of Land Management, **[**$378,556,000**]** *$403,998,000: Provided,* That **[**notwithstanding any other Act,**]** none of the funds made available to the Department of the Interior or the United States Forest Service

during fiscal year 1936 by this or any other Act may be used to implement the proposed jurisdictional interchange program until enactment of legislation which authorizes the jurisdictional interchange.

CONSTRUCTION AND ACCESS

For acquisition of lands and interests therein, and construction of buildings, recreation facilities, roads, trails, and appurtenant facilities, [$1,203,000] *$1,403,000*, to remain available until expended.

PAYMENTS IN LIEU OF TAXES

For expenses necessary to implement the Act of October 20, 1976 (31 U.S.C. 6901-07), [$102,900,000] *$105,000,000*, of which not to exceed $400,000 shall be available for administrative expenses.

[LAND ACQUISITION

[For expenses necessary to carry out the provisions of sections 205, 206, and 318(d) of Public Law 94-579 including administrative expenses and acquisition of lands or waters, or interest therein, $2,800,000, to be derived from the Land and Water Conservation Fund, to remain available until expended.]

OREGON AND CALIFORNIA GRANT LANDS

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein including existing connecting roads on or adjacent to such grant lands; [$66,140,000] *$54,443,000* to remain available until expended: *Provided*, [That the amount provided herein for the purposes of this appropriation on lands administered by the Forest Service shall be transferred to the Forest Service, Department of Agriculture: *Provided further*,] That the amount appropriated herein for road construction shall be transferred to the Federal Highway Administration, Department of Transportation: *Provided further*, That 25 per centum of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California land grant fund and shall be transferred to the General Fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876).

RANGE IMPROVEMENTS

For rehabilitation, protection, and acquisition of lands and interests therein, and improvement of Federal rangelands pursuant to section 401 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701), notwithstanding any other Act, sums equal to fifty per centum of all moneys received during the prior fiscal year under sections 3 and 15 of the Taylor Grazing Act (43 U.S.C. 315, et seq.), *but not less than $10,000,000 (43 U.S.C. 1901)*, and the amount designated for range improvements from grazing fees and mineral leasing receipts from Bankhead-Jones lands transferred to the Department of the Interior pursuant to law, to remain available until expended: *Provided*, That not to exceed $600,000 shall be available for administrative expenses[: *Provided further*, That the dollar equivalent of value, in excess of the grazing fee established under law and paid to the United States Government, received by any permittee or lessee as compensation for an assignment of a grazing permit or lease, or any grazing privileges or rights thereunder, and in excess of the installation and maintenance cost of grazing improvements provided for by the permittee in the allotment management plan or amendments or otherwise approved by the Bureau of Land Management, shall be paid to the Bureau of Land Management and disposed of as provided for by section 401(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701): *Provided further*, That if the dollar value prescribed above is not paid to the Bureau of Land Management, the grazing permit or lease shall be canceled.]

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under sections 209(b), 304(a), 304(b), 305(a), and 504(g) of the Act approved October 21, 1976 (43 U.S.C. 1701), and sections 101 and 203 of Public Law 93-153, to be immediately available until expended[: *Provided*, That pursuant to this Act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, the amounts collected under section 304 of the Act of October 21, 1976, and sections 101 and 203 of Public Law 93-153 and appropriated under this heading shall be sufficient to meet the actual cost, including direct and indirect costs, to the United States, as determined by the Secretary, of the application processing and other activities, including the full cost of preparation of environmental impact statements, required in connection with the application for which such charges are made: *Provided further*, That pursuant to this Act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, no funds other than those appropriated under this heading, or otherwise available under the provisions of subsection 307(c) of the Act of October 21, 1976, may be used to meet the costs determined by the Secretary, in his discretion, to be reasonable under section 304(b) of said Act.]

MISCELLANEOUS TRUST FUNDS

In addition to amounts authorized to be expended under existing law, there is hereby appropriated such amounts as may be contributed under section 307 of the Act of October 21, 1976 (43 U.S.C. 1701), and such amounts as may be advanced for administrative costs, surveys, appraisals, and costs of making conveyances of omitted lands under section 211(b) of that Act, to remain available until expended.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase, erection, and dismantlement of temporary structures and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to $10,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the United States Bureau of Land Management; miscellaneous and emergency expenses of enforcement activities authorized or approved by the Secretary and to be accounted for solely on his certificate, not to exceed $10,000: *Provided*, That appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed to the General Fund of the Treasury from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further*, That appropriations herein made may be expended for surveys of Federal lands of the United States and on a reimbursable basis for surveys of Federal lands of the United States and for protection of lands for the State of Alaska: *Provided further*, That an appeal of any reductions in grazing allotments on public rangelands must be taken within thirty days after receipt of a final grazing allotment decision. Reductions of up to 10 per centum in grazing allotments shall become effective when so designated by the Secretary of the Interior. Upon appeal any proposed reduction in excess of 10 per centum shall be suspended pending final action on the appeal, which shall be completed within two years after the appeal is filed: *Provided further*, That appropriations herein made shall be available for paying costs incidental to the utilization of services contributed by individuals who serve without compensation as volunteers in aid of work of the Bureau.

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

For expenses necessary for scientific and economic studies, conservation, management, investigations, protection, and utilization of sport fishery and wildlife resources, except whales, seals, and sea lions, and for the performance of other authorized functions related to such resources; for the general administration of the United States Fish and Wildlife Service; and for maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge, [$317,202,000] *$303,522,000* of which [$5,000,000] *$3,920,000* to carry out the purposes of 16 U.S.C. 1535, shall remain available until expended; and, of which [$5,649,000] *$5,665,000* shall be for operation and maintenance of fishery mitigation facilities constructed by the Corps of Engineers under the Lower Snake River Compensation Plan, authorized by the Water Resources Development Act of 1976 (90 Stat. 2921), to compensate for loss of fishery resources from water development projects on the Lower Snake River, which will remain available until expended.

CONSTRUCTION AND ANADROMOUS FISH

For construction and acquisition of buildings and other facilities required in the conservation, management, investigations, protection, and utilization of sport fishery and wildlife resources, and the acquisition of lands and interests therein; [$18,209,000] *$15,033,000*, to remain available until expended, of which [$2,000,000] *$4,000,000* shall be available for expenses to carry out the Anadromous Fish Conservation Act (16 U.S.C. 757a-757g).

MIGRATORY BIRD CONSERVATION ACCOUNT

For an advance to the migratory bird conservation account, as authorized by the Act

of October 4, 1971, as amended (16 U.S.C. 715k-3, 5), [$10,000,000] *$20,000,000*, to remain available until expended.

LAND ACQUISITION

For expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l-4-11), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the United States Fish and Wildlife Service, [$45,970,000] *$32,570,000*, to be derived from the Land and Water Conservation Fund, to remain available until expended[: *Provided*, That $2,640,000 for the Cape Charles National Wildlife Refuge shall become available for obligation only upon enactment of authorizing legislation.]

NATIONAL WILDLIFE REFUGE FUND

For expenses necessary to implement the Act of October 17, 1978 (16 U.S.C. 715s), $5,645,000.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 191 passenger motor vehicles of which 178 are for replacement only (including 67 for police-type use); purchase of 4 new aircraft for replacement; acceptance of one donated aircraft as an addition; not to exceed $300,000 for payment, at the discretion of the Secretary, for information, rewards, or evidence concerning violations of laws administered by the United States Fish and Wildlife Service and miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate; repair of damage to public roads within and adjacent to reservation areas caused by operations of the United States Fish and Wildlife Service; options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on conservation areas as are consistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the United States Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources: *Provided*, That pursuant to Public Law 98-244, funds advanced to or spent by the United States Fish and Wildlife Service for costs of the National Fish and Wildlife Foundation shall be repaid to the United States Fish and Wildlife Service from donations received by the Foundation and credited to the appropriation current at the time the payment is received.

National Park Service

OPERATION OF THE NATIONAL PARK SYSTEM

For expenses necessary for the management, operation, and maintenance of areas and facilities administered by the National Park Service (including special road maintenance service to trucking permittees on a reimbursable basis), and for the general administration of the National Park Service, including not to exceed $410,000 for the Roosevelt Campobello International Park Commission[,] *and* $490,000 for the Volunteers-in-the-Park program[, and $350,000 for the National Capital Children's Museum and $350,000 for the Arena Stage as if authorized by the Historic Sites Act of 1935 (16 U.S.C. 462(e)), $628,996,000] *$619,548,000* without regard to the Act of August 24, 1912, as amended (16 U.S.C. 451): *Provided*, That the Park Service shall not enter into future concessionaire contracts, including renewals, that do not include a termination for cause clause that provides for possible extinguishment of possessory interests excluding depreciated book value of concessionaire investments without compensation: *Provided further*, That appropriations for maintenance and improvement of roads within the boundary of Indiana Dunes National Lakeshore shall be available for such purposes without regard to whether title to such road rights-of-way is in the United States: *Provided further, That $85,000 shall be available to assist the town of Harpers Ferry, West Virginia, for police force use.*

NATIONAL RECREATION AND PRESERVATION

For expenses necessary to carry out recreation programs, natural programs, cultural programs, environmental compliance and review, and grant administration, not otherwise provided for, [$11,467,000] *$10,828,000*.

HISTORIC PRESERVATION FUND

For expenses necessary in carrying out the provisions of the Historic Preservation Act of 1966 (80 Stat. 915), as amended (16 U.S.C. 470), [$24,410,000] *$25,480,000* to be derived from the Historic Preservation Fund, established by section 108 of that Act, as amended, to remain available for obligation until September 30, 1987.

[VISITOR FACILITIES FUND

[For grants to the National Park Foundation for reconstruction, rehabilitation, replacement, improvement, relocation, or removal of visitor facilities within the National Park System, and related expenses, as authorized by Public Law 97-433, $7,070,000 to remain available for obligation until September 30, 1989, to be derived from the National Park System Visitor Facilities Fund.]

CONSTRUCTION

For construction, improvements, repair or replacement of physical facilities, without regard to the Act of August 24, 1912, as amended (16 U.S.C. 451), [$104,069,000] *$86,220,000 to remain available until expended, of which $8,500,000 shall be derived by transfer from the National Park System Visitor Facilities Fund and of which not to exceed $8,700,000 shall be expended for engineering and construction of the Burr Trail Scenic Road in and adjacent to the Capitol Reef National Park and the Glen Canyon National Recreation Area, such funds to be transferred to the State of Utah for accomplishment of these activities in accordance with provisions of a cooperative agreement between the National Park Service and the State of Utah: Provided, That appropriations for maintenance and improvement of roads within Capitol Reef National Park and Glen Canyon National Recreation Area shall be available for such purposes without regard to whether title to such road rights-of-way is in the United States: Provided further, That the Burr Trail Scenic Road may deviate up to 75 feet in either direction from the center line of the existing Burr Trail Road*[, including $3,168,000 to carry out the provisions of sections 303 and 304 of Public Law 95-290 and $2,000,000 to assist local communities to protect Mammoth Cave National Park from groundwater pollution: *Provided*, That the National Park Service share of the Mammoth Cave protection project shall not exceed 25 per centum:] *Provided further*, That for payment of obligations incurred for continued construction of the Cumberland Gap Tunnel, as authorized by section 160 of Public Law 93-87, $10,300,000, to be derived from the Highway Trust Fund and to remain available until expended to liquidate contract authority provided under section 104(a)(8) of Public Law 95-599, as amended, such contract authority to remain available until expended: *Provided further*, That funds made available pursuant to this Act for the Cumberland Gap Tunnel shall only be available when the States of Kentucky and Tennessee have entered into an agreement with the National Park Service to operate and maintain all portions of U.S. Route 25E, including the Tunnel, within the boundaries of the Cumberland Gap National Historic Park.

LAND ACQUISITION AND STATE ASSISTANCE

For expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l-4-11), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the National Park Service, [$115,762,000] *$75,400,000*, to be derived from the Land and Water Conservation Fund, to remain available until expended, of which $50,000,000 is for the State Assistance program including $1,650,000 to administer the program: *Provided*, That State administrative expenses associated with the State grant portion of the State Assistance program shall not exceed 15 percent: *Provided further*, That none of the State Assistance funds may be used as a contingency fund: *Provided further*, That of the amounts previously appropriated to the Secretary's contingency fund for grants to States, $852,000 shall be available in 1986 for administrative expenses of the State grant program.

JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

For expenses necessary for operating and maintaining the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, [$4,529,000] *$4,800,000*.

ILLINOIS AND MICHIGAN CANAL NATIONAL HERITAGE CORRIDOR COMMISSION

For the operation of the Illinois and Michigan Canal National Heritage Corridor Commission, $250,000.

[JEFFERSON NATIONAL EXPANSION MEMORIAL COMMISSION

[For the operation of the Jefferson National Expansion Memorial Commission, $75,000.]

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed 1 aircraft and 286 passenger motor vehicles, of which 242 shall be for replacement only, including not to exceed 174 for police-type use and 6 buses; to provide, notwithstanding any other provision of law, at a cost not exceeding $100,000, transportation for children in nearby communities to and from any unit of the National Park System used in connection with organized recreation and interpretive programs of the National Park Service; options for the purchase of land at not to exceed $1 for each option; and for the procurement and delivery of medical services within the jurisdiction of units of the National Park System: *Provided*, That any funds available to the National Park Service may be used, with the approval of the Secretary, to maintain law and order in emergency and other

unforeseen law enforcement situations and conduct emergency search and rescue operations in the National Park System: *Provided further,* That none of the funds appropriated to the National Park Service may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1913: *Provided further,* That none of the funds appropriated to the National Park Service may be used to add industrial facilities to the list of National Historic Landmarks without the consent of the owner: *Provided further,* That the National Park Service may use helicopters and motorized equipment at Death Valley National Monument for removal of feral burros and horses.

GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions, and other areas as authorized by law (43 U.S.C. 31, 1332 and 1340); classify lands as to their mineral and water resources; give engineering supervision to power permittees and Federal Energy Regulatory Commission licensees; administer the minerals exploration program (30 U.S.C. 641); and publish and disseminate data relative to the foregoing activities; [$428,098,000] *$437,655,000*: *Provided,* That $52,324,000 shall be available only for cooperation with States or municipalities for water resources investigations: *Provided further,* That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality: *Provided further,* That in fiscal year 1986 and thereafter, all amortization fees resulting from the Geological Survey providing telecommunications services shall be credited to this appropriation and be available for replacement or expansion of telecommunications services, to remain available until expended: *Provided further,* That the Geological Survey is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private.

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed 16 passenger motor vehicles, for replacement only; reimbursement to the General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for observation wells; expenses of the United States National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts: *Provided,* That appropriations herein made shall be available for paying costs incidental to the utilization of services contributed by individuals who serve without compensation as volunteers in aid of work of the Geological Survey, and that within appropriations herein provided, Geological Survey officials may authorize either direct procurement of or reimbursement for expenses incidental to the effective use of volunteers such as, but not limited to, training, transportation, lodging, subsistence, equipment, and supplies: *Provided further,* That provision for such expenses or services is in accord with volunteer or cooperative agreements made with such individuals, private organizations, educational institutions, or State or local governments.

MINERALS MANAGEMENT SERVICE

LEASING AND ROYALTY MANAGEMENT

For expenses necessary for minerals leasing and environmental studies, regulation of industry operations, and collection of royalties, as authorized by law; for enforcing laws and regulations applicable to oil, gas, and other minerals leases, permits, licenses and operating contracts; and for matching grants or cooperative agreements; including the purchase of not to exceed 8 passenger motor vehicles for replacement only; [$165,118,000] *$170,267,000,* of which not less than [$44,476,000] *$45,495,000* shall be available for royalty management activities including general administration[: *Provided,* That notwithstanding any other provision of law, $125,200,000 shall be deducted from Federal onshore mineral leasing receipts prior to the division and distribution of such receipts between the States and the Treasury and shall be credited to miscellaneous receipts of the Treasury: *Provided further,* That notwithstanding any other provision of law, when in fiscal year 1986 and thereafter any permittee provides data and information to the Secretary pursuant to section 1352(a)(1)(C)(iii) of title 43, United States Code, the Secretary shall pay only the reasonable cost of reproducing such data and information.]

PAYMENTS TO STATES FROM RECEIPTS UNDER MINERAL LEASING

Notwithstanding any other provision of law, in Fiscal Year 1986, monies received from sales, bonuses, royalties (including interest charges collected under the Federal Oil and Gas Royalty Management Act of 1982), and rentals of the public lands under the provisions of the Mineral Lands Leasing Act of 1920, as amended, and the Geothermal Steam Act of 1970, not payable to a State or to the Reclamation Fund shall be available for the payment of interest in accordance with 30 U.S.C. 1721 (b) and (d), prior to credit of such funds to miscellaneous receipts of the Treasury.

BUREAU OF MINES

MINES AND MINERALS

For expenses necessary for conducting inquiries, technological investigations and research concerning the extraction, processing, use and disposal of mineral substances without objectionable social and environmental costs; to foster and encourage private enterprise in the development of mineral resources and the prevention of waste in the mining, minerals, metal and mineral reclamation industries; to inquire into the economic conditions affecting those industries; to promote health and safety in mines and the mineral industry through research; and for other related purposes as authorized by law, [$122,298,000] *$131,445,000,* of which [$75,343,000] *$75,687,000* shall remain available until expended.

ADMINISTRATIVE PROVISIONS

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided,* That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

REGULATION AND TECHNOLOGY

For necessary expenses to carry out the provisions of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, [$85,538,000] *$85,038,000,* including the purchase of not to exceed 14 passenger motor vehicles, of which 9 shall be for replacement only; and uniform allowances of not to exceed $400 for each uniformed employee of the Office of Surface Mining Reclamation and Enforcement; and notwithstanding 31 U.S.C. 3302, an amount equal to receipts to the General Fund of the Treasury from performance bond forfeitures, estimated at $500,000 in fiscal year 1986, to remain available until expended: *Provided, That no funds shall be used to plan, develop, review, finalize or implement any proposed rule, or take any other action which would result in the adoption by the Office of Surface Mining Reclamation and Enforcement of a rule or regulation pursuant to section 507(a) of Public Law 95-87 which would require applicants to reimburse the Department of the Interior for costs incurred in the collection of application fees for permits to conduct surface coal mining and reclamation operations; for permits to conduct coal exploration; for processing mining plans; or for the review of surface coal mining and reclamation permits.*

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out the provisions of title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, including the purchase of not more than 21 passenger motor vehicles, of which 15 shall be for replacement only, to remain available until expended, [$233,585,000] *$191,295,000,* to be derived from receipts of the Abandoned Mine Reclamation Fund: *Provided,* That pursuant to Public Law 97-365, the Department of the Interior is authorized to utilize up to 20 percent from the recovery of the delinquent debt owed to the United States Government to pay for contracts to collect these debts: *Provided further,* That of the funds made available to the States to contract for reclamation projects authorized in section 406(a) of Public Law 95-87, administrative expenses may not exceed 15 percent: *Provided further,* That none of these funds shall be used for a reclamation grant to any State if the State has not established a system acceptable to the Office of Surface Mining Reclamation and Enforcement and agreed to participate in a nationwide data system through which all permit applications and permanent program permits are reviewed and either denied or revoked if the persons (or those who control such persons) applying for or receiving such permits have outstanding state or Federal civil penalties, outstanding state or Federal environmental violations, including cessation orders, or past due Abandoned Mine Land fees: *Provided further,* That none of the funds available to the States pursuant to title IV of Public Law 95-87, shall be granted to any State which is failing to take enforcement action

when violations of section 521(a) of the Act or the approved State programs are observed, unless that State has entered into an explicit agreement with the Office of Surface Mining Reclamation and Enforcement to remedy said failure to enforce[: *Provided further,* That the Office of Surface Mining Reclamation and Enforcement is to apportion the funding for the Secretary's discretionary fund, as referenced in section 402(g)(3) of Public Law 95-87, on the basis of the Abandoned Mine Lands Inventory]: *Provided further,* That expenditure of moneys as authorized in section 402(g)(3) shall be on a priority basis with the first priority being protection of public health, safety, general welfare, and property from extreme danger of adverse effects of coal mining practices, as stated in section 403 of Public Law 95-87[: *Provided further,* That no State will be awarded a reclamation grant, for the purposes of construction, unless its prior years' unobligated balances of the amount granted is less than the amount of the grant obligated in the immediately preceding year.]

BUREAU OF INDIAN AFFAIRS

OPERATION OF INDIAN PROGRAMS

For operation of Indian programs by direct expenditure, contracts, cooperative agreements and grants including expenses necessary to provide education and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order; management, development, improvement, and protection of resources and appurtenant facilities under the jurisdiction of the Bureau of Indian Affairs, including payment of irrigation assessments and charges; acquisition of water rights; advances for Indian industrial and business enterprises; operation of Indian arts and crafts shops and museums; development of Indian arts and crafts, as authorized by law; for the general administration of the Bureau of Indian Affairs, including such expenses in field offices, [$857,303,000] *$877,780,000,* of which not to exceed [$54,656,000] *$51,473,000* for higher education scholarships and assistance to public schools under the Act of April 16, 1934 (48 Stat. 596), as amended (25 U.S.C. 452 et seq.), shall remain available for obligation until September 30, 1987, *and of which $400,000 is for acquisition in trust of land for the Mississippi Band of Choctaw Indians,* and the funds made available to tribes and tribal organizations through contracts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2203; 25 U.S.C. 450 et seq.) shall remain available until September 30, 1987: *Provided,* That this carryover authority does not extend to programs directly operated by the Bureau of Indian Affairs; and includes expenses necessary to carry out the provisions of section 19(a) of Public Law 93-531 (25 U.S.C. 640(d)-18(a)), [$2,886,000] *$2,490,000,* to remain available until expended: *Provided further,* That none of these funds shall be expended as matching funds for programs funded under section 103[(a)(1)(B)(iii)] *(b)(2)* of the *Carl D. Perkins* Vocational Education Act [of 1963, as amended (20 U.S.C. 2303(a)(1)(B)(iii)]: *Provided further,* That no part of any appropriations to the Bureau of Indian Affairs shall be available to provide general assistance payments for Alaska Natives in the State of Alaska unless and until otherwise specifically provided for by Congress: *Provided further, That notwithstanding any law or regulation, in allocating funds for aid to public schools under the Act of April 16, 1934, as amended, the Secretary shall first allocate to each public school in a state which has no schools funded under the Indian School Equalization Formula and to each public school district or state education agency which contracts directly for funds available under the Act of April 16, 1934, as amended, the same amount per pupil as schools in that state received under that Act in the fiscal year ending September 30, 1985: Provided further, That notwithstanding any other provision of law, within fourteen days of the date of enactment of this Act the Snowflake Dormitory in Arizona shall be closed and thereafter no funds available to the Bureau of Indian Affairs shall be available to operate an educational or boarding program at that location: Provided further, That of the amounts available for general assistance payments, $16,510,000 is not available for obligation until July 1, 1986.*

CONSTRUCTION

For construction, major repair and improvement of irrigation and power systems, including architectural and engineering services by contract; acquisition of lands and interests in lands; preparation of lands for farming; and construction, repair, and improvement of Indian housing, [$45,195,000] *$141,254,000,* to remain available until expended[: *Provided,* That such amounts as may be available for the construction of the Navajo Indian Irrigation Project may be transferred to the Bureau of Reclamation]: *Provided, That such amount includes $65,000,000 for use by the Secretary to construct homes and related facilities for the Navajo and Hopi Indian Relocation Commission in lieu of construction by the Commission under section 15(d)(3) of the Act of December 22, 1974 (88 Stat. 1719; 25 U.S.C. 640(d)-14(d)(3)), and to expedite relocations and construction under this proviso (1) the Secretary shall not be required to enter into contracts under section 102 of the Indian Self-Determination Act (88 Stat. 2206; 25 U.S.C. 450f) in carrying out this proviso, (2) the Secretary's authority under section 106(a) of the Indian Self Determination Act (88 Stat. 2210; 25 U.S.C. 450j(a)) shall apply for contracts for construction under this proviso without regard to the status of the contractors, (3) the Secretary may carry out construction and lease approvals or executions under this proviso without regard to the Commission's regulations and under such administrative procedures as the Secretary may adopt without regard to the rulemaking requirements of any law, executive order, or regulation, (4) an action under this proviso is neither a major Federal action for the purposes of the National Environmental Policy Act of 1969, as amended, nor subject to the Act of June 27, 1960, as amended (74 Stat. 220; 16 U.S.C. 469 et seq.), (5) after January 1, 1986, the Secretary may issue leases and rights-of-way for housing and related facilities to be constructed on the lands which are subject to section 11(h) of the Act of December 22, 1974, as amended (25 U.S.C. 640d-10(h)), and (6) after April 30, 1986, the Secretary may issue leases and rights-of-way on land held in trust for the Navajo Tribe to provide for housing and related facilities for those eligible relocatees who had applied by November 30, 1985 to the tribe for leases on tribal trust land but whose applications had not been either granted or denied by April 30, 1986.*

ROAD CONSTRUCTION

[For construction of roads and bridges pursuant to authority contained in 23 U.S.C. 203, the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13), and the Act of May 26, 1928 (45 Stat. 750; 25 U.S.C. 318a), $785,000 to remain available until expended: *Provided,* That not] *Not* to exceed 5 percent of contract authority available to the Bureau of Indian Affairs from the Federal Highway Trust Fund may be used to cover roads program management costs and construction supervision costs of the Bureau of Indian Affairs *: Provided, That $3,200,000 of the contract authority available to the Bureau of Indian Affairs from the Federal Highway Trust Fund for road construction to serve the Navajo Reservation shall be used by the Secretary of the Interior for road construction projects to serve land transferred or acquired under the Act of December 22, 1974, as amended (88 Stat. 1712, 25 U.S.C. 64d et seq.): Provided further, That the foregoing shall not alter the amount of funds or contract authority that would otherwise be available for road construction to serve any Indian reservation or land other than the Navajo reservation.*

ALASKA NATIVE ESCROW ACCOUNT

For the Federal contribution to the Alaska Native Escrow Account related to proceeds received by Federal agencies from lands or resources of lands after the date of withdrawal of the land for Native selection as authorized by Public Law 94-204, an amendment to the Alaska Native Claims Settlement Act (43 U.S.C. 16123, 89 Stat. 1476), and Public Law 96-487, the Alaska National Interest Lands Conservation Act (94 Stat. 2497), $7,877,000: Provided, That those funds appropriated hereunder which represent proceeds received from lands which have been conveyed on or before the date of enactment of this Act shall be distributed to the appropriate Native corporations pursuant to Public Law 96-487 immediately upon receipt in the escrow account: Provided further, That those funds which represent proceeds received from lands withdrawn for Native Selection but not yet conveyed on the date of the enactment of this Act will be held in the escrow account and invested until conveyance, and shall, during the time that such funds are on deposit in the escrow account, be entitled to their share of the interest earned by the escrow account pursuant to the first proviso of section 2(b) of Public Law 94-204.

TRIBAL TRUST FUNDS

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated not to exceed $4,000,000 from tribal funds not otherwise available for expenditure.

REVOLVING FUND FOR LOANS

During fiscal year 1986, and within the resources and authority available, gross obligations for the principal amount of direct loans pursuant to the Indian Financing Act of 1974 (88 Stat. 77; 25 U.S.C. 1451 et seq.), shall not exceed $16,300,000*: Provided, That notwithstanding section 102 of the Indian Financing Act of 1974, as amended (25 U.S.C. 1462) and regulations restricting the purposes for loans under that Act, the Secretary may make a loan under title I of that Act to the Zuni Pueblo for the acquisition in trust for the Pueblo of private lands in the area known as Zuni Heaven.*

INDIAN LOAN GUARANTY AND INSURANCE FUND

For payment of interest subsidies on new and outstanding guaranteed loans and for necessary expenses of management and technical assistance in carrying out the provisions of the Indian Financing Act of 1974, as amended (88 Stat. 77; 25 U.S.C. 1451 et seq.), $2,210,000, to remain available until expended: *Provided*, That during fiscal year 1986, total commitments to guarantee loans pursuant to the Indian Financing Act of 1974 (88 Stat. 77; 25 U.S.C. 1451 et seq.), may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed resources and authority available.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans and the Indian loan guarantee and insurance fund) shall be available for expenses of exhibits; and purchase of not to exceed 150 passenger carrying motor vehicles, of which 100 shall be for replacement only.

TERRITORIAL AND INTERNATIONAL AFFAIRS

ADMINISTRATION OF TERRITORIES

For expenses necessary for the administration of territories under the jurisdiction of the Department of the Interior, [$74,752,000] *$80,366,000*, of which (1) [$72,367,000] *$77,893,000* shall be available until expended for technical assistance; *repurchase premium, late charges, and payments of the annual interest rate differential required by the Federal Financing Bank, under terms of the second refinancing of an existing loan to the Guam Power Authority, as authorized by law (Public Law 98-454, 98 Stat. 1732)*; grants to the judiciary in American Samoa for compensation and expenses, as authorized by law (48 U.S.C. 1661(c)); grants to the Government of American Samoa, in addition to current local revenues, for support of governmental functions; *$490,000 for the College of the Virgin Islands Eastern Caribbean Center*; $2,000,000 for a loan to the Government of the United States Virgin Islands, for construction of an extension to the Alexander Hamilton Airport runway, St. Croix, at an interest rate of 4 per centum, to be repaid within a period of twelve years: *Provided*, That issuance of such loan shall be contingent upon approval of a multiyear grant of Airport Improvement Program funds from the Federal Aviation Administration, and a written guarantee from the Government of the United States Virgin Islands as to the source of funds to be used for repayment of the loan; construction grants to the Government of Guam of [$5,393,000] *$4,583,000*, as authorized by law (Public Law 98-454, 98 Stat. 1732); direct grants to the Government of the Northern Mariana Islands as authorized by law (Public Law 94-241, 90 Stat. 272, and Public Law 98-454, 98 Stat. 1732); and (2) [$2,385,000] *$2,473,000* for fiscal year 1986 for salaries and expenses of the Office of Territorial and International Affairs, of which not to exceed $1,000 shall be available during 1986 for official reception and representation expenses: *Provided further*, That the territorial and local governments herein provided for are authorized to make purchases through the General Services Administration: *Provided further*, That all financial transactions of the territorial and local governments herein provided for, including such transactions of all agencies or instrumentalities established or utilized by such governments, shall be audited by the General Accounting Office, in accordance with the provisions of the Budget and Accounting Act, 1921 (42 Stat. 23), as amended, and the Accounting and Auditing Act of 1950 (64 Stat. 834).

TRUST TERRITORY OF THE PACIFIC ISLANDS

For expenses necessary for the Department of the Interior in administration of the Trust Territory of the Pacific Islands pursuant to the Trusteeship Agreement approved by joint resolution of July 18, 1947 (61 Stat. 397), and the Act of June 30, 1954 (68 Stat. 330), as amended (90 Stat. 299; 91 Stat. 1159; 92 Stat. 495), grants for the expenses of the High Commissioner of the Trust Territory of the Pacific Islands; grants for the compensation and expenses of the Judiciary of the Trust Territory of the Pacific Islands; grants to the Trust Territory of the Pacific Islands, in addition to local revenues, for support of governmental functions; [$107,972,000] *$78,172,000*, of which [$85,022,000] *$70,572,000* is for operations[, of which $2,500,000, to remain available until expended, shall be available for the relocation and resettlement of the people of Enjebi (the dri-Enjebi) on Enjebi Island on Enewetak Atoll in the Marshall Islands: *Provided*, That such sum shall be paid to a trustee selected by the local council of Enewetak subject only to the disapproval of the Secretary of the Interior to be held in trust pursuant to the provisions of a trust agreement or amendment thereto approved by the local council of Enewetak subject only to the disapproval of the Secretary of the Interior: *Provided further*, That such fund and the earnings and distribution therefrom shall not be subject to any form of Federal, State, or local taxation: *Provided further*, That the Governments of the United States and the Trust Territory of the Pacific Islands shall not be liable in any cause of action in law or equity from the administration and distribution of the trust funds: *Provided further*, That the funds shall not be paid to the trustee until the people of Enjebi and the local council of Enewetak have entered into a binding agreement with the United States to hold the United States harmless from loss, damage, and liability associated with resettlement of Enjebi by the people of Enjebi;] and [$22,950,000] *$7,600,000* is for construction, to remain available until expended: *Provided further*, That all financial transactions of the Trust Territory, including such transactions of all agencies or instrumentalities established or utilized by such Trust Territory, shall be audited by the General Accounting Office in accordance with the provisions of the Budget and Accounting Act, 1921 (42 Stat. 23), as amended, and the Accounting and Auditing Act of 1950 (64 Stat. 834): *Provided further*, That the government of the Trust Territory of the Pacific Islands is authorized to make purchases through the General Services Administration.

DEPARTMENTAL OFFICES

OFFICE OF THE SECRETARY

For necessary expenses of the Office of the Secretary of the Interior, [$40,856,000] *$44,673,000*, of which not to exceed $10,000 may be for official reception and representation expenses.

OFFICE OF THE SOLICITOR

SALARIES AND EXPENSES

For necessary expenses of the Office of the Solicitor, [$20,266,000] *$20,378,000*.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General, [$15,117,000] *$16,908,000*.

CONSTRUCTION MANAGEMENT

For necessary expenses of the Office of Construction Management, [$87,890,000, including $45,000,000 for operation and maintenance of facilities under the jurisdiction of the Bureau of Indian Affairs and also including $41,990,000, to remain available until expended, for construction, major repair and improvement of buildings, utilities, and other facilities, under the jurisdiction of the Bureau of Indian Affairs, including architectural and engineering services by contract] *$660,000*.

OFFICE OF THE SECRETARY

(SPECIAL FOREIGN CURRENCY PROGRAM)

For payment in foreign currencies which the Treasury Department shall determine to be excess to the normal requirement of the United States, for necessary expenses of the United States Fish and Wildlife Service and the National Park Service as authorized by law, $1,000,000, to remain available until expended: Provided, That this appropriation shall be available, in addition to other appropriations, to such office for payment in the foregoing currencies (7 U.S.C. 1704).

ADMINISTRATIVE PROVISIONS

There is hereby authorized for acquisition from available resources within the Working Capital Fund, 5 additional aircraft, all of which shall be for replacement only: *Provided*, That no programs funded with appropriated funds in the "Office of the Secretary", "Office of the Solicitor", and "Office of Inspector General" may be augmented through the Working Capital Fund or the Consolidated Working Fund.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

[SEC. 102. No funds provided in this title may be used to sell or exchange, or to propose to sell or exchange, lands owned by the United States within a unit of the United States National Wildlife Refuge System or the National Park System.]

SEC. [103] *102*. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 1535 and 1536 of title 31, U.S.C.: *Provided*, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. [104] *103*. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed $300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations ap-

proved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members: *Provided,* That no funds available to the Department of the Interior are available for any expenses of the Great Hall of Commerce.

SEC. [105] *104.* Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. [106] *105.* Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

SEC. [107] *106.* The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes or volcanoes; for emergency reclamation projects under section 410 of Public Law 95-87; and shall transfer, from any no year funds available to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act: *Provided,* That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further,* That funds transferred pursuant to this section must be replenished by a supplemental appropriation which must be requested as promptly as possible.

[SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the preparation for, or conduct of, pre-leasing and leasing activities (including but not limited to: calls for information, tract selection, notices of sale, receipt of bids and award of leases) of lands within:

[(a) An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), located in the Atlantic Ocean, bounded by the following line: from the intersection of the seaward limit of the Commonwealth of Massachusetts territorial sea and the 71 degree west longitude line south along that longitude line to its intersection with the line which passes between blocks 598 and 642 on Outer Continental Shelf protraction diagram NK 19-10; then along that line in an easterly direction to its intersection with the line between blocks 600 and 601 of protraction diagram NK 19-11; then in a northerly direction along that line to the intersection with the 60 meter isobath between blocks 204 and 205 of protraction diagram NK 19-11; then along the 60 meter isobath, starting in a roughly southeasterly direction; then turning northeast and north until such isobath intersects the maritime boundary between Canada and the United States of America, then north northeasterly along this boundary until this line intersects the 60 meter isobath at the northern edge of block 851 of protraction diagram NK 19-6; then along a line that lies between blocks 851 and 807 of protraction diagram NK 19-6 in a westerly direction to the first point of intersection with the seaward limit of the Commonwealth of Massachusetts territorial sea; then southwesterly along the seaward limit of the territorial sea to the point of beginning at the intersection of the seaward limit of the territorial sea and the 71 degree west longitude line.

[(b) The following blocks are excluded from the described area: In protraction diagram NK 19-10, blocks numbered 474 through 478, 516 through 524, 560 through 568, and 604 through 612; in protraction diagram NK 19-6, blocks numbered 969 through 971; in protraction diagram NK 19-5, blocks numbered 1005 through 1008; and in protraction diagram NK 19-8, blocks numbered 37 through 40, 80 through 84, 124 through 127, and 168 through 169.

[(c) The following blocks are included in the described area: In protraction diagram NK 19-11, blocks numbered 633 through 644, 677 through 686, 721 through 724, 765 through 767, 809 through 810, and 853; in protraction diagram NK 19-9, blocks numbered 106, 150, 194, 238, 239, and 283; and in protraction diagram NK 19-6, blocks numbered 854, 899, 929, 943, 944, and 987.

[(d) Blocks in and at the head of submarine canyons: An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (45 U.S.C. 1331(a)), located in the Atlantic Ocean off the coastline of the Commonwealth of Massachusetts, lying at the head of, or within the submarine canyons known as Atlantis Canyon, Veatch Canyon, Hydrographer Canyon, Welker Canyon, Oceanographer Canyon, Gilbert Canyon, Lydonia Canyon, Alvin Canyon, Powell Canyon, and Munson Canyon, and consisting of the following blocks, respectively:

[(1) On Outer Continental Shelf protraction diagram NJ 19-1; blocks 36, 37, 38, 42-44, 80-82, 86-88, 124, 125, 130-132, 168, 169, 174-176, 212, 213.

[(2) On Outer Continental Shelf protraction diagram NJ 19-2; blocks 8, 9, 17-19, 51-52, 53, 54, 61-63, 95-98, 139, 140.

[(3) On Outer Continental Shelf protraction diagram NK 19-10; blocks 916, 917, 921, 922, 960, 961, 965, 966, 1003-1005, 1009, 1011.

[(4) On Outer Continental Shelf protraction diagram NK 19-11; blocks 521, 522, 565, 566, 609, 610, 653-655, 697-700, 734, 735, 741-744, 769, 778-781, 785-788, 813, 814, 822-826, 829-831, 857, 858, 866-869, 873-875, 901, 902, 910-913, 917, 945-947, 955, 956, 979, 980, 989-991, 999.

[(5) On Outer Continental Shelf protraction diagram NK 19-12; blocks 155, 156, 198, 199, 280-282, 324-326, 369-371, 401, 413-416, 442-446, 450, 451, 489-490, 494, 495, 530, 531, 533-540, 574, 575, 577-583, 618, 619, 621-623, 626, 627, 662, 663, 665-667, 671, 672, 706, 707, 710, 711, 750, 751, 754, 755, 794, 795, 798, 799.

[(e) Nothing in this section shall prohibit the lease of that portion of any blocks described in subsection (d) above which lies outside the geographical boundaries of the submarine canyons and submarine canyon heads described in subsection (d) above: *Provided,* That for purposes of this subsection, the geographical boundaries of the submarine canyons and submarine canyon heads shall be those recognized by the National Oceanographic and Atmospheric Administration, Department of Commerce, on the date of enactment of this Act.

[(f) Nothing in this section shall prohibit the Secretary of the Interior from granting contracts for scientific study, the results of which could be used in making future leasing decisions in the planning area and in preparing environmental impact statements as required by the National Environmental Policy Act.

[(g) References made to blocks, protraction diagrams, and isobaths are to such blocks, protraction diagrams, and isobaths as they appear on the map entitled Outer Continental Shelf of the North Atlantic from 39° to 45° North Latitude (Map No. MMS-10), prepared by the United States Department of the Interior, Minerals Management Service, Atlantic OCS Region.

[SEC. 109. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.]

SEC. [110] *107.* Notwithstanding any other provision of law, appropriations in this title shall be available to provide insurance on official motor vehicles, aircraft, and boats operated by the Department of the Interior in Canada and Mexico.

SEC. [111] *108.* No funds provided in this title may be used to detail any employee to an organization unless such detail is in accordance with Office of Personnel Management regulations.

TITLE II—RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

FOREST RESEARCH

For necessary expenses of forest research as authorized by law, [$124,989,000] *$125,420,000,* of which [$4,000,000] *$7,840,000* shall remain available until expended for competitive research grants, as authorized by section 5 of Public Law 95-307.

STATE AND PRIVATE FORESTRY

For necessary expenses of cooperating with, and providing technical and financial assistance to States, Territories, possessions, and others; and for forest pest management activities, [$56,193,000] *$55,786,000,* to remain available for obligation until expended, to carry out activities authorized in Public Law 95-313: *Provided,* That a grant of $3,000,000 shall be made to the State of Minnesota for the purposes authorized by section 6 of Public Law 95-495.

NATIONAL FOREST SYSTEM

For necessary expenses of the Forest Service, not otherwise provided for, for management, protection, improvement, and utilization of the National Forest System, and for liquidation of obligations incurred in the preceding fiscal year for forest fire protection and emergency rehabilitation, including administrative expenses associated with the management of funds provided under the heads "Forest Research", "State and Private Forestry", "National Forest System", "Construction", and "Land Acquisition", [$1,035,433,000] *$1,070,146,000,* of which [$158,408,000] *$164,151,000,* for reforestation, timber stand improvement, and maintenance of forest development roads and trails shall remain available for obliga-

tion until September 30, 1987: *Provided, That of the amount appropriated, $4,000,000 shall be paid within 30 days of enactment of this Act to Edwards Investments as compensation for all of Edwards Investments' interest in all lands which constitute what was formerly the right-of-way of the Chicago, Milwaukee, St. Paul and Pacific Railroad between Avery, Idaho and St. Regis, Montana and as compensation for all of Edwards Investments' interest in all improvements on said lands including, but not limited to, ballast, trestles, tunnels, fills, sheds and drainage structures on or adjacent to said right-of-way, subsequently purchased by Edwards Investments from the Reorganization Court established pursuant to the "Milwaukee Railroad Restructuring Act," (Public Law 96-101, 45 U.S.C. 901 et. seq.): Provided further, That upon payment of said amount the Forest Service shall use and operate said aforementioned lands and improvements thereon as a public road for multiple use purposes and shall keep and maintain said aforementioned lands and improvements thereon in such condition necessary for the continued annual seasonal use as a public road for multiple use purposes: Provided further, That not less than $24,000,000 shall be available for obligation for Timber Salvage Sales activities: Provided further, That the unobligated balances available September 30, 1985 and funds becoming available in fiscal year 1986 under the Act of October 14, 1980 (16 U.S.C. 1606), shall be transferred to the General Fund of the Treasury of the United States on October 1, 1985: Provided further, That notwithstanding any other provision of law, subsection (e) of section 303 of the Act of October 14, 1980, as amended by the Act of January 6, 1983, Public Law 97-424 (16 U.S.C. 1606), is repealed and subsection (d) of section 303 of the Act of October 14, 1980, as amended by the Act of January 6, 1983, Public law 97-424 (16 U.S.C. 1606), is amended to read as follows:*

"(d) The Secretary of Agriculture is hereafter authorized to obligate such sums as are available in the Trust Fund (including any amounts not obligated in previous fiscal years) for—

(1) reforestation and timber stand improvement as specified in section (3)(d) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601 (d)); and

(2) properly allocable administrative costs of the Federal Government for the activities specified above."

CONSTRUCTION

For necessary expenses of the Forest Service, not otherwise provided for, for construction, [$183,785,000] *$219,608,000*, to remain available until expended, of which [$25,649,000] *$20,571,000* is for construction and acquisition of buildings and other facilities; and [$158,136,000] *$199,037,000* is for construction of forest roads and trails by the Forest Service as authorized by 16 U.S.C. 532-538 and 23 U.S.C. 101 and 205: *Provided*, That funds becoming available in fiscal year 1986 under the Act of March 4, 1913 (16 U.S.C. 501), shall be transferred to the General Fund of the Treasury of the United States: *Provided further, That road construction standards used to construct Forest Service roads, purchaser credit roads, or purchaser elect roads shall be applied, or other management initiatives or administrative cost-saving actions taken, including reductions in personnel or overhead charges, in fiscal year 1986 in a manner so as to achieve a 5 percent reduction in the average cost per road mile as compared to fiscal year 1985: Provided further, That such actions shall be taken so as to achieve this 5 percent reduction in each Forest Service region.*

LAND ACQUISITION

For expenses necessary to carry out the provisions of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 4601-4-11), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the Forest Service, [$29,500,000] *$18,025,000*, to be derived from the Land and Water Conservation Fund, to remain available until expended.

[YOUTH CONSERVATION CORPS

[There is appropriated $10,000,000, of which $3,400,000 is hereby transferred to "National Forest System", $3,300,000 is hereby transferred to "Operation of the National Park System", National Park Service, and $3,300,000 is hereby transferred to "Resource Management", United States Fish and Wildlife Service, for high priority projects which shall be carried out as if authorized by the Act of August 13, 1970, as amended by Public Law 93-408.]

ACQUISITION OF LANDS FOR NATIONAL FORESTS, SPECIAL ACTS

For acquisition of land within the exterior boundaries of the Cache, Uinta, and Wasatch National Forests, Utah; the Toiyabe National Forest, Nevada; and the Angeles, San Bernardino, and Cleveland National Forests, California, as authorized by law, [$780,000] *$782,000*, to be derived from forest receipts.

ACQUISITION OF LANDS TO COMPLETE LAND EXCHANGES

For acquisition of lands in accordance with the Act of December 4, 1967, as amended (16 U.S.C. 484a), all funds deposited by State, county or municipal governments, public school districts or other public school authorities pursuant to that Act, to remain available until expended.

RANGE BETTERMENT FUND

For necessary expenses of range rehabilitation, protection, and improvement in accordance with section 401(b)(1), of the Act of October 21, 1976, Public Law 94-579, as amended, 50 per centum of all moneys received during the prior fiscal year, as fees for grazing domestic livestock on lands in National Forests in the sixteen Western States, to remain available until expended.

MISCELLANEOUS TRUST FUNDS

For expenses authorized by 16 U.S.C. 1643(b), $90,000, to remain available until expended, to be derived from the fund established pursuant to 16 U.S.C. 1643(b).

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed 252 passenger motor vehicles of which 13 will be used primarily for law enforcement purposes and of which 233 shall be for replacement only; acquisition of 161 passenger motor vehicles from excess sources, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed 2 for replacement only, and acquisition of 43 aircraft from excess sources; notwithstanding other provisions of law, existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for the replacement aircraft; (b) services pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 for employment under 5 U.S.C. 3109; (c) uniform allowances for each uniformed employee of the Forest Service, not in excess of $400 annually; (d) purchase, erection, and alteration of buildings and other public improvements (7 U.S.C. 2250); (e) acquisition of land, waters, and interests therein, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a); (f) for expenses pursuant to the Volunteers in the National Forest Act of 1972 (16 U.S.C. 558a, 558d, 558a note); and (g) for debt collection contracts in accordance with 31 U.S.C. 3718(c).

None of the funds made available under this Act shall be obligated or expended to change the boundaries of any region, to abolish any region, to move or close any regional office for research, State and private forestry, or National Forest System administration of the Forest Service, Department of Agriculture, without the consent of the House and Senate Committees on Appropriations and the Committee on Agriculture, Nutrition, and Forestry in the United States Senate and the Committee on Agriculture in the United States House of Representatives.

Any appropriations or funds available to the Forest Service may be advanced to the National Forest System appropriation for the emergency rehabilitation of burned-over lands under its jurisdiction.

Appropriations and funds available to the Forest Service shall be available to comply with the requirements of section 313(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1323(a)).

The appropriation structure for the Forest Service may not be altered without advance approval of the House and Senate Committees on Appropriations.

Funds appropriated to the Forest Service shall be available for assistance to or through the Agency for International Development and the Office of International Cooperation and Development in connection with forest and rangeland research, and technical information and assistance in foreign countries.

Funds previously appropriated for timber salvage sales may be recovered from receipts deposited for use by the applicable national forest and credited to the Forest Service Permanent Appropriations to be expended for timber salvage sales from any national forest.

Provisions of section 702(b) of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 2257) shall apply to appropriations available to the Forest Service only to the extent that the proposed transfer is approved by the House and Senate Committees on Appropriations in compliance with the reprogramming procedures contained in House Report 97-942.

No funds appropriated to the Forest Service shall be transferred to the Working Capital Fund of the Department of Agriculture without the approval of the Chief of the Forest Service.

Not to exceed $900,000 shall be available from National Forest System appropriations or permanent appropriations for the specific purpose of removing slash and cull logs from the Bull Run, Oregon, watershed to preserve water quality and reduce fire hazards.

None of the funds made available under this Act shall be obligated or expended to adjust annual recreational residence fees to an amount greater than that annual fee in effect at the time of the next to last fee adjustment, plus 50 per centum. In those cases

where the currently applicable annual recreational residence fee exceeds that adjusted amount, the Forest Service shall credit to the permittee that excess amount, times the number of years that that fee has been in effect, to offset future fees owed to the Forest Service.

Current permit holders who acquired their recreational residence permit after the next to last fee adjustment shall have their annual permit fee computed as if they had their permit prior to the next to last fee adjustment, except that no permittee shall receive an unearned credit.

Notwithstanding any delegations of authority provided for in regulations of the Department of Agriculture or in the Forest Service manual, the Chief of the Forest Service shall, personally and without aid of mechanical devices or persons acting on his behalf, execute (1) all deeds conveying federally owned land which exceeds $250,000 in value, (2) all acceptances of options on lands to be acquired which exceed $250,000 in value, (3) all recommendations that condemnation be initiated, (4) all letters accepting donations of land, (5) all decisions on appeals of decisions related to land transactions made by regional foresters, and (6) land related transmittals to the House or Senate Committees on Appropriations, including all proposals for congressional action such as the acquisition of lands in excess of the approved appraised value, condemnation actions, and other items covered in reprogramming guidelines.

[DEPARTMENT OF THE TREASURY

[ENERGY SECURITY RESERVE

[(RESCISSION)

[Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126), and subsequently made available to carry out title I, part B, of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This rescission shall not apply to:

[(1) funds transferred from the Energy Security Reserve by this Act;

[(2) $500,000,000, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

[(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under title I of the Energy Security Act before the date of enactment of this Act.]

DEPARTMENT OF ENERGY

CLEAN COAL TECHNOLOGY RESERVE

[(TRANSFER OF FUNDS)]

For the purpose of conducting cost-shared clean coal technology projects for the construction and operation of facilities to demonstrate the feasibility for future commercial application of such technology, *there is hereby appropriated to the Secretary of Energy in fiscal year 1986, $100,000,000; fiscal year 1987, $175,000,000; fiscal year 1988, $300,000,000; and fiscal year 1989, $175,000,000, such sums to remain available until expended* [$500,000,000 shall be available to the Secretary of Energy, to remain available until expended, of which (1) $100,000,000 shall be immediately available, (2) an additional $200,000,000 shall be available beginning October 1, 1986, and (3) an additional $200,000,000 shall be available beginning October 1, 1987, such sums to be derived by transfer from funds appropriated to the "Energy security reserve" in the Department of the Treasury by the Department of the Interior and Related Agencies Appropriation Act, 1980 (Public Law 96-126) and subsequently made available to carry out title I, part B of the Energy Security Act (Public Law 96-294) by Public Laws 96-304 and 96-514: *Provided,* That such amount shall be from the amount of $5,700,000,000 initially available only for obligation to projects with Letters of Intent authorized by the Board of Directors of the United States Synthetic Fuels Corporation on or before June 1, 1984:] *Provided, That within 30 days following enactment of this Act, the Secretary of Energy shall, pursuant to the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901, et seq.), issue a general request for proposals for clean coal technology projects for which the Secretary of Energy upon review may provide financial assistance awards. Proposals for clean coal technology projects under this section shall be submitted to the Department of Energy within 60 days after issuance of the general request for proposals. The Secretary of Energy shall make any project selections within 150 days after issuance of the general request for proposals: Provided further,* That the Secretary shall not finance more than 50 per centum of the total costs of a project as estimated by the Secretary as of the date of award of financial assistance: *Provided further,* That cost-sharing by project sponsors is required in each of the design, construction, and operating phases proposed to be included in a project: *Provided further,* That financial assistance for costs in excess of those estimated as of the date of award of original financial assistance may not be provided in excess of the proportion of costs borne by the Government in the original agreement and only up to 25 per centum of the original financial assistance: *Provided further,* That revenues or royalties from prospective operation of projects beyond the time considered in the award of financial assistance, or proceeds from prospective sale of the assets of the project, or revenues or royalties from replication of technology in future projects or plants are not cost-sharing for the purposes of this appropriation: *Provided further,* That other appropriated Federal funds are not cost-sharing for the purposes of this appropriation: *Provided further,* That existing facilities, equipment, and supplies, or previously expended research or development funds are not cost-sharing for the purposes of this appropriation, except as amortized, depreciated, or expensed in normal business practice.

[Within ninety days following enactment of this Act, the Secretary of Energy pursuant to the Federal Nonnuclear Energy Research and Development Act of 1974, as amended (42 U.S.C. 5901, et seq.), shall issue a general request for proposals for clean coal technology projects described in this account, and immediately begin the contract process for providing financial assistance to such projects.]

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), including the acquisition of interest, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, [$299,534,000] *$292,228,000,* to remain available until expended, of which $535,000 is for the functions of the Office of the Federal Inspector for the Alaska Natural Gas Transportation System established pursuant to the authority of Public Law 94-586 (90 Stat. 2908-2909), and [$12,760,000] *$8,230,000* to be derived by transfer from unobligated balances in the "Fossil energy construction" account, [$2,137,000] *$2,010,000* to be derived by transfer from the account entitled "Alternative fuels production", *of which $200,000 is derived from Public Law 98-146 for a wood pellet gasifier facility,* and $2,775,000 to be derived by transfer from amounts derived from fees for guarantees of obligations collected pursuant to section 19 of the Federal Nonnuclear Energy Research and Development Act of 1974, as amended (42 U.S.C. 5919), and deposited in the "Energy security reserve" established by Public Law 96-126: *Provided,* That no part of the sum herein made available shall be used for the field testing of nuclear explosives in the recovery of oil and gas: *Provided further,* That notwithstanding any other provision of law, funds appropriated under this head in Public Law 97-394 for a Western Hemisphere alternative fuels facility feasibility study, which remain unobligated, shall be available for carrying out any fossil energy research and development activities: *Provided further, That $15,000,000 of the sum provided under this heading shall be available for demonstration of the Kilngas coal gasification process, with the provision that the United States Treasury shall be repaid up to double the total Federal expenditure for such process from proceeds to the participants from the commercial sale, lease, manufacture, or use of such process.*

Of the funds herein provided, $29,000,000 is for implementation of the June 1984 multiyear, cost-shared magnetohydrodynamics program targeted on proof of concept testing: Provided, That 20 percent private sector cash or in-kind contributions shall be required for obligations incurred in fiscal year 1986 and shall increase by ten percent for obligations incurred in each subsequent fiscal year over the life of the proof of concept plan: Provided further, That existing facilities, equipment, and supplies, or previously expended research or development funds are not cost-sharing for the purposes of this appropriation, except as amortized, depreciated, or expensed in normal business practice: Provided further, That cost sharing shall not be required for the basic supporting research activities, such as that undertaken at bench scale or conducted by universities.

NAVAL PETROLEUM AND OIL SHALE RESERVES

For necessary expenses in carrying out naval petroleum and oil shale reserves activities, including the purchase of not to exceed 3 passenger motor vehicles, for replacement only, $13,668,000, to remain available until expended.

ENERGY CONSERVATION

For necessary expenses in carrying out energy conservation activities, [$468,326,000] *$436,587,000,* to remain available until expended[: *Provided,* That pursuant to section 111(b)(1)(B) of the Energy Reorganization Act of 1974, as amended, 42 U.S.C. 5821(b)(1)(B), of the amount appropriated under this head, $10,319,000 shall be available for a grant for basic industry research facilities located at Northwestern University without section 111(b)(2) of such Act being applicable: *Provided further,* That section 404 of Public

Law 98-558 shall not be effective in any fiscal year in which the amount made available for low income weatherization assistance from appropriations under this head is less than 5 per centum above the amount made available in fiscal year 1985.]

ECONOMIC REGULATION

For necessary expenses in carrying out the activities of the Economic Regulatory Administration and the Office of Hearings and Appeals, $24,623,000.

EMERGENCY PREPAREDNESS

For necessary expenses in carrying out emergency preparedness activities, [$3,989,000] *$6,754,000.*

STRATEGIC PETROLEUM RESERVE

For expenses necessary to carry out the provisions of sections 151 through 166 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), [$199,017,000] *$113,043,000*, to remain available until expended[: *Provided*, That in compliance with section 160(d)(1) of the Energy Policy and Conservation Act (Public Law 94-163), as amended, the minimum required rate of fill during fiscal year 1986 is 100,000 barrels a day until the Strategic Petroleum Reserve is 500,000,000 barrels and 50,000 barrels a day thereafter.]

ENERGY INFORMATION ADMINISTRATION

For necessary expenses in carrying out the activities of the Energy Information Administration, [$60,782,000] *$60,682,000.*

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Appropriations under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

From appropriations under this Act, transfers of sums may be made to other agencies of the Government for the performance of work for which the appropriation is made.

None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign: *Provided*, That revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with projects of the Department appropriated under this Act may be retained by the Secretary of Energy, to be available until expended, and used only for plant construction, operation, costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements: *Provided further*, That the remainder of revenues after the making of such payments shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That any contract, agreement or provision thereof entered into by the Secretary pursuant to this authority shall not be executed prior to the expiration of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt by the Speaker of the House of Representatives and the President of the Senate of a full and comprehensive report on such project, including the facts and circumstances relied upon in support of the proposed project.

The Secretary of Energy may transfer to the Emergency Preparedness appropriation such funds as are necessary to meet any unforeseen emergency needs from any funds available to the Department of Energy from this Act.

The reporting requirement established by the last paragraph under the heading "Department of Energy Alternative Fuels Production" in an Act making appropriations for the Department of the Interior and Related Agencies for the fiscal year ending September 30, 1980, (42 U.S.C. 5915 note; Public Law 96-126) is hereby rescinded.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION

INDIAN HEALTH SERVICES

For expenses necessary to carry out the Act of August 5, 1954 (68 Stat. 674), the Indian Self-Determination Act, the Indian Health Care Improvement Act, and titles III and V and section 338G of the Public Health Service Act with respect to the Indian Health Service, including hire of passenger motor vehicles and aircraft; purchase of reprints; purchase and erection of portable buildings; payments for telephone service in private residences in the field, when authorized under regulations approved by the Secretary, [$836,483,000] *$802,684,000*: *Provided*, That funds made available to tribes and tribal organizations through grants and contracts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2203; 25 U.S.C. 450), shall remain available until September 30, 1987. Funds provided in this Act may be used for one-year contracts and grants which are to be performed in two fiscal years, so long as the total obligation is recorded in the year for which the funds are appropriated: *Provided further*, That the amounts collected by the Secretary of Health and Human Services under the authority of title IV of the Indian Health Care Improvement Act shall be available until September 30, 1987, for the purpose of achieving compliance with the applicable conditions and requirements of titles XVIII and XIX of the Social Security Act (exclusive of planning, design, construction of new facilities, or major renovation of existing Indian Health Service facilities): *Provided further*, That funding contained herein, and in any earlier appropriation Acts, for scholarship programs under section 103 of the Indian Health Care Improvement Act and section 338G of the Public Health Service Act with respect to the Indian Health Service shall remain available for expenditure until September 30, 1987.

INDIAN HEALTH FACILITIES

For construction, major repair, improvement, and equipment of health and related auxiliary facilities, including quarters for personnel; preparation of plans, specifications, and drawings; acquisition of sites, purchase and erection of portable buildings, purchases of trailers and for provision of domestic and community sanitation facilities for Indians, as authorized by section 7 of the Act of August 5, 1954 (42 U.S.C. 2004a), the Indian Self-Determination Act and the Indian Health Care Improvement Act, [$61,483,000] *$35,888,000*, to remain available until expended.

ADMINISTRATIVE PROVISIONS

INDIAN HEALTH SERVICE

Appropriations in this Act to the Indian Health Service, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, and for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities: *Provided*, That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriation Acts: *Provided further*, That non-Indian patients may be extended health care at all Indian Health Service facilities, if such care can be extended without impairing the ability of the Indian Health Service to fulfill its responsibility to provide health care to Indians served by such facilities and subject to such reasonable charges as the Secretary of Health and Human Services shall prescribe, the proceeds of which shall be deposited in the fund established by sections 401 and 402 of the Indian Health Care Improvement Act: *Provided further*, That funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation: *Provided further*, That with the exception of service units which currently have a billing policy, the Indian Health Service shall not initiate any further action to bill Indians in order to collect from third-party payers nor to charge those Indians who may have the economic means to pay unless and until such time as Congress has agreed upon a specific policy to do so and has directed the Indian Health Service to implement such a policy[: *Provided further*, That notwithstanding any other provision of law, to satisfy the outstanding judgment against the Seattle Indian Health Board resulting from termination of its occupancy of the Kobe Park building in Seattle, Washington, $270,000 plus interest shall be provided from the unobligated balance available to the Indian Health Service from prior years' appropriations].

DEPARTMENT OF EDUCATION

OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

INDIAN EDUCATION

For necessary expenses to carry out, to the extent not otherwise provided, the Indian Education Act, [$67,656,000] *$67,356,000* of which $50,323,000 shall be for part A and [$15,000,000] *$14,700,000* shall be for parts B and C: *Provided, That the amounts available pursuant to section 423 of the Act shall remain available for obligation until September 30, 1987.*

OTHER RELATED AGENCIES

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Navajo and Hopi Indian Relocation Commission as authorized by Public Law 93-531, [$20,442,000] *$22,241,000* to remain available until expended, for operating expenses of the Commission: *Provided, That notwith-*

standing any regulation to the contrary, the Commission shall notify the Secretary of the Interior by January 1, 1986, of those eligible relocatees who, as of November 30, 1985, were physically domiciled on the lands partitioned to the Hopi Tribe, who had applied by November 30, 1985, for relocation to the lands which are subject to section 11(h) of the Act of December 22, 1974, as amended (25 U.S.C. 640d-10(h)): Provided further, That the Commission shall notify the Secretary of the Interior by January 1, 1986, of those eligible relocatees who, as of November 30, 1985, were physically domiciled on the lands partitioned to the Hopi Tribe, who by November 30, 1985, had not selected a site for relocation and those eligible relocatees shall be designated for relocation to the lands which are subject to section 11(h) of the Act of December 22, 1974, as amended (25 U.S.C. 640d-10(h)).

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES

For necessary expenses of the Smithsonian Institution, including research in the fields of art, science, and history; development, preservation, and documentation of the National Collections; presentation of public exhibits and performances; collection, preparation, dissemination, and exchange of information and publications; conduct of education, training, and museum assistance programs; maintenance, alteration, operation, lease (for terms not to exceed ten years), and protection of buildings, facilities, and approaches; not to exceed $100,000 for services as authorized by 5 U.S.C. 3109; up to 5 replacement passenger vehicles; purchase, rental, repair, and cleaning of uniforms for employees; [$182,599,000] *$176,218,000* including not less than [$793,000] *$777,000* to carry out the provisions of the National Museum Act[, $350,000 to be made available to the trustees of the John F. Kennedy Center for the Performing Arts for payment to the National Symphony Orchestra and $350,000 for payment to the Washington Opera Society for activities related to their responsibilities as resident entities of the Center]: *Provided,* That funds appropriated herein are available for advance payments to independent contractors performing research services or participating in official Smithsonian presentations: *Provided further,* That none of these funds shall be available to a Smithsonian Research Foundation.

MUSEUM PROGRAMS AND RELATED RESEARCH

(SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States, for necessary expenses for carrying out museum programs, scientific and cultural research, and related educational activities, as authorized by law, $2,500,000, to remain available until expended and to be available only to United States institutions: *Provided,* That this appropriation shall be available, in addition to other appropriations to the Smithsonian Institution, for payments in the foregoing currencies: *Provided further,* That none of these funds shall be available to a Smithsonian Research Foundation: *Provided further,* That not to exceed $500,000 may be used to make grant awards to employees of the Smithsonian Institution.

CONSTRUCTION AND IMPROVEMENTS, NATIONAL ZOOLOGICAL PARK

For necessary expenses of planning, construction, remodeling, and equipping of buildings and facilities at the National Zoological Park, by contract or otherwise, [$4,851,000] *$5,551,000* to remain available until expended.

RESTORATION AND RENOVATION OF BUILDINGS

For necessary expenses of restoration and renovation of buildings owned or occupied by the Smithsonian Institution, by contract or otherwise, as authorized by section 2 of the Act of August 22, 1949 (63 Stat. 623), including not to exceed $10,000 for services as authorized by 5 U.S.C. 3109, [$11,075,000] *$12,375,000, to remain available until expended: Provided, That contracts awarded for environmental systems, protection systems, and exterior repair or renovation of buildings of the Smithsonian Institution may be negotiated with selected contractors and awarded on the basis of contractor qualifications as well as price.*

CONSTRUCTION

For necessary expenses to construct, equip, and furnish the Center for African, Near Eastern, and Asian Cultures in the area south of the original Smithsonian Institution Building, $4,000,000, to remain available until expended.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

For the upkeep and operations of the National Gallery of Art, the protection and care of the works of art therein, and administrative expenses incident thereto, as authorized by the Act of March 24, 1937 (50 Stat. 51), as amended by the public resolution of April 13, 1939 (Public Resolution 9, Seventy-sixth Congress), including services as authorized by 5 U.S.C. 3109; payment in advance when authorized by the treasurer of the Gallery for membership in library, museum, and art associations or societies whose publications or services are available to members only, or to members at a price lower than to the general public; purchase, repair, and cleaning of uniforms for guards, and uniforms, or allowances therefor, for other employees as authorized by law (5 U.S.C. 5901-5902); purchase, or rental of devices and services for protecting buildings and contents thereof, and maintenance, alteration, improvement, and repair of buildings, approaches, and grounds; and purchase of services for restoration and repair of works of art for the National Gallery of Art by contracts made, without advertising, with individuals, firms, or organizations at such rates or prices and under such terms and conditions as the Gallery may deem proper, [$34,379,000] *$33,934,000,* of which not to exceed $2,200,000 for the special exhibition program shall remain available until expended.

REPAIR, RESTORATION AND RENOVATION OF BUILDINGS

For necessary expenses of repair, restoration and renovation of buildings, *grounds, and facilities* owned or occupied by the National Gallery of Art, by contract or otherwise, as authorized, [$2,900,000] *$4,000,000,* to remain available until expended: *Provided,* That contracts awarded for environmental systems, protection systems, and exterior repair or renovation of buildings of the National Gallery of Art may be negotiated with selected contractors and awarded on the basis of contractor qualifications as well as price.

WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

SALARIES AND EXPENSES

For expenses necessary in carrying out the provisions of the Woodrow Wilson Memorial Act of 1968 (82 Stat. 1356), including hire of passenger vehicles and services as authorized by 5 U.S.C. 3109, [$3,342,000] *$2,902,000.*

ENDOWMENT CHALLENGE FUND

For the purpose of an endowment challenge fund for the Woodrow Wilson International Center for Scholars, $1,000,000, to remain available until September 30, 1988: Provided, That such sums shall become available only to the extent matched on a three-to-one basis by private funds: Provided further, That these funds may be invested in securities approved by the Board of Trustees and the income from such investments may be used to support programs of the Center deemed appropriate by the Trustees and by the Director of the Center.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL ENDOWMENT FOR THE ARTS

GRANTS AND ADMINISTRATION

For necessary expenses to carry out the National Foundation on the Arts and the Humanities Act of 1965, as amended, [$137,260,000] *$132,900,000,* of which [$121,678,000] *$116,900,000* shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to groups and individuals pursuant to section 5(c) of the Act, of which not less than 20 per centum of the funds provided for section 5(c) shall be available for assistance pursuant to section 5(g) of the Act, and [$15,582,000] *$16,000,000* shall be available for administering the functions of the Act.

MATCHING GRANTS

To carry out the provisions of section 10(a)(2) of the National Foundation on the Arts and the Humanities Act of 1965, as amended, [$29,400,000] *$30,000,000,* to remain available until September 30, 1987, to the National Endowment for the Arts, of which [$20,580,000] *$21,000,000* shall be available for purposes of section 5(1): *Provided,* That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, and devises of money, and other property accepted by the Chairman or by grantees of the Endowment under the provisions of section 10(a)(2), subsections 11(a)(2)(A) and 11(a)(3)(A) during the current and preceding fiscal years for which equal amounts have not previously been appropriated.

ARTS AND ARTIFACTS INDEMNITY FUND

For payment of certified claims for losses or damages pursuant to the Arts and Artifacts Indemnity Act of 1975, $300,000, to remain available until expended: Provided, That such funds shall be available to the National Endowment for the Arts for obligation only for claims for losses or damages which the Federal Council on the Arts and Humanities has certified as valid and reported to the Speaker of the House of Representatives and the President pro tempore of the Senate, as provided by the Act.

NATIONAL ENDOWMENT FOR THE HUMANITIES

GRANTS AND ADMINISTRATION

For necessary expenses to carry out the National Foundation on the Arts and the Humanities Act of 1965, as amended, [$111,549,000] *$108,978,000,* of which [$98,429,000] *$94,650,000* shall be available to the National Endowment for the Humanities for support of activities in the humanities, pursuant to section 7(c) of the Act, of which not less than 20 per centum shall be

available for assistance pursuant to section 7(f) of the Act, and [$13,120,000] *$14,328,000* shall be available for administering the functions of the Act.

MATCHING GRANTS

To carry out the provisions of section 10(a)(2) of the National Foundation on the Arts and the Humanities Act of 1965, as amended, [$27,929,000] *$30,500,000*, to remain available until September 30, 1987, of which [$18,643,000] *$16,500,000* shall be available to the National Endowment for the Humanities for the purposes of section 7(h): *Provided*, That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, and devises of money, and other property accepted by the Chairman or by grantees of the Endowment under the provisions of subsections 11(a)(2)(B) and 11(a)(3)(B) during the current and preceding fiscal years for which equal amounts have not previously been appropriated.

INSTITUTE OF MUSEUM SERVICES

GRANTS AND ADMINISTRATION

For carrying out title II of the Arts, Humanities, and Cultural Affairs Act of 1976, as amended, [$21,560,000] *$15,870,000*: *Provided*, That none of these funds shall be available for the compensation of Executive Level V or higher positions.

ADMINISTRATIVE PROVISIONS

None of the funds appropriated to the National Foundation on the Arts and the Humanities may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1913: *Provided*, That none of the funds appropriated to the National Foundation on the Arts and the Humanities may be used for official reception and representation expenses.

COMMISSION OF FINE ARTS

SALARIES AND EXPENSES

For expenses made necessary by the Act establishing a Commission of Fine Arts (40 U.S.C. 104), [$377,000] *$382,000*.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

SALARIES AND EXPENSES

For expenses made necessary by the Act establishing an Advisory Council on Historic Preservation, Public Law 89-665, as amended, $1,585,000: *Provided*, That none of these funds shall be available for the compensation of Executive Level V or higher positions.

NATIONAL CAPITAL PLANNING COMMISSION

SALARIES AND EXPENSES

For necessary expenses, as authorized by the National Capital Planning Act of 1952 (40 U.S.C. 71-71i), including services as authorized by 5 U.S.C. 3109, [$2,721,000] *$2,703,000*.

FRANKLIN DELANO ROOSEVELT MEMORIAL COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Franklin Delano Roosevelt Memorial Commission, established by the Act of August 11, 1955 (69 Stat. 694), as amended by Public Law 92-332 (86 Stat. 401), $21,000, to remain available for obligation until September 30, 1987.

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

SALARIES AND EXPENSES

For necessary expenses, as authorized by section 17(a) of Public Law 92-578, as amended, [$2,316,000] *$2,329,000* for operating and administrative expenses of the Corporation.

PUBLIC DEVELOPMENT

For public development activities and projects in accordance with the development plan as authorized by section 17(b) of Public Law 92-578, as amended, $3,250,000, to remain available for obligation until expended.

UNITED STATES HOLOCAUST MEMORIAL COUNCIL

HOLOCAUST MEMORIAL COUNCIL

For expenses of the Holocaust Memorial Council, as authorized by Public Law 96-388, [$2,119,000] *$2,125,000*.

TITLE III—GENERAL PROVISIONS

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.

SEC. 304. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. 305. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 306. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 307. [Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, and except for land in the State of Alaska, and lands in the national forest system or public lands which have been released for nonwilderness uses by any Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, and except to carry out the obligations and responsibilities of the Secretary of the Interior under section 17(k)(1)(A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226), none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further*, That in car-

rying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further,* That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of any lands designated by Congress as wilderness study areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness study area or other nonsurface disturbing methods.] *Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312, and except for land in the State of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, and except to carry out the obligations and responsibilities of the Secretary of the Interior under section 17(k)(1) (A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226), none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: Provided, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: Provided further, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: Provided further, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: Provided further, That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, syn thetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and x-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such a data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: Provided further, That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: Provided further, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of any lands designated by Congress as wilderness study areas, that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness study area or other nonsurface disturbing methods.*

SEC. 308. None of the funds provided in this Act shall be used to evaluate, consider, process, or award oil, gas, or geothermal leases on Federal lands in the Mount Baker-Snoqualmie National Forest, State of Washington, within the hydrographic boundaries of the Cedar River municipal watershed upstream of river mile 21.6, the Green River municipal watershed upstream of river mile 61.0, the North Fork of the Tolt River proposed municipal watershed upstream of river mile 11.7, and the South Fork Tolt River municipal watershed upstream of river mile 8.4.

SEC. 309. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless such assessments and this basis therefor are presented to the Committees on Appropriations and are approved by such committees.

SEC. 310. Employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment except as provided by law.

SEC. 311. Notwithstanding any other provisions of law, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Energy, and the Secretary of the Smithsonian Institution, are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the presuppression, detection, and suppression of fires on any units within their jurisdiction.

SEC. 312. [None of the funds provided by this Act to the United States Fish and Wildlife Service may be obligated or expended to plan for, conduct, or supervise deer hunting on the Loxahatchee National Wildlife Refuge.] *Funds available to the Department of the Interior and the Forest Service in fiscal year 1985 for the purpose of contracting for services that require the utilization of privately owned aircraft for the carriage of cargo or freight shall be used only to contract for aircraft that are certified as airworthy by the Administrator of the Federal Aviation Administration as standard category aircraft under 14 CFR 21.183 unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services.*

SEC. 313. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation.

SEC. 314. [No funds provided by this Act shall be expended to allow an increase in animal unit months above licensed active preference as of October 21, 1976, in wilderness study areas administered by the Bureau of Land Management.] *Section 317 of title III of the Act of December 30, 1982 (96 Stat. 1966), is amended by deleting the words "but before December 31, 1985,".*

SEC. 315. Notwithstanding any other provision of law, section 8336(j)(3)(A) of title 5, United States Code is amended by striking "5 years" and inserting in lieu thereof "10 years".

SEC. 316. None of the funds provided in this Act may be used for the augmentation of grizzly bear populations in currently occupied areas of Forest Service grizzly bear habitat or the preparation of specific augmentation proposals to establish new grizzly bear populations in areas identified as suitable grizzly bear habitat in any unit of the National Park System or National Forest System unless the appropriate General Management Plan or Forest Plan provides for such augmentation and has been adopted, including having been available for public comment and review: Provided, That such activities may be conducted only with funds specifically justified for such purpose in an agency budget justification and subsequently approved in a report accompanying an appropriation bill making appropriations for that agency, or with funds provided for through reprogramming procedures: Provided further, That this is not intended to prohibit the emergency relocation of nuisance bears into currently occupied areas of congressionally designated wilderness areas within Forest Service boundaries, or into other currently occupied situation one areas where conflict between bears and humans is not likely to occur: Provided further, That the Secretaries of Interior and Agriculture shall provide for a public meeting at each affected National Forest and National Park Headquarters and the subsequent publication of the "Guidelines for Management Involving Grizzly Bears in the Greater Yellowstone Atea" in the Federal Register, reflecting the public comments: Provided further, That notwithstanding any other provision of law, agencies included in this Act are authorized to reimburse permittees for such

reasonable expenses as may be incurred as a result of moving permitted animals from one location to another, as may be required by the permitting agency, in order to prevent harassment and attacks by grizzly bears. Such expenses are to be determined by the agency responsible for the permitted action.

Mr. McCLURE. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc except the committee amendment beginning on line 22, page 54 through line 17, page 55, and that the bill as thus amended be regarded for purposes of further amendment as original text provided that no points of order shall have been considered to have been waived by agreement to this order.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Idaho?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I shall not object, will the manager yield for two questions without losing his right to the floor?

Mr. McCLURE. I am happy to yield.

Mr. METZENBAUM. Mr. President, is it my understanding that the one amendment not included in the unanimous-consent request is that having to do with the committee amendment pertaining to the Synthetic Fuels Corporation?

Mr. McCLURE. The Senator is correct.

Mr. METZENBAUM. Is it further my understanding that he understands the rules to be as I understand them to be and that is that the first matter before the body immediately after agreeing to the unanimous-consent request will be the committee amendment in conjunction with the Synthetic Fuels Corporation?

Mr. McCLURE. It is my understanding that the committee amendments must be disposed of prior to moving to other amendments and that would mean that the amendment to which the Senator made reference will be the first amendment in order.

Mr. METZENBAUM. Mr. President, is that the understanding of the Chair?

The PRESIDING OFFICER. The Senator is correct.

Mr. METZENBAUM. I thank the Chair.

I have no objection.

Mr. MELCHER. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Montana reserves the right to object.

Mr. MELCHER. Mr. President, may I hear the request?

The PRESIDING OFFICER. The request propounded was to agree to all of the committee amendments, that they be considered as original text for the purpose of further amendment, except for the amendment on page 54, which is the synthetic fuels amendment, and provided that no points of order shall be waived.

Mr. MELCHER. Mr. President, will the distinguished chairman yield?

Mr. McCLURE. I am happy to yield for a question.

Mr. MELCHER. Mr. President, I shall not object. I just want to state that I do have an interest in restoring—or not restoring—but bringing into the bill at least the House amount which I understand is about $32 million for MST research and development.

The chairman is well aware of my interest in that project and I wish to be present anytime the unanimous-consent requests are made on either the time agreement or a certain amendment or on the time agreement on the bill itself.

I thank the distinguished chairman.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Idaho?

Mr. BYRD. Mr. President, what is the request?

The PRESIDING OFFICER. The request of the Senator from Idaho is that the committee amendments be agreed to en bloc, except the amendment on page 55, line 22, which is the synthetic fuel amendment, that points of order are not waived and that the bill, as amended, be considered as original text for the purpose of further amendment.

Mr. BYRD. I thank the Chair.

I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXCEPTED COMMITTEE AMENDMENT

The excepted committee amendment is as follows:

Strike the following language beginning on line 22, page 54 through line 17, page 55:

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

(RESCISSION)

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include al funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126), and subsequently made available to carry out title I, part B, of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This rescission shall not apply to:

(1) funds transferred from the Energy Security Reserve by this Act;

(2) $500,000,000, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under title I of the Energy Security Act before the date of enactment of this Act.

Mr. McCLURE. Mr. President, the fiscal year 1986 Department of the Interior and related agencies appropriations bill as reported by the Appropriations Committee proposes new budget authority totaling $8,113,134,000. This bill represents a decrease in new budget authority of $124.9 million below the House passed level and an increase of $926 million above the adjusted budget request of $7.167 billion.

In one way or another, Mr. President, this bill has an impact on every State and every Member of this Chamber. Therefore, I am hopeful that we can complete floor action quickly and bring back a conference report which both the Congress and the President can support.

The last point is very important. In its present form, according to CBO, the Interior bill is right at the budget resolution conference agreement in budget authority. I want my colleagues to understand that this means we have essentially no room for additional amendments. I also want my colleagues to understand that, while the Interior bill may be at its allocation in budget authority, some allege it is over its allocation in budget outlays.

We will have the opportunity to discuss that more fully later on.

CBO has scored the Interior bill at $8.113 billion in budget authority, and $9.338 billion in budget outlays. The Budget Committee originally scored the Interior bill at $8.313 billion in authority and $9.543 billion in outlays. Subsequently, the Budget Committee adjusted the scoring of the Interior bill downward in both budget authority and budget outlays. Focusing on outlays, which seem to be where the disagreement lies, the Budget Committee, in conjunction with CBO, reduced the outlays scored against the Interior bill by $254 million.

This $254 million adjustment is made up of $112 million in strategic petroleum reserve adjustments—including $81 million from prior year budget authority in construction as a result of an overturned deferral in the 1985 supplemental and $31 million in other SPRO scoring adjustments—$42 million reflecting outlays associated with action taken in the 1985 supplemental, $30 million reflecting a scorekeeping error in the abandoned mine land reclamation fund, and $100 million reflecting half of the reduction of a possible later requirement for the firefighting account. The remaining $30 million comes in an upward adjustment of outlays associated with scoring corrections.

There is still a question, Mr. President, whether we are using CBO scoring or Senate Budget Committee scoring. It was made very clear to me that both the chairman of the Appropriations Committee and the chairman of the Budget Committee stated that the Appropriations Committee should abide by CBO scoring. This is impor-

tant because there is a $100 million difference of opinion between CBO and Senate Budget Committee scoring which relates to how firefighting outlays are scored. Using CBO scoring, as we agreed to do, the outlays charged to the Interior bill would be reduced by $100 million.

There were also several scoring problems that I mentioned during the October 3 allocation meeting of the Appropriations Committee. These include:

First. CBO scores fish and wildlife construction at an 80-percent outlay rate. No construction program outlays at that rate and the correct rate is 20 percent. This difference reduces estimated outlays by $9 million.

Second. CBO scores the new Clean Coal Technology Program at an outlay rate of 20 percent. To derive this figure, CBO called the Energy Department and asked them what the outlay rates are for the fossil energy construction programs. Clean Coal, however, is not an ongoing program but a brandnew initiative which cannot be scored on the same basis as an ongoing program which has been underway for years. The correct outlay figure is $4 million which results in a reduction in estimated outlays of $16 million.

Third. CBO scores the Arts and Artifacts Indemnity Program at 100-percent outlays. In 9 years, only $100,000 has been spent under this authorization. We should not be scored with any outlays, resulting in an outlays savings of $300,000.

Fourth. The Interior bill is scored with outlays in fiscal year 1986 of $182 million for the Synthetic Fuels Corporation. If the Senate adopts the House language, which I am not supporting, and essentially terminates the Synthetic Fuels Corporation, the Interior bill will only be scored with outlay savings of $96 million.

It is my understanding, Mr. President, that while the chairman of the Budget Committee does not disagree with these errors, he has been unwilling to make any further outlay adjustments to the Interior bill.

Let me emphasize that we do not have room for costly amendments. Additional amendments will only worsen our already critical situation and make a difficult conference much more difficult.

Mr. President, there will no doubt be statements made with respect to various programs that the committee is over the budget resolution assumptions. That is certainly true and it is the prerogative of the Appropriations Committee to make the detailed recommendations on funding. I am well aware of the fact that during the final negotiations on the budget resolution a number of Members of the Senate presented their case to the Budget Committee to get line item consideration for certain of their programs. This was not done with repsect to the activities funded in this bill and I do not feel that is the proper role of the Budget Committee—they deal with gross estimates. It is the right and responsibility of the Appropriations Committee to deviate from their assumptions if it can be done within the framework of the total numbers.

For instance, the budget resolution assumes no construction funds for the Smithsonian Institution. We have provided $4 million so the Quadrangle Complex can be completed and there are many other details of our bill which are simply beyond the scope of the Budget Committee considerations.

I will mention only one other area due to the fact that the chairman of the Budget Committee included additional remarks with our report stating that the committee had not taken reductions in administrative costs of Federal agencies. Approximately $123 million in administrative reductions were included in the budget estimates of the various agencies, and the committee approved administrative reductions of approximately $135 million.

Mr. President, Members of the Senate have requested 538 amendments to the Interior appropriation bill, and I will guarantee you that at least 500 of those amendments sought to add money. While I understand the focus now being placed on outlays, the Members of this body should understand that the $8.1 billion in budget authority recommended in this bill is the same level as that approved in fiscal year 1982, the first year that I chaired the subcommittee. I wish to emphasize that that was 1982. We are flat, we are level over that period of time. This bill is unlike many others where a small amount of budget authority will commit us to much larger future outlays. These accounts are basically pay as you go.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a list of the highlights of the committee action on the Interior appropriations bill.

There being no objection, the highlights were ordered to be printed in the RECORD, as follows:

HIGHLIGHTS OF COMMITTEE ACTION

For the Land and Water Conservation Fund, the Committee has recommended $114,825,000, an increase of $108,325,000 over the budget request. This includes $50 million for State grants under LWCF.

For the Fish and Wildlife Service, the committee has recommended an appropriation of $376,770,000, a decrease of $47,056,000 from 1985 appropriations to date. Within this sizable decrease, the committee has recommended increases over the budget for activities such as wildlife refuge operations and maintenance; repair and operation of fish hatcheries; and endangered species protection and recovery.

For the National Park Service, the committee has recommended an appropriation of $822,526,000, a decrease of $103,778,000 from 1985 appropriations to date. Within the 11-percent reduction the committee provided for the National Park Service, the committee has recommended increases over the budget for activities such as management and maintenance of our national parks; historic preservation, including grants to States; and construction and repair of park facilities.

For U.S. Geological Survey and the Bureau of Mines, the committee has recommended additional funds totaling over $18 million. This includes additional funding for Water Institutes, Mineral Institutes, mine safety research, strategic and critical materials research.

For the Forest Service, the committee has recommended an appropriation of $1,070,146,000, a reduction of $41,402,000 from 1985 appropriations to date and a reduction of $64,158,000 from the President's budget. The committee recommendation continues such programs as a competitive research grant program; State and local cooperative insect and fire suppression activities; and an aggressive multiple use management program of national forest system lands for recreation, wildlife, timber, mineral and other activities.

For Fossil Energy Research and development, the committee recommends an appropriation of $292,228,000, an increase of $17,281,000 over 1985 appropriations to date and an increase of $116,200,000 over the 1986 budget.

For Energy Conservation, the committee has recommended $436,587,000. This is an increase of nearly $260 million over the budget request and includes additional funding for the Weatherization Program, EES, EPCA, vehicle propulsion research and development.

For Indian Health, the committee recommends $838,572,000, which will continue necessary services while achieving savings in the construction area.

For National Endowment for the Arts and Humanities, the committee allowance continues the current level for NEH and makes a slight reduction—less than one-half of 1 percent—for NEA.

In addition, the Secretary of the Interior has announced a new program called "Take Pride in America." The purpose of this new task force is to provide broad program direction and service support for and liaison with agencies, bureau's and organizations in program implementation. The cost of this program in fiscal year 1986 is expected to be $350,000 and will be funded within available funds.

(Mr. NICKLES assumed the chair.)

Mr. METZENBAUM. Has the Senator yielded the floor?

Mr. McCLURE. Mr. President, I would like to yield first to the distinguished Senator from Louisiana, the floor manager for the minority, to make whatever statement he may wish to make at this time.

Mr. METZENBAUM. I understand.

Mr. JOHNSTON. Mr. President, I thank and commend my distinguished colleague from Idaho, the chairman of the subcommittee, for having done an excellent job and for giving a statement with which I totally agree.

Mr. President, Senator McCLURE has already elaborated on the specific facts and figures related to this fiscal year 1986 appropriation bill for the Department of the Interior and relat-

ed agencies. I will not take the time of the Senate to reiterate those details now. However, I would like to make a few more points on where the bill stands in comparison to its section 302(b) allocation under the budget resolution.

Budget authority provided in this committee-reported bill totals $8,113,134,000, which is $87 million under the subcommittee allocation. So, we are right on the mark on budget authority. And, let me add—there is no disagreement about budget authority. Budget authority is a very specific, measurable concept. We on the committee know exactly how much budget authority is provided in this bill, so does the Budget Committee, and so does OMB; it is the $8,113,134,000 that I just mentioned, not 1 penny more, not 1 penny less.

The Budget Committee also tracks this and other appropriation bills in terms of outlays which, basically, is an estimate of how fast the funds in a bill will actually be spent. Putting these two concepts in more human terms, Mr. President, if I set a personal budget for myself of $100 a week, that $100 is equivalent to budget authority. Now, if during that week I write checks in the amounts of say $30, $50, and $20, I have used up my budget authority. A call to my bank at the end of the week might indicate that my balance was still $100 because the three checks hadn't been presented for payment. I have no control over those disbursements. The holder of my notes, or checks, will determine the rate of spending. Both that bank and I can only guess when the actual payments, or outlays, from my account will occur. And that, Mr. President, is the crux of the problem in trying to control these appropriation bills in terms of outlays. Outlay estimates are only an educated guess. There is nothing exact or precise about them.

In total, the recommendations for all appropriation bills are within one-half of 1 percent of the budget resolution outlay targets. And, in the past, these outlay numbers have been just that, targets. Given the variance between outlay estimates and actual experience in the past, I believe that one-half of 1 percent is certainly close enough.

The important point, Mr. President, is that the committee has not recommended expenditures that exceed the precise budget authority ceiling for the bill or for the committee jurisdiction as a whole. We are being faulted simply because we cannot control the rate at which obligations are paid. This criticism is shortsighted because we are not being required to control spending "per se" but rather the "rate of spending." Not $1 more nor $1 less would be saved over time by controlling outlays alone. The only way to cut spending is to cut budget authority. We have done that, Mr. President. This bill is under the fiscal year 1985 level by nearly $275 million. Counting inflation, program levels are some $600 million, or 7.5 percent, below last year. More importantly, as I said before, the budget authority in this bill is under its allocation ceiling.

So, the Appropriations Committee has recommended a very reasonable Department of the Interior and Related Agencies appropriation bill for fiscal year 1986. I applaud Senator McCLURE for his efforts to be both frugal and fair and ask that my colleagues support the committee-recommended bill.

Mr. President, we deal in some facts and in some opinions on the subcomittee. The facts are budget authority. Budget authority is real; it is measurable; it is palatable; you can see it; you can gauge it to the exact dollars and cents.

Budget outlays, on the other hand, get into the realm of opinion and into the realm of estimation. And it is in that realm of opinion and estimation that we have our problem with CBO and with OMB.

Mr. President, we have met our target; indeed, we are under our target in terms of budget authority, which are the facts of the matter. In terms of outlays, we have been scored, I believe, improperly with some matters which CBO believes will outlay in this year, and we believe we should not be given credit for that.

I would like to point out, Mr. President, that in fiscal year 1982, fiscal year 1983, and fiscal year 1984—in each of those years—CBO has estimated that outlays would be much higher than outlays actually were. In fiscal year 1982 they estimated that outlays would be $329 million more than they actually were. In fiscal year 1983, $648 million more than they actually were; and in fiscal year 1984, $740 million more than they actually were.

Mr. President, I ask unanimous consent that a table showing those figures along with a copy of a letter from Rudolph G. Penner, Director of the Congressional Budget Office, be printed in the RECORD at this time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, DC, October 23, 1985.

Hon. JAMES A. McCLURE,
Chairman, Subcommittee on Interior and Related Agencies, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: In response to your request of October 16, we have performed a review of CBO's Interior Subcommittee outlay estimates for 1982, 1983, and 1984 as prepared for use with the appropriations action and the first concurrent budget resolution for those years. These estimates were consistent with the budget resolutions in effect at the time estimates were prepared, which were based on information available in February of the year before the fiscal year in question. Thus, in the case of outlay estimates for appropriation bills, the estimate of outlays from prior year budget authority is the same as in the budget resolution adopted by the Congress, and the rate at which we estimate that new obligational authority would outlay is the same as assumed in the budget resolution. Changes from these rates are made only if the appropriation bill would cause program changes that would make these rates inappropriate.

A comparison to actual outlays for these years as reported by the Treasury Department showed the following:

[Fiscal year outlays in millions of dollars]

	1984	1983	1982
Actual	8,541	8,377	8,809
CBO estimates-when appropriation bills were scored	8,950	8,592	8,989

I hope this information will be useful.
With best wishes,
Sincerely,

RUDOLPH G. PENNER.

INTERIOR SUBCOMMITTEE OUTLAY TABLE

[In millions of dollars]

	Fiscal year—		
	1982	1983	1984
Subcommittee allocation	11,200	8,400	9,300
Original CBO estimate	8,989	8,592	8,950
Increase associated w/Supp	149	433	331
Total CBO estimate	9,138	9,025	9,281
Actual outlays	8,809	8,377	8,541
Difference	329	648	740

Mr. JOHNSTON. In my judgment, Mr. President, the estimate of CBO at this time which estimates that outlays will exceed our target are also overestimated by CBO, and when the year is concluded we will find that we were well within our target, not only in budget authority but in budget outlays.

Finally, Mr. President, I would like to say that we will now move to the Synfuels amendment. It is my hope, and I think the hope of the Senator from Idaho, and I believe the hope of others, to deal with that matter expeditiously this morning before we move on to something else. I say that to alert our colleagues who may have an interest in speaking on the Synfuels subject so they come to the floor at this time so that we may conclude it, I hope, by 12:30 or thereabouts.

Mr. President, before I yield the floor, I have an amendment I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Louisiana [Mr. JOHNSTON], proposes an amendment numbered 934.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment——

Mr. METZENBAUM. I object to that. Reserving the right to object, will the Senator from Louisiana be good enough to explain what this amendment is about?

Mr. JOHNSTON. Yes. This is a perfecting amendment to the committee amendment which cuts $500 million from the amount initially available for obligation to projects within the letters of intent authorized by the Board of Directors on or before June 1, 1984, and not obligated or rescinded, and with two provisos: first, that the Board of Directors shall proceed to complete action on these projects under consideration or negotiation by the Corporation as of October 1, 1985, and further provided that such action shall include either the award by the Board of financial assistance to such a project or a determination by the Board that the Corporation will not enter into financial assistance contract for such projects. In sum, it is a cut of $500 million.

Mr. METZENBAUM. It also locks in place some of the awards heretofore made? Is that what the Senator is saying?

Mr. JOHNSTON. No. It does not lock into place anything. It is silent on that question.

Mr. METZENBAUM. Reserving the right of object, I do not know yet whether I will object, I inquire of the Chair as to whether a second-degree amendment is in order at this point.

The PRESIDING OFFICER. The committee amendment proposes to strike language. The language proposed to be stricken is amendable in two degrees. It is in order to offer amendments to the language proposed be stricken.

Mr. METZENBAUM. Do I understand the Chair then to be saying that the Johnston amendment which is an amendment to the committee amendment to strike the language is in order? I have difficulty in comprehending when the committee amendment would be striking the House amendment, the House amendment having eliminated the entire project, and how then an amendment to the committee amendment would be in order.

I have difficulty in following the logic of that position. Is the Chair in a position to explain that?

The PRESIDING OFFICER. The amendment by the Senator from Louisiana is an amendment to the language proposed to be stricken by the committee amendment. It is not an amendment to the committee amendment itself.

Mr. METZENBAUM. Therefore, it would be in order?

The PRESIDING OFFICER. The amendment by the Senator from Louisiana is in order.

Mr. METZENBAUM. I wonder if the Senator from Louisiana would be good enough either to withdraw his amendment or temporarily set it aside. I do not understand it exactly. I would like to read it. I do not want to make an issue in connection with it. I may very well support it. If I might have an opportunity to speak to the basic underlying amendment, the Senator from Louisiana certainly will not lose his position. I assure him that I have no intention of trying to bring anything else up.

Mr. JOHNSTON. Mr. President, I withdraw the amendment.

Mr. McCLURE. Will the Senator yield? First of all, I do know, having checked with the Parliamentarian, that this amendment is in order.

It is the intention of the Senator from Idaho to offer a second-degree amendment to the amendment offered by the Senator from Louisiana. I have no intention to cut off the debate. I want to give the Senate an opportunity to look at more than one alternative rather than simply denying the committee amendment which would have the effect of totally eliminating the Synthetic Fuels Corporation.

Mr. METZENBAUM. As I understand it, the Senator from Louisiana as well as the Senator from Idaho are both within their rights. I am only indicating that in order that we not get detoured in our debate on the basic issue, if the Senator from Ohio was given an adequate time—and the staff—in order to explore this amendment, we very well may be in agreement.

So I ask the action be held up.

Mr. McCLURE. Mr. President, will the Senator from Louisiana yield?

Mr. JOHNSTON. I yield.

Mr. McCLURE. It would be my hope that we could have the amendments pending. I am perfectly willing to provide copies of the amendment to the Senator from Ohio. The debate on the basic committee amendment, the basic issue of the continuance of the Synthetic Fuels Corporation is certainly debatable under those circumstances as would be the substance of the first- and second-degree amendments.

Mr. METZENBAUM. I understand that. I merely suggest the Senator from Idaho be good enough to withhold the second-degree amendment, and the Senator from Louisiana be good enough to lay his amendment temporarily aside without losing his position.

Mr. McCLURE. Obviously, if we laid them aside somebody else could come in and offer amendments instead. The only way to protect ourselves under those circumstances is to offer the amendments, and then have them debated. That is a lot easier than getting unanimous consent that we be recognized to offer the first and second-degree amendments, which I would suspect would be difficult to obtain.

Mr. METZENBAUM. I will not quibble with the manager. The Senator has the right to recognition and the Democratic floor manager has equal rights. I am trying to work out a modus operandi. I am trying to debate the issue.

Mr. JOHNSTON. Perhaps, Mr. President, if we had a quorum call for a moment so the Senator could look at the amendment.

Mr. METZENBAUM. We all sort of feel we tried to get this matter to a vote before 1 o'clock. I am receptive to doing that. It is my understanding that Senators EVANS, NICKLES, and I think Senator BRADLEY wishes to be heard on this issue. I am concerned that the clock is going to run on us. Why could we not agree that the Senator from Idaho will lay down his second-degree amendment, that by unanimous consent we would agree to lay both of those aside for a half-hour or something of the kind and come back to them?

Mr. JOHNSTON. In effect not vote on them for a half-hour?

Mr. METZENBAUM. That is right.

Mr. McCLURE. I have no objection to that.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the Senator from Idaho be recognized for the purpose of offering a second-degree amendment assuming the same to be in order, that both the first-degree amendment and the second-degree amendment then be laid aside unless the second-degree amendment is out of order according to the Chair. I doubt that it is.

The PRESIDING OFFICER. If the Senator would withhold for a moment, the Chair understood the unanimous-consent request made was for the clerk to suspend from reading the amendment. Is that the question still pending?

Mr. METZENBAUM. I waive the objection.

AMENDMENT No. 934

(Purpose: Perfecting amendment providing for a further rescission of SFC obligational authority by $500 million)

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Louisiana [Mr. JOHNSTON], proposes an amendment numbered 934.

The text of the amendment follows:

Delete the language proposed to be stricken from page 54, line 25, through page 55, line 17, and insert the following:

"Of the funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126) and subsequently made available to carry out Title I, Part B of the Energy Security Act (Public

Law 96-294) by Public Laws 96-304, 96-514, and 98-473, $500,000,000 of the amounts initially available only for obligation to projects with Letters of Intent authorized by the Board of Directors on or before June 1, 1984, and not obligated are rescinded; *Provided*, That the Board of Directors shall proceed to complete action on those projects under consideration or negotiation by the Corporation as of October 1, 1985; *Provided further*, That such actions shall include either the award by the Board of financial assistance to such a project or a determination by the Board that the Corporation will not enter into financial assistance contracts for such project.".

The PRESIDING OFFICER. The Chair would like to clarify the situation in which amendments are in order. If a motion to strike is pending, that motion, itself, is not amendable, but the language proposed to be stricken is amendable in two degrees. The first amendment proposed by the Senator from Louisiana is, itself, a motion to strike, and since the motion to strike is not amendable, no further amendments would be in order at this time.

Mr. McCLURE. The Johnston amendment, Mr. President, is a motion to strike and insert, I believe, certain portions and would be amendable, but a motion to strike is not.

The PRESIDING OFFICER. The Senator is correct.

AMENDMENT NO. 935 TO AMENDMENT NO. 934

(Purpose: 2nd degree amendment to SFC perfecting amendment so as to provide an October 1, 1986, suspension of the SFC's authority to award financial assistance and for termination of the SFC)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. McCLURE] proposes an amendment numbered 935 to amendment numbered 934.

At the end of amendment 934 add the following:

"*Provided further*, That, notwithstanding section 191 of the Energy Security Act (Public Law 96-294), (a) the Board of Directors shall make no new awards or commitments for financial assistance pursuant to section 131 of the Energy Security Act for synthetic fuel projects after September 30, 1986; and (b) the Corporation shall terminate on September 30, 1991, except that the President, on recommendation of the Board of Directors, may by Executive order terminate the Corporation at an earlier date, but in no event prior to September 30, 1989.".

Mr. McCLURE. Mr. President, now I understand that the Senator from Ohio had requested that we temporarily defer action on the first-degree and second-degree amendments offered by the Senator from Louisiana and the Senator from Idaho, and that he might proceed with the debate on the committee amendment. Do I state that correctly?

Mr. METZENBAUM. That is correct, without waiving my rights.

Mr. McCLURE. Mr. President, I therefore ask that the debate for the next one-half hour be on the committee amendment and not the first- or second-degree amendments.

Mr. METZENBAUM. Mr. President, I do not think that is what the Senator from Ohio is suggesting. It is all right for those who wish to debate to do so, but I would like to get into the basic issue and see what the amendment is all about, consulting with my staff, the staff of Senator BRADLEY, and the staff of Senator EVANS so that we would not be limited in our debate.

Mr. McCLURE. That is fine with me.

The PRESIDING OFFICER. Is there objection to the request?

Mr. EVANS. Reserving the right to object, if we are limited to a half-hour, at the end of the half-hour are we to return to the two amendments and, as such, be technically confined to debating those two amendments rather than the underlying proposition?

Mr. McCLURE. It is not my intention to limit this debate in any way, shape, or form. We have three amendments pending. We have the committee amendment and two amendments to the underlying text. They all are before us and are all debatable.

I have no problem at all saying to the Senator from Ohio or the Senator from Washington, that as long as we have no time agreement on this amendment they have an unlimited right to debate the underlying issue of, whether or not the Synthetic Fuels Corporation should exist at all.

Mr. EVANS. Then for what purpose is this unanimous-consent request?

Mr. McCLURE. To satisfy the request of the Senator from Ohio.

Mr. EVANS. So there would be, in essence, no difference between what we debate now and what we debate a half-hour from now?

Mr. McCLURE. That is correct.

The PRESIDING OFFICER. Without objection, the request is agreed to.

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise in opposition to the committee amendment.

The committee amendment restored $7.4 billion to the budget to keep the United States Synthetic Fuels Corporation alive.

I originally supported enthusiastically the Synthetic Fuels Corporation. At that point, we knew there was an oil shortage and we envisioned creating a Synthetic Fuels Corporation that would step into the gap and would use the billions of dollars that we made available to the Synthetic Fuels Corporation to develop synthetic fuels.

But now in retrospect, and in view of the conduct and the actions of the Synthetic Fuels Corporation, I have come to believe that the expenditure of those dollars is an unjustified expense and one we can little afford, given the pressures of the budget deficit.

I have heard the managers of the bill address themselves to how the figures are to be calculated, whether the CBO is right or wrong.

I want to say that I am not going to debate that issue. I am willing to accept the CBO figure because whatever the number of dollars CBO says is involved or anyone else says is involved is not the basic issue. The basic issue is: Is there any logic or reason to continue this Synthetic Fuels Corporation in business? It has been an abomination.

As a consequence of its actions and its failure to act, in July, by an overwhelming vote of 312 to 11, the House of Representatives said enough is enough, and they rescinded the funds.

It is time for the U.S. Senate to follow suit. It is time for us to retain the language currently in the bill. Although I have not been able to study the two amendments offered by the manager and the comanager, I would guess that what they are offering is in the nature of a retreat or perhaps as they might suggest a compromise.

But in this instance, I believe there is no room for compromise and only a total routing, a total retreat, of the Synthetic Fuels Corporation and the utilization of those dollars for more necessary purposes in this country is appropriate.

By eliminating the Synthetic Fuels Corporation, we will be yielding billions of dollars in savings. The Congressional Budget Office projections included in the House budget reconciliation report, show that the language in this bill will save $93 million in outlays in fiscal year 1986, $468 million in the years 1986 to 1988, and $6 billion in later years for a total of $7.4 billion, which are very much needed as we face the future years in attempting to balance the budget.

The significance of the billions of dollars in total savings cannot be downplayed, but the Synthetic Fuels Corporation is rushing to sign commitments which will lock us into these outlays. What they want to do is tie it down, make a contract, then say the contract cannot be broken. Depending on the resolution of last-minute awards, and the Synthetic Fuels Corporation has been trying to get them out the door before we act, some savings may now escape us and even today may be too late in some instances. This should impress upon us that we should not and cannot delay any longer our actions in shutting down this agency.

Mr. President, the U.S. Congress never has difficulty in creating new agencies. The U.S. Congress always has difficulty in closing down an existing agency, because they build up their alliances and they use their dol-

lars to get commitments, commitments from the business community that is able to eat at the trough. If ever an agency deserved to be put to rest, it is the Synthetic Fuels Corporation.

As I said earlier, I supported it back in 1979 and 1980 as a way to improve our energy security. I agree wholeheartedly that it is important that we develop technology to utilize our coal, our oil shale, and our tar sand resources. But during its 5-year history, the SFC has failed to bring the Nation any closer to achieving that goal or establish a viable synthetic fuels industry. The Synthetic Fuels Corporation, set up as a financing bank and accenting commercial development is not designed or equipped to promote the kind of research and development needed to solve the technical and market uncertainties of current synthetic fuel processes.

The SFC is an agency flawed in management as well as execution. It has abused its autonomy and freedom to become the most scandal-ridden, poorly managed, and least productive agency in the Government. Two presidents of the agency resigned amidst charges of mismanagement and impropriety. Salaries—and I want my colleagues to listen to this—of the top 50 percent of the employees average $56,000 per year. Pension plans—and hear this—fully vest employees in 1 year. Pension plans are fully vested within 1 year and the agency pays 100 percent of the cost. In fact, in only 2 years, this agency, with less than 200 employees, has paid cut nearly $1 million in benefits.

Consulting contracts range as high as $1,000 a day. This type of largess makes a mockery of efforts to cut waste and trim the deficit.

Similarly, the SFC has failed to exhibit any sense of fiscal responsibility or restraint in its attempts to create a synthetic fuels industry. Time and time again, the SFC has promoted the candidacy of weak projects. It has awarded unjustified price guarantees as high as $67 per barrel of oil and $12 to $15 per million Btu's for gas; $12 to $15 per million Btu's for gas.

The SFC is creating an industry which will be perpetually dependent upon Federal subsidies. Already, two projects which received $1.9 billion in awards have returned to the SFC for an additional $1.2 billion in bailouts.

The SFC's approach is to simply throw more and more money at a problem. This only creates greater deficits. It does not establish the basis for a successful commercial industry or a reliable energy source.

The new SFC Board has perpetuated and stepped up this campaign of irresponsibility.

In the last 2 months, this agency has been rushing to commit billions of dollars before Congress can rescind its funds.

Can you imagine that? In the midst of a paralyzing deficit crisis, the SFC is shoveling money out the door in clear defiance of the administration and the House of Representatives.

The $60 million for $40 per barrel price guarantees were awarded to a heavy oil process already in use in the private sector.

Recently, the SFC awarded another $500 million—for price guarantees of $67.87 per barrel.

Oil is selling today in the world market at something in the area of $24, $26, $27 a barrel. They awarded price guarantees of $67.87 a barrel. They awarded it to Union Oil for a project that already received a $400 million price guarantee commitment and with all of the guarantees, the project does not work. It is not producing the oil.

Waiting in the wings, and this is the important part for my colleagues, unless we stop the SFC, is another project negotiating price guarantees in excess of $150 per barrel.

This is fiscal irresponsibility of the highest order. Yet, this is the story of the SFC.

Let us not be fooled. These giveways have nothing to do with energy security. It is political pork barrel, pure and simple.

In August, an SFC lobby plan was made public. The document makes it clear that the basis of SFC awards is to win political support in the Senate, rather than the quality or merit of projects.

It should be noted and it has been publicly discussed that many Members of this body were mentioned by name in that document.

For an agency to misuse billions of dollars to carry out a plan to buy the support of the Senate is an insult to every Member of this body and an affront to the taxpayers of this Nation. But that is exactly what that document was all about, an internal SFC document.

Mr. President, I ask unanimous consent that that internal document from the SFC be printed in the RECORD at this point.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

THE PLAN

ASSUMPTIONS

A. Wright and Murtha Cannot Generate Successful Floor Strategy.

B. House is Lost by a Vote of 325 on Interior Bill.

C. Senate Position Weakening—During August Recess Budget Fears in Senate Will Sharpen.

D. McClure/Byrd Willingness to Exercise Leadership on the Issue "Declining.

E. Senate Appropriations Action Likely September 15.

F. Some Sort of Senate Floor Action Likely by September 30 on SFC.

G. Final Senate Action Likely to Zero Out SFC at Present Trends:

ACTION STEPS

I. *Use August to build broad base of support in the West to reinforce McClure & Domenici*

A. Convert a group of western senators from neutrality to advocacy.

1. At August Board meeting, Board releases a new western shale solicitation which compliments the eastern coal solicitation.

2. TC meets with all possible applicants in the field to generate interest in the solicitation and support for the program during August.

3. TC meets with sponsors of existing shale/western projects and their Senate delegations in the district during August.

4. Hold Andrews, Burdick, Gramm for SFC using SFC support for project contrasted with DOE decision.

II. DEVELOP A SERIES OF ACCOMPLISHMENTS FOR CONGRESS BY SEPTEMBER 15

A. Act on Seep Ridge by September 1.

B. Or Act on Utah Methanol by September 1.

C. Act on Forest Hills by September 1.

D. Union—

1. TC, ER, VS with proxy from PM "come out of cage" with Steigemeier in Los Angeles during the week of August 3.

2. Negotiating Team follows up, driven by Board Guidance document, with completion target of September 7.

E. CB—1. Closure is impossible by September 15; first two weeks in September develop positive stories in media on project.

F. Tar Sands—On back burner unless Seep Ridge fails. During August maximize western attention on the resource with cooperation from Garn and Hatch.

G. "Eastern Projects—

1. Keystone—TC sees Dingman and Governor Thornburgh ASAP. First or second week of August, then sees Heinz. Team negotiates project with goal of $ billion by September 7.

2. Memphis/Air Products—closure is impossible by September 7, negotiating team works up preliminaries during first 3 weeks of August; fourth week of August TC sees Sasser and Gore to relay SFC post September 7 intentions on project.

3. American Syncrude—Closure is impossible by September 7, but negotiating team can achieve four corners agreements by the end of August. TC sees Lugar and Quayle and sets up basis for agreement.

III. TARGET SENATE LEADERSHIP IN FIELD

A. Dole's lost.

B. TC works Simpson in Wyoming on Naval Oil Shale Reserves during August recess.

C. Set up Washington Lobbyists during August to work Byrd on clean coal.

D. TC sees Heinz on Keystone and national defense issues.

E. TC with Daniels works Warner, and Trible towards leading Armed Services Committee by using leverage on Virginia Power decision.

IV. LATE AUGUST, REESTABLISH ADMINISTRATION SUPPORT

1. Ed Meese.
2. Don Hodel.
3. John Herrington.
4. Cap Weinberger.
5. Executive Office of the President.

V. SEPTEMBER 7 CONVENE SENATE MEETING WITH DOMENICI AND MC CLURE AND ALL PREVIOUS TARGET SENATORS

A. Demonstrates support in Senate to Domenici and Mc Clure.

B. Get commitment to lead on issue.

C. With their support cement Administration support.

VI. SEPTEMBER 7-15 ORGANIZE WASHINGTON TRADE REPRESENTATIVES WITH FOCUS ON SENATE APPROPRIATIONS COMMITTEE

VII. LATE SEPTEMBER APPROPRIATIONS COMMITTEE VOTE

VIII. MID-SEPTEMBER FOCUS ON SENATE FLOOR ACTION

A. Use previous leadership base.

B. Emphasize national defense issues.

C. Hold Clean Coal supporters.

D. Mobilize DOE as Administration spokesman.

Mr. METZENBAUM. One thing is very clear, energy security seems much less of a concern at the SFC than political survival.

The SFC has made a mockery of the high goals we set for it in 1980.

This is not what a National Synfuels Program should be about.

This is not what the American public deserves.

If we are really serious about effective Synfuels development, we should replace the SFC with a program which will work.

The language in the bill moves in that direction, but the amendment pending would delete that provision.

The amendment, as put in by the House, rescinds the funds available to the SFC and reserves $500 million—to be used for a Synthetic Fuels Program at DOE. No signed contracts are abrogated.

Mr. President, a few weeks ago, 75 Members of this body, an overwhelming majority, approved the Gramm-Rudman-Hollings amendment, which requires this Government to have a balanced budget by 1991—6 years from now. What we have before us today is, the acid test of our seriousness and resolve to end the massive deficits which threaten to ravage our economy and our citizens.

If we do not have the political will to end a wasteful, nonproductive program like this, we will never be able to balance our budget and significantly reduce deficits.

There is no justification to restore $7.4 billion to this bill to save a program so racked with scandal and failure. A vote to restore the budget of the SFC is to put a stamp of approval on the birth of a new, multibillion-dollar entitlement program.

We tell the farmers, and we shall debate that on the floor this afternoon—we tell our students and the elderly to seek help elsewhere, there is no money left for them. How, at the same time, do we tell them with a straight face that it is necessary to spend $900 million of their money so that the Union Oil Co. can get $67.87 per barrel for its oil?

We have a responsibility to the taxpayers and to this Nation to provide a Synfuels Program that will work and yield results in an effective and efficient manner. The language currently in the bill provides us with that opportunity. The proposed amendment does not. Now we are presented with a so-called compromise at the last minute. It will cut only $500 million and it will terminate the SFC funding authority 1 year from now. It is better called a feed-me-first amendment. We know why it is offered. A few companies are poised to raid the Federal Treasury and they want to make sure they get theirs before the agency is shut down.

Well, we all know the SFC is a flawed program and an irresponsible agency and there is not anything about giving it less money that is going to make the agency any better. It is just as wrong to let it waste $7.4 billion as it is to waste $7.9 billion. If we leave the SFC in and allow it to go back to its standard method of business, that is what will surely happen. If we are really serious about effective synfuels development, we should replace the SFC with a program which will work.

I want to read into the RECORD a letter from John Herrington, Secretary of Energy, dated October 2, 1985, addressed to the distinguished chairman of the House Committee on Energy and Commerce, the Honorable John Dingell, in which he concludes as follows:

I understand that the SFC board has scheduled a number of projects for final action on October 16. The department does not support SFC funding of these projects. Because of these circumstances I have strong reservations about continued funding of the SFC.

It is interesting that even after that letter the SFC attempted to put out and sign some new contracts and did move in that direction. It is further interesting to note that the Secretary of the Treasury saw fit to bring into play some extraordinary powers and authority which he has to indicate that he wanted a halt called to that action at the SFC. The best way we can call a halt to any further action at the SFC is by defeating the committee amendment. That, Mr. President, is what I believe this Senate should do today.

Mr. President, I ask for the yeas and nays with respect to the basic underlying committee amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. I thank the Chair.

I rise to support my colleague from Ohio, and to add some remarks to his on the basic underlying amendment and on the two amendments which are now pending.

I understand the thrust of the two amendments now pending. They do represent what I believe is a sincere effort by the chairman and the ranking member to offer a compromise, a compromise, however, which is merely limiting to some degree, a minor degree, both the ability of the Synfuels Corporation to pour out more money and to a relatively minor degree the amount of money which they can pour out during the course of the next year.

It seems to me, Mr. President, rather than a compromise on something so wildly out of control, it is time to kill this snake and to rebalance our energy research operations.

Let me speak first to the balance that I believe is desperately needed in energy research. No one knows precisely what the best, the cleanest, and the most appropriate energy sources are going to be in the 21st century, and it is up to this Nation and this Government to try to do a balanced job of initiating research and seeing to it that there is the broadest possible opportunity for various energy solutions to be sought and ultimately to be found.

I think we ought to be very careful at the level of Government to not go beyond the concepts of basic research; that once we get beyond basic research into the next phase, the feeling that there is something there to be followed through on, that there is the potential through pilot projects and ultimately through production for a new and a market-ready energy source; that we begin to share in that operation with other enterprises and eventually move out.

Some suggest that is precisely what the Synfuels Corportion was all about when it was first initiated a half-dozen years ago. But where are we? We started with almost $18 billion we wanted to put in this one basket of energy research, and at the same time we have steadily cut back on the amount of money available in a broad variety of other energy research fields.

Now, I supported, I might add at great cost to many of my constitutents, the continuation of the breeder reactor project on the basis that this might well be one of the energy projects of the future and we ought not, totally, cut off that kind of support. In the case of Synfuels, perhaps we ought not to cut off some elements of that support, but it does not require $16 billion, it does not require $14 billion, it does not require $7.9 billion, it does not require $7.4 billion and, most of all, it does not require a very expensive, highly paid, separate, unresponsive Synfuels Corporation. We ought to bring that responsibility back within the Department of Energy. We ought to give a Department which we have established to be the focal for

energy development and energy research the chance to truly do that job. I suspect we will be far better off and so will the Department in being able to view all of the opportunities for energy research and to ensure that there is better balance.

Today we put up relatively piddling amounts of money in terms of further research on photovoltaics and solar, virtually no research at all on the ultimate potential of hydrogen as an alternative to some of our petroleum energy, not very much money in the context of the potential in better efficiency and conservation, both in electrical energy and in other energy sources as well.

I think perhaps the most important reason to cease now, today, immediately, this Synfuels Corporation is so that we can bring back together under one Agency, and one direction, more closely associated and responsive to the Congress the broad elements of energy research. That is the practical concern I have.

There are several others that make this even more urgent. The arrogance of the Synfuels Corporation is simply unbelievable. The Senator from Idaho has inserted in the RECORD an untitled, unidentified, unnamed internal document of that organization. Some may suggest that that was merely the writings of one person, that it was done off official time, and that it was thoroughly rejected by the officials and the members of the Corporation itself. I suggest that the actions of the Synfuels Corporation to date do a lot more to suggest to me that that internal document was indeed the floor plan for their policies.

Mr. President, I ask unanimous consent to have printed in the RECORD the memorandum of the U.S. Synthetic Fuels Corporation of August 9, 1985.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. SYNTHETIC FUELS CORPORATION,
August 9, 1985.

Memorandum: To Len Axelrod, Charles Cowan, Jim Groelinger, Len Rawicz.
From: Edward E. Noble.
Subject: Negotiations Teams and Schedules for the Priority Projects.

This is to confirm the substance of our meeting this morning. The three projects with priority status are Union, Forest Hill, and Keystone. Negotiations and documentation should proceed in parallel for Union and Forest Hill, toward closure on September 6. Final contract signing would occur sometime during the week of September 6-13. Keystone will move on a slightly slower schedule, and I will await your guidance as to the precise schedule.

As discussed this morning, I want Ralph Blackwell as Director of Negotiations to oversee and coordinate all of the priority negotiations. Each project will have its separate negotiating team, with a team lead*. The teams we agreed to are:

Union: Dick Keegan,* Len Axelrod, Jim Groelinger, Phil von Turk.

Forest Hill: Bill Gudal,* Skila Harris, Frank Hill, Andy McDonald.

Keystone: Francis Allhoff,* Ted Atwood, Frank Hill, Jeanine Matte.

This will be a major undertaking, with each of the contracts most likely involving combination loan and price guarantees. Thus, you should take whatever actions are necessary to ensure that sufficient expertise, including contract assistance, is available to meet the schedule.

Finally, I want to meet personally with each negotiating team, with Blackie, at the end of each day on which a negotiating session has been held on any of these projects. Each of you is also welcome to attend any of these meetings.

I will appreciate your letting me know if you have any problems with the above, or recommendations to make the process more efficient. Otherwise, this is how we will proceed. Seep Ridge, Utah Methanol, and Cathedral Bluffs will be given the next priority.

Mr. EVANS. Mr. President, that official document of the Synfuels Corporation, on their letterhead, talks about the urgency of moving ahead and the necessity to meet personally with each new negotiating team at the end of each day on which a negotiating session has been held on any of these projects. That is commendable. It is also unusual.

It indicates strongly to me that there is every effort on behalf of that corporation to get as much money out from under the purview of Congress before we act, as I hope we will, in the same fashion the House of Representatives has acted, and prevent the further allocation of money.

Knowing of pending congressional action, the Synfuels Corporation has not taken the prudent course of waiting, of seeing whether in fact this policymaking body of the U.S. Government is going to give new direction. No; their attitude is to move as rapidly as possible to prevent this body from working its will and giving new direction.

Mr. President, I do not think there is any question that the administration wants to kill this program, and I am supporting what the administration wants. The Secretary of Energy has spoken quite clearly in terms of the letter he has submitted. The Senator from Ohio has inserted it in the RECORD. A similar letter came to Senator HUMPHREY a couple of days later.

I have certainly not heard the President taking the Secretary of Energy to the woodshed, as he took David Stockman a few years ago. I have heard nothing to indicate that the administration is rejecting or turning aside from the statements of the Secretary. I think he has been quite clear, and I think he is quite persuasive in his recommendations.

Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Wall Street Journal, written by the Secretary of Energy, entitled "The Synfuels Energy Dinosaur."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SYNFUELS ENERGY DINOSAUR

(By John S. Herrington)

This week, Congress is struggling to agree on a plan to reduce the deficit. Regardless of the outcome, in the next few days members of both houses will have a unique opportunity to make an early downpayment on deficit reduction. Next Wednesday, the Synthetic Fuels Corporation's board plans to lock up more than $1 billion in taxpayer-supported subsidies for two uneconomical and unneeded oil-shale demonstration projects.

These projects are telling examples of why the SFC was, this July, targeted for extinction by a 312-111 vote in the House. The question now is: Will Congress as a whole put a halt to these projects before the SFC allocates the money for them next week?

The projects in question—$900 million in price supports and guarantees for a Union Oil project in Parachute Creek, Colo., and $184 million in like guarantees for Seep Ridge's Vernal, Utah, project—reflect more than their dollar amounts. They are a microcosm of what is wrong with the SFC. In an era when everyone is striving to reduce the deficit, the SFC could not have picked two more wrongheaded projects to pilot, nor could it be championing them at a more pivotal time in its short-lived history.

Parachute Creek has major technological weaknesses. Both Parachute Creek and Seep Ridge have technologies applicable to only a small portion of U.S. oil-shale resources. Both would have guaranteed price supports at a level several times the market price. Neither would make a lasting contribution to U.S. energy security.

I am opposed to these projects, and these circumstances have raised strong reservations about continued funding of the SFC. Terminating these projects would salvage at least $1 billion—and perhaps more, since the SFC will soon consider additional projects totaling $2.5 billion.

Congressional opponents of these projects need only to look to Union Oil's Parachute Creek operation for ammunition.

Union Oil first began acquiring oil-shale lands in Western Colorado in 1920. Sixty-five years later, its Parachute Creek project still has not been operated successfully beyond a period of a few days, despite the investment of $800 million by the company over the past six years.

Parachute Creek's problems are enormous. The price per barrel of the hoped-for 10,000 barrel-per-day plant is pegged at $72, in an economy where our Strategic Petroleum Reserve is buying oil at about $25 a barrel. Parachute Creek's retort scraper system—a mechanism that ejects spent shale—failed and still hasn't continuously worked as advertised. When it does work, the spent shale is coming out at a too-high temperature (900 degrees Fahrenheit) with an excessively high cargon content, a sign of inefficiency. Its fluid bed combustor, a component that would burn the carbon in the spent shale, is only in conceptual design, both unproved and untested.

The financial terms of the SFC agreement are such that 6 to 10 years from now, when subsidies are exhausted, Union could walk away from the project.

Union has failed to produce the oil that would allow it ultimately to earn $400 million in price supports. Nonetheless, the SFC plans to reward Union with an additional $500 million in loan and price guarantees to support the development of a combustor—and wants to extend Union's right to earn the $400 million in price supports. The total cost to taxpayers: $900 million.

Hand in hand with the Parachute Creek project, the SFC plans to provide $184 million in loan and price guarantees for Seep Ridge. SFC is guaranteeing its price per barrel at $55, more than twice the market rate.

Why the SFC is so ardently interested in Seep Ridge is something of a mystery. The project will offer no technological advance for synfuels development; the technology is already developed, and at full production Seep Ridge will produce only 1,100 barrels per day.

Supporters of these projects will no doubt weave their defense into the cloth of our energy future and national security through energy security.

The fact is that national-security and energy-security arguments do little to justify the Parachute Creeks and the Seep Ridges. When Congress established the Synthetic Fuels Corporation in 1980, oil prices were projected to reach $75 to $125 per barrel by 1990. Since oil prices peaked in 1981 following President Reagan's decontrol of oil prices, the world energy outlook has improved substantially: In nominal terms oil prices are down more than 30% from their 1980 levels.

As a result of these fundamental changes in the energy marketplace, virtually no projects pending before the SFC are likely to become economical in the foreseeable future. Thus, the development of a commercial synthetic-fuels industry at a pace envisioned by Congress in 1980 would require huge expenditures of federal tax dollars that would not be offset by economic benefits.

There is little point in building demonstration projects when the fuel costs are two, three or four times that of current and anticipated market prices. There is no compelling reason to subsidize construction of model synfuels plants when advanced technology, now under research and development by industry and the Department of Energy, will ultimately surpass these plants' existing technologies. Finally, there is little merit to the national-security argument advanced by supporters of synfuels. Were all the SFC projects currently planned ultimately able to produce at their maximum capacity, they would only supply substantially less than 0.5 percent of U.S. energy requirements over the next 10 years.

The sensible approach for U.S. energy development is to let the free market work its way up to the next band of energy opportunities. And in this respect, the synthetic-fuels industry is several decades away from practicality. Synthetic fuels are not competitive with the next generation of fuels or expected energy gains through conservation and efficiency. Moreover, more exotic techniques such as enhanced oil recovery and the potential application of coal in the slurries, advanced clean-burning combustors and high-efficiency turbines are today closer to the realities of the marketplace.

When the Synthetic Fuels Corporation was created in the late 1970s, its founders were acting with vision and patriotism during a time of rising oil prices and limited supplies. But times have changed and so have the circumstances that gave rise to these projects. Now we must adjust to the new realities. The proposed SFC projects offer Congress an opportunity to make meaningful budget savings with little acrimony and without compromising the public trust, national security or our energy future.

Mr. EVANS. Let me read from that article by Secretary Herrington. He says, among other things:

There is not compelling reason to subsidize construction of model synfuels plants when advanced technology, now under research and development by industry and the Department of Energy, will ultimately surpass these plants' existing technologies. Finally, there is little merit to the national-security argument advanced by supporters of synfuels. Were all the SFC projects currently planned ultimately able to produce at their maximum capacity, they would only supply substantially less than 0.5% of U.S. energy requirements over the next 10 years.

The sensible approach for U.S. energy development is to let the free market work its way up to the next band of energy opportunities.

That, in my view, is an appropriate direction and is especially aided by a broad and uniform look at basic research by the Department of Energy and by this Government.

He continues:

And in this respect, the synthetic-fuels industry is several decades away from practicality. Synthetic fuels are not competitive with the next generation of fuels or expected energy gains through conservation and efficiency. Moreover, more exotic techniques such as enhanced oil recovery and the potential application of coal in slurries, advanced clean-burning combustors and high-efficiency turbines are today closer to the realities of the marketplace.

Mr. President, I think that is another one of the fundamental reasons why we should abandon the Synfuels Corporation—that there are already other elements closer to the marketplace than this and others where we should spent some of our efforts.

We do not need the continuation of a Synfuels Corporation to continue and build upon the success stories with respect to fluid bed combustor, the application of coal in slurries, and enhanced oil recovery techniques. We already have programs for funding coal sludge R&D, clean oil, and so forth, which can be handled and are being handled in other ways outside the synfuels industry.

Mr. President, not only does the administration want to kill this program, but also, industry itself is backing out. Let me list what industry, itself, believes about the continuation of the synfuels industry.

Exxon withdrew from the Colony oil shale project. Sohio withdrew from the Hampshire coal gasification project, the White River oil shale project, and the Paraho Ute oil shale project. Westinghouse put its entire synfuels division up for sale. Ashland Oil withdrew from the Breckinridge coal project.

Mr. FORD. Mr. President, will the distinguished Senator from Washington yield for a question?

Mr. EVANS. I yield.

Mr. FORD. The Senator just touched on Kentucky. Will he explain why Ashland withdrew from the Breckinridge project?

Mr. EVANS. As soon as I finish the list and mention the comments made by some people.

Mr. FORD. The Senator says they withdrew and gives no reason for it. He just touched on Kentucky.

Mr. EVANS. I suspect that many of these have been concerned about the inconsistency of funding the Synfuels Corporation itself.

Mr. FORD. The Senator suspects that, but he should give the real reason, rather than just naming names.

Mr. EVANS. I will give the Senator from Kentucky a good opportunity to speak for himself on that particular issue.

Mr. FORD. I certainly look forward to doing that.

Mr. EVANS. EG&G abandoned its New England Energy Park coal project. Mobil abandoned its efforts to form a consortium of companies to construct an oil shale project. W.R. Grace canceled its Grace-Baskett coal project.

The best indication of the immaturity of synfuels technologies can be found in statements made by representatives of industry:

The technical aspects, economic process, environmental controls, deployment techniques are still in their earliest stage. A lot of field work needs to be done. (Bob Shelton, Shale Energy Corporation of America.)

I'm not saying there aren't some interesting things going on in the lab, and that's where we should be focusing our attention. * * * We should be spending our money on improving (through lab research) the second generation of synfuels technologies, not proving to the world that the first generation is no good. (Ted Eck, chief economist, Standard Oil of Indiana.)

We're putting synfuels to bed as a major priority. (Samuel Vastola, manager of corporate planning, Exxon.)

The industry doesn't do it today because we don't have the technology nor see the market. You can see by the projects that folded, they didn't have the technology right. Demonstration-size research and development projects are a must before you move into full-scale operation. (Earl Hurst, Chevron Shale Oil Co.)

The PRESIDING OFFICER. The Senator should be advised that the 30 minutes which were allotted in the unanimous-consent request by the Senator from Ohio have been completed. So the Senate will go to the consideration of amendments 934 and 935.

Mr. EVANS. I thank the Chair. I will continue for only a relatively few minutes.

Mr. President, the arguments apply equally well to both the underlying amendment and my support for it—or,

the amendment which will shortly come and my support for it, and my opposition to the amendments numbered 934 and 935, which are now pending.

Let me summarize: Here is an organization, not under policy control by Congress, moving ahead as rapidly as they can, in spite of what may well be a decision to cut back severely, in opposition to an administration which seeks to end the Synfuels Corporation.

We are out of balance in our energy research, recognized as being so by both the administration and by much of industry who itself would back out of a direction which has not been in the reasonable sense basic research, which is where we should be focusing our effort, and in fact the Synfuels Corporation has spent its time and too much of the taxpayers' money in the support of proving up technologies which are not tomorrow's technologies and clearly not even today's technologies in terms of the marketplace, but are yesterday's technologies, and that is why in the article which he submitted to the Wall Street Journal the Secretary of Energy rightly called the Synfuels Corporation a dinosaur.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I shall take just a minute or two to visit this question. I think those who are in opposition to the continuation of the Synthetic Fuels Corporation smell blood. They smell the blood of being able to get rid of it and then pound their chest that they have saved all this money.

I hear the distinguished Senator from Washington as he relates the administration does not want it; therefore, he is supporting the administration.

The first piece of legislation that was passed by the House of Representatives came to this side as the Defense Production Act, so that the defense of this country would have some research and development, some pilot and demonstration and commercial plants to put us in the posture of having energy at a time it might be needed.

Energy is an important part of our national defense. Now that there is a little glut on the market and that glut comes from the dismal economy that has been given to us by this administration where our industrial complex has been running less than 70 percent and I am not sure it is even back up to 80 percent, no wonder we are not using energy, no wonder we are not using natural gas, no wonder we are not using oil as it relates to the need of this country.

We have the distinguished Senator saying this administration wants to get rid of the Synfuels Corporation. If you go back and look at the history of this administration as it relates to the appointments of the board of the Synfuels Corporation, you will find that it is not necessarily the board's problem because they have never been in place to do any work. It is the delay of appointments of good people based on what the administration wants which was the dismantling of the Corporation and so, therefore, they have not had a chance.

You jump all over the Synfuels Corporation and say it is not run properly and they have not used good judgment, and that sort of thing. You have to lay it on this administration. You cannot lay it on anyone else.

Let me say this: There is a lot of negotiation going on by many of us on both sides of the aisle. I think you have to give the chairman of the Energy Committee, the distinguished Senator, Mr. McCLURE, from Idaho, a great deal of credit because he worked as I have seen no Senator work before, as relates to trying to put it together in a way that we could make some sense, we could begin to look at the future as it relates to synfuels and finally got it into place. That has not been very long. I heard yesterday you should have at least 5 years or more to study certain things, to see how well they have been able to do, and we have not even been in place 5 years as it relates to the Synfuels Corporation.

Let me give you some projections. Let me go back to one other. There is one project that was a pilot project. We had a little better than $200 million in that project when this administration came in. Instead of continuing that pilot project, they cut it off. Sure it had some problems because it was new, a new technology. They were exploring fields that have never been before. Every day that plant ran it set a new Guiness Book of Records. Yet now that we could look at the last several years of research and development and data, we have lost all of that.

How far along could we have been had we not had the administration wanting to put the crimp on this particular field?

We are going to need within the next 15 years or less synfuels operations. We are going to look back on this occasion and say we made a mistake if we eliminate the Synfuels Corporation.

I do not want to be in the position of saying I told you so. This administration has curtailed research. It is already out of the lab. It is already into the pilot project, and about the time you are trying to develop and are developing a program under the pilot project, it is eliminated. How in the world can you proceed under those circumstances?

The United States will be heavily dependent on synthetic fuels to meet the energy requirements necessary for economic growth and national security. If you remember nothing else that I say here this morning, remember that the United States will be heavily dependent on synthetic fuels to meet the energy requirements necessary for economic growth and national security.

Yet we sit here without any fuel. We always react. We react. And the need will come one of these days and this is not an arena that can be accomplished and completed in a 12-month period as Roosevelt did when we moved to synthetic rubber back during World War II. You cannot put a synthetic plant together, build it, have it in operation in 12 months.

Sure it cost money. Sure it cost money.

But the long leadtimes that are necessary to the development require, in my opinion, joint effort of Government and industry. If I were industry, I would be reluctant to play along with stop-and-go operations. There is nothing consistent at all about saying we are in and then we are out. We are in but we have not got a board of directors to operate it. We want a board of directors that will dismantle it.

Finally, we get a board of directors that is reasonably favorable trying to do something, and lo and behold, here we come along wanting to eliminate it.

Mr. President, we are going to need the diversity. We are going to need the diversity, let me repeat, as it relates to energy and the way we are going, we are going to be using 70 percent or need 70 percent of foreign energy and that 70 pecent will not be good.

So, Mr. President, I urge my colleagues to support the amendment of my distinguished friends, Senator JOHNSTON and Senator McCLURE, and see if we cannot have an opportunity to have some stability instead of this jerky situation that we have had since the Synfuels Corporation has been in existence.

I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. McCONNELL). The Senator from Louisiana.

AMENDMENT NO. 934, AS MODIFIED

Mr. JOHNSTON. Mr. President, I send a modification to my amendment to the desk and ask that my amendment be so modified.

The amendment (No. 934), as modified, reads as follows:

In lieu of the language proposed to be stricken from page 54, line 25, through page 55, line 17, insert the following:

"Of the funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126) and subsequently made available to carry out Title I, Part B of the Energy Security Act (Public Law 96-294) by Public Laws 96-304, 96-514, and 98-473, $500,000,000 of the amounts initially available only for obligation to projects with Letters of Intent authorized by the Board of Directors on or before June

1, 1984, and not obligated are rescinded; *Provided*, That the Board of Directors shall proceed to complete action on those projects under consideration or negotiation by the Corporation as of October 1, 1985; *Provided, further*, That such actions shall include either the award by the Board of financial assistance to such a project or a determination by the Board that the Corporation will not enter into financial assistance contracts for such project.".

(Mr. GORTON assumed the Chair.)

Mr. JOHNSTON. Mr. President, my colleagues who are here to demolish and dismantle the Synthetic Fuels Corporation remind me of the story of the grasshopper and the squirrel. The grasshopper chirped and sang and hopped all summer long and made fun of the squirrel because the squirrel, day after day, was putting aside hickory nuts and acorns and storing them up for the cold winter which the squirrel knew was going to come. All the while the grasshopper was chirping and singing and hopping and making fun of the squirrel, as our colleagues here are making fun of those of us who want to try to keep the Synthetic Fuels Corporation going.

Because you see, Mr. President, the proponents of the Synthetic Fuels Corporation know that the winter is coming. The winter has been here in terms of fuel shortages and the winter again is coming. It is well said, Mr. President, that those who do not learn from history are doomed to repeat it. And, if there is one thing that is a clear and certain prediction of the future, it is that the shortages of the early 1970's will be again upon us. We will again be hostage to the Middle Eastern oil producers, as we have been in the past. Indeed, because America domestic supplies continue to go down, the percentage of the world supplies held by the Middle East continue to go up and our dependence will continue to rise.

When will that happen, Mr. President? No one knows. Perhaps as soon as the late 1980's; perhaps into the early 1990's. No one knows for sure. But that day of reckoning is coming and coming for sure.

Mr. President, we are told about the mismanagement of the Synthetic Fuels Corporation. I have never tried to defend the mistakes of that Corporation in the past. The mistakes are certainly not the fault of those of us who initially put together the Synthetic Fuels Corporation.

It is well known that this administration, at least initially, was strongly opposed to the Synthetic Fuels Corporation. It appeared that they intentionally tried to set the scene for its failure. Whether that is so or not, it is clearly true that Board was mismanaged in its early months and years.

But, Mr. President, the past mistakes of the Synthetic Fuels Corporation have, I believe, been corrected. Indeed, we just confirmed three additional members, outstanding in record and experience, who, with the now seasoned survivors of the Synthetic Fuels Corporation, I believe, can, will and are doing an excellent job.

Let me say one thing about the Synthetic Fuels Corporation that I think is not well understood by our colleagues. That is, how we score this $7.357 billion. Everyone in the discussion today has treated this money as if it is an expenditure from the Synthetic Fuels Corporation. The fact of the matter is that the $7.357 billion is either for loan guarantees or in price guarantees. Every dollar that is expended for these guarantees, is counted as an expenditure or counted against that $7.357 billion, whether or not that money is repaid.

Indeed, it was my amendment that called for scoring of that kind, because we did not want to create a revolving fund. If this were scored in terms of actual outlays from the budget, it would probably amount, by most accounting methods, and based on experience with other Federal Government guarantees, to maybe a third of the $7.357 billion. That is because a good amount—I would hope the vast majority—of this money will be repaid. The loan guarantee will not be called upon or the price guarantee will not be necessary, at least to the full extent.

So, therefore, Mr. President, it is incorrect to say that we are talking about an expenditure at any time of as much as $7.357 billion. To the contrary, we are talking about only guaranteeing that much either of a loan or of a price.

Mr. President, my distinguished colleague from Kentucky has talked about the hard work of our distinguished chairman, the Senator from Idaho, in putting together this compromise. I fully support what he has said, because it was a monumental job.

Mr. President, it takes two sides for a compromise. There was a great deal of give on the part of those of us who supported the Synthetic Fuels Corporation. We reduced the funding down to less than half of what it had originally been. But in return for that, we got a commitment by the administration to stick to that compromise.

Now, it is, at any given moment, difficult to say where the administration stands on this matter. I know the Secretary of Energy has written a disparaging letter about the Corporation. I do not know where the President stands. I do know they made a deal. They put the word of the administration on the line behind this compromise.

Mr. President, it is not just a question of whether those of us in the Senate can count upon the administration. There is a vast array of people involved in the synthetic fuels business who have also got a right to rely upon what the administration says. And, indeed, $1.2 billion has been committed by private industry in reliance upon not only the law of the land but what this administration has said.

Mr. President, I think it would be an outrage for the administration to say, "Oh, we were just kidding. We made a deal and we gave our word and unfortunately, private industry, your $1.2 billion will now go down the drain because, you know, caveat emptor, you don't have a right to rely upon what this administration says."

I think we do have a right to rely upon what an administration says, particularly when it is a solemn promise given which ripens into the passage of legislation.

Mr. President, the first retort for shale oil was built in Rifle, CO, in this country in the first decade of this century. If I recall the exact date, I believe it was 1904. The first Government-financed retort for shale oil.

Since that time, on a periodic basis, the Federal Government has recognized the importance of developing shale oil and has gotten into the business of developing shale oil only at the last moment to decide, "No, let's don't do it now. The price of crude oil is too low." We have done that several times. Mr. President, we are right on the threshold now of being able to determine the commercial viability of shale oil. I do not know whether it is going to be commercially viable or not. I know there is only one way to find out, and that is by efforts of the Federal Government through the Synthetic Fuels Corporation to develop modified in situ or retort technology or the other kinds of technologies, which will prove whether or not shale oil is a commercially viable venture.

Oh, I know, Mr. President. The price of crude oil is now down to about $25. I know that the Synthetic Fuels Corporation has made price guarantees based upon a higher amount. By the way, the higher amount which they have used as the basis for guarantees—I think the distinguished Senator from Washington referred to $67—happens to be in line with the projections of the Department of Energy as to what the price of crude oil will be in the future.

We are developing synthetic fuels, Mr. President, not for the 1980's but for the needs of the 1990's; not for the present summer of low energy prices, but for the feared winter of future high energy prices and energy shortages, and dependence upon Middle Eastern oil producers who have shown in the 1970's that they are fully capable of holding the United States hostage to fuel shortages and embargoes.

Mr. President, it was not very long ago when we were raising the heat in the summer in Federal buildings, when we were cutting off the lights in Federal buildings, when we were

taking all kinds of heroic efforts to hold down our consumption of energy. And the whole focus of the country was upon the shortage of energy. People were literally shooting and cutting one another as they waited in gas lines. I was looking over a speech I made just not too many years ago on this very subject.

I recalled the events of the preceding week where they had just those events—a shooting in a gas line in California, and incidents indeed all over the country. The whole country was conscious of the shortage of energy.

Mr. President, the present surplus of fuel is a temporary phenomenon that, like the grasshopper, is going to be gone with the first frost. I hope that the Synthetic Fuels Corporation in its stripped-down, low-budget, relatively low-budget amount will be allowed to continue and to seek to determine whether or not we can at commercial rates make liquids and gas from coal; whether or not we can use that vast shale oil deposit to produce energy at commercial prices.

I hope we will be allowed to pursue that, Mr. President. I hope we will not be so shortsighted as to cut off that one ray of hope that we may have in the next fuel shortage.

Mr. ANDREWS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, I appreciate the comments of the Senator from Kentucky. I wanted to respond to them because I think what he pointed out is something that just has not been touched on in this argument; talking more or less on the quantitative aspects of fuel supplies in this country. I think we also ought to look when we are looking at synthetic fuels at the qualitative types of fuel.

Let me point out, Mr. President, that not too long ago—as a matter of fact, as recently as October 29, 1985, which is 2 days ago before this Halloween day we are debating this on—the Chicago Tribune revealed that the Soviet Union, which has been developing technologies in peat utilization and underground oil mining, has been operating an experimental synthetic fuel installation near Moscow where it hopes to eventually convert coal into liquid fuel.

This plant, which Tass says has no analogues in the world, is considered to be a prototype for synfuel plants to be built in a vast central Siberian coal field.

Mr. President, there is tremendous product and byproduct potential under the various technologies—gasoline, turbine and boiler fuels, chemical feedstocks, and synthetic natural gas just to name a few. Then, Mr. President, there is a matter of our national security.

I wonder if we have given sufficient consideration to the impact of synfuels on our defense and national security. Along that line, we have as you know, Mr. President, a synfuels plant in North Dakota, a synfuels plant designed to put out pipeline quality gas which, of course, is not cost competitive. That plant, however, is cost competitive if it produces jet fuel.

Mr. President, as we discusss the question of the future of the Synthetic Fuels Corporation, I wonder if we have carefully evaluated all of the potential available and essential to our consideration. We have made some progress toward energy independence since the establishment in 1981 of the SFC through the Energy Security Act. With the richness of our Nation's own vast energy resources found virtually across this country, it was then and is now only logical and wise to develop those resources of coal, oil shale, and tar sands.

While we have made some progress, Mr. President, I see several reasons why we should continue the SFC and its projects. We are still far too dependent on foreign oil. In 1984 we imported 60 billion dollars' worth of oil, and predictions are that consumption of oil in this country is on the increase. Furthermore, we have only an estimated 9 years of domestic oil supply identified.

We need to continue the synfuels projects that we have started because it will take a decade or more of experience, or leadtime, with a variety of technologies to develop the needed data, much of which can only come from design, construction, and long-term operation of pioneer projects using full-scale commercial equipment. Some of the projects underway have been brought about at the cost of displaced people and severe local impact.

Private industry, Mr. President, has absorbed all of the front-end expenses and capital costs, with a total to-date expenditure of between $2 to $3 billion on project development and construction. The Government must keep its commitment to the good-faith investment by the private sector if it expects private industry to participate in this kind of program in the future when the Nation needs it.

Another reason to continue the SFC and the Synfuels Program is that the United States is lagging behind other countries in the development of technologies in direct and indirect coal liquefaction, tar sands, peat utilization, and underground oil mining. Many of these programs are heavily Government subsidized and take a very long-range view. As recently as October 29, 1985, the Chicago Tribune revealed that the Soviet Union, who has been developing technologies in peat utilization and underground oil mining, has begun operating an experimental synthetic fuel installation near Moscow that it hopes will eventually convert coal into liquid fuel. This plant, which Tass says "has no analogues in the world," is considered to be a prototype for synfuel plants to be built in a vast central Siberian coal field.

There is tremendous product and byproduct potential under the various technologies—gasoline, turbine, and boiler fuels, chemical feedstocks, synthetic natural gas, just to name a few.

Then, Mr. President, there is the matter of our national security. I wonder if we have given sufficient consideration to the impact of synfuels on our defense and national security.

Mr. President, during peacetime energy shortages, DOD must compete with other users for scarce energy supplies needed to sustain military readiness. In recognition of the special needs of the Department of Defense, the Energy Security Act provided the DOD with a right of first refusal for any output from SFC-assisted projects. Utilizing this priority, the DOD has contracted for 10,000 barrels of shale oil per day from Union's Parachute Creek project. This production will be used for operational validation programs for shale-derived jet and diesel fuels. If I may prevail on the good Senator from Alaska, in his position as chairman of the Defense Appropriations Subcommittee, I would like to know the role that SFC and Synfuels Program could play to meet other special requirements of the Department of Defense, for example, for coal-derived fuels.

Mr. STEVENS. Mr. President, DOD is a heavy liquid fuel user—178 million barrels in 1984. DOD has conducted extensive tests on certain synfuels. In addition, as you note, DOD has a contract with SFC that carries an option to buy jet and diesel fuel refined from shale oil that meets DOD specifications. And the SFC has implemented policies and procedures which integrate Defense fuel needs into its program by encouraging appropriate project design, modes of operation and marketing. I understand the proposed implementation of the SFC's current phase I business plan under last year's agreement with the chairman of the Interior Appropriations Subcommittee, could result in a national technical capability that could be expanded relatively rapidly to help meet future DOD needs if and when conditions so dictate.

The current phase I program, by proving out an array of liquids-producing technologies, would substantially shorten the leadtime required to construct production facilities and to reach full design output of those facilities. This capability, taken in conjunction with the short-term role of the strategic petroleum reserve, could significantly add to the Nation's re-

sponse to any urgent and extended need for secure fuel supplies.

Mr. ANDREWS. Mr. President, I thank the Senator from Alaska. I would like to add that the Great Plains gasification plant in North Dakota, which has great potential for the development of both products and byproducts, can also be retrofitted to produce heavy jet fuel at the rate of about 10,000 barrels per day. This would more than cover the daily fuel requirements of three major DOD air bases located relatively close to that plant, and the Defense Subcommittee has directed the DOD to purchase some 10,000 barrels per day from that plant.

In my view, we have the resources; we have sufficient technologies developed to the point where commercial-sized projects can be developed. We have the time, which is now because of this period of "oil relief" or "oil glut" we are experiencing; and if all predictions are true, we will again have the need for synfuels.

The development of a strong Synfuels Program requires a corporation, or a group, with potential funding resources, the organization, strategic interest and a large cadre of experienced managers and engineers. We have that group in place, the Synthetic Fuels Corporation, and we should keep it.

Mr. President, I yield the floor.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I rise in opposition to the Appropriations Committee amendment to restore $7.4 billion to the appropriations bill for a lesser amount, and modified by the various amendments subsequent to the beginning of today's proceedings.

Mr. President, the Synthetic Fuels Corporation is bad energy policy. It is bad budget policy, and it gives Government a bad name.

Mr. President, the analysis that we have heard on the floor today is similar to the analysis that we have heard about our energy problems since about 1975. Mr. President, it should be recalled for the Senate that the oil embargo of 1973-74 quadrupled the price of energy at that time. President Ford called upon a national commission to evaluate the problem. They then came out with a very detailed report arguing for the concept of energy independence; that somehow if we were independent of foreign oil production, that our economy and that our country would be secure.

Mr. President, in 1979, and in 1980, there was again a disruption in the flow of oil from the Middle East that caused the price of oil to once again double. It is in the atmosphere of the second major oil supply disruption that the Synthetic Fuels Corporation was born.

Mr. President, I do not in any way disparage the intent or purposes espoused by many of the sponsors of the Synthetic Fuels Corporation. As the distinguished Senator from Louisiana has conveyed, it was a time that bordered on panic in many of our States. Our phones were ringing off the hook, and we were called upon to do something.

The result of that call, Mr. President, was the Synthetic Fuels Corporation. I believe it is conceptually flawed because it is not a response to the problems that emanated from the embargo of 1974 nor from the interruptions of 1979 and 1980.

It is, rather, an answer to the question: What energy mix and sources of energy do you want America to have in the 21st century?

It is not an answer to the question: What do we do if we lose oil tonight in the Persian Gulf?

Mr. President, I think we must view the energy problem in three phases: First: What do you do if you lose oil in the Persian Gulf tonight? Second: How do you, in the midterm, reduce your dependence on those sources of oil? Third: What is the mix of energy sources that one would like to see America have in the 21st century?

Mr. President, the cause of the panic in 1979 was that we had lost the oil in the Persian Gulf. The response to that in the creation of a Synthetic Fuels Corporation was to try to decide what our fuel mix would be in the 21st century.

It is no wonder that it was a serious mismatch. That response ultimately proceeded from the analysis done after the embargo in 1973-74 that concluded that the answer for America to the energy problem was energy independence.

Mr. President, I would like to take that hypothetical to its logical conclusion.

Let us assume that, because of the Synthetic Fuels Corporation, or because of a variety of other reasons, that we consumed no oil from the Persian Gulf, we consumed no foreign oil whatsoever, but that indeed there was a disruption in the supply of oil because of instability in the Persian Gulf and that disruption in the supply of oil to our allies, Japan and Western Europe, resulted in a dramatic price increase in the world price for oil.

Mr. President, I would argue that in that circumstance, even though the United States was energy independent, that we would pay the highest cost for that disruption in the supply of oil.

Mr. President, why is that? It is simply because we consume more oil than virtually any other country in the free world. So if the world price of oil doubled or quadrupled, as it would if there were a serious oil supply disruption, the biggest tax in the form of an increased price for a barrel of oil would fall on the American consumer, it would fall heavily on our allies as well, it would more than likely trigger the IDA agreements, and, Mr. President, we would have been energy independent but we would not have been invulnerable to the effects—both economic and national security effects—of an oil supply disruption.

Mr. President, that is why I have from time to time on the floor, over the last 7 years, argued that virtually the only thing that protects us from an oil supply disruption and the effects of that on our economy is to put more and more oil in stockpile, in the strategic petroleum reserve—and get our allies to do the same—so that at a moment of crisis, we can draw that oil out of the stockpile and keep our economy going.

Mr. President, I would argue that the Synthetic Fuels Corporation was a flawed concept from the beginning because it was the wrong answer to the question posed by the embargo of 1973-74 and the disruptions of 1979 and 1980.

Mr. President, to give the benefit of the doubt to those who make that argument, let us assume that energy independence was a noble objective. Let us assume that it would insulate us from the effects of a disruption in the foreign oil supply, which I hope I have demonstrated it would not.

If it would, there at least has to be the question: Energy independence at what cost?

I think those who sponsor the Synthetic Fuels Corporation had very high aspirations, Mr. President. When we passed the bill in 1980, it was estimated that the Synthetic Fuels Corporation would be producing 500,000 barrels of oil a day by 1987 and 2 million barrels of oil per day by 1992. In fact, Mr. President, this year, as a result of the projects of the Synthetic Fuels Corporation, there will be 1,000 barrels of oil per day produced.

Mr. President, there is a great difference between 2 million barrels of oil per day by 1992 or 500,000 barrels of oil by 1987 and 1,000 barrels of oil per day in 1985.

I would argue further that the cost is simply not worth it. If we are sending dollars to extremely profitable corporations to subsidize their production of oil at a price to the taxpayers of $67 a barrel, there are better ways to spend the Federal dollars.

Mr. President, my first argument is that it is bad energy policy because the whole approach was conceptually flawed. It is much better to spend the money on putting oil into stockpile to address a problem that could develop tonight or next week than it is to put money into a hope project that will always miss its targets at very great expense and with very little relationship to what the problem is today but

a remote relationship to a theoretical hope that we can determine the energy application of our country in the 21st century.

Beyond being bad energy policy, I would argue that it is bad budget policy. We are putting back $7.4 billion in outlays, and it is considerably less over the next 3 years, a little less than $500 million.

I would simply argue that there are other more worthy uses for these Federal dollars than an investment in energy sources that might come on line in the 21st century. Keep in mind that the projections for the Synthetic Fuels Corporation was in 1987 there would be 500,000 barrels per day and today it is 1,000 barrels of oil per day.

I can understand the argument of many individuals who say, "We need to at least do some research, and we need to do some research for what might develop 20 years from now."

In that case, one must be able to postpone these expenditures now in light of the present budgetary circumstances. It is bad energy policy and it is bad budget policy. It spends dollars on projects that have no relevance to today, tomorrow, or even next year, or 3 years from now. In so doing, it takes money from programs and people that need those moneys, or I would argue programs such as the strategic petroleum reserve, where moneys could be spent more effectively in addressing the true nature of the energy problem.

Finally, Mr. President, in addition to being bad energy policy and bad deficit or budget policy, I would argue that the Synthetic Fuels Corporation has given Government a bad name.

The history of the Synthetic Fuels Corporation is one of fiscal irresponsibility, poorly designed projects, and general mismanagement.

With respect to fiscal irresponsibility, we need only look at the Great Plains coal gasification project. This project is sponsored by a consortium of large, extremely profitable energy companies. After acquiring extensive coal reserves in North Dakota, the American Natural Resources Co. attempted to obtain support from private lending institutions to fund a project. An article appearing in the Reader's Digest this past August points out that, having failed to obtain private financing,

> The consortium has succeeded in securing Federal support. Today, the facility is generating natural gas at a cost of approximately $10 per thousand cubic feet.

This is over three times greater than the market value of natural gas, which is in plentiful supply in the United States, Mexico, and Canada. Yet we have lent these profitable corporations well over $1.3 billion in taxpayers' money to build this facility. The sponsors are threatening to abandon it unless the Government provides additional subsidies.

(Mr. SIMPSON assumed the chair.)

Mr. McCLURE. Will the Senator yield for a question?

Mr. BRADLEY. If the Senator will allow me to finish the whole statement, I shall be pleased to answer any questions he has.

With respect to poorly designed projects, I cite the conclusion reached as a result of a study by Newsday newspaper, which said:

> Two projects designated for priority treatment will use technologies that are already being pursued by other companies and at their own expense, not the taxpayers'. These projects are the Forest Hills project, which is intended to extract heavy oil in Texas, and a Utah methanol project which will gasify coal and convert the gas to methanol.

With respect to general mismanagement, Mr. President, a GAO report issued earlier this year criticized the SFC for failing to solicit competitive bids for consulting services or comparing the value of the work with the cost of doing it inhouse. This resulted in contractors being reimbursed at up to $1,000 per day.

GAO concluded that:

> The Corporation's contracting practices continue to reflect the complete disregard for Federal procurement regulations.

Last year, Congress put the SFC on notice that we would no longer tolerate business as usual and rescinded the $5.4 billion in budget authority. This obviously created a stir at the Corporation, but its response has been more than disappointing. Rather than reassess the direction of the program, the merits of the pending projects, the Corporation appears to be stirring around trying to build political support. An internal, unsigned draft memo outlines in great detail a lobbying plan for the Corporation to pursue in order to head off any attempt at additional rescissions. While this is not an official SFC document, it is interesting that action taken to date has closely paralleled the recommendations put forth in this document.

Mr. President, I support the action taken by the House of Representatives. It was an action taken with overwhelming agreement. It will allow the continued support of research and development in synthetic fuel technologies by transferring $500 million to the DOE, thereby maintaining our commitment to a secure energy future.

The Congressional Budget Office estimates that that will result in a saving of $468 million within 3 years. An additional $473 million will be saved in fiscal year 1989-90 and $5.9 billion beyond that date.

If you look at the way the Synthetic Fuels Corporation has functioned, Mr. President, you see at best that some of the people who were put into the Corporation to run it wanted to subvert it from the very beginning and have effectively done so; or, at worst, you find it to be an embarrassment to the Federal Government.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BRADLEY. Yes, I yield.

Mr. McCLURE. I have only one question of the Senator. That is, I understood the Senator to say that the SFC was guilty of supporting badly designed projects. Am I correct in my hearing of that part of the statement?

Mr. BRADLEY. I do not know if I used those exact words, but in general terms, I would concur.

Mr. McCLURE. If that is correct, Mr. President, I wonder if he would tell us what badly designed projects the SFC has supported?

Mr. BRADLEY. I would list any of the projects that happen to have their oil production subsidized at high above market rates. That happens to be the basis upon which I would call a project badly designed.

If the taxpayer is going to get $1 worth of product for $1 worth of his taxes, that is fine.

Mr. McCLURE. Would the Senator yield further?

Mr. BRADLEY. Certainly, Mr. President.

Mr. McCLURE. I thank the Senator for yielding further. I understand that statement, but could the Senator identify a project that fits that test which the Senator has put forward?

Mr. BRADLEY. Union Oil I.

Mr. McCLURE. That was a DOE project turned over to the SFC. So as I understand the Senator, he did not like Union Oil I at DOE and he does not like it at the SFC.

Mr. BRADLEY. I would think that is an outstanding one——

Mr. McCLURE. What other project would the Senator identify that the SFC supported which was badly designed?

Mr. BRADLEY. I see the line of the Senator's question, because he wants to indict DOE and in so doing, I think, cast an unfair light on the House's action in saying let us transfer $500 million to DOE.

Mr. McCLURE. Mr. President, all I am trying to do is find the Senator's basis for the criticism.

Mr. BRADLEY. I cited the Union Oil Corp. that was supported by SFC. Take the Great Plains coal gasification project.

Mr. McCLURE. I would say that Great Plains also is totally DOE. The Synthetic Fuels Corporation has never had it at all. It was done by the DOE in the first place, and has continued up to the present time to be a DOE project. The Synthetic Fuels Corporation has had nothing to do with Great Plains other than consider a proposal that was not approved.

Mr. BRADLEY. Does the Senator support the coal gasification project?

Mr. McCLURE. Whether I do or do not has nothing to do with it. The Senator has suggested SFC is at fault in part for supporting Great Plains but they had nothing to do with it. That was done by DOE.

Mr. BRADLEY. I thank the Senator for the clarification, but I assert that the principle is still valid. That is that the taxpayers' dollars should not be spent to subsidize the production of oil or gas at prices high above market value. Whether it is the Synthetic Fuels Corporation that supports it or whether it is DOE that supports it, in a time of very strict budget problems, I do not believe we should be supporting the production of oil at $67 a barrel.

If the Senator would like, I could read my list of all of the projects of the Synthetic Fuels Corporation. I do not happen to think that would illustrate my point any better than I have by simply asserting the principle that it should not be the business of Government to support above-market prices for corporations that, themselves, are not doing badly.

Mr. FORD. Will the Senator yield for a question?

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. BRADLEY. Yes, I yield.

Mr. ANDREWS. The Senator mentioned the Great Plains plant which is in my State. I am not interested in debating the merits of SFC versus Department of Energy. But I think the Senator would be interested to know, Mr. President, because his is a fair-minded Member of this body, that that particular plant, the Great Plains plant, came in ahead of schedule, came in under budget, and is producing now synthetic gas for precisely what they said it would produce it for.

Mr. President, let me add one caveat; that in the interim between the time that plant was started and today, the price of natural gas has fallen sharply. I do not have 20/20 hindsight all the time, but 99 percent of the time.

My foresight is only about 20-percent accurate. My personal crystal ball ends up with all kinds of glass splinters. But to say that it was ill planned or ill defined is not fair, Mr. President. I am sure the Senator would want to reconsider that connotation. In fact and indeed, that plant is now producing synthetic gas which has dropped in price, like its counterpart, threefold. So at today's price structure—not at the price structure the plant was begun under—it is indeed priced out of the market.

That plant, however, remains a national resource and is, we hope, going to be converted to producing synthetic jet fuel, which in quality, as we pointed out a few moments ago, is far superior to anything we can buy that is derived from petroleum. So the Nation has not lost on that project.

The vagaries of the pricing of energy over the years is something that I think no Member of this body can respond to or can guess ahead of time.

I just wanted to correct that and I ask my colleague if he is aware that it did come in ahead of schedule, under price, and is now producing gas at precisely the price it estimated it would be producing at 3 years ago and that, indeed and in fact, is a competitive price.

Mr. BRADLEY. I respond to my friend from North Dakota by saying that I guess my position, in light of not only the Great Plains coal gasification project but a variety of other projects that have been a part of the Synthetic Fuels Corporation efforts, is that it is better to leave the market determine which projects are going to fly and which are not. I basically believe that is a much better approach than trying to guess what the market price is going to be at a particular time. There is no doubt that the coal gasification project, while it might have met its target, is still producing gas high above what gas is available for in other parts of the United States out of the ground or in Mexico or Canada. So whether it came in at a proper level as targeted and agreed to in advance by the bureaucrats in my view is not the issue. My view is whether you believe it is better for the Government to sponsor these programs or whether you think it is better for the market to determine which one of these technologies is most workable.

Mr. President, I am pleased to yield to the distinguished Senator from Maryland.

THE VISIT TO THE SENATE BY MEMBERS OF THE PARLIAMENT OF GREAT BRITAIN

Mr. MATHIAS. Mr. President, I appreciate the courtesy of the Senator from New Jersey.

Mr. President, it is with great pleasure that I announce to the Senate that we are visited today by a group of members of the Parliament of Great Britain. They are in Washington in connection with the exhibition which is opening at the National Gallery of Art from the Treasure Houses of Britain. It is a great pleasure and privilege to welcome them as guests of the Senate.

[Applause.]

Mr. MATHIAS. Mr. President, our visitors are:

Lord Gibson, Lord Ashcombe, Lord Leigh, Lord Iliffe, Earl of Rosebery, Marquess of Bute, Lord Northbrook, Lord St. Oswald, Earl Bathurst, Duke of Rutland.

Earl of Cawdor, Viscount Hampden, Lord Montagu of Beaulieu, Lord Clifford of Chudleigh, Baroness Elliot of Harwood, Lord Tollemache, Lord Astor of Hever, Lord Somerleyton, Lord Crathorne, and Lord Scarbrough.

The PRESIDING OFFICER. The Chair thanks the Senator from Maryland. We greet our visitors and we very much appreciate them coming.

RECESS

Mr. MATHIAS. Mr. President, I ask unanimous consent that we recess for 3 minutes to greet our visitors from Great Britain.

There being no objection, the Senate, at 12:52, recessed until 12:56 p.m.: whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. SIMPSON).

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS 1986

The Senate continued consideration of the bill (H.R. 3011).

Mr. BRADLEY. Mr. President, if I may revisit briefly the question raised by the distinguished Senator from Idaho on what projects the Synthetic Fuels Corporation had supported, we had an exchange on Union Oil. The Senator said that the Union Oil project was originated under DOE. I do not disagree with him, but, Mr. President, the Union Oil Shale Project has not worked for 2 years and yet the Synthetic Fuels Corporation gave the sponsors $500 million in additional SFC subsidies. So the taxpayer liability for this project has suddenly increased to $900 million.

So the point is that, indeed, it might have originated under DOE, but it is the Synthetic Fuels Corporation that has increased it by $500 million.

Will the Senator explain that?

Mr. McCLURE. will the Senator yield so that I might propound a unanimous-consent request? Under the earlier agreement, at 1 o'clock the Senate would revert to the consideration of the farm bill. My understanding of the situation is that the Agriculture Committee is still proceeding with the hearing on farm credit. I have had a request from the majority leader's office that I propound this unanimous-consent request that we remain on the Interior bill until 2:30. That would permit us to continue this discussion. I understand there are others who think we should not do that, but I will on behalf of the majority leader propound that unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. EVANS. Mr. President, reserving the right to object, will the Senator from Idaho yield for a question? Is it his intent that the discussion continue but that we not come to a vote on the issue?

Mr. McCLURE. Mr. President, in responding to the Senator, if the Senator will yield, it would be my intention

to continue the discussion. If we were prepared to come to a vote, we would. If we were not prepared to come to a vote, we would not.

Mr. EVANS. I think there may be others who would want to be heard who are not here at this time.

Mr. McCLURE. I have no doubt that is correct. If we have a chance to discuss it, we will find out. We will find out how much they want to be heard.

Mr. EVANS. If the Senator will add to the unanimous-consent request that we continue but not have a vote prior to 2:30, I would not object.

Mr. McCLURE. I am not prepared to say that we would not have a vote, because I do not know whether we are involved in extended debate on this issue, whether we have a minifilibuster, or whether it is simply a question of people wanting to be heard. If they want to be heard, I do not want them to be cut off. I have offered a mechanism which I hope will be voted on. It is not my intention to offer a motion to table my own amendment.

Mr. EVANS. I say to the Senator that I do not intend to engage in a filibuster. I think we should get to the issue. However, the proposed amendments by the Senator from Idaho and the Senator from Louisiana are brand new. They have just come to us. No one has had a chance to check with our colleagues on the consequences of those amendments.

Mr. McCLURE. I know that the Senator from Washington is a very quick study. They are simple amendments, and it will not take him more than 30 seconds to read them and understand them.

Mr. EVANS. I do understand it quite thoroughly. I just want to make sure that 50 of my colleagues understand it as thoroughly.

Mr. McCLURE. I understand that.

The PRESIDING OFFICER (Mr. DENTON). Is there objection?

Mr. MELCHER. Mr. President, reserving the right to object, I have a dual interest in this. I have an interest in this bill and in the bill which would be before us at this moment and which would be open to amendment.

I repeat that I will seek recognition to offer an amendment which I have been waiting patiently to offer. I believe the request is for 2:30 p.m.

Mr. McCLURE. The Senator is correct.

Mr. MELCHER. I am not going to object. I reserve the right to object just to make this statement.

I shall seek recognition, and I hope I can be recognized on this matter, after patiently attempting to get the amendment before the Senate last night and again this morning and now at 1 o'clock—each time the bill is open for amendment. I hope my amendment will be the first one when we do get on the bill. I have no objection until 2:30.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, I am a little disturbed with my colleague from Idaho, who suggested something like a minifilibuster.

Mr. McCLURE. I do not know.

Mr. METZENBAUM. The Senator from Idaho is going to learn full well when this Senator or any other Senator around here is engaged in a filibuster.

What you have done in this instance is that you have confused an issue which you knew you were going to bring to the floor, knew many of us had a concern about it, and you knew that we intended to be involved in the issue.

I must say to my colleague that I am not certain why he did not see fit to share with us his amendment, the minority manager's amendment the modification of the minority manager's amendment.

True, Senator EVANS very well can understand this amendment. True, the Senator from Ohio can very well understand this amendment. But there are 96 other players in the U.S. Senate besides the managers and us.

Mr. McCLURE. I do not regard the other 96 Members as less astute than the Senator from Ohio.

Mr. METZENBAUM. Of course not, and no one would suggest that by implication. But it is a fact that there is an effort to confuse the issue.

What the Senator from Idaho and the Senator from Louisiana are doing is that they are offering amendments which they call a compromise, and they are not a compromise, and the issue is to keep the Synthetic Fuels Corporation in business and operating.

What we thought we had before us was the committee amendment, which I had indicated from the start we were prepared to vote on. We were prepared to vote on it before 1 o'clock, up or down, on the committee amendment. But, no, the Senator from Idaho and the Senator from Louisiana did not see fit to share their views with us on this subject. As a consequence, you pop on us, on the floor, an amendment, by surprise, and some might be confused. Some might think it is a compromise. I know it is not a compromise. I know it is just a back-door way of keeping the Synthetic Fuels Corporation in business. But I am concerned that some people might think it is what you described it as—a compromise.

By reason of that fact, I want to be certain that there is sufficient debate on the subject. I do not intend to object to your request to continue the debate until 2:30.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. McCLURE. I thank the Senator for yielding, and I thank the Senator for his statement.

It is not my intention to try to cut off debate. It is just that I did not wish to agree with the suggestion of the Senator from Washington, that I am prepared to say that I know the Senate will want to discuss it for 1½ hours more without coming to a vote on it. That is my only reason for withholding the response the Senator from Washington wished me to give.

Mr. BYRD. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Democratic leader.

Mr. BYRD. Mr. President, there are Senators on my side of the aisle who have amendments, and they would like to call them up.

Mr. MELCHER has an amendment on the farm bill. At least, I got the clear implication from last evening that he was going to offer his amendment at this point.

I am reluctant to continue to agree that the farm bill be laid aside. I am not against the pending appropriations bill.

I am concerned that if we now lay this farm bill aside at 2:30, we may be asked then to lay it aside at 3:30. I am not saying that the Senator will be doing that, except at the request of the leader, but I do not want to continue to lay this bill aside. The first thing we know, the day will have gone, and nothing will have been done on the farm bill.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BYRD. I yield.

Mr. McCLURE. I cannot tell the Senator what might be behind the request or whether or not the Senator's fears are well founded or ill founded. All I can do, as I did at the outset, is indicate that the information that comes to me is that the Agriculture Committee is still meeting on the farm credit question and that the managers of the farm bill will not be able to be on the floor in the near future. If we do not continue on this approriations bill, we will be faced with a long quorum call and a dead space in time. I just tell the Senator that I cannot go further than that because I do not know more than that.

Mr. GARN. Mr. President, if the Senator will yield, I am not involved whatsoever in the procedural dispute. I simply came here to speak and have stood in this position, with my microphone, for 34 minutes now, expecting action to take place on the farm bill.

The Senator from New Jersey has been interrupted many times. He was 5 minutes away from finishing his talk, 35 minutes ago. I hope he can finish his statement and that I can make my brief statement, after both of us have been so patient, if we could

have even a brief continuation. I do not think that will slow down the Senate, because I do not think the Senate will work on the Agriculture bill until the committee comes back to the floor.

Mr. BYRD. Mr. President, I appreciate everything that has been said.

As I say, there are Senators on this side of the aisle who have amendments to the farm bill. I do not want to see this continue throughout the day, with no opportunity for action on the farm bill. Senators on this side want to bring up their amendments.

If the distinguished Senator would change that hour to 2 p.m., I would not object.

Mr. McCLURE. I will be happy to accommodate in whatever way.

Before changing the request, let me indicate I have just been informed that the manager of the bill has informed the staff that he would be prepared to come to the floor at 2:30 p.m. for the resumption of the farm bill, if that information is of any value to the Senator from West Virginia.

Mr. BYRD. It is of value. I do not want to inconvenience any Senator any more than I might have to in the protection of my own colleagues and my own rights.

I will not object in this instance with the understanding that the Senate will go back to the farm bill at 2:30 p.m. and I would hope that the leadership on the other side of the aisle would relent a little and let Mr. Melcher get his amendment up.

That having been said, I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. I thank the Senator.

Mr. BRADLEY. Mr. President, as I was saying about the Synthetic Fuels Corporation, the distinguished manager of the bill pointed out that neither the Great Plains coal gasification project nor the original Union oil shale contract were let under the Synthetic Fuels Corporation.

I wonder, however, if he could answer a few questions about the number of projects of the Synthetic Fuels Corporation.

Just take the Union shale project which the Senator pointed out correctly was not a project that was originally supported or originally sponsored by the Synthetic Fuels Corporation but rather by DOE. Yet, I ask the Senator is it not true that the Synthetic Fuels Corporation gave the sponsors $500 million in additional subsidies in order to bail it out? Did not the then Synthetic Fuels Corporation commit an additional $500 million to the Union shale oil project?

Mr. McCLURE. The Union I project, which was the original Department of Energy project which was then transferred under the terms of the act to the Synthetic Fuels Corporation, was subsequently restructured and approved by the Synthetic Fuels Corporation. In the operation of that demonstration project, the Union I project ran into some problems with respect to the handling of materials, particularly slag, that was coming out of the retort. Union Oil, to correct that, submitted what became known as Union II, which when merged with their first project would change the combustion process of a fluidized bed process, and the Senator is correct that the Synthetic Fuels Corporation has entered into an agreement with respect to going forward with the project which will require an additional investment at Union II by the sponsor of $225 million.

The SFC support is a price and market guarantee with the exception of up to $327 million, which is a loan guarantee, as I understand it.

Mr. BRADLEY. So the Senator agrees there was an additional commitment of $500 million?

Mr. McCLURE. Yes, broken down into two components of a purchase price and price guarantee and a loan guarantee.

Mr. BRADLEY. So the total taxpayer liability for this project is $900 million?

Mr. McCLURE. Over a period of 10 years it could reach that level. That is the upper limit.

Mr. BRADLEY. If I may propound another question to the Senator on the Dow syngas project, is it true that the Dow syngas project will receive $12.50 per million Btu's for its gas?

Mr. McCLURE. While the staff is getting those figures, let me just add with respect to Union II that that $500 million under Union phase 2 was rescaled, since the compromise that reconstituted the board of last year, down from $2.7 billion to $500 million.

Mr. BRADLEY. Does the Senator mean at an earlier point it committed $2.7 billion?

Mr. McCLURE. That was the proposal. It was not committed.

Mr. BRADLEY. I see.

Mr. McCLURE. But under the negotiation process, with the reconstituted SFC Board under the agreement of last fall, the project has been rescaled down from the $2.7 billion originally intended to $500 million.

Mr. BRADLEY. But it is true the Synthetic Fuels Corporation commited an additional $500 million.

Mr. McCLURE. The Senator is correct.

Mr. BRADLEY. Now as to syngas, it is true that they will receive $12.50 per million Btu's for the gas.

Mr. McCLURE. That is for the first $10.95 billion Btu's of production and $11 per million Btu's thereafter, and there is an adjustment quarterly by three different indexes.

Mr. BRADLEY. So is it true that the total award is $620 million for the Dow syngas project?

Mr. McCLURE. That is the maximum liability under the SFC's price guarantee. It is not necessarily accurate to say that under all circumstances it will reach that.

Mr. BRADLEY. Is it true $620 million maximum liability is several times the cost of the venture to the sponsors?

Mr. McCLURE. The capital cost of the project is estimated to be $105 million.

Mr. BRADLEY. $105 million?

Mr. McCLURE. The Senator is correct.

Mr. BRADLEY. And total award is for $620 million; it could be $620 million?

Mr. McCLURE. Over a period of 10 years under the price guarantee.

Mr. BRADLEY. So it is six times greater than the cost that they went into?

Mr. McCLURE. Over a period of 10 years the Senator would be correct. That does not include the carrying cost of the investment. That is just the initial capital cost.

Mr. BRADLEY. One other question. Is it true on the Great Plains project that the project defaulted on a $1.5 billion loan?

Mr. McCLURE. Again, as to the Great Plains project, the Synthetic Fuels Corporation never had any connection with that project. The Senator can criticize the project if he wishes, and I would certainly agree with the Senator from North Dakota that it is not subject to all the criticism it gets. The Senator can if he wishes criticize the project, but do not criticize the Synthetic Fuels Corporation for it.

Mr. BRADLEY. I say to the Senator I have plenty of things to criticize the Synthetic Fuels Corporation for without even mentioning the coal gasification project, and I think the Senator's confirmation on the Union project is much appreciated because earlier in the exchange it was intimated that the DOE was the responsible party here and the Synthetic Fuels Corporation made no additional commitment. I am pleased that the Senator has made the record crystal clear.

Mr. McCLURE. What I said earlier, I asked the Senator from New Jersey to identify the project to which the Synthetic Fuels Corporation had made commitments which he said were ill-designed. When I asked that question the Senator brought up Union I, which is a DOE project and not Synthetic Fuels, and Great Plains, which is a DOE project, and not Synthetic Fuels.

Mr. BRADLEY. And the Senator confirmed that the Synthetic Fuels Corporation committed an additional

$500 million to this ill-designed project.

Mr. McCLURE. Whether it is ill-designed or not is another question. But, yes, the Senator is correct with respect to the commitment.

Mr. BRADLEY. I say to the distinguished Senator that if he goes anywhere in the country and told them we were taking the taxpayers' dollars and spending to subsidize production of oil at $67 a barrel that would not be viewed as a particularly prudent decision, and I simply wanted to make that plain.

Mr. McCLURE. Will the Senator yield?

Mr. BRADLEY. Certainly.

Mr. McCLURE. The Senator is entitled to his opinion, which I certainly do not agree with. But I think that what this entire debate is about, is whether or not we ought to have a synthetic fuels program and, if so, what kind of a program.

The Senator is entitled to state his view, but do not ask me to agree with him.

Mr. BRADLEY. I thank the distinguished Senator from Idaho for clarifying the RECORD on the commitment by the Synthetic Fuels Corporation of an additional amount of $500 million and also a commitment to pay $12.50 per million Btu for a commitment to Dow in the syngas project of $620 million, could be, which is six times what the project costs.

Mr. President, these points only illustrate my earlier line of argument, and that is that these projects are not in the national interest; that they are the wrong way to spend taxpayers' dollars at a time of budget stringency; and that they do not make good energy policy sense because they are not directed at what the problem is.

And the problem is: What do we do if we lose oil tonight in the Persian Gulf? The record of the Synthetic Fuels Corporation, which now, as a result of all these projects, produces about 1,000 barrels of oil per day, when originally it was conceived to produce in 1987 500,000 barrels a day, does not leave me particularly reassured that this is going to give us any relief, even in the 1990's.

So I say to my distinguished colleague from Idaho that, indeed, there is a very real disagreement here on how to spend taxpayers' dollars. I would argue that the parable of the grasshopper and the squirrel was totally irrelevant to this particular debate and that, instead, we should carefully analyze how we got into the box of spending over $20 billion for overinflated boondoggles for major companies, when, instead, we could have trusted the market and benefited more of our consumers.

Mr. President, I thank the distinguished Senator from Utah for his patience and say to him that the only consolation I can offer him is that I hope his speech will not be interrupted by six specific interruptions. I thank the Senator from Utah.

Mr. GARN. Mr. President, I might say to my colleague from New Jersey that I am certain the 50 minutes I have waited to say what I have to say was not worth it to the Senate or to me to wait 50 minutes. But, having invested that much time, I am going to go ahead and say what I was going to say, in any event.

I could not be considered a cheerleader for the Synfuels Corporation. Before the Senator from New Jersey was here, when I was first elected, I was a junior member of the Banking Committee. Senator PROXMIRE was the chairman. The Banking Committee did not like the way the Synfuels Corporation was being set up financially and felt that we should consider the financing end of it.

We were not energy experts. We recognized the Energy Committee was. So we got a referral to consider it. After holding a number of hearings, we came back and concluded that we were right; that it was far too big a project to talk about $88 billion; that we wanted a vastly scaled-down project and we wanted the means of financing the change.

Well, the Senate totally ignored the Senate Banking Committee at that time and said, "We don't agree with you," and went ahead with the original proposal.

I only say that to indicate that I have not been one, for the last 10 years, who has been trying to spend large amounts of money in the Synfuels Corporation. But, as I listened to the debate while I have been standing here, a great deal of talk about numbers and problems, I am not in a position to agree or disagree, particularly.

I certainly could agree that the Synfuels Corporation has had its problems. There has been some wasted taxpayers' dollars there. But I think what we are doing is getting away from the fundamental issue of whether we need to develop alternative sources of fuel in this country or not.

I do not want to stand here like the old sage and indicate that I have been around long enough to understand everything that goes on around here. I have not. But I sure have learned one thing in 19 years in public office, whether it be here or whether it be in municipal government, and that is politicians do not like to look too far into the future. We are very defensive and very reactive. We do not want to look beyond the next election, because if we try to plan 5 or 10 or 15 years down the road, how does that get us credit and votes and at the next election?

I see it happen over and over again. I see it happen in the Banking Committee, where you have a financial revolution going on out there. It is happening—deregulation is occurring, savings and loans are failing and the deposit insurance system needs revision. We have more banks on the trouble list since the 1930's; insurance companies are buying security firms and banks; security firms want to be in the nonbank-bank business and banks want to be in everybody else's business. That is a fact. It is happening. It is going on.

Try to get this body to move? Try to get somebody to make some decisions for the future? Yes, we passed one bill 3 years ago; passed one in the Senate and could not get it through the House. Time rolls on.

Well, it applies to energy. I was here back in 1974 when I traded cars with my wife. I would give her the duty of lining up in the gas lines because I did not have the time. So she would take the empty car and I would drive the full one. And, boy, everybody was out here on this floor demanding energy independence. It did not matter whether you were conservative, liberal, Republican, or Democrat. Boy, everybody had to make a speech on how we had to get out of that, because it was real. It was right here in Washington, DC.

Sometimes we could not get both cars filled with gas, so you would call one of your colleagues and say, "Do you have gas in your car?", so you could get a ride down to the Senate. So we had to have energy independence and we got into the gigantic Synfuels Corporation that I felt was too expensive. But at least we were trying to do something.

But how quickly we forget. Now we have a bunch of critics out on the floor saying that we ought to kill it totally. I can agree with a lot of their criticism. Why do we not try and fix it? It has been scaled back dramatically. Why do we not try and fix it, rather than do away with it?

Because, when this comes to an end and everybody votes, I hope the public looks at who voted to totally do away with it and abandon alternative sources of fuel, because the next time the gas lines come, I want their constituents to know how shortsighted they were.

I just cannot believe how unwilling we are in any area, whether it is banking, or whether it is energy, or any other field, that we wait until there is an editorial in some newspaper, or we hear something on TV or get a petition from our constituents, and then we say, "Hey, we got to act on that. People are stirred up."

Well, energy is plentiful right now. It is relatively cheap. I never thought I would think that $1.12 was cheap, when I am old enough to remember 15-cents-a-gallon gasoline. But, relative to what it could have been when

they talked about $2-a-gallon gasoline, it is cheap.

We have a glut. OPEC is in disarray. They do not know what to do with their own supplies; how much to produce. But I hope there is no one on this floor that thinks that is going to last.

I can remember those who said it would not happen to begin with in 1973 and 1974. "Oh, that will never happen; don't worry about it. We don't need to look at any alternative sources. We don't need to explore for fossil fuel. We don't want to look at anything. We don't want to go into geothermal because it is not necessary. We have got these abundant supplies."

That has only been 10 or 11 years and we have forgotten. That is why I am out here defending the amendments of the Senator from Idaho, which are trying to clean up some of the very problems that the critics talk about but they just would totally do away with it and sit back and say, "Well, we will worry about the next crisis when it gets here."

Maybe it is impossible ever to get the Senate and the House of the United States to look longer than a few months in advance. I mean, that is a long time. Usually, we look at the immediate—what are we going to put out a press release on today? How are we going to look like a fiscal conservative? It does not matter how we vote on this issue, but how can we get a big thing out of this, that we are against this expensive, wasteful, taxpayers' boondoggle that is going on.

Mr. METZENBAUM. Will the Senator yield?

Mr. GARN. I will yield in just a moment.

In the 11 years I have been here, I suppose that is the thing that bothers me more about this body than anything else—not the decisions that are made, not the differences in political opinion, not the differences between parties, but just that we will not try to look at the future and have a little foresight.

We are reacting, we are defensive, we are too interested in our own individual political future, and how we look with our constituents. I would just like the critics to come up and say, OK, the Synfuels Corporation ought to be done away with but we have an alternative plan for developing coal gasification, tar sands, and oil shale so that next time those OPEC nations cannot cut it off, they cannot cause massive unemployment in this country, a massive increase in the cost of living, and 15- to 18-percent interest rates because that is one of the major causes of that gigantic inflation we had in the late 1970's—the OPEC oil embargo, and the disruptions that it caused in our economy.

No single event has caused that much problem with our economy. We looked at that very closely in the Banking Committee because we get it in the neck when we have high interest rates. It is obviously the bankers. We need to look back and learn from 1973-74. Apparently, we will not. I guess I am shouting at windmills. I do not know why after 11 years I continue to have optimism that the Senate of the United States will try to have a little foresight rather than basically being against things or reacting to them after the fact.

I will guarantee you that regardless of the outcome of this vote, when it occurs, whether we have a synfuels project or not, or corporation, that sometime in the next few years we will have some of the very same Senators and Congressmen who voted on the other side back here yelling and screaming, getting out their 1973-74 speeches about how we have to be energy independent. We cannot tolerate these disruptions by foreign countries in our domestic economy. They will dust off their speeches, and they will hope the American public will forget how they voted in between.

I would suggest that the American taxpayers have a stake in trying to develop alternative sources of fuel. And the cost to the taxpayers if we can make Synfuels Corporation more efficient will be a lot less than $2.50 or so a gallon for gasoline, forgetting the disruptions that it causes to the tourist industry, to interest rates, to employment, and everything else. You cannot even measure—I am not sure we can even quantify—the cost of that embargo and the attendant increase in oil prices as a result of it to our economy, and the reduction in the standard of living it caused.

So I hope the Senate will not be shortsighted. I hope we will look at this on a more fundamental basis, and not talking about a dollar here and a dollar there, again recognizing that Synfuels Corporation has not been a shining example of efficiency.

Let us not throw the baby out with the bathwater. Let us try to develop some alternative sources of fuel.

I would like to hear from those who just totally want to do away with it what their alternative is, and what their answer is going to be a few years down the road when we face the next energy shortage in this country.

I yield the floor.

Mr. METZENBAUM. Mr. President, will the Senator yield for a question?

Mr. GARN. I will answer a question. I will yield the floor as well.

Mr. METZENBAUM. The Senator indicated that this amendment or this proposal of Senators JOHNSTON and MCCLURE would help to clean up the situation. At least that is the way I interpreted the Senator's speech.

I read the amendment. I see nothing in it that will do anything about cleaning up the situation as it presently exists. If the Senator would be good enough to explain to me how it will clean it up, all I see it doing is accelerating the expenditure of $7.4 billion to 1 year. It has to be spent in 1 year or it cannot be spent. If I know the SFC, they will be able to push the money out fast.

So I would like to ask the Senator what kind of improvement is that going to provide? How is that going to help these vested pensions? How is it going to help this average of $56,000 a year in salaries for more than 50 percent of the employees?

Mr. GARN. The Senator is tying two of my statements together. On the one hand I said I supported this amendment, which I do, as an alternative to the Senator's attempt to totally do away with the Corporation. I also then said in a different context that there were problems with synfuels that ought to be cleaned up. I said I was an original critic of the 1988 authorizations as a member of the Banking Committee, and that there had been wasteful and inefficient practices.

I challenge those who are offering to totally do away with it to come up with suggestions for cleaning it up rather than just doing away with it, and some plan for developing alternatives in the future. I did not say this amendment was the answer to too high a salary or all of that. The Senator's two statements remain, but in a different context.

Mr. McCLURE. Will the Senator yield?

Mr. METZENBAUM. Mr. President, I yield.

Mr. McCLURE. I want to respond to the same question as asked the Senator from Utah. First of all, the Senator in his statement indicated that the Synfuels Corporation would, under this amendment, go out and spend over $7 billion. I think the Senator was a little loose in the language. He knows better than that.

Mr. METZENBAUM. It provides they cannot make any further expenditures after September of 1986.

Mr. McCLURE. The Senator is mistaken. I say that most respectfully.

Mr. METZENBAUM. I will be glad to have a clarification.

Mr. McCLURE. The SFC cannot make commitments beyond that date. In other words, what they do is commit their money to a project which will be expended over a 10-year period in the future.

Mr. METZENBAUM. What the Senator is saying is I am not wrong about the fact that by September 1986 they have to make the commitments whether they think it is good or bad, if they want to get rid of the money.

It is like what we do in Government. That is, so many departments of Government run so fast before October 1,

the end of the fiscal year to spend the money, and to commit it.

Mr. McCLURE. Will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. McCLURE. Yes; that is simply a way of trying to give assurances to people like the Senator that this does not have an unlimited future existence. If the Senator would leave them alone, I would not have offered the amendment.

Mr. METZENBAUM. The Senator is really very reassuring. What he is saying to me is, we are going to put it out of business in September of 1986 as far as making any commitments after that time, but do not worry, we are going to spend all the money. We commit it before that time, even if we do not know what to spend it for.

Mr. McCLURE. Will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. McCLURE. I certainly agree with much of what the Senator said with the exception of when he said that even if they do not know what they are doing. The Senator knows that last year we forged a compromise which was agreed to by this body, the other body, and by the administration.

One of the things we had to do to get enough support from the people who were doubtful of the program was to put some more limits on their spending authority, reduce it, and limit the time and scope of their program, which we did. By putting that compromise together we got enough votes to avoid terminating the program last year.

Similarly right now, the Senator from Ohio and others, who have not liked it for a long time, want to terminate the program completely.

What I am trying to do is find a compromise that will give some assurance to some people at least that it is not going to live forever, trying to spend all of the $8.6 billion that we made available to them last year out of the original $88 billion.

It is an attempt to give some assurance to people, who doubt it, that the Corporation will terminate. As far as I am concerned, it is certainly not a question that they are going to be irresponsible. If the Senators would look at their business plan, which was developed over the last several months, and at the way they are pursuing that business plan, which was adopted after we finally confirmed enough members of the Board so that they would have an active quorum, they would agree.

I would remind the Senators that their confirmation only occurred in May of this year. The Board has been following that business plan. They think they can complete the awards under that business plan if they are given another year to do it. I thought it would be a measure of some assurance to the Senator from Ohio, and others, that indeed there was not going to be an unlimited life to this Corporation.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I point out that since this question has arisen concerning the expenditure of their funds, the Synfuels Corporation has proposal to commit $720 million to bail out the Great Plains project, and $500 million to bail out the Union Oil project. If I could sing, I would probably put to music "Where, oh, where have all the conservatives gone? Where, oh, where have all the budget balancers gone?" We come out here, and make a big-to-do about Gramm-Rudman, what we are going to do to balance the budget, mañana, next year, 2 years, 5 years from now.

We are talking about the matter before the U.S. Senate that has to do with the spending of $7.4 billion.

I initially supported this agency, and the Senator from Idaho knows that very well. I not only supported it but I presented specific language to put in to provide protection. We could not prevail. No, we had to get people from industry in so that we would not have the restrictions in that the Senator from Ohio thought should be in. We were going to have the cream of industry come into the Synthetic Fuels Corporation. The Senator from Ohio was told he was wrong when he thought we had to have limitations with respect to self-dealing, with respect to conflicts of interests, with respect to a number of other things.

So we finally got the bill through and I went along and I supported it.

What has happened?

What has happened is the following:

The President of the United States has made clear how unhappy he is with many of the actions of the Synthetic Fuels Corporation.

The Treasurer of the United States has indicated his concern about the effort to go out the back door with hundreds of millions of dollars in recent weeks.

The Secretary of Energy has indicated his concern with respect to the entire issue of the continuation of funding for the Synthetic Fuels Corporation.

The Senator from Utah comes to the floor and tells us, "Well, we just have to have a program."

You know, there is a lot of merit to that. I thought so myself in the past, and I still believe so. I believe we ought to have solar energy projects in this country. I believe we ought to have gasification projects in this country. I think we ought to be able to turn coal into natural gas. I believe that we ought to be able to develop shale oil in this country.

I remember when one of the most prominent people in the industry with respect to the development of shale oil said to me one evening, "If we had only $3 more in tax credit"—at that time, oil was $13 a barrel—"we would be able to produce more oil than the Saudi Arabians have at the present time."

I have heard some beautiful word pictures about the development of synthetic fuels. I am one who still believes, as the Senator from Utah and many other Members of this body, that we should indeed be developing synthetic fuels in this country.

There are many kinds of programs and projects we have discussed over the years, and I have been in the forefront of supporting almost all of them. In fact, to the best of my recollection, I have supported all of them.

But what we are talking about here has to do with the fact that this Synthetic Fuels Corporation has been wasteful. This Synthetic Fuels Corporation has been irresponsible. This Synthetic Fuels Corporation has thrown hundreds of millions of dollars and in some cases billions of dollars at an industry that has failed to produce.

They have not been funding small synthetic fuels projects. They have been supporting the biggest ones in the country.

One recently came up in which those who were involved, who had used the Government's money, also had gained tremendous tax advantages and tax writeoffs as against their other income, but still came back pounding at the door of the Synthetic Fuels Corporation saying, "We want more. We want more. We want more."

You know, it is a funny thing. This crowd that keeps coming in saying they want more and more and more from the Synthetic Fuels Corporation are also the ones whose lobbyists tell us that we have to balance the budget, whose presidents go on national television programs and say we have a responsibility to balance the budget, whose corporations spend literally hundreds of thousands of dollars in newspaper advertising saying it is the responsibility of Congress to bite the bullet and balance the budget.

Well, I happen to agree with all of that. I think it is our responsibility. I think every day in every way we show more and more the realities of the U.S. Congress. That is, that we would like to balance the budget on somebody else's back. We are not willing to eliminate a project in one of our own States because that might hurt us politically.

I have had Members during the course of this debate say, "I think you are right, but, you know, I have this project in my State."

When does the day arrive when the Members of the U.S. Congress, 535 of

us, have the temerity, have the courage of our own convictions, to stand on the floor of the Senate and say, "Enough is enough. No more."

This is a subsidy program. This is nothing different than a subsidy program.

We are great when we cut off subsidies for the poor. We are great when we cut off subsidies for women and infants and children. We show great courage when we cut back on school lunch programs. We show great courage when we stand out here on the floor. After all, those kids do not have powerful lobbyists. We are not spending hundreds of millions of dollars in their States so that they may be active individuals. They are kids without anybody to speak for them here. There are senior citizens without anybody to speak for them here.

So I say to my colleague, is it not time that we recognize that we did not make the mistake? We probably did the right thing when we created the Synthetic Fuels Corporation. But those who have had the privilege of operating it, those who have been in the position to dole out the money, those who have been in the position to bring to it a sense of integrity and high mindedness, instead have brought to it an effort to play the political game. Two of the presidents have already resigned under circumstances that are hardly complimentary to them.

I am opposed to the continuation of the Synthetic Fuels Corporation because I think it has worn out its welcome. I am pleased to say that by an overwhelming majority in the House of Representatives, 312 to 111, the House indicated its determination to terminate its existence.

I think that is our responsibility. The so-called compromise that has now been offered to this body is not a compromise at all. It is just another way of permitting the Synthetic Fuels Corporation to continue in business and spend the $7.4 billion that could be saved if we were permitted to vote up or down on that particular issue.

Mr. McCLURE addressed the Chair.

Mr. METZENBAUM. Mr. President, I have the floor.

AMENDMENT NO. 936

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM for himself and Mr. PROXMIRE], proposes an amendment numbered 936.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection?

Mr. McCLURE. Mr. President, reserving the right to object, I wonder if the Senator will tell us what the amendment is about.

Mr. METZENBAUM. It is the same language as in the House. It is the same language as that which is in the House bill.

Mr. McCLURE. I thank the Senator and I withdraw my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 54, line 23 strike through page 55, line 17, and insert in lieu thereof the following:

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of Interior and Related Agencies Appropriations Act, 1980 (P.L. 96-126), and subsequently made available to carry out Title I, part B, of the Energy Security Act by P.L.'s 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This recission shall not apply to:

(1) funds transferred from the Energy Security Reserve by this Act;

(2) 500,000,001, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under Title I of the Energy Security Act before the date of enactment of this Act.

Mr. METZENBAUM. Mr. President, without losing my right to the floor, I yield to the Senator from Washington.

AMENDMENT NO. 937 TO AMENDMENT 936

Mr. EVANS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Washington [Mr. EVANS] proposes an amendment numbered 937 to amendment numbered 936.

Mr. EVANS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be stricken insert the following:

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are herby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Laws 96-126), and subsequently made available to carry out title I, part B, of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This rescission shall not apply to:

(1) funds transferred from the Energy Security Reserve by this Act;

(2) 500,000,002 which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under title I of the Energy Security Act before the date of enactment of this Act.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. EVANS. Mr. President, I shall take just a moment. May I ask for clarification on the parliamentary position we are now in?

The PRESIDING OFFICER. The committee amendment, the substitute pending to it, the perfecting amendment to the substitute, and two perfecting amendments to the language proposed to be stricken.

Mr. EVANS. May I ask the Chair, which one will be voted upon first?

The PRESIDING OFFICER. The perfecting amendment to the language proposed to be struck.

Mr. EVANS. In other words, the amendment I have just introduced?

The PRESIDING OFFICER. The Senator is correct.

Mr. EVANS. Mr. President, I thank the Chair.

This gives us an opportunity to vote directly on the issue which we have been debating in fundamental terms during the course of the last several hours, the question of whether or not we are to continue with the Synfuels Corporation.

The proposals of my good friend, the chairman of the committee [Mr. McCLURE] and the ranking member were no compromise. They represent no compromise whatsoever. I think that it is important for the Senate to have the opportunity to vote directly on the fundamental issue.

I should say to the Senator from Kentucky, who talked about the concerns of national security, national security is not enhanced remarkably if, in 10 years, if we move fully ahead on the synfuels industry, one-half of 1 percent—one-half of 1 percent, Mr. President—of our energy needs would be met. That cost $16 billion. Are we going to spend another $16 billion to get to 1 percent or another $32 billion to get to 2 percent? How much do we have to spend to get energy from these sources for national security? I suggest there are other and better ways and ways more likely to give us national security than this.

The Senator from Louisiana earlier talked about the fable of the grasshopper. I suggest that another fable is much more appropriate. We have all heard of the three little pigs. In this case, I suggest the wolf is the wolf of war.

The wolf of war outside would certainly blow down the straw house, the straw house of depending on overseas supply, depending on OPEC, depending on nations which are not very

secure. But I suggest that the wooden house which the wolf in the fable and the wolf of war would also blow down is the synfuels house—the synfuels house of a half percent of our needs in the next 10 years.

I suggest there is a brick house, one that cannot be broken down. That is to proceed as rapidly and as wisely and in as balanced a manner as we can through the Department of Energy, with the assistance and direction of this Congress, on the wide variety of energy resources which will make us independent.

I suggest that while virtually no resources have been put to it, if we were to seek out a perfect fuel to replace or to work with petroleum for the future, what would we be looking for? We would be looking for a fuel that is nonpolluting. We would be looking for a fuel that is not subject to overseas cartels—in other words, universally available. And we would be looking for a fuel that is economic.

The most prevalent element around, hydrogen, is nonpolluting. It certainly is not subject to cartels, since the fundamental source for hydrogen is water, which is available for every nation and to everyone around the world. And while it is not economic yet, it could be and, I suggest, might very well be if we put anything like the resources we are now putting into the synfuels industry into the development of necessary elements to bring hydrogen into production.

That is just one source. But there are others. There are more alternatives potentially for adequate and cheap energy supplies than we are yet doing research on. It would be, in my view, a lack of will and a lack of wisdom if we do not have a secure economic energy supply in all of its aspects by the turn of the century, and we need not do it by continuing down the wrong road with too much money and far too little in the way of production.

The Senator from Idaho mentioned that a deal had been made with the administration. Perhaps that is right, or at least, he felt that was right. But I suggest to my friend from Idaho that we have had—I would not even call them deals. I think they are agreements that, at the time they are negotiated, appear to be the appropriate thing to do. We had an agreement, I remember, many years ago, long before I came to this body, to proceed in a partnership program on a supersonic transport. We got halfway there and decided it was not such a good deal.

Mr. McCLURE. Will the Senator yield?

Mr. EVANS. I shall be happy to yield.

Mr. McCLURE. This agreement we had was merged into legislative action last fall after weeks and weeks of negotiation. A part of that agreement was that the administration would submit nominations to members of the Board. There were four vacancies that needed to be filled. The administration has submitted two such nominations. Our committee acted on those nominations. The Senate did not act on them before adjournment last fall.

There were recess appointments made during December, after we had adjourned, but those Board members did not vote upon the substance of projects until after they were confirmed. By the time we got through acting on them in the committee and they had been resubmitted to the floor of the Senate and the Senate had had the opportunity to work on those nominations, those nominations were finally cleared, if I recall correctly, in May of this year.

I thank the Senator for yielding and I take the time only to underscore the fact that this is not so ancient an agreement. This is an agreement made last fall, ratified by the Congress last fall, fleshed out by the confirmation of two Board members that gave them a quorum to act in May of this year, and the actions they have taken since May of this year.

Mr. EVANS. I thank the Senator. I do understand that in the intervening period, recess appointments were made, which allowed the Corporation to act for a longer period of time than that. But I do not think that deters from what I was suggesting, that on numerous occasions, whether the agreements are new or old, other new information, new decisions, new determinations come along to suggest that we ought to change directions.

I bring up the SST as one example, but there is a much more current one. For a number of years, we included in the Armed Forces budget money to continue with the development of the Divad gun. We did so and finally, came to the conclusion that it was not a very smart decision, that it did not work. It did not work adequately and we ought not to continue to spend money on it. So we changed our mind.

Mr. PRESSLER assumed the chair.

Mr. FORD. Mr. President, would the Senator yield for a question?

Mr. EVANS. Certainly, Mr. President.

Mr. FORD. Does that mean that the Defense Department is going to stop looking for the kind of weapon that the so-called Divad would have been? Have they quit trying to research and develop, trying to find new weaponry that would fit that bill?

Mr. EVANS. Of course not. I say to the Senator that having abandoned a bad idea, of course they are looking for better alternatives. I suggest that is precisely what we sought to be doing here, abandoning a bad idea. The proposal we have would provide $500 million in the Department of Energy to move ahead.

What we need to do in my view is to look for a better idea, which is a more balanced energy/reseach combination, and I think perhaps there is a very good analogy to what the Senator has suggested—that have abandoned a bad idea, you do look for a better and more balanced one.

Mr. FORD. Will the Senator yield further?

Mr. EVANS. I will be glad to.

Mr. FORD. You do not abolish or disband the Defense Department because of a weapon that they decided would not work. So what you need to do, I think, is not disband the Synfuels Corporation but to be sure that they attempt to find projects that will produce those things which are necessary. You are talking about $500 million, and then even the Senator's amendment will not get to the billions beyond in the next 3 to 5 years. The Senator is talking about small expenditures compared to what he is talking about in savings. The savings are not immediate. The idea is to try to find something that will work and continue in that arena, not just cut the head off the body because the feet hurt.

Mr. EVANS. I thank the Senator for his question. I would suggest that we do in this amendment honor all existing commitments. There are plently of exampies out there that will be honored and will go through. They may not be very good ones, but I think that honoring the existing commitments is an appropriate thing to do.

Of course, we do not abandon the Defense Department when we cancel one gun. We do not abolish the Department of Energy either. I think the Department of Energy is the equivalent of the Department of Defense. It is a Cabinet office. It has the same opportunity to sit at the table with the President as the rest of the Cabinet. It is the appropriate place for the varying priorities of energy research to be decided. I think there is a very good analogy. Of course, you do not abandon what you are trying to do. You try to do it better. You try to do it under the umbrella of a single agency that we created specifically for this purpose, to look at energy, its development, its research and how we might produce an independent energy future.

Mr. President, I believe that the amendment which we now have before us will not only adequately but amply provide the necessary flexibility and the necessary direction to lead us to an independent energy future before the end of this century.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. EVANS. Mr. President, before yielding the floor, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. McCLURE. The yeas and nays on the Evans amendment?

Mr. EVANS. Yes.

The PRESIDING OFFICER. There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, I will be happy to yield the floor so the Senator from Illinois may be recognized.

Mr. SIMON. I thank the Senator from Idaho. I shall just take 5 minutes of the Senate's time. There are certain basics to which I think we ought to be paying attention. No. 1, my belief is that, basically, we as a nation do not have an energy policy yet. We kind of drift. We are putting little pieces together, but we fundamentally, the most powerful nation in the world, desperately dependent on energy and dependent on energy from others, do not yet have an energy policy.

Second, we have to have research. It seems to me the Synthetic Fuels Corporation is the vehicle for doing that research. If you were to take a look at the various parts of the Federal budget and compare them to private corporations, put them on the stock market, in the area of education we would be way down; you would not buy that stock because they are not spending enough money on research. In fact, as you go through the various branches of the Federal Government where we spend money, you would not buy stock in any of them with one exception. That is the area of defense. We do a lot of research in defense. But we do not do anywhere near enough research in the area of energy.

Earlier I heard one of our colleagues say, "Oh, but there have been failures." Of course there are going to be failures. That is part of research. If we are not willing to have some failures in the area of energy research, we are not going anywhere. Absolutely, there has to be research and there has to be failures.

One other thing I would point out Mr. President. People say with the price of energy where it is, it is going to take so many years to pay off, and so forth. Just as certain as I am standing here, 5 years from now the price of oil is going to be far, far higher than it is right now. If the price of oil was double what it is right now, we would be passing this amendment without one question. It would be breezing through this body. That price of oil is going to be going up. It is a finite commodity, just as most other forms of energy are finite commodities. We ought to be moving ahead.

As far as the Synthetic Fuels Corporation itself, they are bringing in new people. One of the people is Tom Cochran, from the State of Illinois, a former Member of the House, I think a commonsense person who is dedicated to doing a good job. I have every reason to believe the Synthetic Fuels Corporation is an instrument that can be used effectively.

I think the point was made earlier by my colleague from Idaho [Mr. McCLURE] that by and large the failures pointed out are really not failures of the Synthetic Fuels Corporation; they are failures of the Department of Energy. Frankly, I do not fault the failures. We have to be willing to fail. Any time we are not willing to try new things and fail and then try again, we are never going to get there. Let me tell you, we did not find polio vaccine by accident, saying, "Oh, the first time they tried something it worked." We do not find any significant step forward without some failure. I hope the Synthetic Fuels Corporation has failures, not in the sense that I want failures but if it does not have failures, it is not researching, it is not doing what it ought to be doing. We ought to be conducting research so we are less dependent on the Middle East, on other nations, and less dependent on our own sources. Where are we going to be on energy 20 years from now, 30 years from now? I do not know. But those are the kinds of questions we ought to be asking as we look at the Synthetic Fuels Corporation. I think we ought to continue to encourage that entity. Moves that take us away from research, take us away from that long-range picture, do not serve the best purposes of this Nation.

I thank my colleague for yielding.

Mr. ROCKEFELLER and Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROCKEFELLER. Thank you, Mr. President. I rise to support the efforts of the distinguished chairman of the Energy Committee and the able ranking minority member.

I happen to think that a lot of the discussion today has been interesting but has missed the point. I would be willing to bet that if those who oppose the Synthetic Fuels Corporation are successful in their efforts on this day or others, we will be back in this Chamber 3 years or 5 years or 10 years from now trying to recreate the Synthetic Fuels Corporation to do the Nation's business. It will be harder to do it then if we disband it now because budget pressures will make it more difficult to start any kind of new effort.

Those who have pointed out that the fault lies not with the goal but with the management, or with some of the projects, are entirely correct. But the fact that there have been problems does not mean that we should give in to frustration and anger and abandon a national effort which few dispute is going to be needed in our near future and distant future. To do so would be a disservice, Mr. President, to the people of our country.

I am perfectly aware, and I think most Members of this body are aware, that when the Synthetic Fuels Corporation was created, no one expected that it would work perfectly. Nor did Congress believe that it would solve the energy crisis overnight. It was not the idea that the perfect technology would suddenly appear and present itself to the Nation. It was going to be a struggle, and an expensive one, and it was clearly going to be a long battle.

The problem was that Congress understood that the private sector, even in relatively better times, in the late 1970's, was not going to be able to secure our energy future by itself. Even those of us who do not necessarily approve of the nuclear power program and the money that goes into the budget every year have underwritten that budget because we understand that in this country and in this world of depleting resources, we have to do everything on all fronts with respect to energy in order to guarantee our future.

Very little mail comes to my office speaking urgently with respect to synthetic fuels or with respect to energy in general. But those of us in this body are expected to look beyond today's energy picture and remember that our long-term energy situation is urgent, because oil and gas and other essential resources are depleting, inevitably and inexorably depleting, not only in this country but also all around the world.

So if we expect to have some sort of security, not just on a national security basis, but an economic security basis; if we expect to have some kind of continuity and a strong foundation in en economy which is in enough difficulty, we have to prepare for the future, and the time to prepare for the future is right now.

And one part of that preparation is called the Synthetic Fuels Corporation, and its work. Mismanaged though it has been to some substantial degree, it is an effort which we must continue, which the distinguished chairman of the Energy Committee is trying to continue through his compromise, and in which I support him. This effort must be successful.

We should not decide this question on the basis of whether our constituents are concerned today. We should decide it with an eye to the future: so that 5, 10, 15, or 25 years from now, there will be a flow of energy from a variety of sources—not just the coal I favor from Appalachia, not just the nuclear power that I do not favor from the West or other parts, but hydroelectric, and the variety of products that Synthetic Fuels may produce from coal and from oil shale, from gas, from methane, and from other substances.

We need to try many things. Some will come together and be successful experiments that move this country forward in terms of energy independence. We need that effort. The opportunity to continue it is before us.

The chairman of the Energy Committee has presented us with a fine compromise. There are amendments which would undermine that. I think they are not only wrong, but dangerous. I believe that the compromise is right, and I urge the Senate to support it.

Mr. NICKLES. Mr. President, I support the amendment of Senator EVANS and Senator METZENBAUM, and I ask unanimous consent that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, I wish to show a little difference with respect to the so-called compromise which has been alluded to by the chairman of the committee and Senator JOHNSTON.

The compromise says let us rescind $500 million. The Senator will correct me if I am wrong. The amendment I am cosponsoring with Senator METZENBAUM and Senator EVANS rescinds the balance of funds.

I will read it for those who may be listening or those who are kind of confused. We have four amendments floating around the tree, but these are substantially different amendments in approach to the difficulty or substantially different amendments in approaching the synfuels question.

Senator MCCLURE and Senator JOHNSTON said they want to rescind $500 million. The amendment which Senator EVANS, Senator METZENBAUM, Senator BRADLEY, and I and others are supporting actually restates the language that is in the House appropriations bill which was stricken by the Senate Energy Committee, or by the Senate Appropriations Committee.

This statement says:

> Except as otherwise provided in this item, all funds appropriated to the energy security reserve are hereby rescinded.

So it rescinds all the rest of the funds. The figure of $7.9 billion has been used. The chairman of the Energy Committee might bring us up to date. I am not sure that that is exactly correct, because the Synfuels Corporation has made several announcements in the last month or so of new projects which obligate, in one case, several hundred million dollars, and smaller amounts in other cases. Basically, it would rescind the remainder of the funds.

It also would set-aside $500 million going into the Department of Energy. I do not think that is necessary, but it is not necessary to raise that question now.

The question is, are we going to rescind the amount of money that is obligated in the Synfuels Corporation, or are we going to rescind $500 million out of maybe $7.5 billion? I think we should rescind the balance.

I will agree with those on the other side of this issue who say we are not really saving much on outlays. They are correct. We do not save much on outlays for the next several years. Just because you have a major rescission of the budget authority does not mean you are going to save on outlays. Most of these projects take years. Most are set up with price guarantees, and the plant has to be built and producing, and when it produces is when the Government obligation takes effect. In most cases, the bulk of the dollars is for 1990 and beyond.

Mr. EVANS. Mr. President, will the Senator yield?

Mr. NICKLES. I yield.

Mr. EVANS. Will the Senator agree that even between the period of now and 1990, the period of the so-called Gramm-Rudman budget-balancing amendment, which I think everyone is focusing on, the budget outlays would be reduced, as far as I understand, by about $1 billion, even in that period of time? I think that is pretty significant. It is part of the old Everett Dirksen opinion: a dollar here and a dollar there.

If I recall correctly, do we not get $1 billion even in that period of time, and a lot more beyond?

Mr. NICKLES. The Senator is correct.

I will read into the RECORD a statement that came from the Congressional Budget Office, dated September 17, 1985.

It says that if this amendment were enacted, we would save $7.37 billion in budget authorizations. I am going to use the net outlay impact. There are some savings and spending on both sides.

Net outlay impact for the year 1986 is $93 million, which is not too small. In 1987, it is $166 million; in 1988, $209 million; in 1989, $219 million; in 1990, $254 million.

If you went to 1991 and beyond you are talking about $6 billion or $6.5 billion savings in potential outlays. It is hard to get, and the Senator is well aware of this, because you do not really know what the market price of energy is going to be. They are making price guarantees in many of these cases on oil $40 or $50 or $60 when, and this is today, and they also put escalators on them and so those price guarantees escalate regardless of what the market price may be doing, those escalators may be escalating.

We do not know if in 1990 the price of oil is going to be $25 or going to be $35.

Mr. MCCLURE. Mr. President, will the Senator yield?

Mr. NICKLES. I am happy to yield.

Mr. MCCLURE. I do not mean to interrupt his presentation at all but I do think all Members should be cautious about those CBO estimates because they are preliminary estimates that are now several months old and some of the assumptions upon which they were based have already changed. As an example, it was assumed the Great Plains was going to go ahead, and although it is not a Synthetic Fuels Corporation project there would be payments made under that.

That project has been terminated. Those expenditures will not now occur as was assumed at the time the CBO baseline estimates were made.

There are several other issues of precisely that kind which I lay out in detail in the statement that I will make.

I thank the Senator for yielding. I hope Senators will understand those estimates are based upon fallacious premises.

Mr. NICKLES. I appreciate the chairman's comments. He is exactly right.

I was making the same comment. No one knows exactly how it is going to be. A lot of it is like dealing with the farm bill. It is hard to guesstimate because you are talking about the difference of a promised price and that price and the amount of cost to taxpayers and the difference between that price and what the market price is. We do not know what the market price is going to be for natural gas or oil or any other energy resource we are taking about. So it is hard to guesstimate how much it will be.

One way of making sure taxpayers so not write big checks, though, is to rescind future amounts of money that synfuels has to obligate.

Quite frankly, the corporation has been obligated quite a bit and they are in the process. If we do not pass this amendment there are going to be a lot more projects that will be coming out the door almost on a monthly basis. So we are talking about really obligating future generations.

I hope that we do not have a budget problem in 1990 or 1991. Maybe if Gramm-Rudman, et cetera, is right on target we will have a balanced budget by then, but even at that we are going to have enormous debt that we should be paying back. So there is still no real justification, in my opinion, of having the taxpayers coming in and subsidizing these projects.

I am for synthetic fuel development. I want to see synthetic fuel development proceed when the market dictates it is ready. I think when we have a Federal energy corporation—and that is what the Synfuels Corporation is, you have a group of people making decisions, albeit by congressional mandate, the law says that they have to do this—coming up and saying, "Yes, we need to come up with these projects to meet these goals and this is what we

are going to do to try and do it." They must by necessity make commitments, make price guarantees, many of which will be far in excess, and we are looking at some today. We are looking at some today that are 2 or 3 times the price of energy today.

Again let us see development of these projects but let us not see it on the backs of taxpayers.

I hope we will pass the Metzenbaum-Evans-Nickles, what-all, amendment which will rescind the balance of funds that are now in the Synfuels Corporation.

I yield the floor.

Mr. PROXMIRE. Mr. President, It is time to say bye-bye, adios, sayonara, and good riddance to one of the most wasteful, unnecessary and ill-conceived Federal programs ever—the Synthetic Fuels Corporation.

This amendment represents the ultimate test of congressional budget-cutting resolve. If we can't eliminate this program now, we can't eliminate any program, any time.

Created in 1980 and lavishly supplied by Congress with over $17 billion of the taxpayer's money, the Synthetic Fuels Corporation was supposed to be America's answer to the oil crisis.

According to its supporters, the Corporation would produce the equivalent of 500,000 barrels of oil per day by 1987, and 2 million barrels by 1992—all this at the supposedly modest price of about $40 per barrel.

But what happened? The Corporation's economic projections collided with reality. Instead of continuing their upward climb, oil prices tumbled in the face of increased conservation.

At the same time, estimates of synthetic fuel costs skyrocketed, with $60 and even $90 per barrel prices considered likely.

Thus the margin between oil's market price and that for synthetic fuels grew even larger. Synthetic fuels were not cost competitive, not now and not in the foreseeable future.

Oil imports dropped from 45 percent in 1980 to about 35 percent today with 91 percent of oil imports coming from non-Arab nations like Mexico, Canada, and Venezuela. Oil producing countries now fight among themselves over market share and there is, at least temporarily, an oil glut, not a shortage.

Yet the economic success of the Synthetic Fuels Corporation depends on high oil prices. Without them, the Corporation must pay out huge sums in price supports and faces defaults on its loan guarantees. Even worse, once price supports stop the industry collapses.

Thus despite the prospect of billions of dollars in Federal subsidies, Exxon, Conoco, Ashland, Sohio, Chevron, Amoco, Tosco, Westinghouse, Mobil, W.R. Grace, and other major corporations canceled, postponed or redirected their synthetic fuels development plans. They saw the writing on the wall—why didn't we?

But while industry stopped spending its own money, the SFC committed over $2.5 billion of ours and plans to commit over $7.6 billion more in the next 2 years if we don't stop them now. Just this week the Corporation gave Union Oil another $500 million to bail out its shale program.

Mr. President, by all accounts the Synthetic Fuels Corporation is a total failure, but no one told its employees. The Corporation had 190 employees on the payroll at the beginning of this year. Of these, 69 are paid $50,000 or more per year, and 18 more than $70,000.

While the Corporation was notably slow in parcelling out funds to industry they were quick off the mark in giving themselves every perquisite of office known to man.

And what were the lucky projects which received the Corporation's bounty. Listen to the story of losers.

The Colony Oil shale project received $1.2 billion in loan guarantees. The Corporation touted it as the No. 1 oil shale project in the United States. What happened? Costs doubled and the project collapsed.

The Union Oil shale project in Colorado received $400 million in price guarantees but its plan never worked for more than a few days at a time. Did the Synthetic Fuels Corporation give up on it. No way.

Instead, the Corporation gave it another cash infusion of $500 million on Wednesday. This new combination of loan and price guarantees insures Union Oil a price of $67.87 per barrel, far above the $25 per barrel market price, and risks $327 million in loan guarantees should the project default, as is likely.

The history of the Corporation is littered with projects that were withdrawn, inadequately funded or just plain didn't work. Unfortunately, many of these projects got Corporation letters of intent, the first step in the approval process.

Mr. President, we must stop the Corporation now, before it commits all its funds on more uneconomic, technically questionable, and environmentally damaging projects.

Mr. MATTINGLY. Mr. President, I would like to express my desire to see my colleagues support the provisions of the pending amendment which would rescind the remaining funds for the Synthetic Fuels Corporation. Many of us have watched the operations of the Corporation over the past few years with increasing dismay and disgust. We have witnessed the arrogance of the Corporation and the apparent contempt which many within the Corporation seem to exhibit for the concerns expressed with increasing intensity by some of us in the Congress.

I personally deplore the recent attempts by the Synfuels Corporation to totally ignore the legislative branch of our Government. I am amazed by their frenzied actions to make a gigantic raid on the Treasury before pending legislation can be enacted to put a curb on their greedy tactics. The plain fact remains that the program has been a total and complete failure and a growing embarrassment. I feel that it is time for those of us in the Senate to reexamine the entire question of how best we can ensure that America will have an adequate supply of affordable energy resources for the future. However, while we are taking a new look at our needs in this regard, I think it would be highly improper to allow another $7.5 billion to be poured down the drain.

So, Mr. President, I would urge my colleagues to support the recission of funds in the Synfuels Program as it is presently structured and administered. This is not to say that we do not recognize the need to develop synthetic fuel sources. There is a demonstrable need to prove reliable, affordable technologies for this purpose. But the present situation we have with the Corporation blindly plunging ahead at a breakneck pace with questionable project approvals and commitments should not be allowed to continue.

Mr. ARMSTRONG. Mr. President, our country has been greatly injured, in my opinion, by an off-again/on-again energy policy, which in the last 10 years has seen three basic reversals of direction regarding the synthetic fuels industry and which appears to me is about to result in another basic reversal.

It is a policy which was first characterized by neglect, and I do not mean benign neglect, I mean just plain neglect, by a Federal Government that did not think it was important that we develop oil for shale and coal gasification, and so on. This policy denied those of us who sought some level of interest and some degree of Federal support for synthetic fuel development any attention at all for a number of years.

Then came the Arab oil embargo and suddenly there was no limit to the amount of commitment the Congress was willing to make and it became fashionable to support an $88 billion program and the creation of another major Federal bureaucracy. As a result, Congress went ahead and created the Synthetic Fuels Corporation with an initial $17.5 billion appropriation of budget authority in 1980.

It is a secret to no one that I strongly opposed creating the Corporation, believing and still believing, that we could have used existing legislative authority under the Defense Production

Act and did not need a new Federal agency.

But all that is water under the bridge. Here is where we are today. There are four projects with which the Synthetic Fuels Corporation has signed contracts. These four projects represent a commitment of $4 billion of the total authorize for the Synthetic Fuels Corporation. There are several other projects for which the Corporation has signed letters of intent.

Nonetheless, last year the pendulum began swinging back in the opposite direction. The gas lines are gone, the oil embargo is off, synthetic fuels development is not fashionable at the moment, and the House suggests that we flick the switch off again on Federal energy policy including synthetic fuels. Needless to say, I think that this is a mistake.

EQUITY

Because of the Energy Security Act of 1980, the Federal Government has encouraged expenditures of a great deal of money, time, and talent by the companies involved and the host of communities in preparation for such projects.

The companies have spent millions in private capital to bring the projects to a state of readiness and the communities have spent large sums of public money to prepare schools, roads, sewer, and water systems to meet the requirements identified by the Federal Government as necessary for the national security and energy independence. So I think there is a very strong equity consideration against changing the rules in mid-stream.

As an example of the impact on communities, I would like a letter to me from the mayor of Rifle, CO, be included in the RECORD following my statement.

Last year we all agreed not to change those rules in mid-stream. After long and heated negotiations between the Congress and the White House, we reached an agreement in October to rescind $5.375 billion in the continuing resolution (Public Law 98-473), leaving a net total of $7.375 billion available to the Corporation and taking into consideration commitments and outstanding letters of intent issued by the Corporation. Subsequent administrative costs of about $14 million have reduced the funds available in the Energy Security Reserve to about $7.875 billion.

In spite of that hard fought agreement, the House of Representatives again is seeking abolition of the Corporation—proposing a recission of all but $500 million to be used by the Department of Energy to cover a program to promote commercial synthetic fuels development.

DEFICITS

Opponents to the Corporation argue that:

In 1980, few could predict what now seems to be years of $200 billion-plus deficits. Federal spending is being cut back in areas that for decades had been viewed as immune to budget reductions. When financial assistance to the elderly, the unemployed, and those in need of government health care are cut, and programs for food stamps, school lunches, and student loans are eliminated, continued corporate subsidies must also be reduced.

It wouldn't have taken someone in the habit of crystal gazing to figure out even in 1980 that we were headed for serious economic trouble, but that is a topic for another debate. The fact of the matter is that cutting the Corporation as the House proposes will do little to reduce the deficit. Much of the Corporation's remaining $7.9 billion is in the form of loan and price guarantees which may never be needed and whatever will be spent will be paid out over many years. Moreover, the Congressional Budget Office has found that H.R. 935, with its new DOE Synfuels Program, would save just $332 million over the next 5 years. But as the Senator from Idaho has indicated, these are overestimated.

Moreover, the Corporation has significantly revised many of the projects with letters of intent and greatly reduced the Corporation's potential outlay of money. For example Colorado's two oil shale projects under the letters of intent would have obligated about $4.89 billion of the Corporation's remaining $7.9 billion.

In August the Corporation announced a proposed contract for Union Phase II which would combine it with Union Phase I, with total SFC support at $900 million, leaving $1.8 billion unobligated. That contract has subsequently been signed.

The latest proposal before the Corporation on the Cathedral Bluff's project would call for a joint venture with the Corporation providing $360 million and Occidental Oil Shale, Inc., providing $240 million, which would leave an additional $1.83 billion unobligated.

CORPORATION HAS ONLY 2 OPERATING PROJECTS

I find it particularly ironic that the opponents to the Corporation use as a major argument for abolishing it the fact that in the 5 years it has been in existence, it has produced only two operating projects. (Great Plains/North Dakota and Coolwater/California), but Great Plains, 2 DOE project, not SFC, is now in default.

It is clear that the Corporation has had serious problems getting the show on the road—with an operation that size it was to be expected, as well as the scandals that accompanied it. Nonetheless, much of the problem can be attributed to the Government's wishy-washy policy. while Congress was left battling out the agreement last year that would continue the program, the Corporation was left without a quorum of board members to do any substantive work.

The Corporation now is getting its feet on the ground, and a good example of that is the execution of two contracts to support projects which have been before the board for a number of years—Union Phase II near Parachute, CO, and Forest Hill heavy oil project in Wood County, TX.

U.S. FOREIGN DEPENDENCY

We may no longer have the gas lines or an oil embargo, but the United States is still heavily dependent on foreign oil. Today imports account for about 30 percent of our energy use. According to former Secretary of Energy Hodel, domestic production will decline by about 2 percent annually through the remainder of the 20th century. Should this forecast be correct, we will face a 50-percent dependency on foreign imports by 1995. At the same time, DOE's midrange estimates indicate a price of about $74 per barrel of oil by that time. I will nearly take that time to get synthetic fuels into commercial production to help insulate us from the national security ramifications of such a dependency on foreign energy.

I therefore support Senator MCCLURE's motion to table.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CITY OF RIFLE,
Rifle, CO, October 11, 1985.

Hon. WILLIAM ARMSTRONG,
Senate Office Building,
Washington, DC.

DEAR SENATOR ARMSTRONG: As the Mayor of Rifle, I am beginning my ninth year of service to the citizens of Rifle but I remember when I was first on the Council, I found a need to begin the ground work on enabling legislation to control and regulate development and annexation. From that time forward, and during my terms in the Mayor's office, we were encouraged by the State and Federal governments to expect and plan for an influx of oil shale workers. We were advised from all sides to put water treatment facilities on line to accommodate 10,000-15,000 people. We were informed that we also needed to similarly increase our sewage treatment facilities. We were apprised from time to time of the schedule that would be established for the construction period, and then later the workers who would handle the operations.

This apprisal covered the expected work force in each case and also indicated what part of the the work force would be expected to establish residence in Rifle. We were also given the formula that would be applied to the worker coming to our City which told us how many service people we should also plan to accommodate. As the ordinances were amended to cover rules and regulations we were also advised to enact a comprehensive plan. This was done in conjunction with annexation ordinances and annexation agreements. Annexation and development occurred in such regularity that special meetings became as natural as regular meetings. Planning departments, planning commissions, city administration officials, and city council people worked long

hours to finalize plats and agreements necessary to accommodate the building of infrastructure for the workers we were told were coming.

Environmental and socio-economic studies continued to impress us with the necessities to make preparations for the impact of workers employed by Exxon, Union Oil, Cathedral Bluffs, Rio Blanco Oil Shale, Multi-Minerals and their construction contractors.

This was done. Annexation of Highlands East, Mesa View, Rimrock, Palomino Park, Deerfield, and many others more than doubled the land area of Rifle. While we were prepared for 10,000-15,000, our top population just exceeded 6,000.

Expenses incurred as a result of expansion for oil shale development has left Rifle without the kind of tax base that could overcome these expenses. For example, streets that were deteriorating at the height of the oil shale expansion could not be repaired and resurfaced because of the time lag between the growth and the increased tax base that would furnish us the additional operation and maintenance money.

Other expenses such as an increase in the size of the pipeline across the Colorado River and an upgrade of our Beaver Creek Water facilities cannot be accomplished without a considerable increase in taxes.

The above necessary improvements are, without question, required as a result of oil shale impact. The need is specifically this: that fire power needs to be increased in a wide area south of the river. These motels, apartments, and office facilities were annexed and developed purely in an effort by our City to provide the facilities necessary to oil shale worker accommodations. Should the Department of Energy and Congress decide that all of this effort and accommodation was an exercise in futility, then it will be at great expense to the Rifle taxpayers. For they and they alone, after innumerable public meetings agreed that the effort should be put forth and that they would open their town to these workers who in turn would help solve the oil crises developing in the Middle East. The City of Rifle was praised and epitomized for what was described as our admirable contribution to our Country's common good. But that was in the past. If the Letters of Intent to the Union Oil Company operation and to the Cathedral Bluffs operation are not honored, it will be a detrimental action to both the oil shale system development plan and to the infrastructure now in existence in the City of Rifle.

Consider, if you will, the importance of previous oil shale development effort and the private investment of more than one billion dollars and several hundred million dollars investment by the entities in the area including the City of Rifle. Such investments in an all out effort, to solve America's oil import problems cannot be ignored. Please exert all possible effort to see that the Letters of Intent are honored.

Sincerely,

GEORGE E. MITCHELL,
Mayor, City of Rifle.

Mr. BYRD. Mr. President, the question before the Senate is whether to continue an energy program which is focused on the Nation's long-term energy security. How soon we forget, Mr. President. Only 5 years have passed since the Iranian revolution dramatically underscored the consequences of America's reliance on imported oil. The long gasoline lines which formed at service stations across the Nation brought the lesson of energy vulnerability home to millions of Americans. Just as the OPEC oil embargo of 1973 had focused public attention on the vulnerability of America's imported oil supplies—and the economic consequences of that dependence—so the Iranian revolution reminded us once again of the harsh realities of the Nation's energy insecurity.

In response, the Congress passed the Energy Security Act, an ambitious package of initiatives to facilitate the commercial development of alternative energy resources, including synthetic fuels. Congress recognized that alternatives to imported oil had to be developed to ensure national security. It was recognized that efforts to develop new and advanced energy technologies would have to begin in the 1980's if those technologies were to be ready for commercial application in the 1990's and beyond.

However, the scenes of gasoline lines on the evening news, which were symbolic of those tumultuous days at the end of the last decade, have faded into distant memory. The sense of urgency experienced 5 years ago about the Nation's energy situation has been dissipated. Complacency dominates the views of many policymakers today. The conventional wisdom these days celebrates the oil glut, falling oil prices, and the current conflicts and disarray in OPEC. It is indeed tempting to construct a dry-roof theory of energy from these facts. That is, some might find it tempting to conclude that the energy crisis is over, and that the Nation no longer needs the energy policy initiatives undertaken in the last decade. The Nation's energy roof is dry, so we do not need to worry.

We should not allow the relative serenity of the current oil supply situation to obscure the fact that the basic long-term energy situation has not changed for the United States or its allies. Let us not forget that the United States still depends upon oil imports for more than a fourth of the oil we use. It may be tempting to find comfort in the fact that the Nation is less dependent upon OPEC oil than in 1980. But let us be aware that OPEC still accounts for one-third of our oil imports.

It is also important that we do not lose sight of the situation of our allies, many of whom are very dependent on OPEC oil. For example, in 1984, OPEC oil imports account for 72 percent of oil consumption in Japan; 36 percent of West Germany's oil consumption; and 72 percent of Italy's oil consumption.

We may be tempted to believe that excess world oil productive capacity is sufficient to make up for any disruption in supply from, say, the Iran-Iraq war. However, we should be aware that most of the world's excess capacity is in the OPEC nations of the Persian Gulf. Excess productive capacity in non-Persian Gulf OPEC nations is about 3.2 million barrels per day. Of this, more than one-third is in Libya.

Mr. President, we should be aware that the security of world oil supplies can be affected by the continuing political instability in the Middle East. Let us not forget the bitter fighting of the Iran-Iraq war, which is now grinding into its fifth year, and may be entering a new and more deadly phase. Over the past several weeks Iraq has launched numerous air attacks against the Iranian oil terminal at Kharg Island, and, according to press accounts, has caused heavy damage to the oil-loading facilities. According to press accounts, Iranian oil exports from Kharg Island have, in effect, been halted because of the damage. In the past, Iran has threatened to close the Straits of Hormuz, and to retaliate against Iraq's allies in the Persian Gulf, such as Kuwait and Saudi Arabia, if Iran's oil exports are halted.

About 5 million barrels per day, almost 15 percent of the free world's oil supply, currently flows through the Straits of Hormuz. If Iran successfully carries out its threat to close the straits, the 3.2 million barrels of excess productive capacity outside the Persian Gulf would not be sufficient to make up for the lost supplies.

It has been said that it is very difficult to make predictions, especially about the future. Indeed, the differences between the world oil situation 5 or 6 years ago relative to the current situation illustrates the difficulty of forecasting and predicting events affecting world oil markets. Therefore, Mr. President, we should not be dissuaded from a policy course based on long-term considerations by short-term inbalances in oil supply and demand which work to the advantage of oil consuming nations.

We should recognize the unsettling long-term policy implications of the unforgiving realities of geophysics which have determined the inequitable distribution of petroleum resources, largely in favor of the Middle East. Thus, as the U.S. Geological Survey pointed out in a recent report, "the Middle East increasingly will monopolize world petroleum supplies." In the face of that reality, combined with the political instability of the region, I do not think we can afford to be sanguine about the security of oil supplies in the future. We should heed the warning of the U.S. Geological Survey in its recent review of world petroleum resources:

> We have but a few decades to enjoy the convenience of crude oil as our major energy fuel. And, while it is found in great supply today, there is every indication that it will become ever more difficult to obtain in years to come; there is also very good

reason to believe that owing to its narrow distribution, we can anticipate many irregularities in its availability during those last decades of oil prominence. Such a stated reality may accrue to our benefit in that early warnings may coax us into preparing for the longer term future instead of just waiting for a surprise in blissful ignorance.

Congress recognized this reality when it established the SFC in 1980. Accordingly, the mission of the Synthetic Fuels Corporation is to facilitate the commercialization of technologies capable of producing substitutes for imported oil from domestic resources. The Nation cannot afford to gamble on the future security of our oil supplies. We must develop technologies which can provide a basis for the production of synthetic fuels from abundant domestic resources, such as coal and oil shale. In other words, the development of synthetic fuels technology is an insurance policy for the future.

Mr. President, let me point out that the critics of the SFC who argue that synthetic fuels technologies are uneconomic entirely miss the point of establishing the Corporation. The SFC was established because such technologies are not economic in today's marketplace. The point is to provide an adequate basis for making such technologies economic in tomorrow's energy market. To hold current market conditions as the standard against which to measure the economic viability of synthetic fuels technology is totally inappropriate.

Finally, Mr. President, let me point out that those who argue that the technologies being supported by the SFC will not make a significant contribution to domestic energy supplies are raising a red herring. If one were to apply that logic to public investments in other alternative energy technologies, such as solar energy, we might never invest in any such projects.

Mr. President, I would hope that the Senate will not succumb to the temptation to take a short-sighted view in considering the fate of the Synthetic Fuels Corporation today.

Mr. GORTON. Mr. President, I support the amendment my colleagues have offered to rescind funds for the Synfuels Corporation. When Congress established the Corporation in 1980, oil prices were projected to reach $75 to $125 per barrel by 1990. Since oil prices peaked in 1981, the world energy outlook has improved substantially—oil prices are now over 30-percent below their 1980 levels in nominal terms. As a result of these fundamental changes in the energy marketplace, virtually no large-scale synthetic projects are likely to become economical in the foreseeable future. Thus, the development of commercial synthetic fuels industry at a pace envisioned by the Congress in 1980 would require huge expenditures of Federal tax dollars that would not be offset by any economic benefits.

I believe that it is wrong to continue to subsidize the commercialization of a technology that has been demonstrated to be too costly, unreliable, and environmentally unsound. With the enormous Federal deficits threatening the prospects for a sustained economic recovery, it would be fiscally irresponsible to allow any Federal agency to spend $7.9 billion on wasteful and unnecessary programs.

Mr. President, the House has acted to reduce spending by cutting the funds for the Synfuels Corporation. It is time for the Senate to follow suit. I strongly urge my colleagues to support the amendment.

Mr. CHAFEE. Mr. President, I am pleased to offer my support of the amendment offered by Senators EVANS and METZENBAUM to rescind funding for the Synthetic Fuels Corporation.

At a time when the Federal Government is faced with a $212 billion deficit, the SFC is an expenditure we can no longer afford. The Synfuels Program was created in 1980 to encourage and help finance development of fuels from such resources as oil shale and coal. A successful Synfuels Program could reduce our dependency on foreign oil. From the beginning, the program has been plagued with serious mismanagement problems. The Corporation has had trouble finding commercially viable projects to underwrite, especially after falling oil prices caused many corporations to drop their synfuels projects.

Perhaps the best example of this misbegotten Synfuels Program can be found in Beulah, ND. This coal gasification plant, intended to demonstrate the commercial viability of synthetic fuels manufacturing, has fallen far short of its production goals of 20,000 barrels daily. And, it is producing synthetic fuel at more than twice the market price of natural gas. The Union Oil project in Colorado, an effort to produce diesel and jet fuel out of shale oil, has produced only a trickle of fuel. The other major SFC project, the Cool Water—coal to electricity—Program in California continues to receive funds even though it was close to succeeding without Federal help.

Last year, Congress rescinded $5.4 billion in Federal funds and required comprehensive reforms. The Synfuels Program is still troubled, however. For example, the Corporation is suspected of violating a law forbidding Federal agencies to use tax money to lobby Congress. In addition, the Corporation continues to exercise poor judgment in granting awards. SFC continues to place a priority on rapid, large-scale commercialization rather than needed research and development. The result: Billions of taxpayers dollars are wasted on technologies which are both economically and environmentally unsound.

It is imperative that Congress act promptly on this issue as the SFC is in the process of negotiating commitments on as many as six commercial scale synthetic fuels projects. If these awards are finalized, the Federal Government could be committed to projects valued at $3.86 billion, making the abolishment of the SFC virtually impossible.

Congress now has both the opportunity and responsibility to reevaluate the Synfuels Program. The SFC has fallen far short of our expectations. Despite its meager record, SFC has spent almost $53 million in salaries and administrative costs over its 5 years of existence. Sound energy and fiscal policy dictate that we fashion a more responsible, effective, and economical Synthetic Fuels Program.

The House of Representatives has already voted to provide $500 million over the next 3 years to establish a responsible and accountable Synfuels Program within the Department of Energy. Thus, we will remain committed to the development of snythetic fuels technologies. At the same time, considerable savings would result: $468 million during fiscal years 1986–88, $473 million during fiscal years 1989–90, and $5.4 billion for the years beyond 1990.

Mr. President, I urge my colleagues to support the effort to rescind funding for the Synthetic Fuels Corporation by retaining the House language on SFC in the Interior appropriations bill.

Mr. LAUTENBERG. Mr. President, I rise in support of the amendment offered by my colleague from Ohio, Senator METZENBAUM. The amendment would rescind funding for the Synthetic Fuels Corporation.

Mr. President, Congress established the SFC in the wake of successive embargoes as a means of quickly providing domestic sources of energy. In 1980, when the SFC was established, the price of oil was expected to soar. Forecasting predicted major shortfalls in oil and gas supplies. Congress reacted by creating a super agency that was to subsidize commercialization of synthetic fuels. This super agency was exempted from congressional oversight, and the requirements of the National Environmental Policy Act and Freedom of Information Act in an attempt to speed the development of commercial synfuels. These were unusual exemptions granted in an atmosphere of deep concern over our energy future.

The energy picture that drove Congress to establish the SFC has changed significantly. Oil prices have fallen, and are expected to remain at these lower prices. The atmosphere of near panic that existed in 1980 has receded. We now have an important op-

portunity to consider our overall energy policy and the viability of the SFC. Additionally, we must consider the expense of the SFC, and its track record, before continuing to spend increasingly scarce Federal dollars.

Mr. President, funding for the SFC was eliminated by a 3-to-2 margin by the House of Representatives in July. The rescission made by the House was driven by technical problems in funded projects, by mismanagement and politization of the Corporation, and by budgetary concerns. The rescission would return $7.4 to the American taxpayer and transfer $500 million to the Department of Energy for a research program on synfuels.

Mr. President, we must spend our Federal dollars for alternative energy sources effectively. I have supported funding for energy conservation, solar and other alternative energy sources, clean coal technologies, and fuel cells research. I am ready to support a modest synfuels research program. However, I believe that Congress must say no to the high costs and doubtful merit of continued subsidization of commercial synfuels projects.

There are enormous gaps between the market price of oil and gas and the subsidized prices for the projects. The Corporation has guaranteed subsidies of $67 per barrel of oil and is purportedly considering subsidies of $150 per barrel. In stark comparison, the market price of oil is approximately $27 per barrel. While it is important to fund the development of alternative energy sources, to encourage conservation and reduce our reliance on foreign supplies, it is important to recognize the SFC for what it is. The Synfuels Corporation is neither a development or a research program. It has turned out to be an expensive bankroll for projects that have failed.

A few weeks ago, the SFC issued a grant of $500 million to UNOCAL corporation for an oil shale project in Parachute Creek, CO. This grant would bring the spending for this project to nearly $1 billion. This grant was made despite the opposition of the Secretary of the Department of Energy. It came just 2 months after the House voted by 312 to 111 to eliminate funding for the program. But, perhaps most importantly, it was made despite the fact that the project has never worked. Because of technical problems, UNOCAL has been unable to run the plant for more than a few days. According to experts, these technical problems are not easily resolved, and are indicative of the broader problems associated with commercializing synthetic fuels before adequate research has been done.

Mr. President, my colleagues from Ohio, Washington, and New Jersey have discussed the mismanagement of the SFC. Two SFC chairmen have been forced to resign amidst charges of mismanagement and conflict of interest. A study by the GAO issued earlier this year detailed the excessive salaries and benefits paid to employees and contractors to the SFC. And, most recently, internal memorandum have revealed that the SFC has made grants on the basis of their political rather than technical merit in an effort to win key congressional votes. The powers that were vested in the SFC have been misused and are in and of themselves ample enough reason to transfer the Federal dollars devoted to synfuels from the SFC to a more responsible and accountable agency.

Mr. President, we have heard many persuasive arguments for abolishing the SFC. However, we have not had much discussion about the environmental impacts of the projects that have been funded or considered by the SFC. The broad powers that have been granted to the SFC include exemptions from the environmental, health, and safety requirements imposed on all other projects of the size and potential impact of commercial synfuels projects. The environmental monitoring guidelines employed by the SFC, which replace environmental impact statements required under NEPA, do not protect against the air and water pollution that would be caused by many of these projects. These problems would be compounded by enormous volumes of solid waste generated, sometimes on the order of thousands of tons per day. These hazards have not been, and will not be, resolved through the guidelines and restricted congressional and public control over actions taken by the SFC.

Mr. President, the Senate can put itself on record in favor of fiscal responsibility by rescinding the funding for the SFC. The House has voted overwhelmingly to abolish the SFC and establish a reasonable research program. The Secretary of the Department of Energy is strongly opposed to the SFC, and has canceled the projects within the reach of DOE. And many of the industries originally interested in SFC grants have abandoned their plans for large scale projects.

The SFC was an extraordinary experiment. Unfortunately, it has failed. It has failed to produce competitive products. It has been grossly mismanaged. It has raised many troubling environmental problems. And it is not affordable today.

The Senate has struggled as never before with cuts in programs that touch the lives of every American, from research programs for reducing air and water pollution to programs for rehabilitating urban areas. Yet, these programs are dwarfed by the funds available to the SFC. As a measure of comparison, the funds remaining in the synfuels account are over five times the operating budget of the entire Environmental Protection Agency. A more balanced expenditure of our Federal dollars, that includes a sensible energy policy focused on a mix of energy sources and conservation, must be pursued.

Mr. President, our long-term energy supply problems continue to exist. But, Mr. President, the dollars we do have available for developing alternative energy sources are better spent on less costly and more feasible research programs.

I urge that my colleagues support this amendment to rescind funding for the SFC.

Mr. LEVIN. Mr. President, in the past I have supported the existence of the Synthetic Fuels Corporation and have voted accordingly. I continue to support synthetic fuels development, but my support for the Synthetic Fuels Corporation [SFC] no longer exists. That is one reason why I am supporting Senator METZENBAUM's efforts to transfer the SFC's functions to the Department of Energy [DOE].

Also, in light of the $200 billion budget deficit we are facing, the Synthetic Fuels Corporation with all of its inadequacies is no longer a top priority. Abolishing the Corporation and transferring its function to DOE will result in a savings of $6.8 billion to the taxpayer according to CBO, which represents a significant savings to the taxpayer.

Congress is forced to account for every dollar we spend. And it is hard to justify to our taxpayers the excessive practices of the SFC. The board of directors has given itself and other officials in the Corporation liberal salaries and pensions. Their pension plan vests 50 percent after 6 months and 100 percent after 1 year. The vice president of engineering at the SFC has a higher salary than the Vice President of the United States.

The proposal I am supporting today includes two very important features. One, the Government is honoring existing contracts. Given my capacity as a local official before coming to the Senate, I take that point very seriously. Second, we are not abolishing the Synthetic Fuels Program, we are operating it on a more modest scale.

The impetus for commercial scale synthetic fuels projects has decreased but the need for demonstration projects and development of new technology with regard to synthetic fuels has not. I believe the result of the proposal by Senator METZENBAUM will result in a workable Synthetic Fuels Program.

Mr. BINGAMAN. Mr. President, I rise today to support the efforts of my colleagues from Washington and Ohio to rescind $6.9 billion in funding from the U.S. Synthetic Fuels Corporation.

The remaining $1 billion in the energy security reserve, which funds

the SFC Program, would be transferred to the Department of Energy; $500 million would be used for a new scaled down Synfuels Research Program. And $500 million would be transferred to the previously unfunded "clean coal technology reserve," which will be used by DOE to fund demonstration projects for cleaner ways to burn coal. I believe this action represents sound energy policy and responsible fiscal policy.

Mr. President, I have been a supporter of synthetic fuels research since the Corporation was first authorized. Congress created the Corporation in 1980 as the most ambitious of several means of achieving energy independence. The Arab oil embargo, the emergence of OPEC, crippling energy price increases, as well as the long gasoline lines of the 1970's, precipitated the action. The Synthetic Fuels Corporation began to create an instant synthetic fuels industry by offering Federal loan and price guarantees to energy companies to induce them to convert the nation's vast coal and oil shale resources to liquid fuels and gas.

Unfortunately, today's world oil market is too weak, our Federal budget too tight, and the management of the agency too controversial to justify the corporation's continued existence.

Many factors over the past 5 years have led me to the action I take today. The high prices of energy in the 1970's had the classic effect of reducing energy demand. The deep recession of the early 1980's reduced it even further, triggering lower energy prices. Synfuels projects that had seemed to make sense in the period of soaring prices and tight supply became much less desirable in the face of a glut. The major oil companies backed out of their sizable projects and asked for larger subsidies. Technical problems have pushed the cost of synfuels from $60 to $90 per barrel. The Corporation added to the problem by its own mismanagement, conflict-of-interest questions, poor project review performance, and questionalbe project awards.

Even though I support the elimination of the agency, I still support a Synfuels Research and Development Program and I will work to ensure that such a program continues at the Department of Energy. Synfuels research necessarily remains an important component of our energy security. The lessons of the early 1970's should not be forgotten. However, any research program to develop commercially viable technologies must be managed effectively in light of limited budget resources. The alternative I support will better serve our Nation's energy security needs by establishing a more rationally scaled and paced synfuels effort.

I encourage my colleagues to support this amendment.

Mr. McCLURE. Mr. President, I understand the Senator from Colorado wishes to speak for 3 minutes. We will be on this bill until 2:30 p.m. I ask unanimous consent that the rollcall commence at 2:30 p.m. and that the time remaining between now and then in that hour the Senator from Colorado be recognized for 3 minutes and the Senator from Idaho the remaining.

Mr. MELCHER. I object. Is the intention to go again into the time when I would like to offer an amendment?

Mr. McCLURE. We will just only be completing a rollcall that will commence before the hour of 2:30 p.m.

Mr. BYRD. What is it? May I ask?

Mr. McCLURE. The request was that a rollcall commence. I am making the motion to table the amendment of the Senator from Washington and that will occur at 2:20 p.m., the rollcall continues, and that the time between now and then the Senator from Colorado be recognized for 3 minutes and the Senator from Idaho the remainder.

Mr. BYRD. Mr. President, reserving the right to object, has the rollcall been ordered?

Mr. McCLURE. It has not. I have not made the motion to table.

Mr. BYRD. Fine. We are not going to attempt to order a rollcall by unanimous consent.

Mr. McCLURE. No. I would request that at the time I make the motion to table.

Mr. BYRD. Yes. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Colorado.

Mr. HART. Mr. President, at the outset, let me admit a bias. Two of the projects to which commitments have been made are located in the State of Colorado for the development of synthetic fuel from oil shale.

It is clearly known or should be known to my colleagues in the Senate that there is the equivalent energy supply in the oil shales of Colorado, Wyoming, and Utah, to surpass the known or proven reserves of the Middle East and the Persian Gulf.

Mr. President, I wish to make two arguments. One is an argument that other Senators have already made and that is that commitments have been made in good faith, commitments by the Federal Government under two administrations, commitments represented by letters of intent and by contracts and by actual commitments of Federal resources.

Those commitments should not be broken. Regardless of how one feels about the Synthetic Fuels Corporation, and I join with those who criticise its horrible mismanagement and join with those who seek to cut off any further commitment from being made, commitments already made should be honored.

Mr. President, my second argument would be in response to the Senator from Oklahoma who talked about the marketplace. There is one thing that marketplace does not do and that is define this country's national security. We do not leave it and should not leave it to the marketplace to decide this Nation's national security.

As long as we are dependent and increasingly depend on foreign supplies of oil, particularly from the troubled Persian Gulf area, this country will not be secure.

Steps have to be made to establish technologies to develop synthetic supplies of fuel for this country's national security, whether or not the marketplace justifies those investments. That must be a commitment by this Nation's Government and the private sector.

I would hope we would not wait for another energy crisis and not wait for an energy war before this country identified its true national security interests.

Mr. McCLURE. Mr. President, I will in a couple minutes make a motion to table the underlying amendment of the Senator from Ohio and I take only this remaining time. I have not spoken except by comments with respect to the other comments that have been made, but I do want to clarify one thing. There has been some allusion to the administration's position. The administration's position is in favor of the compromise that was adopted last fall. Secretary Herrington's criticism has been of the Union II project not of the Synthetic Fuels Corporation or of the compromise.

Let us be very clear that the administration is not in favor of abolishing the Synthetic Fuels Corporation. They are not. They have not so stated at any time since the compromise was entered into last year.

Second, the Secretary of Defense is strongly in favor of the continuation of the Synthetic Fuels Corporation and its program for the purposes of national security.

Finally, Mr. President, I think it is strange in the extreme that critics of the Corporation, and there are many who have been critics for a long time, have forced delays on the program and then criticize the Corporation for the delay, not of their own making. Those who created the uncertainty that drives corporate sponsors away from the program because of the uncertainty, then criticize the Corporation for having failed to attract corporate sponsors. Those who criticize the program for lack of interest that they, themselves, created by their criticisms on the floor and the uncertainty created by congressional action.

I think we should have a balanced energy program and the Synthetic Fuels Corporation and its demonstra-

tion projects are certainly a part of that necessary balance.

Mr. President, in 1980, the Congress responded to the energy crisis of the 1970's by enacting the Energy Security Act. Among its various legislative initiatives, that act created the U.S. Synthetic Fuels Corporation, and mandated as a national goal establishment of the capability for commercial production of synthetic fuels, and also a broader purpose—enhancement of the long-term energy and hence economic security of the United States.

In the intervening years our immediate energy situation improved as we faced seemingly plentiful oil and gas supplies and, until recently, declining oil prices. As a consequence we have become complacent regarding our longer term energy security, as congressional debate on the budget has turned to emphasize fiscal constraint.

For example, when President Reagan declared the SFC operational in 1981, it started with $14.9 billion in obligational authority, not the $88 or $20 billion that is touted by SFC critics. Nevertheless, in recognition of the need to reexamine the budgetary effects of Federal programs such as synthetic fuels, the Deficit Reduction Act for fiscal year 1984 reduced that figure to $14.1 billion, and the continuing resolution for fiscal year 1985 further rescinded $5.375 billion. The end result was that the current SFC board was left with $8.686 billion, out of which $5.7 million was earmarked for eight projects with letters of intent. Moreover, last year's agreement provides for recapture of 50 percent of any unobligated balances, and its return to the Treasury. Under these recapture provisions of the continuing resolution, an additional $1.2 to $2.5 billion in SFC obligational authority will be automatically rescinded.

In response to this agreement and the appointment of three new directors, the SFC board of directors subsequently reformulated and scaled back its business plan. This restructuring, which has been reflected in negotiations on those projects with letters of intent, has further reduced the potential budgetary impact of the SFC's program. This scaled back program, when completed, will achieve the critical initial commercialization of synthetic fuels at less than 10 percent of the cost contemplated by the Congress in the Energy Security Act. However, the opponents of the SFC remain unsatisfied.

SFC GOAL REMAINS VALID

Nevertheless, the broader goal of the SFC—the commercialization of synthetic fuels in the United States—remains valid. The world's oil supply remains finite and unlikely to grow. A recent USGS report on the adequacy of world petroleum resources until the mid-21st century forecasts a continuing dependence of the United States on unstable countries in the Persian Gulf region. Charles Masters, chief author of the report, emphasized that:

> The most important conclusion of our study is that the Middle East increasingly will monopolize world petroleum supplies.

This conclusion is based on current trends which indicate a permanent decline in discoveries of new oil. Given this trend, the report dismisses the commonly held assumption that discoveries have dropped due to decline in exploration caused by a current surplus in world oil supplies. Rather, the report observes:

> To the contrary the amount of drilling effort has stayed constant over time * * * the decline in discovery * * * reflects the lower-grade prospects available to, or conceived by, the world exploration community.

Experts in industry and Government agree that oil production from non-OPEC nations is expected to decline in the years ahead. For this reason, as indicated by the USGS report and the DOE projections, the United States is headed toward increased reliance on imported oil from unstable countries in the Persian Gulf region. Our vulnerability to another interruption of oil imports cannot be ignored.

In 1984, the United States imported nearly 2 billion barrels of crude oil and petroleum products, or 35 percent of domestic consumption, at a cost of $54 billion. Oil imports were by far the single largest component of our trade deficit, alone representing, it is better than four times the size of the United States trade deficit with Japan.

Department of Energy estimates also project oil imports to rise to 39 percent of total U.S. consumption by 1990 and 48 percent by 1995. Middle Eastern fields contain 57 percent of the world's proved oil reserves and two-thirds of proved reserves outside China and the Soviet Union.

Mr. President, as a nation, we currently are and will continue to be critically dependent on international energy supplies. Therefore, we need to develop the domestic alternative of synthetic fuels which relies on our own plentiful supplies of oil shale, coal, heavy oil, and tar sands. If converted into liquids and gases these resources would provide domestic energy supplies, equal to five to six times the reserves of the entire Middle East.

Continuing the presently restructured SFC synfuels program will enable the United States to gain the essential operating and environmental experience, that will give us the capability to move quickly to full scale commercial production, when required to meet our energy and security needs. Now, when we are close to completing a 4-year effort to achieve the principal goal of the Energy Security Act—the commercialization of synthetic fuels in the United States—is not the time to scrap this critical program.

CURRENT SFC FUNDING

When President Reagan declared the SFC operational in 1981, it had $14.9 billion in obligational authority available for conditional financial assistance, not the $88 billion originally proposed and often cited by SFC critics, or the $20 billion authorized by the Energy Security Act.

Nevertheless, in recognition of the need to reexamine the budgetary effects of Federal programs, such as synthetic fuels, the Deficit Reduction Act for fiscal year 1984 reduced the SFC's obligational authority to $14.1 billion. Subsequently, also in 1984, the continuing resolution for fiscal year 1985 further rescinded $5.375 billion.

CURRENT SFC OBLIGATIONAL AUTHORITY

The current SFC Board was thus left with only $8.686 billion in obligational authority, out of which $5.7 million was earmarked for eight projects with "letters-of-intent" authorized on or before June 1, 1984. In the aggregate these "letters-of-intent," which were approved by the previous Board on the basis of an indepth review of each project's strength and maturity, totaled $6.795 billion.

An added feature of this agreement with the administration, was the provision for recapture of 50 percent of any unobligated balances from this set-aside for "letter-of-intent" projects, and its return to the Treasury.

SFC'S IMPLEMENTATION OF 1984 AGREEMENT

In response to this agreement and the appointment of three new Directors, the SFC Board of Directors subsequently reformulated and scaled back its business plan. This restructuring, which will further reduce the potential budgetary impact of the SFC's Program, is reflected in SFC's recent negotiations and awards to those projects with "letters-of-intent." On the basis of recent SFC Board actions, under the recapture provisions of the continuing resolution for fiscal year 1985, an estimated $2.1 billion in additional SFC obligational authority will be automatically returned to the Treasury.

This potential recapture of obligational authority is set forth in a table that I request appear at this point in my remarks.

POTENTIAL RECAPTURE OF FUNDS ACTION ON LETTER OF INTENT PROJECTS

[LOI projects: status, savings, and recapture amounts]

Project status	Original LOI amount	Renegotiated LOI amount	Recapture amounts
Inactive or cancelled:			
Hop Kern	$100 million	0	
Ky Tar Sands.	$543 million	0	
Great Plains	$790 million	0	

POTENTIAL RECAPTURE OF FUNDS ACTION ON LETTER OF INTENT PROJECTS—Continued

[LOI projects: status, savings, and recapture amounts]

Project status	Original LOI amount	Renegotiated LOI amount	Recapture amounts
Awarded:			
Union phase II.	$2.7 billion	$500 million	
Forest Hill	$60 million	$60 million	
Action pending:			
Seep Ridge	$45 million	$184 million	
Subtotal	$4.24 billion	$744 million	$1.2 billion minimum.
In negotiation:			
Cathedral Bluffs.	$2.19 billion	$400 million	
Northern Peat.	$365 million	$365 million	
Total	$6.795 billion	$0.744 billion minimum. $1,509 billion maximum.	$2.1 billion minimum. 2.48 billion maximum.

Mr. President, the current SFC business plan, with its reformulated program, when completed, will achieve that critical initial commercialization of synthetic fuels, but at less than 10 percent of the cost contemplated by the Congress in the Energy Security Act. Nevertheless, the opponents of the SFC remain unsatisfied. They want to abolish the SFC.

OVERESTIMATED BUDGET SAVINGS

With that as background, Mr. President, let us now look at the House provision, which would be deleted by the committee amendment. The House provision would abolish the Synthetic Fuels Corporation and establish yet another $500 million research program at the Department of Energy. To do so would be shortsighted and irresponsible.

The argument of its supportors is that significant budget savings will be achieved; but their estimated savings are patently wrong. In 1986, for example, the actual outlay savings are only about $14 million, according to the Congressional Budget Office, and an estimated $82 million for the 3 fiscal years 1986 to 1988. By comparison, the opponents of the committee amendment claim unrealistic savings of $468 million over the same period based on outdated CBO baseline assumptions.

While in later years after 1990 there may be savings, but these savings are also overestimated. For example, the CBO estimate cited by the SFC's opponents fails to mention that, according to the Congressional Budget Office, the estimated fiscal year 1986 savings of about $14 million are principally from reductions in the SFC's administrative costs that will likely now show up in the Department of Energy's budget. Further, the Congressional Budget Office estimate, for the years after 1990, fails to take into consideration several recent events and other significant factors:

First, the profit sharing arrangements that have been negotiated by the SFC;

Second, cancellation of the Great Plains project;

Third, significantly lower outlays as a result of the SFC's rescaling of proposed projects in response to last year's agreement;

Fourth, under last year's agreement, one-half of any savings—an estimated $1.2 to $2.5 billion—will be automatically returned to the Treasury; and

Fifth, any costs associated with SFC assistance only occur in later years, after the projects achieve commercial production.

But more importantly, it can be anticipated that any funds that are now released from abolition of the SFC will not be returned to the Treasury; instead they will be redirected by the Congress, to other Federal programs, which will immediately contribute a greater amount to the deficit, than if we let the SFC program continue.

Nevertheless, the supporters of the House provision claim budgetary savings. But let the record be clear on one point, what is at issue here is not budgetary savings, that was achieved last year. What is at issue is that the opponents of the SFC were opposed to it when it was created, and they are continuing their opposition under the guise of budgetary and fiscal restraint.

But let us look closely at some of the unrealistic features of their proposal.

BREACH OF FAITH

First, there is a matter of breach of faith.

Last year the Congress asked the SFC to review, and if necessary, restructure its eight letter-of-intent project. The SFC and the projects' sponsors responded to that challenge. Yet it is now proposed by the SFC's opponents that the Congress once again not only change directions, but cancel the SFC program.

Under the House provision the program would not only be further downgraded, but abolished, and transferred to DOE. Once there, the Secretary of Energy must redirect the Federal Synthetic Fuels Program, away from commercialization, and toward research. In addition, under H.R. 3500, the House passed Omnibus Reconciliation Act, he would be authorized to terminate any existing SFC contracts, such as those to Cool Water and Dow Syngas. To terminate such contracts, he must simply determine that such contracts are not, in his judgment, in the national interest, which is undefined. Moreover, this determination is delegated to Secretary Harrington, who has demonstrated in recent days, that he is opposed to the SFC's commercialization effort, an effort mandated by the Congress, and supported by the President.

But even more importantly, under H.R. 3500 we are talking about canceling contracts that are now full faith and credit obligations of the United States. As such they are incontestible in the hands of the holder for fraud or material misrepresentation. Thus the current project sponsors, as with any other Government contract, are now entitled to the ordinary remedies available when a Government contract is terminated. However, Mr. President, under H.R. 3500 as passed by the House this would change; the current SFC contract holders would only be entitled to recovery if such terminations by the Secretary are later determined by a court to be unconstitutional.

While not in this bill—but in the companion measure—if adopted this contract termination provision would establish an unprecedented breach of faith by the Federal Government with project sponsors—and their employees, affiliates, and investors—who have spent hundreds of millions of dollars and years of effort in response to a government-industry cooperative effort. This program was initiated in 1980 by the Congress in the Energy Security Act, and reaffirmed last year by the Congress and this administration in the 1985 continuing resolution.

Besides being a breach of faith on the part of the Federal Government, such an abrogation of contract rights as set forth in the amendment would have major and unprecedented implications for not only Federal contractors generally, but for future legislation, for example, in the area of natural gas pricing.

MORE RESEARCH, WITHOUT COMMERCIALIZATION

The House provision being deleted by the committee amendment would attempt to establish a new but modified synthetic fuels program in DOE, again with the pledge of the full faith and credit of the United States behind its contracts. I must ask why its supporters believe that industry will believe this new pledge after the present one is broken in poor, if not bad, faith?

But more importantly, the new program calls for assistance at the smallest scale practicable to determine the commercial viability and economic feasibility of commercial scale projects. This is now being undertaken by the SFC, which has the necessary expertise.

However, as prior experience at DOE has demonstrated, this cannot be accomplished if Federal assistance is limited to only $500 million. For example, a single minimum sized coal or oil shale commercial module would require the entire $500 million authorized. Moreover, the small scale projects envisioned by the amendment lack economies of scale.

The SFC's experience in negotiations demonstrates that the required Federal assistance would have to be significantly greater for a commercial facility in order to attract private sector equity.

SFC'S STANDARDS OF CONDUCT

The supporters of the House provision argue that one of the reasons for their House provision is that SFC employees are not subject to the normal governmental statutes governing conflict of interest and public information, and these requirements would apply to the new program. However, this is untrue.

The provisions of the original Energy Security Act governing public information are modeled after the Freedom of Information Act. Moreover, they were orignially offered by the Senator from Ohio, Mr. METZENBAUM in 1980.

Similarly, last year the Congress, at the suggestion of the opponents of the committee amendment, clarified current law regarding financial reporting and ethical standards governing SFC employees. In response to enactment of that amendment last year the SFC subsequently revised its standards of ethical conduct and financial reporting to conform with these statutory changes, which are identical to those for Federal officers and employees.

It is further argued that the SFC's contracting practices continue to reflect a complete disregard for Federal procurement regulations; but this also is not the case.

While there were problems in this regard in the past, this situation has not been corrected. According to the SFC, over the first 11 months of fiscal year 1985, approximately 94 percent of its contracts were obligated on a competitive basis. Also, their records indicate that approximately 92 percent of payments to firms were under competitive contracts. This compares to less than 60 percent achieved for the Federal Government overall.

Furthermore it is alleged that the SFC did not monitor the performance of consultants. However, the GAO reports that "monitoring normally consisted of interacting with the consultants on a frequent, and in some cases, daily basis." Moreover, each contract specifically designates an SFC employee to monitor the consultant and the SFC contract office maintains a monthly status on all contract agreements.

Following an in-depth review over several months of the SFC's contracting practices for consulting services, the GAO noted no major deficiencies and made no recommendations for changes in the SFC's current practices.

POTENTIAL FOR EXTENSIVE LITIGATION

In addition, the companion measure, H.R. 3500, would abolish the general powers of the SFC as an independent Federal entity, including the authority to sue and be sued and represent itself in court, as well as limitations on claims against the SFC. This would foster a rush of lawsuits during the transition period, attacking various provisions of the statute. There could, for example, be extensive lawsuits attacking the validity of actions taken by SFC officers and employees in administering financial assistance agreements.

ADMINISTRATION'S POSITION

It has been stated that the administration supports the House provision; however, I would point out that the October 2 letter to House Members from Secretary Herrington clearly avoids being forthright by saying it is sent on behalf of the President. Rather, only by implication does it let you believe the Secretary is speaking for others. The Secretary's letter is further faulted by its misinformation, such as the statement concerning the development of a commercial synthetic fuels industry at a pace envisioned by the Congress in 1980. But that is not the reformulated program now being pursued by the SFC under last year's agreement, which abolished the statutory production goals. His letter clearly addresses a situation that does not even exist today; namely, the statutory objectives as originally enacted in 1980, which included production goals.

I would also note that on July 15 the President's Assistant for Policy Development, John Avahn, wrote SFC Chairman Noble stating that:

> The continued appropriateness of the SFC is very much in question and . . . the Corporation should complete its mission as expeditiously as possible.

He added:

> Were the administration to seek legislation now to abolish the Corporation, we believe it would be extremely difficult to obtain the agreement of Congress and would greatly increase the risk that Congress would utilize the Corporation's remaining budget authority to initiate a series of coal technology demonstration projects in the Department of Energy, further increasing the deficit.

Nevertheless, there still remains the question of not where Secretary Herrington stands on this issue, but whether he represents the administration, which I understand he does not.

On the same day as this letter, July 15, in testimony before the House Commerce Subcommittee on Fossil and Synthetic Fuels, Secretary Herrington stated:

> I support the compromise that was reached between OMB and the Congress last year for the reduction of the amount that Synfuels Corporation can spend from $20 billion dollars down to eight and included in that the so-called $750 million dollar clean coal—

He later added:

> I would like to meet the commitments of the administration in its negotiations with Congress and as an administration official I plan on doing that to the best of my ability.

His recent letter, however, appears to be inconsistent with this earlier commitment, but I will let the two statements speak for themselves.

Nevertheless the Secretary's letter of October 2 goes on to address pending SFC project negotiations on which the Department has limited knowledge. The implication of the letter is that DOE has oversight responsibility for the SFC's programs, which is not the case. The Congress established the SFC as an independent Federal entity—not a part of the Department of Energy, and only the Congress has oversight responsibility for the SFC. That is what was intended, and it hasn't changed.

The Secretary's letter then goes on to criticize an oil shale project which is proposed to receive approximately $500 million in price supports from the SFC. What the letter fails to note is that the original financial assistance was granted by the DOE, not the SFC. Moreover, this is one of the letter-of-intent projects specifically identified by the Congress. Under last year's agreement, the SFC has succeeded in restructuring the project downward from the original amount in the SFC's letter of intent was $2.7 billion.

Moreover, the letter fails to mention that the total output of 10,000 barrels per day from this project is under contract to the Department of Defense. If the Department cannot obtain this supply, it can be expected that it will itself get into the business of synthetic fuels production to meet its needs.

CONCLUSION

As I discussed earlier, the Congress addressed the matter of SFC funding only last year. Only 11 months have passed since the SFC compromise legislation was enacted in the fiscal year 1985 continuing resolution. That agreement with the administration, not Secretary Herrington, called for a scaled-down synthetic fuels program and a rescission of $7.375 billion.

Since that agreement, the new Board has responded to Congress and has moved deliberately to produce a statement of objectives and principles, a new business plan, and the comprehensive strategy report to the Congress. The Corporation has restructured its program, as mandated by Congress, to reflect the new business plan. The new program concentrates on obtaining experience in construction and operation of scaled-down projects using commercial scale equipment.

Abolishing the SFC at this time will result in loss of the potential benefits for which we have been pursuing for 4½ years. It is budgetarily irresponsible to abandon achievement of these benefits at this critical time, when the SFC's program is about to reap the rewards which we have sought for so long. There currently are three successful synthetic fuels plants which have been assisted by the new SFC Board. Given time, the new Board will approve more well-designed and well-

managed projects based upon their technical, managerial, and economic strengths. We are finally seeing tangible results of a 4-year effort by the Congress and the Reagan administration.

Mr. President, the House provision proposes that we abolish the Corporation, but continue the synthetic fuels program in the Department of Energy. I am concerned that if we dismantle the SFC we may very well be putting the nails in the coffin of our Nation's commercial synthetic fuels program. DOE had a credible track record on synthetic fuels research and subcommercial demonstration; however, after a 10-year effort that research program can exhibit little, if any, commercialization of synthetic fuels technologies. Research has not been enough to achieve transfer of federally funded energy technology into the marketplace. We must not repeat our past mistakes by returning to an overemphasis on research at the expense of commercialization. Rather, let's obtain the important commercial-scale experience that the SFC's program can provide our country. As a nation we cannot launch a full-scale commercial industry on the basis of only DOE pilot plant experience; if this were possible, we already would have done it.

What has always been needed is an entity which can utilize experienced management teams with the expertise to operate commercial facilities. The SFC was created for that purpose, and the SFC has been taking a cautious approach in selecting qualified sponsors and projects which meet its criteria of strength and maturity.

That is not true today for the DOE, any more than it was in 1980 when it was under the gun of yearly appropriations. The SFC now has the experience and knowledge necessary to foster a synthetic fuels industry that can respond when market or national security considerations warrant.

The importance of this synthetic fuels program is unanimously supported by the Western Governors' Association, whose members include Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming, and the territories of American Samoa, Guam, and the Northern Marianias; and is unanimously supported by the Southern Governors' Association, whose members included Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, Virginia, The Virgin Islands, and West Virginia. In addition, the SFC's program is supported by the Southwest Regional Energy Council, whose membership consists of elected officials from the States of Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

The current SFC program, now in place, costing a fraction of the original congressional authorization, consititutes an appropriate initial program to foster the development of our synthetic fuels option—which is an insurance policy for the United States. If this synfuels option does nothing more than help to keep world oil supplies plentiful and prices stable, then I would argue that it is an investment well worth making today. We must not fail to use this opportunity wisely, and we must not break faith with the private sector after it has invested so heavily. We must move ahead with this very reasonable and necessary investment in the country's energy and economic future.

Therefore I urge that you join with us and the 34 States that oppose a further erosion of our necessary commitment to a strong synthetic fuels program for the United States. A vote in support of the committee amendment is a vote in favor of implementation of last year's agreement and America's energy future.

Mr. President, I ask unanimous consent to have printed in the RECORD a "Dear Colleague" letter, dated October 4, 1985; a Western Governors' Association Resolution 85, on the subject of the Synthetic Fuels Corporation, dated August 28, 1985; and a letter to the President, dated October 15, 1985, from the chairman of the committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WESTERN GOVERNORS' ASSOCIATION
RESOLUTION 85–

Sponsor: Governor Bangerter.
Subject: The Synthetic Fuels Corporation.

A. BACKGROUND

1. In recent action in the United States House of Representatives, the funding level of the United States Synthetic Fuels Corporation was reduced from a recommended level of $7.9 billion to $500 million.

2. The issue of funding the Corporation will be considered by the United States Senate when the Congress reconvenes in September.

3. The Board of Directors of the Corporation has reviewed the existing program and initiated changes to provide a workable and cost-effective program that allows the private sector to develop technologies for efficient and clean production of synthetic fuels. It is essential that these technologies exist to promote production when market or national security considerations dictate.

4. The Board of Directors had begun to implement this program when on August 20, 1985, it directed staff to complete negotiations and contract documentation by September 13, on financial assistance agreements totaling approximately $700 million in price and loan guarantees for three major synthetic fuels projects. Those projects are the Seep Ridge oil shale project in Utah, the Union Oil Parachute Creek project in Colorado, and the Forest Hill heavy oil project in Texas. Negotiations are continuing on several other projects, including the Great Plains project.

B. GOVERNORS' POLICY STATEMENTS

1. We support a continued Federal role in the financing of diverse synthetic fuels technologies. The program developed by the Synthetic Fuels Corporation (SFC) is a long-term benefit to the economic and energy security of the nation. Congress should fund the SFC at a level adequate to allow a meaningful review of good faith applications and development of the most meritorious projects.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. Convey the governors' position to senators and representatives from the western states to relevant committee chairman, to the Administration, and other individuals with an interest in the issue.

Members include: Alaska, American Samoa, Arizona, California, Colorado, Guam, Hawaii, Idaho, Montana, Nebraska, Nevada, New Mexico, North Dakota, Northern Mariana Islands, Oregon, South Dakota, Utah, Washington, Wyoming.

PROPOSED AMENDMENT TO THE EXISTING POLICY POSITION REGARDING UNITED STATES SYNTHETIC FUELS POLICY

Submitted by: Governor Mark White, Texas
August 9, 1985.
For: Consideration at the 1985 Annual Meeting of the Southern Governors' Association.

The Governors continue to support a federal role in the financing of diverse synthetic fuels technologies, including those technologies which utilize regional coal resources. Long term benefit to the economic and energy security of the nation can be provided by adequate federal support. Congress should fund this effort at a level adequate to allow a meaningful review of good faith applications and development of the most meritorious projects.

Members include: Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, Virginia, Virgin Islands, West Virginia.

SOUTHWEST REGIONAL ENERGY COUNCIL POLICY STATEMENT REGARDING SYNTHETIC FUELS DEVELOPMENT

[September 27, 1985]

BACKGROUND

Even under today's relatively favorable conditions, the United States is paying approximately one billion dollars per week for imported oil. This level of dependency is projected to increase with the decline of production from conventional domestic resources. The development of unconventional resources of oil and gas, including synthetic fuels, could supplement reduced domestic supplies.

If synthetic fuels production is to be able to expand rapidly, safely, and efficiently, pioneer projects must be built first. Unfortunately, the long lead times and large capital investments required to demonstrate their technical and commercial viability of synthetic fuels projects prevent all but the most far-sighted and persistent private companies from investing in synthetic fuels development.

RECOMMENDATION

A balanced mix of energy sources is essential for the long-term security and the future economic growth of the United

States. The development of a synthetic fuels capability is a critical component in that mix. The private sector has demonstrated its interest in synthetic fuels by large capital investments and major commitments of resources. The long-term energy outlook, the lead times involved in synthetic fuels development, and the critical role of pioneer plants warrant some public investment in synthetic fuels development. Through loan guarantees and price supports, the federal government can perform a vital and essential role to ensure that the private efforts to develop commercial synthetic fuels capability are brought to fruition.

The Southwest Regional Energy Council urges the Congress and the President to continue federal assistance for the effective development of a commercial synthetic fuels industry under the authority of the Energy Security Act of 1980, as amended in 1984.

Members include elected and local officials from: Arkansas, Louisiana, New Mexico. Oklahoma, Texas.

COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, DC, October 4, 1985.

DEAR COLLEAGUE: In the near future it is expected that you will once again be asked to vote on an amendment to abolish the Synthetic Fuels Corporation (SFC), which we urge you oppose.

Last year the Congress rescinded $7.375 billion of the SFC's off-budget obligational authority and eliminated the synthetic fuels production goals in the Energy Security Act. Subsequently, the SFC Board of Directors reformulated its business plan and is renegotiating the size of individual projects so as to achieve further budgetary savings of between $1.2 and $2.5 billion. When completed, this reduced program will significantly contribute to the statutory objective of establishment of the infrastructure necessary to support a commercial synthetic fuels industry in the United States. Moreover, this critical initial commercialization objective will be achieved at less than 10 percent of the cost contemplated by the Congress in the Energy Security Act.

In requesting your opposition to this amendment we urge that you consider the following recent reports that underscore the United States' continuing economic and international oil supply vulnerability:

The Iran-Iraqi War poses a new and greater threat to U.S. interests, according to Reagan Administration oil analysts and former Ambassador Richard Helms (Washington Post, September 27, 1985);

Iran's oil exports have declined by two-thirds as a result of Iraqi's attacks (Wall Street Journal, September 27);

Significant oil price price increases recently have occurred because of such factors as Iran's and the Soviet Union's temporary suspension of oil exports, and the Saudi announcement that it will take on no new contracts (New York Times, September 27); and

Recently the U.S. Geological Survey concluded that the Middle East will increasingly monopolize dwindling world petroleum supplies and the U.S. can expect to return to the energy crisis of the 1970's, experiencing regular supply interruptions with but a few decades left to enjoy the convenience of crude oil as our major energy fuel and therefore it is essential for the Nation to develop its own alternative energy resources (Washington Post, September 26).

These recent reports do indeed highlight the danger of dependence on international oil supplies. Further, they emphasize our continuing need to develop the domestic alternative of synthetic fuels which relies on our abundant supplies of coal, oil shale, heavy oil and tar sands.

The SFC is close to completing the modest, but commercial, program that the Administration agreed to last year. This program will provide the operating and environmental experience that is essential to provide the United States with a synthetic fuels capability when required to meet our energy and security needs. Now when we are about to culminate a four-year effort to achieve the principal goal of the Energy Security Act—commercialization of synthetic fuels in the United States—is not the time to scrap this critical program.

Opponents of the SFC argue that significant budget savings can be achieved from its abolition, but they fail to mention that, according to the Congressional Budget Office, the outlay savings are minimal. In FY 1986, for example, the savings are only $14 million. In later years there may be additional savings, but they would not occur, if at all, until after 1990. The CBO estimate also fails to take into consideration several significant factors: namely, (a) the profit sharing provisions that have been negotiated by the SFC; (b) cancellation of the Great Plains project; (c) significantly lower outlays as a result of the SFC's rescaling of proposed projects; (d) under last year's agreement, one-half of any savings—an estimated $1.2 to $2.5 billion—will be automatically returned to the Treasury; and (e) any costs associated with SFC assistance only occur in later years after the projects achieve commercial production. But more importantly, it can be anticipated that any funds that are released now from abolition of the SFC will not be returned to the Treasury; instead they will be redirected to other Federal programs, which will immediately contribute a greater amount to the deficit than if we let the SFC program continue.

The importance of the SFC's program to our country's energy future was recently supported unanimously by the Western Governors Association, the Southern Governors Association, and the Southwest Regional Energy Council. Please joun us and these 34 States and 5 territories in opposing any amendment which further erodes our necessary commitment to a strong U.S. synthetic fuels effort.

Sincerely,

J. Bennett Johnston, *Ranking Minority Member,* James A. McClure, *Chairman,* Wendell H. Ford, Quentin N. Burdick, Mark Andrews, Gary Hart, Arlen Specter, Alan J. Dixon, Paul Simon, William L. Armstrong, John W. Warner, Orrin G. Hatch, Jay D. Rockefeller, John Heinz, Ted Stevens, Paul S. Trible, Jr., Pete V. Domenici, Russell B. Long, Jake Garn, Robert C. Byrd, and James Abdnor.

COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, DC, October 15, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: I know we both are aware of the importance of the program of the U.S. Synthetic Fuels Corporation to our country's energy and economic future. Your appointment of the Board of Directors under Chairman Ed Noble in 1981 recognized the national security benefits of continuation of this vital, government-industry partnership.

Last year, however, in recognition of the need for budgetary constraint, we negotiated an agreement for the rescission of $7.375 billion of the SFC's obligational authority and eliminated the synthetic fuels statutory production goals in the Energy Security Act. As a part of that agreement the Senate confirmed your three nominees, so that the SFC had a working quorum. Considerable effort was expended on my part to achieve that agreement, in recognition of our mutual concerns for the budget deficit.

Subsequently, and again as part of our agreement, the SFC Board reformulated its business plan and is renegotiating the size of individual projects so as to achieve further budgetary savings of between $1.2 and $2.5 billion. Equally important, private industry has invested almost $1.4 billion in good faith to implement last year's agreement.

When completed, this reduced program will significantly contribute to the statutory objective of establishment of the infrastructure necessary to support a commercial synthetic fuels industry in the United States. Moreover, this critical initial commercialization objective will be achieved at less than 10 percent of the cost contemplated by the Congress in the Energy Security Act.

As you are aware, I reached that agreement with Edwin Meese, then Counselor to the President; David A. Stockman, then Director of the Office of Management and Budget; and Donald Paul Hodel, then Secretary of Energy, who were acting on your behalf. Acting on the belief that they were indeed carrying out your instructions, I made representations to a great many of my colleagues that our agreement would be the last effort to alter our synthetic fuels program. Now it appears that the rules have changed since you recently reorganized your staff so that new individuals have assumed these responsibilities. Members of your Administration are actively working to overturn our agreement. To my knowledge you continue to support the SFC's reformulated and restructured program as we agreed. Am I correct in that assumption?

The importance of the SFC's program to our country's energy future was recently supported unanimously by some 34 States who are members of the Western Governors' Association, the Southern Governors' Association, and the Southwest Regional Energy Council. Now, when we are about to culminate a four-year effort to achieve the principal goal of the Energy Security Act—commercialization of synthetic fuels in the United States—is not the time to scrap this critical national program.

Sincerely,

JAMES A. MCCLURE, *Chairman.*

U.S. SYNTHETIC FUELS CORPORATION,
Washington, DC, September 30, 1985.

Hon. JAMES A. MCCLURE,
Chairman, Senate Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I understand that during a business meeting of the Committee on September 26, 1985, questions were raised concerning a paper entitled "The Plan," prepared by a Corporation staffer purporting to set forth a series of "action steps" to be taken by the Corporation in connection with Senate consideration of proposed legislation affecting the Corporation. I would like to clarify the Committee's

record by setting forth the facts concerning this document.

The existence of such a document first came to my attention following a search of Corporation files in response to an August 14, 1985 request from Chairman John Dingell of the Oversight and Investigations Subcommittee of the House Committee on Energy and Commerce for all documents, including drafts, "setting forth any action, plan or strategy for defeating any legislative efforts to rescind funding for the Synthetic Fuels Corporation." I responded to Chairman Dingell on August 23, 1985, that there were no documents setting forth such a Corportion action plan or strategy. Our search had identified, however, the five-page undated, unattributed, and unaddressed draft outline entitled "The Plan" which has become the subject of your Committee's discussion. A copy of the document was transmitted to Chairman Dingell on August 23, along with the explanation that the draft had been prepared for Tom Corcoran, the Corporation's Vice Chairman, in mid-July by his aide, Mike Bayer. The draft had never been finalized.

Since our transmittal to Chairman Dingell, Mr. Corcoran has on several occasions responded publicly to questions concerning the document, most recently during hearings of the Economic Stabilization Subcommittee of the House Committee on Banking, Finance and Urban Affairs held on September 12, 1985. His response definitively refutes the suggestion that he or any one else with management or decision making responsibility at the Corporation acted on the proposals set forth in "The Plan." I set forth that response in full:

Chairman LAFALCE. Some individuals have suggested that the actions of the Synthetic Fuels Corporation in the past several months are based, primarily, on a document that was prepared for you, which had as its principal thesis, actions that could be taken by the Synthetic Fuels Corporation, in order to win the game of political favor within the United States, especially in the United States Senate, and that, therefore, the Synthetic Fuels Corporation was, in fact, acting first and foremost in a political fashion, secondarily, perhaps, in a complementary fashion, perhaps not so, for substantive reasons.

Would you care, at this point in time, to take up this issue, which certainly is going to arise elsewhere?

Mr. CORCORAN. Well, there is no basis for that assertion. There is what has been described as "the plan;" it was perpared by an individual on our staff, who happens to work directly for me. He is an idea man. In my work in the Synthetic Fuels Corporation and my work in the Congress of the United States, I've always tried to associate myself with people who can develop ideas. In this instance, he did, at his own instigation, develop a series of suggestions as to what might be done.

I looked at those ideas. I regard some of them as being good, most of them as being not so good, and certainly, from the standpoint of any kind of policy by myself or any kind of policy decision by the Synthetic Fuels Corporation, there was no decision, there was no action, no corporate policy that was based on the suggestions of one individual, which, in many instances, were not useful suggestions.

So I think any suggestion that there was any kind of corporation policy based on the suggestions of one individual staff guy is nonsense.

Chairman LAFALCE. First, so you understand where I am coming from, I think it would be naive to think that members of the Executive Branch don't frequently act in a way that is going to gain favor with influential members of the Congress.

What I am concerned about is that no decision is being made for political reasons as opposed to substantive reasons.

Mr. CORCORAN. Yes.

Chairman LAFALCE. I am just curious, though, if the money that was let, if you will, the commitments that were made from the time of this memo to the President would have all been made in the absence of this memo.

Mr. CORCORAN. There is no connnection between this memorandum and the decisions that we have made.

For my own part, I would only wish to underscore that I had not seen nor heard of such a document until the matter was raised by Chairman Dingell. My own testimony before the Economic Stabilization Subcommittee follows:

Chairman LAFALCE. Would Mr. Noble care to comment?

Mr. NOBLE. Yes, sir. I never saw that piece of paper. The first time I knew of it is when Mr. Dingell wrote his letter, and I questioned. When I asked what is this, I had never seen it, and if there was any effort to do anything about it I had no knowledge of it, and I said that in the very beginning.

The draft "Plan" has not guided my thinking, or, to the best of my knowledge, that of my fellow Board members.

I respectfully request that this letter be made a part of the minutes of your Committee's deliberations.

Sincerely,

EDWARD E. NOBLE,
Chairman of the Board.

Mr. President, I now move to table the amendment of the Senator from Ohio [Mr. METZENBAUM] and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON, I announce that the Senator from Mississippi [Mr. STENNIS], is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 41, nays 58, as follows:

[Rollcall Vote No. 270 Leg.]

YEAS—41

Abdnor	Hatch	Pell
Andrews	Hecht	Pressler
Armstrong	Heflin	Rockefeller
Bentsen	Heinz	Sasser
Burdick	Inouye	Simon
Byrd	Johnston	Specter
Dixon	Laxalt	Stevens
Domenici	Long	Symms
Exon	Mathias	Thurmond
Ford	Matsunaga	Trible
Garn	McClure	Wallop
Goldwater	McConnell	Warner
Gore	Murkowski	Zorinsky
Hart	Nunn	

NAYS—58

Baucus	East	Mattingly
Biden	Evans	Melcher
Bingaman	Glenn	Metzenbaum
Boren	Gorton	Mitchell
Boschwitz	Gramm	Moynihan
Bradley	Grassley	Nickles
Bumpers	Harkin	Packwood
Chafee	Hatfield	Proxmire
Chiles	Hawkins	Pryor
Cochran	Helms	Quayle
Cohen	Hollings	Riegle
Cranston	Humphrey	Roth
D'Amato	Kassebaum	Rudman
Danforth	Kasten	Sarbanes
DeConcini	Kennedy	Simpson
Denton	Kerry	Stafford
Dodd	Lautenberg	Weicker
Dole	Leahy	Wilson
Durenberger	Levin	
Eagleton	Lugar	

NOT VOTING—1

Stennis

So the motion to lay on the table amendment No. 936 was rejected.

Mr. EVANS. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER, Without objection, it is so ordered.

THE FISH AND WILDLIFE SERVICE'S WORK IN THE CHESAPEAKE BAY

Mr. MATHIAS. Mr. President, I applaud the Senate Appropriations Committee for including $500,000 in the Department of Interior appropriations bill for the Fish and Wildlife Service's involvement in the Chesapeake Bay Cleanup Program. These funds will enable the Service to continue its vital work in the bay, including raising striped bass for release to the bay and protecting ecologically sensitive areas, so vital to all the bay's organisms.

The Fish and Wildlife Service plays a key role in the cleanup program. The Service's bay activities center on the effects of the bay's pollutants on biological resources, primarily fish, shellfish, waterfowl, aquatic vegetation, and endangered species. The main objective of the Service is to assess the effects of nonpoint source pollution from urban and agricultural runoff on fish and wildlife habitats and to recommend ways to prevent or minimize those impacts.

The Fish and Wildlife Service is focusing its immediate attention on the Choptank River on Maryland's Eastern Shore. Last spring and summer, it reviewed 34 sites to evaluate water quality and the health of fish and wildlife habitats there. To help maintain those habitats, the Service en-

courages management practices which improve the water quality and benefit the bay's living resources.

Another important objective of the Fish and Wildlife Service is to help other agencies evaluate and reduce the danger from industrial toxic substance discharges into the bay. About 3,000 discharge sites exist in the bay region, each allowed under State or Federal permits to discharge specified amounts of toxins. At selected sites, the Service is assessing the effects that these discharges may have on the bay's living resources and is recommending necessary modifications to the discharge permits.

In general, fish and wildlife resources of the bay have decreased in recent years, and one of the first signs of that decline was the lower number and smaller size of striped bass caught. Many believed it was a cyclical temporary decline and that striped bass populations soon would be back to normal. But that did not occur. There was an extensive reproductive failure of the bay's striped bass. The situation now has deteriorated so severely that restrictions on commercial and sport catches of striped bass are in place not only in Maryland, but also up and down the east coast.

To start the long-term reversal of this tragic situation, the Fish and Wildlife Service and the State of Maryland have underway a 5-year pilot program to supplement the striped bass's natural production with hatchery-reared fish. This past spring, adult striped bass were captured and artificially spawned. The eggs were incubated and the young fish were distributed to six national fish hatcheries east of the Mississippi and one State hatchery for rearing. This fall, about 250,000 young striped bass—6 to 8 inches long—will be released into the same bay tributaries from which they came.

Plans are to double striped bass production in 1986 and in the future years the goal is to add as many as 1.5 million young striped bass per year to the bay to augment the natural population. Using innovative computer chip tags, some of the young fish will be tagged to follow their growth and survival. In support of this Federal/State cooperative effort, the Fish and Wildlife Service recently placed a fishery biologist at Annapolis to develop appropriate fish stocking strategies, coordinate Federal/State activities, and evaluate the success of the striped bass stocking program. It is anticipated that the stocking program in concert with improved habitat quality and effective fishery management procedures will help restore striped bass as a valuable recreational and commercial species of the bay.

In addition to striped bass, the Fish and Wildlife Service is determining the abundance and health of other living resources in the bay, including canvasback and black ducks, shad, blue crabs, oysters, and submerged aquatic vegetation, sometimes called SAV. Causes for declines of these important resources will be identified and recommendations for corrective actions will be made.

Already, much progress has been made in analyzing the loss of SAV, the sea grasses of the bay, used for food and shelter by so many of the bay's organisms. The Fish and Wildlife Service with other Federal and State agencies, is mapping the distribution, density, and species composition of submerged aquatic vegetation throughout the bay. Maryland watermen and other volunteers are also helping in this effort. Johns Hopkins University is analyzing bay sediments to determine how sediment affects submerged aquatic vegetation and what land practices affect the loss of this valuable resource.

The Fish and Wildlife Service is playing an important role in restoring Chesapeake Bay. It is a role that cannot be omitted from the overall Bay Cleanup Program. I urge the approval of the Appropriations Committee's decision to provide the necessary funding to continue this vital effort to restore living resources of the Chesapeake Bay.

Mr. STAFFORD. Mr. President, I commend the Committee on Appropriations and the floor managers of this bill on the decision to increase funding for the programs authorized by the Water Resources Research Act of 1984 (Public Law 98-242).

Public Law 98-242 was developed in the Committee on Environment and Public Works, largely as a result of the excellent leadership of the chairman of our Subcommittee on Water Resources [Mr. ABDNOR]. That law authorizes a small, but vital, program of water research under the direction of the U.S. Geological Survey.

This bill makes available a total of $15,270,000 during fiscal 1986 for these water research programs. I look upon this as an investment in our future, an investment that will certainly save the Federal taxpayers far more in the long run.

For example, I support strongly the Appropriation Committee's decision to increase to $7,500,000 the money that will be made available for matching water research grants during fiscal year 1986. This is a sound decision. These studies of serious water problems are important to the wise use of water in America.

In addition, I applaud the committee's action increasing the money that will be available to the water research institutes located at a land-grant college in each of the States.

If anyone is concerned over this increase, it should be noted that even at $15 million, spending remains far below the levels at which it stood several years ago.

Mr. President, I commend the chairman of the subcommittee [Mr. MCCLURE] and the subcommittee's ranking member, the distinguished minority leader [Mr. BYRD]. Water research is an important investment in our future. I urge the floor managers to defend this increase vigorously in conference with the House.

RECESS UNTIL 4 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate stand in recess until 4 p.m.

There being no objection, the Senate, at 2:56 p.m., recessed until 4 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. GARN].

QUORUM CALL

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SIMPSON. I object.

The PRESIDING OFFICER. The objection is heard.

The clerk will call the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SIMPSON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The bill clerk resumed the call of the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SIMPSON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SIMPSON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. EXON. Mr. President, in order to proceed in an orderly fashion, I ask unanimous consent that the order for the quorum call be dispensed with.

Mr. SIMPSON. Mr. President, in order to proceed in just as orderly a fashion, I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DOLE. I object.

The PRESIDING OFFICER (Mr. HATCH). Objection is heard. The clerk will call the roll.

The legislative clerk resumed the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. EXON. I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the call be rescinded.

Mr. EXON. Mr. President, I object.

The PRESIDING OFFICER (Mr. GORTON). Objection is heard.

The bill clerk resumed the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 7 P.M.

Mr. DOLE. Mr. President, my colleagues on the other side need some time to look over material that we may propose. Therefore, I move the Senate stand in recess until 7 p.m.

Mr. PRYOR. Will the majority leader answer a question? Is it possible that the majority leader might give us some guidance as to what is going to happen the rest of the evening?

Mr. DOLE. I would say—I indicate to my colleagues that I just moved to recess—that we would hope to offer an amendment. I have indicated to a number of my colleagues who have small children that we would try to protect them until 7:30, because this is Halloween and they wanted to go out and scare some people.

So there probably will not be any votes until then, and maybe even after that, because there will be an amendment that probably will require some discussion, even though it is similar in many respects to the amendment we had yesterday. That could be followed by a payment limitation amendment limiting loans on sugar and other programs to $200,000. So there are a series of those things that probably will come up. I assume we are going to be here quite late this evening and certainly tomorrow.

Does that help any?

Mr. PRYOR. Well, it does not help a lot.

[Laughter.]

The PRESIDING OFFICER. Without objection, the Senate stands in recess until 7 p.m.

Mr. EXON. If I might ask a question of the majority leader.

The PRESIDING OFFICER. I believe the Senate is now in recess.

Mr. DOLE. Mr. President, I ask unanimous consent that we reconvene or whatever it takes.

Mr. EXON. I cannot hear the Chair.

The PRESIDING OFFICER. The Chair indicated that, unless the majoirty leader withdrew his motion to recess, the Senate was in recess.

Mr. EXON. Did the Chair indicate that we were in recess?

The PRESIDING OFFICER. The Chair did.

Mr. EXON. That is the way this place is generally run, and I have no objection.

The motion was agreed to, and, at 6:11 p.m., the Senate recessed until 7 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. BOSCHWITZ].

Mr. DOLE. Mr. President, I think our colleagues, particularly Senator MELCHER and Senator EXON, may still be looking at the amendment, so I am going to suggest the absence of a quorum. They certainly have that right.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I am advised by the distinguished minority leader it may take another 30 minutes. I think rather than everyone stay in the Chamber we will probably best serve the interest of everyone by recessing.

RECESS UNTIL 7:30 P.M.

Mr. DOLE. Mr. President, I move that the Senate stand in recess until 7:30 p.m.

The motion was agreed to, and at 7:01 p.m., the Senate recessed until 7:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. BOSCHWITZ].

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT OF 1985

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I am not certain my colleagues, Senators MELCHER, EXON, and others, have had adequate time to go over the rather lengthy amendment. There is not really that much difference from what we had. I do not want to take advantage of anyone. If they need additional time, I would be happy to request another 30 minutes recess. If not, it would be my hope we could go ahead and start the process.

My own view is we have an opportunity here to bring together a number of farm State Senators on both sides of the aisle, and I would obviously like to proceed with that, if that is possible.

I will leave it up to the minority leader. If he feels additional time is needed, we can recess for another 30 minutes. If not, I will proceed.

Mr. MELCHER. Will the majority leader yield?

Mr. DOLE. I will yield for a question.

Mr. MELCHER. We have gone through the 165 pages as to what they might take out and what they might add to the rather lengthy bill before us, the farm bill. I noted that it does have a savings in it. If my memory serves me correctly, the savings would be exactly $7.6 billion, almost all of the savings features that I proposed in my amendment. Is that correct?

Mr. DOLE. I would say that is correct, but I would also indicate there is a little pamphlet or list circulating where you can get savings. But, yes, that is correct. I would hope that based on that we would have the support of the distinguished Senator from Montana.

Mr. MELCHER. Mr. President, might I say to the majority leader, the savings are very well put in both instances, coming up to exactly the same amount I had. Some of them seem to be the savings that maybe the House had. I think the majority leader referred to it as smoke and mirrors. Is that correct?

Mr. DOLE. That is right. There may be a little smoke and mirrors in here. I am not suggesting that there is not a little smoke in there. We hope not too much. Otherwise, we will be in deep trouble.

Mr. MELCHER. I thank the majority leader. It is going to take a long discussion, so far as I am concerned, and I am not speaking for others. We have waited a long time and I certainly do not prefer to wait any longer. However, I am not speaking for others, only for myself.

FAIR LABOR STANDARDS ACT AMENDMENTS

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1570.

THE PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1570) entitled "An Act to amend the Fair

Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employee, to clarify the application of that Act to volunteers, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause and insert:

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

COMPENSATORY TIME

SEC. 2. (a) COMPENSATORY TIME.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)(1) Employees of a public agency which is a State, a political subdivision of a State, or an interstate governmental agency may receive, in accordance with this subsection and in lieu of overtime compensation, compensatory time off at a rate not less than one and one-half hours for each hour of employment for which overtime compensation is required by this section.

"(2) A public agency may provide compensatory time under paragraph (1) only—

"(A) pursuant to—

"(i) applicable provisions of a collective bargaining agreement between the public agency and representatives of such employees; or

"(ii) in the case of employees not covered by subclause (i), an agreement or understanding arrived at between the employer and employee before the performance of the work; and

"(B) if the employee has not accrued compensatory time in excess of the limit applicable to the employee prescribed by paragraph (3).

In the case of employees described in clause (A)(ii) hired prior to April 15, 1986 the regular practice in effect on April 15, 1986, with respect to compensatory time off for such employees in lieu of the receipt of overtime compensation, shall constitute an agreement or understanding under such clause (A)(ii). Except as provided in the previous sentence, the provision of compensatory time off to such employees for hours worked after April 14, 1986, shall be in accordance with this subsection.

"(3)(A) If the work of an employee for which compensatory time may be provided included work in a public safety activity, an emergency response activity, or a seasonal activity, the employee engaged in such work may accrue not more than 480 hours of compensatory time for hours worked after April 15, 1986. If such work was any other work, the employee engaged in such work may accrue not more than 180 hours of compensatory time for hours worked after April 15, 1986. Any such employee who, after April 15, 1986, has accrued 480 or 180 hours, as the case may be, of compensatory time off shall, for additional overtime hours of work, be paid overtime compensation.

"(B) If compensation is paid to an employee for accrued compensatory time off, such compensation shall be paid at the regular rate earned by the employee at the time the employee receives such payment.

"(4) An employee who has accrued compensatory time off authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at a rate not less than the average regular rate received by such employee during the last 3 years of the employee's employment.

"(5) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time off authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time, shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(6) For purposes of this subsection—

"(A) the term 'overtime compensation' means the compensation required by subsection (a), and

"(B) the terms 'compensatory time' and 'compensatory time off' means hours during which an employee is not working, which are not counted as hours worked during the applicable workweek or other work period for purposes of overtime compensation, and for which the employee is compensated at the employee's regular rate.".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENTS.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits compensatory time off in lieu of overtime compensation shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986, in accordance with section 7(o) of the Fair Labor Standards Act of 1938 (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) (as it relates to section 7) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of monetary overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours worked after April 14, 1986.

SPECIAL DETAILS, OCCASIONAL OR SPORADIC EMPLOYMENT, AND SUBSTITUTION

SEC. 3. (a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C 207) is amended by adding after subsection (o) (added by section 2) the following:

"(p)(1) If an individual who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such individual's option, agrees to be employed on a special detail by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such individual was employed by such separate and independent employer shall be excluded by the public agency employing such individual in the calculation of the hours for which the employee is entitled to overtime compensation under this section if the public agency—

"(A) requires that its employees engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform the special detail,

"(B) facilitates the employment of such employees by a separate and independent employer, or

"(C) otherwise affects the condition of employment of such employees by a separate and independent employer.".

(b) OCCASIONAL OR SPORADIC EMPLOYMENT.—Section 7(p) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a different capacity from any capacity in which the employee is regularly employed with the public agency, the hours such employee was employed in performing the different employment shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(c) SUBSTITUTION.—(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) If an individual who—

"(A) is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency, and

"(B) is employed in fire protection or law enforcement activities (including activities of security personnel in correctional institutions),

agrees, with the approval of the public agency and solely at the option of such individual, to substitute during scheduled work hours for another individual who is employed by such agency in such activities, the hours such employee worked as a substitute shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(3) may not be required under this subsection to keep a record of the hours of the substitute work.".

VOLUNTEERS

SEC. 4. (a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4)", and

(2) by adding at the end the following:

"(4)(A) The term 'employee' does not include any individual who volunteers to perform services for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, if—

"(i) the individual receives no compensation or is paid expenses, reasonable benefits, or a nominal fee to perform the services for which the individual volunteered; and

"(ii) such services are not the same type of services which the individual is employed to perform for such public agency.

"(B) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any

other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations to carry out paragraph (4) of section 3(e) (as amended by subsection (a) of this section).

(c) CURRENT PRACTICE.—If, before April 15, 1986, the practice of a public agency was to treat certain individuals as volunteers, such individuals shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees. No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occurring before April 15, 1986, with respect to services deemed by that agency to have been performed for it by an individual on a voluntary basis.

STATE AND LOCAL LEGISLATIVE EMPLOYEES

SEC. 5. Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch or legislative body of that State, political subdivision, or agency and is not employed by the legislative library of such State, political subdivision, or agency.".

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect April 15, 1986. The Secretary of Labor shall before such date promulgate such regulations as may be required to implement such amendments.

EFFECT OF AMENDMENTS

SEC. 7. The amendments made by this Act shall not affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act of 1938 for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy on January 1, 1985, and published in section 775.3 of title 29 of the Code of Federal Regulations.

DISCRIMINATION

SEC. 8. A public agency which is a State, political subdivision of a State, or an interstate governmental agency and which discriminates or has discriminated against an employee with respect to the employee's wages or other terms or conditions of employment because on or after February 19, 1985, the employee asserted coverage under section 7 of the Fair Labor Standards Act of 1938 shall be held to have violated section 15(a)(3) of such Act.

Amend the title so as to read: "An Act to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the Act to volunteers, and for other purposes.".

Mr. DOLE. Mr. President, I move that the Senate disagree to the House amendments and request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HATCH, Mr. STAFFORD, Mr. NICKLES, Mr. KENNEDY, and Mr. METZENBAUM conferees on the part of the Senate.

FUEL ETHANOL INDUSTRY AND THE FARM BILL

Mr. DURENBERGER. Mr. President, this is the fifth in my series of statements on the farm bill, and it is an appropriate forum to highlight the growth and importance of the fuel ethanol industry to America's farmers.

The Federal Government's commitment to the ethanol industry grew out of the economic and social effects of disruptions in the supply of oil imports from the Middle East during the 1970's. In 1978, as a part of its efforts to develop greater energy independence, Congress adopted a multifaceted national policy to support and nurture the development of a domestic fuel ethanol industry.

Federal initiatives implementing this policy include an excise tax-exemption and other tax incentives, cooperative agreements, research and development grants, and a special federal tariff on imported fuel ethanol—now at 60 cents per gallon. The Government has also invested, in the form of guaranteed loans, millions of dollars in the construction and development of ethanol production facilities at various locations throughout the country.

The success of this policy has been dramatic. Over 135 domestic production facilities have been constructed representing an investment of more than $1 billion. U.S. production of fuel ethanol has increased over fortyfold since 1978, climbing from 10 million gallons in 1978 to over 500 million gallons this year.

The impact of this growth both on the Nation's dependence on foreign oil supplies and on the trade deficit has been substantial. Each gallon of domestically produced ethanol displaces as much as 1.1 gallons of imported oil, which saved the country $337 million in 1983 and $443 million in 1984 on its oil import bill. The food byproducts from ethanol production provide an important source of exports which, when combined with the savings on imported oil, reduced the Nation's trade deficit by over $500 million in 1982.

Indirect economic benefits have been equally significant. The 1984 domestic production alone generated over $1.6 billion in economic activity, creating thousands of jobs in heavily depressed sectors of the labor force: agriculture, construction, trucking, and the railroads.

Domestic ethanol production in 1984 created a nearly 200 million bushel increase in the demand for corn, the feedstock most commonly used for ethanol production in this country. This had a material impact on corn prices and increased the income of our Nation's farmers by roughly $700 million.

Moreover, this growth in the ethanol industry has generated these economic benefits at virtually no cost to the Federal Treasury. A 1982 GAO report determined that the lost revenues from tax-exemptions for ethanol are more than offset by an even larger decrease in Federal outlays under agricultural price support programs, such as PIK, due to the increased demand for corn in producing ethanol.

As one of the chief architects of this policy, I would say it has been extremely successful. With continued congressional support, annual production could increase fivefold, producing 2.5 billion gallons of fuel ethanol every year. Increasing annual production to only 1 billion gallons by 1990 would cut oil imports by 22 percent, increase farm income by $3.59 billion, and generate over $4 billion per year in economic activity.

A growing ethanol industry is important to Minnesota farmers. The industry will soon become a vital component of Minnesota's agricultural economy.

Currently, we have two ethanol facilities on line with a capacity of 4.5 million gallons. We also have a large number of new facilities planned which could boost production to 40 million gallons a year. That's over 20 million bushels of corn and at current market conditions that is $4.4 billion for farmers.

The demand for ethanol is there, and it is only going up. In December 1984, consumption of gasohol in Minnesota was 1.5 percent. Now it's up to 30 percent. And by January, lead will be virtually eliminated, leaving an octane gap which ethanol can fill.

But, Mr. President, we've a few more hurdles yet to jump before we're assured of a permanent position in the agricultural economy. One of the biggest threats to the domestic industry is continued high levels of ethanol imported from other countries.

Imported fuel ethanol has increased from less than 5 million gallons in 1981 to over 122 million gallons in 1984, capturing 21 percent of the domestic market. This rapid increase in imports has occurred in spite of an increase in the Federal tariff on imported fuel ethanol during the same period from 10 cents to 50 cents per gallon and now it is 60 cents a gallon.

Mr. President, this body has already dealt with this issue several times this

fall. Through a series of amendments instructing the Customs Service to close loopholes in the tariff schedule under which ethanol in a variety of forms was entering duty-free, we've sent a clear signal that further flooding of the U.S. market is not acceptable to this body.

During the pendancy of the farm bill, several of my colleagues and I will be offering a number of amendments to further our commitment to the fuel ethanol industry. By adopting these amendments we will reaffirm our commitment to restore a faltering agricultural economy and establish fuel ethanol's vital place in that economy. I strongly urge all of my colleagues to support these important amendments.

ROUTINE MORNING BUSINESS

(During the day routine morning business was transacted and additional statements were submitted, as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting a nomination which were referred to the Committee on the Judiciary.

(The nomination received today is printed at the end of the Senate proceedings.)

REPORT ON SANCTIONS AGAINST NICARAGUA—MESSAGE FROM THE PRESIDENT—PM 90

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

On May 1, 1985, in Executive Order No. 12513, I declared a national emergency to deal with the threat of the national security and foreign policy of the United States posed by the policies and actions of the Government of Nicaragua. In that order, I prohibited: (1) all imports into the United States of goods and services of Nicaraguan origin; (2) all exports from the United States of goods to or destined for Nicaragua except those destined for the organized democratic resistance; (3) Nicaraguan air carriers from engaging in air transportation to or from points in the United States; and (4) vessels of Nicaraguan registry from entering United States ports.

The declaration of emergency was made pursuant to the authority vested in me as President by the Constitution and laws of the United States, including the International Emergency Economic Powers Act, 50 U.S.C. 1701 et seq., and the National Emergencies Act, 50 U.S.C. 1601 et seq. I reported the declaration to the Congress on May 1, 1985, pursuant to Section 1703(b) of the International Emergency Economic Powers Act.

The Office of Foreign Assets Control of the Department of the Treasury issued the Nicaraguan Trade Control Regulations implementing the prohibitions in Executive Order No. 12513 on May 8, 1985, 50 Fed. Reg. 19890 (May 10, 1985). I am enclosing a copy of these regulations with this report.

It should be noted that Section 540.505 permits the issuance of licenses authorizing the export of goods from the United States to Nicaragua in certain circumstances involving contractual obligations which the exporter incurred prior to May 1, 1985. The regulation provides that such exports may be authorized only through October 31, 1985. Once this deadline has passed, licenses for exports on prior contractual grounds will no longer be available.

The policies and actions of the Government of Nicaragua continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. I shall continue to exercise the powers at my disposal to apply economic sanctions against Nicaragua as long as these measures are appropriate, and will continue to report periodically to the Congress on significant developments, pursuant to 50 U.S.C. 1703(c).

RONALD REAGAN.

THE WHITE HOUSE, *October 31, 1985.*

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on October 30, 1985, he had approved and signed the following enrolled bill:

S. 1726. An act to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 2:06 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of it reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 2942. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 3:30 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, annonced that the House has passed the following joint resolution, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 29. Joint resolution to designate the week of November 11, 1985, through November 17, 1985, as "National Reyes Syndrome Week".

The message also announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 126. Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Drug Abuse Education Week".

MEASURE PLACED ON THE CALENDAR

The following joint resolution was read the first and second times by unanimous consent, and placed on the calendar.

H.J. Res. 126. Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Drug Abuse Education Week."

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, October 31, 1985, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1160. An act to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for the Department of Defense for fiscal year 1986, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize appropriations for fiscal year 1986 for national security programs of the Department of Energy, and for other purposes; and

S.J. Res. 227. Joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KASTEN, from the Committee on Appropriations, without amendment:

S. 1816: An original bill making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-167).

By Mr. MATTINGLY, from the Committee on Appropriations, with amendments:

H.R. 3327: A bill making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-168).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Con. Res. 80: Concurrent resolution to authorize the printing of 2,000 additional copies of the committee print of the Committee on Armed Services (99th Congress, 1st session) entitled "Defense Organization: The Need for Change" (Rept. No. 99-169).

S. Res. 244: An original resolution authorizing the printing of background information on the Committee on Foreign Relations as a Senate document (Rept. No. 99-170).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 250: An original resolution to pay gratuity to Alben A. Flatt.

S. Res. 251: An original resolution to pay a gratuity to Pauline Washburn.

S. Res. 252:. An original resolution to pay a gratuity to Reilly B. Flaherty and Andrella M.S. Flaherty.

S. Res. 253: An original resolution to pay a gratuity to Stephanie L. Rogers Smith.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment and with a preamble:

S.J. Res. 130: Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

S.J. Res. 208: Joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

S.J. Res. 213: Joint resolution to designate January 19-25, 1986, as "National Jaycee Week."

S.J. Res. 219: Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Humanities Week, 1985."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

C.M. Naeve, of Virginia, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1989.

(The above nomination was reported from the Committee on Energy and Natural Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on the Judiciary:

Charles J. Cooper, of Virginia, to be an Assistant Attorney General.

(The above nomination was reported from the Committee on the Judiciary with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Edward R. Korman, of New York, to be U.S. district judge for the eastern district of New York;

Robert E. Cowen, of New Jersey, to be U.S. district judge for the district of New Jersey;

William J. Zloch, of Florida, to be U.S. district judge for the southern district of Florida; and

Jane R. Roth, of Delaware, to be U.S. district judge for the district of Delaware.

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

Edward V. Hickey, Jr., of Virginia, to be a Federal Maritime Commissioner for the remainder of the term expiring June 30, 1986.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CHAFEE (for himself, Mr. HEINZ, and Mr. BAUCUS):

S. 1814. A bill to amend the Internal Revenue Code of 1954 to provide that employees may take certain contributions to provide for cost-of-living protection under a defined benefit plan, and for other purposes; to the Committee on Finance.

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 1815. A bill to prevent the denial of employment opportunities by prohibiting the use of lie detectors by employers involved in or affecting interstate commerce; to the Committee on Labor and Human Resources.

By Mr. KASTEN:

S. 1816. An original bill making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1986, and for other purposes; from the Committee on Appropriations; placed on the calendar.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. Res. 250. An original resolution to pay a gratuity to Alben A. Flatt; placed on the calendar.

S. Res. 251. An original resolution to pay a gratuity to Pauline Washburn; placed on the calendar.

S. Res. 252. An original resolution to pay a gratuity to Reilly B. Flaherty and Ardella M.S. Flaherty; placed on the calendar.

S. Res. 253. An original resolution to pay a gratuity to Stephanie L. Rogers Smith; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHAFEE (for himself, Mr. HEINZ, and Mr. BAUCUS):

S. 1814. A bill to amend the Internal Revenue Code of 1954 to provide that employees may make certain contributions to provide for cost-of-living protection under a defined benefit plan, and for other purposes; to the Committee on Finance.

CONTRIBUTIONS TO COST-OF-LIVING ARRANGEMENTS

Mr. CHAFEE. Mr. President, today I am pleased to join with Senators HEINZ and BAUCUS in introducing legislation to create a mechanism for private pension plans to provide annual cost-of-living increases. The legislation permits employers and employees to jointly fund supplemental retirement benefits [SRB's] through tax-qualified pension plans using employer contributions and employee savings in company programs.

Retirees and those approaching retirement today face much uncertainty about the future buying power of their private sector pensions. Unlike Social Security and many government employee pension plans, virtually no private sector pensions are regularly indexed to compensate for increases in the cost of living. Consequently, inflation, such as we have experienced during the past decade, rapidly erodes the economic security of millions of elderly Americans. By making the SRB available, we not only can offer inflation protection to retiring workers, but we will encourage them to increase savings to purchase the added benefit.

The SRB Program would be voluntary on the part of employees and could be funded by any combination of savings from the worker and contribution from the company. Already, several large employers have shown interest in offering an SRB Program. Of course, it would have to be offered on a nondiscriminatory basis to high and low paid employees alike. In addition, the amount of the SRB could not exceed the greater of 3 percent of a retiree's initial pension payment or a percentage of the pension equal to a 7-year average of the consumer price index.

Legislation is needed to implement this program because current law will not allow making a 1-year contribution toward retirement benefits that would be large enough to fund the SRB. Furthermore, our bill assures that the employer's contribution will not be taxable to the employee until it is received as income in the form of supplemental retirement benefits.

The act would also allow:

Employer/employee cost sharing in providing supplemental retirement benefits;

An employer to condition its contribution for supplemental retirement benefits on the employee's agreement to share a portion of the cost;

An employer to fund its contribution for these supplemental benefits over the employee's career; and

The benefits to be subject to the joint and survivor protections of current law.

I introduced similar legislation in the last Congress as S. 1066, and held a hearing on that bill in the Senate Finance Committee's Subcommittee on Pensions, Savings and Investment Policy on September 17, 1983. The Treasury Department testified in opposition to the legislation at that hearing, but since that time the legislation has been modified so that the Treasury Department no longer has any objection to the legislation of which I am aware. According to the Joint Committee on Taxation, the revenue loss associated with the legislation should be minimal, less than $10 million a year.

The President's tax reform proposal, as well as the other tax reform plans which have been put forth, recognize the need to encourage our private pension system and to encourage the use of savings for retirement security purposes. The supplemental retirement benefit proposal we are proposing does precisely that. In the interest of enhancing retirement income security for our working men and women, we urge all our colleagues to consider cosponsoring and supporting this legislation.

Mr. President, I ask that the text of the Supplemental Retirement Benefit Act of 1985 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1814

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONTRIBUTIONS TO COST-OF-LIVING ARRANGEMENTS UNDER DEFINED BENEFIT PLANS.

(a) IN GENERAL.—Section 415(k) of the Internal Revenue Code of 1954 (relating to special rules for limitations on benefits and contributions under qualified plans) is amended by adding at the end thereof the following new paragraph:

"(2) CONTRIBUTIONS TO PROVIDE COST-OF-LIVING PROTECTION UNDER DEFINED BENEFIT PLANS.—

"(A) IN GENERAL.—In the case of a defined benefit plan which maintains a qualified cost-of-living arrangement—

"(i) any contribution made directly by an employee under such arrangement shall—

"(I) not be treated as an employee contribution for purposes of subsection (c), but

"(II) shall be so treated for purposes of subsection (e), and

"(ii) any benefit under such arrangement which is allocable to an employer contribution which was transferred from a defined contribution plan and to which the requirements of subsection (c) were applied shall, for purposes of subsection (b), be treated as a benefit derived from an employee contribution (and subsection (c) shall not again apply to such contribution by reason of such transfer).

"(B) A QUALIFIED COST-OF-LIVING ARRANGEMENT.—For purposes of this paragraph, the term 'qualified cost-of-living arrangement' means an arrangement under a defined benefit plan which—

"(i) indexes a benefit provided under such plan or a separate plan subject to the requirements of section 412, and

"(ii) meets the requirements of subparagraphs (C), (D), and (E) and such other requirements as the Secretary may prescribe by regulations.

"(C) DETERMINATION OF AMOUNT OF BENEFIT.—An arrangement meets the requirement of this subparagraph only if the cost-of-living adjustment of participants is based—

"(i) on increases in the cost-of-living after the annuity starting date, and

"(ii) on average cost-of-living increases determined by reference to 1 or more indexes prescribed by the Secretary, except that the arrangement may provide that the increase for any year will not be less than 3 percent of the primary retirement benefit.

"(D) ARRANGEMENT ELECTIVE; TIME FOR ELECTION.—An arrangement meets the requirements of this subparagraph only if it is elective and it provides that such election may be made in—

"(i) the year in which the participant—

"(I) attains the earliest retirement age under the defined benefit plan, or

"(II) separates from service, or

"(ii) both such years.

"(E) ANTIDISCRIMINATION REQUIREMENTS.—

"(i) IN GENERAL.—An arrangement meets the requirements of this subparagraph only if the arrangement does not discriminate in favor of highly compensated employees as to eligibility to participate.

"(ii) PATTERN OF ABUSE.—Notwithstanding clause (i), an arrangement shall not meet the requirements of this subparagraph if the Secretary finds that a pattern of abuse exists with respect to participation.

"(F) SPECIAL RULES FOR APPLICATION OF SUBPARAGRAPH (E) IN THE CASE OF KEY EMPLOYEES.—An arrangement shall not meet the requirements of subparagraph (E) if—

"(i) in the case of an arrangement under a top-heavy plan (within the meaning of section 416(g)), any key employee is eligible to participate, or

"(ii) in the case of an arrangement under any other plan, any key employee other than an officer described in section 416(i)(1)(A)(i) is eligible to participate.

For purposes of this subparagraph, the term 'key employee' has the meaning given such term by section 416(i)(1).".

(b) CERTAIN TRANSFERS TO DEFINED BENEFIT PLANS NOT TAKEN INTO ACCOUNT FOR PURPOSES OF LUMP-SUM DISTRIBUTION.—Section 402(e)(4) of the Internal Revenue Code of 1954 (relating to special rules for lump-sum distributions) is amended by adding at the end thereof the following new subparagraph:

"(N) TRANSFERS TO COST-OF-LIVING ARRANGEMENT NOT TREATED AS DISTRIBUTION.—For purposes of this subsection, the balance to the credit of an employee shall not include any amount transferred from a defined contribution plan to a qualified cost-of-living arrangement (within the meaning of section 415(k)(2)) under a defined benefit plan.".

(c) CONTRIBUTIONS NOT DEDUCTIBLE.—Paragraph (2) of section 219(e) of the Internal Revenue Code of 1954 (defining qualified voluntary employee contribution) is amended by adding at the end thereof the following new subparagraph:

"(D) CONTRIBUTIONS TO QUALIFIED COST-OF-LIVING ARRANGEMENTS.—The term 'qualified voluntary employee contribution' shall not include any contribution by an employee to a qualified cost-of-living arrangement (within the meaning of section 415(k)(2)(B)).".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning after December 31, 1985.

Mr. HEINZ. Mr. President, I am pleased to join with Senator CHAFEE in introducing legislation to encourage employers and employees to fund annual cost-of-living adjustments for private pension plans. This legislation recognizes the need to maintain the purchasing power of retirement benefits after retirement has occurred. I think it offers a creative approach to a difficult problem.

Inflation can be a source of substantial financial insecurity for older Americans. Only a portion of the retirement income the elderly receive is adequately protected against inflation. Social Security and other Federal retirement benefits are automatically adjusted each year to maintain their purchasing power, but these benefits provide less than half of the income the elderly receive. Benefits from private pension plans in particular are unlikely to be adjusted regularly for inflation. A survey of private pension plans conducted in 1981 showed that only 3 percent of the plans provided for automatic annual benefit increases after retirement. All of the plans surveyed had provided some ad hoc benefit increase, but the average increase amounted to only 3 to 4 percent per year, in a time of double-digit inflation.

Fixed pension benefits that are adequate at the start of retirement can become inadequate after several years of inflation. Today, most working Americans can look forward to more than 15 years of retirement after reaching age 65. After 15 years of only 5 percent inflation, pension benefits will be worth only half of what they could be worth at retirement. This decline in value can cause a substantial loss in purchasing power for a retiree depending heavily on these benefits in their later years.

The legislation we are introducing today would provide a mechanism for the inflation protection of private pension benefits. Employees and employers would be encouraged to participate jointly in preparing for the cost of supplemental retirement benefits to compensate for inflation. Senator CHAFEE has worked closely with the Treasury Department in preparing this bill to ensure that it complements our overall retirement income policy, and that it does not reduce tax revenues. I commend him on the fine work he has done. This bill can be an important step toward improving the adequacy of the retirement benefits provided through our voluntary employer-sponsored pension system. I urge my colleagues to join with us in this effort.

51-059 O 87-50 (Pt 21)

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 1815. A bill to prevent the denial of employment opportunities by prohibiting the use of lie detectors by employers involved in or affecting interstate commerce; to the Committee on Labor and Human Resources.

POLYGRAPH PROTECTION ACT

Mr. HATCH. Mr. President, today Senator KENNEDY and I are introducing the Polygraph Protection Act of 1985, a bill which will afford needed protection for American working men and women by prohibiting the use of truth verification devices in the private sector.

While there appears to be little consensus of opinion regarding lie detector tests, there seems to be agreement on one issue. Lie detection is by no means a science; it is at best a craft. As a result, the validity and reliability of these tests often depend in large part on the competency, professionalism, and integrity of the test administrator. The potential for human error is high, especially when the test is given in a short period of time, and research has shown that even the most respected and reputable polygraphers make mistakes, mistakes which can unjustly condemn and stigmatize an individual for life, rob him of his livelihood, or bar him from just advancement.

Despite the numerous concerns with the accuracy and merit of these tests, their use is increasing. In 1983, the Congressional Office of Technology Assessment observed that polygraph examinations are being used not just for criminal investigations but also for preemployment screening, periodic screening of employees to control crime, and to recommend promotion. The Office estimated that more than 1 million polygraph tests are being administered each year in the private sector alone.

What makes this statistic so disturbing is the fact that even proponents of polygraph testing admit that there is probably a 5-percent rate of error in the analysis of test results. Consequently, even under the best of circumstances, some 50,000 workers may have their employment opportunities terminated, curtailed, or blocked each year due not to their own work record but due to employer reliance on the results of invalid polygraph tests. In addition, there is evidence that in several instances, test results are deliberately manipulated or annualized to justify a predetermined decision—a decision not to hire a qualified applicant or a desire to fire an innocent employee.

I recognize that more than half of the States in this country, including my own State of Utah, have sought to offer some protection against polygraph test abuse. Yet, as one would expect, there is little uniformity in the content of these State laws. While some States bar polygraph examinations entirely, others only prohibit employers from requiring employees or applicants to submit to such tests. In these latter instances the consequences can be quite severe. Often, it is quickly learned that a refusal to take a test is considered commensurate with failing it. Moreover, some employers also avoid State restrictions by hiring employees in States permitting the use of polygraphs and then transferring these employees to States where their use is barred. In sum, it is time for the Federal Government to act and establish a uniform means for protecting all working men and women regardless of geographical location.

At the same time, the bill does recognize that the use of polygraph tests may have a limited role where they are administered in an objective, professional, and complete manner. Consequently, the prohibitions in the bill do not apply to Federal, State or local governments. Moreover, the prohibitions do not extend to the employees of defense contractors who have access to classified information.

The legislation we are introducing today attempts to strike a legitimate balance between governmental need and the rights of working men and women. I do recognize, however, that as drafted the bill does not address arguments from employers that polygraph tests are the only effective means at their disposal for ascertaining the veracity of employment applications, locating drug or similar types of abuse among employees, or rooting out crime in their work force.

It is impossible for me at this time to fully evaluate the merit of these assertions, but there are still too many examples of polygraph test abuse for Congress not to move forward to establish some uniform protection for working men and women. It is my hope that in the ensuing months we will be able to work with all interested parties and develop legislation that will protect the rights of all employees in a logical, effective, and enforceable manner.

I ask unanimous consent that the bill be printed in its entirety at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1815

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Polygraph Protection Act of 1985".

PURPOSE

SEC. 2. (a) PURPOSE.—It is the purpose of this Act to prevent the denial of employment opportunities based on the use of lie detectors designed to detect deception or verify the truth of statements.

(b) CONSTRUCTION.—This Act shall be construed to prohibit the use of all such lie detectors on any employee, agent, prospective employee, and prospective agent.

PROHIBITION ON LIE DETECTOR USE

SEC. 3. No employer or any other person engaged in or affecting interstate commerce, nor any agent or representative thereof—

(1) may directly or indirectly require, request, suggest, permit or cause any employee, agent, prospective employee, or prospective agent to take or submit to any lie detector test or examination for any purpose;

(2) may use, accept, or refer to the results of any lie detector test or examination of any employee, agent, prospective employee, or prospective agent for any purpose; or

(3) may—

(A) discharge, dismiss, discipline in any manner, or deny employment or promotion to; or

(B) threaten to discharge, dismiss, discipline, or deny employment or promotion to, any employee, agent, prospective employee, or prospective agent who refuses, declines, or fails to take or submit to any lie detector test or examination.

NOTICE OF PROTECTION

SEC. 4. (a) NOTICE OF PROTECTION.—The Secretary of Labor shall prepare and have printed a notice setting forth information necessary to carry out the purpose of this Act.

(b) POSTING REQUIRED.—The notice required by this section shall be posted at all times in conspicuous places upon the premises of every employer engaged in any business in or affecting interstate commerce.

RULES AND REGULATIONS

SEC. 5. In accordance with the provisions of subchapter II of chapter 5 of title 5, United States Code, the Secretary of Labor shall issue such rules and regulations as may be necessary or appropriate to carry out this Act.

AUTHORITY OF THE SECRETARY OF LABOR

SEC. 6. The Secretary of Labor shall—

(1) make such delegations, appoint such agents and employees, and pay for such technical assistance on a fee for service basis, as the Secretary deems necessary to assist in carrying out the functions prescribed by this Act;

(2) cooperate with regional, State, local, and other agencies, and cooperate with and furnish technical assistance to employers, labor organizations, and employment agencies to aid in carrying out the purpose of this Act; and

(3) make investigations and require the keeping of records necessary or appropriate for the administration of this Act in accordance with the powers and procedures provided in sections 9 and 11 of the Fair Labor Standards Act of 1938 (29 U.S.C. 209 and 211).

ENFORCEMENT PROVISIONS

SEC. 7. The provisions of this Act shall be enforced in accordance with the powers, remedies, and procedures provided in sections 11(b), 16, and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 211(b), 216, and 217). Amounts owing to a person as a result of a violation of this Act shall be deemed to be unpaid minimum wages or unpaid overtime compensation for purposes of sections 16 and 17 of the Fair Labor Standards Act of 1938 (29 U.S.C. 216 and 217).

EXEMPTIONS

SEC. 8. The provisions of this Act shall not apply with respect to—

(1) any individual who is employed by the United States Government, a State government, city, or any political subdivision of a State or city; or

(2) personnel of contractors of the Department of Defense with access to classified information.

Personnel described in clause (2) may be subject to the polygraph program authorized in the Department of Defense Authorization Act, 1986.

DEFINITIONS

SEC. 9. As used in this Act—

(1) the term "person" means any natural person, firm, association, partnership, corporation, or any employee or agent thereof;

(2) the term "lie detector" includes but is not limited to any polygraph, deceptograph, voice stress analyzer, psychological stress evaluator, or any other similar device (whether mechanical, electrical, or chemical) which is used, or the results of which are used, for the purpose of detecting deception or verifying the truth of statements; and

(3) the term "employer" includes an employment agency.

EFFECTIVE DATE

SEC. 10. The provisions of this Act shall take effect on the date of enactment of this Act, except that the provisions of section 4 shall take effect six months after the date of enactment of this Act.

ADDITIONAL COSPONSORS

S. 384

At the request of Mr. BUMPERS, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 384, a bill to authorize appropriations for a highway demonstration project on U.S. Highway 71 between Alma, Arkansas, and Bella Vista, Arkansas, that would increase the number of lanes on this segment of the route from two to four.

S. 1543

At the request of Mr. MATHIAS, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 1543, a bill to protect patent owners from importation into the United States of goods made overseas by use of a United States patented process.

S. 1647

At the request of Mr. LAUTENBERG, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of S. 1647, a bill to amend the Tariff Act of 1930 to enhance the protection of intellectual property rights.

S. 1707

At the request of Mr. SIMON, the names of the Senator from New Jersey [Mr. BRADLEY], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 1707, a bill to authorize the President to present a gold medal to the parents of Father Jerzy Popieluszko.

S. 1775

At the request of Mr. DODD, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 1775, a bill to authorize a multifamily housing preservation loan program.

S. 1787

At the request of Mr. BURDICK, his name was withdrawn as a cosponsor of S. 1787, a bill to amend the Federal Election Campaign Act of 1971 to provide for the public financing of Senate general election campaigns.

SENATE JOINT RESOLUTION 2

At the request of Mr. HATCH, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of Senate Joint Resolution 2, a joint resolution proposing an amendment to the Constitution of the United States relating to voluntary silent prayer or reflection.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the name of the Senator from Ohio [Mr. METZENBAUM] was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February, 1986, as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 170

At the request of Mr. SIMON, the names of the Senator from Georgia [Mr. NUNN], and the Senator from Mississippi [Mr. STENNIS] were added as cosponsors of Senate Joint Resolution 170, a joint resolution to designate the month of March 1986 as "Music In Our Schools Month."

SENATE CONCURRENT RESOLUTION 39

At the request of Mr. DODD, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of Senate Concurrent Resolution 39, a concurrent resolution expressing the support of the Congress for Costa Rica's neutrality and urging the President to support such neutrality.

SENATE CONCURRENT RESOLUTION 72

At the request of Mr. SIMON, the names of the Senator from Wyoming [Mr. WALLOP], the Senator from Arkansas [Mr. BUMPERS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Oklahoma [Mr. BOREN], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Indiana [Mr. QUAYLE] were added as cosponsors of Senate Concurrent Resolution 72, a concurrent resolution expressing the sense of Congress concerning human rights in Poland.

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from Oregon [Mr. HATFIELD], the Senator from Vermont [Mr. STAFFORD], the Senator from Michigan [Mr. RIEGLE], and the Senator from Missouri [Mr. DANFORTH] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

SENATE CONCURRENT RESOLUTION 81

At the request of Mr. SIMON, the name of the Senator from Maryland [Mr. MATHIAS] was added as cosponsors of Senate Concurrent Resolution 81, a concurrent resolution requesting the President to begin talks with the Government of the Soviet Union to establish a United States-Soviet Union student exchange for peace program.

SENATE CONCURRENT RESOLUTION 83

At the request of Mr. D'AMATO, the names of the Senator from North Dakota [Mr. ANDREWS] and the Senator from Iowa [Mr. HARKIN] were added as cosponsors of Senate Concurrent Resolution 83, a concurrent resolution expressing the sense of the Congress that Federal tax reform legislation not take effect until its date of enactment, but in no case earlier than July 1, 1986.

SENATE RESOLUTION 250—TO PAY A GRATUITY TO ALBEN A. FLATT

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar.

S. RES. 250

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Alben A. Flatt, widower of Jeannine H. Flatt, an employee of the Senate at the time of her death, a sum equal to eight months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other alllowances.

SENATE RESOLUTION 251—TO PAY A GRATUITY TO PAULINE WASHBURN

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar.

S. RES. 251

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Pauline Washburn, widow of Elwood C. Washburn, an employee of the Senate at the time of his death, a sum equal to ten and one-half months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 252—TO PAY A GRATUITY TO REILLY P. FLAHERTY AND ARDELLA M. S. FLAHERTY

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar.

S. RES. 252

Resolved, That the Secretary of the Senate hereby is authorized and directed to

pay, from the contingent fund of the Senate, to Reilly B. Flaherty and Ardella M. S. Flaherty, parents of Terrence R. Flaherty, an employee of the Senate at the time of his death, a sum to each equal to one-half of one years' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

SENATE RESOLUTION 253—TO PAY A GRATUITY TO STEPHANIE L. ROGERS SMITH

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar.

S. RES. 253

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Stephanie L. Rogers Smith, widow of Kenneth R. Smith, an employee of the Senate at the time of his death, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

AMENDMENTS SUBMITTED

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATION, 1986

JOHNSTON AMENDMENT NO. 934

Mr. JOHNSTON proposed an amendment which was subsequently modified, to the language proposed to be stricken on page 54, line 25, through page 55, line 17 of the bill (H.R. 3011) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

In lieu of the language proposed to be stricken insert the following:

"Of the funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126) and subsequently made available to carry out Title I, Part B of the Energy Security Act (Public Law 96-294) by Public Laws 96-304, 96-514, and 98-473, $500,000,000 of the amounts initially available only for obligation to projects with Letters of Intent authorized by the Board of Directors on or before June 1, 1984, and not obligated rescinded; *Provided,* That the Board of Directors shall proceed to complete action on those projects under consideration or negotiation by the Corporation as of October 1, 1985; *Provided, further,* That such actions shall include either the award by the Board of financial assistance to such a project or a determination by the Board that the Corporation will not enter into financial assistance contracts for such project.".

McCLURE AMENDMENT NO. 935

Mr. McCLURE proposed an amendment to amendment No. 934 proposed by Mr. JOHNSTON to the bill H.R. 3011, supra; as follows:

At the end of amendment 934 add the following: "*Provided, further,* That, notwithstanding section 191 of the Energy Security Act (Public Law 96-294), (a) the Board of Directors shall make no new awards or commitments for financial assistance pursuant to section 131 of the Energy Security Act for synthetic fuel projects after September 30, 1986; and (b) the Corporation shall terminate on September 30, 1991, except that the President, on recommendation of the Board of Directors, may by Executive order terminate the Corporation at an earlier date, but in no event prior to Septmember 30, 1989.".

METZENBAUM (AND OTHERS) AMENDMENT NO. 936

Mr. METZENBAUM (for himself, Mr. BRADLEY, Mr. DODD, Mr. NICKLES, and Mr. PROXMIRE) proposed an amendment to the language proposed to be stricken on page 54, line 23, through page 54, line 17, to the bill H.R. 3011, supra; as follows:

On page 54, line 23, strike through page 55, line 17, and insert in lieu thereof the following:

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126), and subsequently made available to carry out title I, part B of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This recission shall not apply to:

(1) funds transferred from the Energy Security Reserve by this Act;

(2) $500,000,001, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amendments as may be necessary to make payments for projects or modules for which obligations were entered into under title I of the Energy Security Act before the date of enactment of this Act.

EVANS AMENDMENT NO. 937

Mr. EVANS proposed an amendment to amendment No. 936 proposed by Mr. METZENBAUM to the language proposed to be stricken on page 54, line 23, through page 54, line 17 of the bill H.R. 3011, supra; as follows:

In lieu of the language proposed to be inserted, insert the following:

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126), and subsequently made available to carry out title I, part B, of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This rescission shall not apply to:

(1) fund transferred from the Energy Security Reserve by this Act;

(2) $500,000,002, which may not be used for payments with respect of projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under Title I of the Energy Security Act before the date of enactment of this Act.

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT

INOUYE AMENDMENT NO. 938

(Ordered to lie on the table.)

Mr. INOUYE submitted an amendment intended to be proposed by him to the bill (S. 1714) to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes; as follows:

Beginning on page 299, strike out line 19 and all that follows through line 4 on page 300 and insert in lieu thereof the following new section:

AGRICULTURE

SEC. 1522. (a)(1) Section 1475(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3322(b)) is amended—

(A) in the first sentence—

(i) by striking out "and" at the end of paragraph (2);

(ii) by inserting "and" at the end of paragraph (3); and

(iii) by inserting after paragraph (3) the following:

"(4) nonprofit private research institutions;"; and

"(B) by inserting "(of which amount an in-kind contribution may not exceed 50 percent)" after "matching grant" in the last sentence.

(2) Section 1475(d) of such Act is amended—

"(A) by inserting "(1)" after the subsection designation;

"(B) in the first sentence, by striking out "State agencies" and all that follows through "universities,", and inserting in lieu thereof "any of the non-Federal entities specified in subsection (b)";

"(C) by striking out last sentence; and

"(D) by adding at the end thereof the following new paragraphs:

"(2) Funds made available for the operation of such regional centers may be used for the acquisition or rehabilitation of existing buildings or facilties, or the constructon of new buildings or faciilities, to house such centers, except that not more than $250,000 may be used for the acquisition, rehabilitation, or construction of any single building or facility.

"(3) To the extent practicable, the aquaculture research, development, and demonstration centers established under this subsection shall be geographically located such that they are representative of the regional aquaculture opportunities in the United States.".

(3) The first sentence of section 1475(e) is amended—

(A) by inserting "the House Committee on Merchant Marine and Fisheries," after "House Committee on Agriculture,"; and

(B) by inserting "the Senate Committee on Commerce, Science, and Transportation," after "Forestry,".

(b) The first sentence of section 1476(a) of such Act (7 U.S.C. 3323(a)) is amended by striking out "1985" and inserting in lieu thereof "1989".

(c)(1) Section 1477(a) of such Act (7 U.S.C. 3324(a)) is amended by striking out "1985" and all that follows through "subsequent fiscal year" and inserting in lieu thereof "1989".

(2) Section 1477(b) of such Act is amended—

(A) by striking out the first sentence; and

(B) by striking out "these funds" in the second sentence and inserting in lieu thereof "funds appropriated under subsection (a)".

DOLE AMENDMENT NO. 939

Mr. DOLE proposed an amendment to the motion to recommit the bill S. 1714, supra, with instructions; as follows:

In lieu of the instructions proposed insert the following: "to be reported back forth within status quo with the following amendments at the end of the bill insert "Intermediate Export Credit."

DOLE AMENDMENT NO. 940

Mr. DOLE proposed an amendment to amendment No. 939 proposed by him to the motion to recommit with instructions the bill S. 1714, supra; as follows:

In the pending amendment, strike the word "Credit" and insert in lieu thereof: "Credit . . .

INTERMEDIATE EXPORT CREDIT

SEC. . Section 4(b) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)) is amended—

(1) by adding at the end of paragraph (1) the following new sentence: "In addition, the Corporation may guarantee the repayment of loans made to finance such sales.";

(2) in paragraph (2)—

(A) by inserting ", and no loan may be guaranteed," after "financed";

(B) by striking out "or" at the end of clause (A);

(C) by striking out the period at the end of clause (B) and inserting in lieu thereof "; or"; and

(D) by inserting at the end thereof the following new clause:

"(C) otherwise promote the export of United States agricultural commodities.";

(3) by striking out paragraph (7);

(4) by redesignating paragraphs (3) through (6) as paragraphs (4) through (7), respectively;

(5) by inserting after paragraph (2) the following new paragraph:

"(3) The Secretary is encouraged, to the maximum extent practicable, to finance or guarantee the export sales of agricultural commodities under this subsection to purchasers from—

"(A) countries that are previous recipients of credit extended under title I of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1701 et seq.);

"(B) countries unable, as determined by the Secretary, to utilize other short-term export credit programs offered by the Secretary or the Commodity Credit Corporation; and

"(C) countries that are friendly countries, as defined in section 103(d) of such Act (7 U.S.C. 1703(d)).";

(6) in paragraph (4) (as redesignated by clause (4))—

(A) by inserting "or guarantees" after "financing";

(B) by striking out "and" at the end of subparagraph (C);

(C) by striking out "credit" in subparagraph (D);

(D) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof a semicolon; and

(E) by adding at the end thereof the following new subparagraphs:

"(E) to finance the importation of agricultural commodities by developing nations for use in meeting their food and fiber needs; and

"(F) otherwise to promote the export sales of agricultural commodities.";

(7) in paragraph (5) (as redesignated by clause (4))—

(A) by inserting "or guarantees" after "financing"; and

(B) by striking out "to encourage credit competition, or";

(8) in paragraph (6) (as redesignated by clause (4))—

(A) by inserting "(A)" after the paragraph designation;

(B) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(C) by amending clause (i) (as redesignated) to read as follows:

"(i) Repayment shall be in dollars with interest at a rate determined by the Secretary."; and

(D) by adding at the end thereof the following new subparagraph:

"(B) Contracts of guarantee under this subsection shall contain such terms and conditions as the Commodity Credit Corporation shall determine.";

(9) by inserting "or guarantees" after "financing" in paragraph (7) (as redesignated by clause (4));

(10) by inserting "or guaranteed" after "financed" in paragraph (8); and

(11) by adding at the end thereof the following new paragraph:

"(10) For purposes of guaranteeing export sales under this subsection, the Commodity Credit Corporation shall make available—

"(A) for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, not less than $500,000,000; and

"(B) for the fiscal year ending September 30, 1989, not more than $1,000,000,000.".

TITLE IV—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, WHEAT ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 401. Effective only for the 1986 through 1989 crops of wheat, the Agricultural Act of 1949 is amended by inserting after section 107C (7 U.S.C. 1445b-2) the following new section:

"SEC. 107D. Notwithstanding any other provision of law:

"(a)(1) Except as provided in paragraph (2), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of wheat at such level as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(2)(A) Except as provided in subparagraph (B), the loan and purchase level determined under paragraph (1) shall—

"(i) in the case of the 1986 crop of wheat, not be less than $3.00 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops of wheat, not be less than 75 percent, nor more than 85 percent, of the simple average price received by producers of wheat, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, except that the loan and purchase level for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

"(B)(i) Except as provided in clause (ii), if the Secretary determines that the average price of wheat received by producers in any marketing year is not more than 110 percent of the loan and purchase level for wheat for such marketing year, the Secretary may reduce the loan and purchase level for wheat for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain.

"(ii) The loan and purchase level may not be reduced under clause (i) by more than 20 percent in any year.

"(iii) Any reduction in the loan and purchase level for wheat under this subparagraph shall not be considered in determining the loan and purchase level for wheat for subsequent years.

"(3)(A) The Secretary shall permit a producer to repay a loan made under paragraph (1) for a crop at a level that is the lesser of—

"(i) the loan level determined for such crop; or

"(ii) the higher of—

"(I) 70 percent of such level;

"(II) if the loan level for a crop was reduced under paragraph (2)(B), 70 percent of the loan level that would have been in effect but for the reduction under paragraph (2)(B); or

"(III) the prevailing world market price for wheat, as determined by the Secretary.

"(B) The Secretary shall prescribe by regulation—

"(i) a formula to define the prevailing world market price for wheat; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for wheat.

"(4) For purposes of this section, the average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(b)(1) The Secretary may, for each of the 1986 through 1989 crops of wheat, make payments available to producers who, although eligible to obtain a loan or purchase agreement under subsection (a), agree to forgo obtaining such loan or agreement in return for such payments.

"(2)(A) A payment under this subsection shall be computed by multiplying—

"(i) the loan payment rate; by

"(ii) the quantity of wheat the producer is eligible to place under loan.

"(B) For purposes of this subsection, the quantity of wheat eligible to be placed under loan may not exceed the product obtained by multiplying—

"(i) the individual farm program acreage for the crop; by

"(ii) the farm program payment yield established for the farm.

"(3) For purposes of this subsection, the loan payment rate shall be the amount by which—

"(i) the loan level determined for such crop under subsection (a); exceeds

"(ii) the level at which a loan may be repaid under subsection (a)(3).

"(c)(1)(A) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of wheat in an amount computed as provided in this subsection.

"(B) Payments for any such crop of wheat shall be computed by multiplying—

"(i) the payment rate; by

"(ii) the individual farm program acreage for the crop; by

"(iii) the farm program payment yield for the crop.

"(C)(i) Except as provided in clauses (ii) and (iii), if the producers on a farm reduce the acreage of wheat planted for harvest on the farm from the acreage base by at least the percentage recommended by the Secretary in the announcement of the national program acreage and such producers actually plant wheat or a nonprogram crop for harvest on at least 50 percent of the wheat acreage base of the farm (reduced by the percentage recommended by the Secretary)—

"(I) any portion of the wheat acreage base of the farm determined in accordance with subsection (f)(2)(C) (reduced by the percentage recommended by the Secretary) that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(II) the producers shall be eligible for payments under this paragraph with respect to the acreage referred to in subclause (I); and

"(III) any portion of the wheat acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to wheat.

"(ii) If an acreage limitation program under subsection (f)(2) is in effect for a crop of wheat and the producers on a farm actually plant wheat or a nonprogram crop for harvest on at least 50 percent of the permitted wheat acreage of the farm (determined in accordance with subsection (f)(2)(A))—

"(I) any portion of the permitted wheat acreage of the farm that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(II) the producers shall be eligible for payments under this paragraph with respect to the acreage referred to in subclause (I); and

"(III) any portion of the wheat acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to wheat.

"(iv) Notwithstanding any other provision of this subparagraph, this subparagraph shall not apply to the 1986 and 1988 crops of wheat.

"(D) The payment rate for wheat shall be the amount by which the established price for the crop of wheat exceeds the higher of—

"(i) the national weighted average market price received by producers during the marketing year for such crop, as determined by the Secretary; or

"(ii) the loan level determined for such crop.

"(E)(i) In the case of each of the 1986 through 1988 crops of wheat, the established price applicable to the producers on a farm shall not be less than an amount determined on the basis of the percentage by which the producers reduce the acreage planted to wheat on the farm for harvest from the acreage base for the farm in accordance with an acreage limitation program described in subsection (f)(2), as provided in the following tables:

"In the case of the 1986 crop of wheat, if the producers on a farm reduce the acreage planted to wheat on the farm from the acreage base for the farm under an acreage limitation program by:	The established price for the 1986 crop of wheat applicable to such producers shall not be less than:
15 percent	$4.20 per bushel
20 percent	$4.38 per bushel
25 percent	$4.60 per bushel
30 percent	$4.85 per bushel
35 percent	$5.15 per bushel
40 percent	$5.50 per bushel.
"In the case of the 1987 crop of wheat, if the producers on a farm reduce the acreage planted to wheat on the farm from the acreage base for the farm under an acreage limitation program by:	The established price for the 1987 crop of wheat applicable to such producers shall not be less than:
15 percent	$3.95 per bushel
20 percent	$4.15 per bushel
25 percent	$4.35 per bushel
30 percent	$4.60 per bushel
35 percent	$4.85 per bushel
40 percent	$5.20 per bushel.
"In the case of the 1988 crop of wheat, if the producers on a farm reduce the acreage planted to wheat on the farm from the acreage base for the farm under an acreage limitation program by:	The established price for the 1988 crop of wheat applicable to such producers shall not be less than:
10 percent	$3.80 per bushel
15 percent	$3.95 per bushel
20 percent	$4.15 per bushel
25 percent	$4.35 per bushel
30 percent	$4.55 per bushel.

"(ii) In the case of the 1989 crop of wheat, the established price shall be the higher of—

"(I) a level that is not less than 110 percent, nor more than 125 percent, of the simple average price received by producers of wheat, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(II) 85 percent of the established price for the 1985 crop of wheat.

"(F) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(G) As used in this paragraph, the term 'nonprogram crop' means any agricultural commodity other than wheat, feed grains, upland cotton, extra long staple cotton, rice, or soybeans.

"(2)(A) Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(i) the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage that the producers were prevented from planting to wheat or other nonconserving crops in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(ii) 75 percent of the farm program payment yield established by the Secretary; by

"(iii) a payment rate equal to 33⅓ percent of the average of the established prices for the crop.

"(B) Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat that the producers are able to harvest on any farm is less than the result of multiplying 60 percent of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the average of the established prices for the crop for the deficiency in production below 60 percent for the crop.

"(C) Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the wheat acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the wheat acreage of the producers.

"(D)(i) Notwithstanding subparagraph (C), the Secretary may make a disaster payment to producers on a farm under this paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crops or from reduced yields;

"(II) such losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(IV) additional assistance must be made available to such producers to alleviate such economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(d)(1)(A) For each of the 1986 through 1989 crops of wheat, the Secretary shall proclaim a national program acreage. The proclamation shall be made not later than

July 1 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) if the Secretary determines it necessary based on the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the quantity the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 percent nor less than 80 percent.

"(3)(A) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The individual farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of wheat planted for harvest on the farm from the acreage base established for the farm under subsection (f)(2) by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of wheat planted for harvest is less than the acreage base established for the farm under subsection (f)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for wheat, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(e)(1) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable.

"(2) Notwithstanding paragraph (1)—

"(A) in the determination of yields, the Secretary shall take into account the actual yields proved by the producer; and

"(B) neither the actual yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period; or

"(B) if such data are not available, on the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(f)(1)(A) Notwithstanding any other provision of this section—

"(i) in the case of each of the 1986 through 1988 crops of wheat, the Secretary shall provide for an acreage limitation program as described in paragraph (2); and

"(ii) in the case of the 1989 crop of wheat, the Secretary may not provide either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3).

"(B) The Secretary shall announce any such wheat acreage limitation program not later than July 1 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(C) Not later than July 31 prior to the calendar year in which the crop is harvested, the Secretary may make adjustments in an announcement made under subparagraph (B) if the Secretary determines that there has been a significant change in the total supply of wheat since the earlier announcement.

"(2)(A) If an acreage limitation program is announced under paragraph (1), the limitation on the acreage planted to wheat shall be achieved by applying the percentage reductions to the acreage base for each wheat-producing farm selected by producers under subsection (c)(1)(E)(ii)(I).

"(B) Producers who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm.

"(C)(i) For the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph, the acreage base for any farm shall be the average acreage planted to wheat for harvest in the 5 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to wheat for harvest shall include—

"(I) any reduced acreage and diverted acreage; and

"(II) any acreage that producers were prevented from planting to wheat or other nonconserving crops in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(D)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(E) Subsection (d) shall not be applicable a crop of wheat, including any prior announcement that may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to wheat for harvest within the permitted wheat acreage for the farm as established under this paragraph.

"(3)(A) The regulations issued by the Secretary under paragraph (2) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) Subject to subparagraph (C), the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(C)(i) Except as provided in clause (ii), the Secretary shall permit, at the request of the State committee established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) for a State and subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage diverted from production by participating producers in such State to be devoted to—

"(I) in the case of the 1986 crop of wheat, hay and grazing; and

"(II) in the case of each of the 1987 through 1989 crops of wheat, grazing.

"(ii) Haying and grazing shall not be permitted for any crop of wheat under clause (i) during any 5-consecutive-month period that is established for such crop for a State by the State committee established under section 8(b) of such Act.

"(D) In determining the quantity of land to be devoted to conservation uses under an acreage limitation program with respect to land that has been farmed under summer fallow practices, as defined by the Secretary, the Secretary shall consider the effects of soil erosion and such other factors as the Secretary considers appropriate.

"(4)(A) The Secretary may make land diversion payments to producers of wheat, whether or not an acreage limitation program for wheat is in effect, if the Secretary

determines that such land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(5)(A) Any reduced acreage and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(g)(1) The Secretary may, for each of the 1986 through 1989 crops of wheat, make payments available to producers who meet the requirements of this section.

"(2) Such payments shall be—

"(A) made in the form of wheat owned by the Commodity Credit Corporation; and

"(B) subject to the availability of such wheat.

"(3)(A) Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) The quantity of wheat to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan or purchase agreement under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant wheat for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production under subsection (f); and

"(D) otherwise complies with this section.

"(h)(1) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(i) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(j) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(k) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(l) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(m) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

STUDY OF LOAN AND DEFICIENCY PAYMENT RATES FOR WHEAT CLASSES

SEC. 402. (a) The Secretary of Agriculture shall conduct a study of the feasibility of establishing separate loan rates and deficiency payment rates for (1) hard red winter wheat, (2) soft red winter wheat, (3) hard red spring wheat, (4) white wheat, and (5) durum wheat, as defined in the official United States standards for wheat established under the United States Grain Standards Act (7 U.S.C. 71 et seq.).

(b) Not later than 18 months after the date of enactment of this Act, the Secretary shall report the results of the study required under subsection (a), together with any recommendations for necessary legislation, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 403. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379d-1379j) (relating to marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1986, through May 31, 1990.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 404. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1331-1336, 1338, 1339, 1379b, and 1379c) shall not be applicable to the 1986 through 1989 crops of wheat.

SUSPENSION OF CERTAIN QUOTA PROVISIONS

SEC. 405. The joint resolution entitled "A joint resolution relating to corn and wheat marketing quotas under the Agricultural Adjustment Act of 1938, as amended", approved May 26, 1941 (7 U.S.C. 1330 and 1340), shall not be applicable to the crops of wheat planted for harvest in the calendar years 1986 through 1989.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF WHEAT

SEC. 406. Section 107 of the Agricultural Act of 1949 (7 U.S.C. 1445a) shall not be applicable to the 1986 through 1989 crops of wheat.

TITLE V—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, FEED GRAIN ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 501. Effective only for the 1986 through 1989 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105B (7 U.S.C. 1444d) the following new section:

"SEC. 105C. Notwithstanding any other provision of law:

"(a)(1)(A) Except as provided in subparagraphs (B) and (C), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of corn at such level as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

"(B) Except as provided in subparagraph (C), the loan and purchase level determined under subparagraph (A) shall—

"(i) in the case of the 1986 crop of corn, not be less than $2.40 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops of corn, not be less than 75 percent, nor more than 85 percent, of the simple average price received by producers of corn, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, except that the loan and purchase level for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

"(C)(i) Except as provided in clause (ii), if the Secretary determines that the average price of corn received by producers in any marketing year is not more than 110 percent of the loan and purchase level for corn for such marketing year, the Secretary may reduce the loan and purchase level for corn for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain.

"(ii) The loan and purchase level may not be reduced under clause (i) by more than 20 percent in any year.

"(iii) Any reduction in the loan and purchase level for corn under this subparagraph shall not be considered in determining the loan and purchase level for corn for subsequent years.

"(D)(i) The Secretary shall permit a producer to repay a loan made under this paragraph or paragraph (2) for a feed grain crop at a level that is the lesser of—

"(I) the loan level determined for such crop; or

"(II) the higher of—

"(aa) 70 percent of the loan level determined for such crop;

"(bb) if the loan level for a crop was reduced under subparagraph (C), 70 percent of the loan level that would have been in effect but for the reduction under subparagraph (C); or

"(cc) the prevailing world market price for such feed grain, as determined by the Secretary.

"(ii) The Secretary shall prescribe by regulation—

"(I) a formula to define the prevailing world market price for feed grains; and

"(II) a mechanism by which the Secretary shall announce periodically the prevailing world market price for feed grains.

"(E) For purposes of this section, the average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(2) The Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b).

"(b)(1) The Secretary may, for each of the 1986 through 1989 crops of corn, grain sorghums, barley, oats, and rye, make payments available to producers who, although eligible to obtain a loan or purchase agreement under subsection (a), agree to forego obtaining such loan or agreement in return for such payments.

"(2)(A) A payment under this subsection shall be computed by multiplying—

"(i) the loan payment rate; by

"(ii) the quantity of such feed grains the producer is eligible to place under loan.

"(B) For purposes of this subsection, the quantity of feed grains eligible to be placed under loan may not exceed the product obtained by multiplying—

"(i) the individual farm program acreage for the crop; by

"(ii) the farm program payment yield established for the farm.

"(3) For purposes of this subsection, the loan payment rate shall be the amount by which—

"(i) the loan level determined for such crop under subsection (a); exceeds

"(ii) the level at which a loan may be repaid under subsection (a)(1)(D).

"(c)(1)(A) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, in an amount computed as provided in this subsection.

"(B) Payments for any such crop of feed grains shall be computed by multiplying—

"(i) the payment rate; by

"(ii) the individual farm program acreage for the crop; by

"(iii) the farm program payment yield for the crop.

"(C)(i) Except as provided in clauses (ii) and (iii), if the producers on a farm reduce the acreage of feed grains planted for harvest on the farm from the acreage base by at least the percentage recommended by the Secretary in the announcement of the national program acreage and such producers actually plant feed grains or a nonprogram crop for harvest on at least 50 percent of the feed grain acreage base of the farm (reduced by the percentage recommended by the Secretary)—

"(I) any portion of the feed grain acreage base of the farm determined in accordance with subsection (f)(2)(D) (reduced by the percentage recommended by the Secretary) that is devoted to conserving uses or nonprogram crops, shall be considered as part of the individual farm program acreage;

"(II) the producers shall be eligible for payments under this paragraph with respect to the acreage referred to in subclause (I); and

"(III) any portion of the feed grain acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to feed grains.

"(ii) If an acreage limitation program under subsection (f)(2) is in effect for a crop of feed grains and the producers on a farm actually plant feed grains or a nonprogram crop for harvest on at least 50 percent of the permitted feed grain acreage of the farm (determined in accordance with subsection (f)(2)(A))—

"(I) any portion of the permitted feed grain acreage of the farm that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(II) the producers shall be eligible for payments under this paragraph with respect to the acreage referred to in subclause (I); and

"(III) any portion of the feed grain acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to feed grains.

"(iii) If a set-aside program under subsection (f)(3) is in effect for a crop of feed grains, the Secretary has announced a limitation on the acreage planted to feed grains in accordance with subsection (f)(3)(C), and the producers on a farm actually plant feed grains or a nonprogram crop for harvest on at least 50 percent of the limited farm acreage (determined in accordance with subsection (f)(3)(C))—

"(I) any portion of the limited farm acreage that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(II) the producers shall be eligible for payments under this paragraph with respect to the acreage referred to in subclause (I); and

"(III) any portion of the feed grain acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to feed grains.

"(D) The payment rate for corn shall be the amount by which the established price for the crop of corn exceeds the higher of—

"(i) the national weighted average market price received by producers during the marketing year for such crop, as determined by the Secretary; or

"(ii) the loan level determined for such crop.

"(E) The established price for corn shall—

"(i) in the case of the 1986 crop, not be less than $3.03 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops, not be less than 110 percent, nor more than 125 percent, of the simple average price received by producers of corn, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, except that the established price for a crop determined under this clause may not be reduced by more than 5 percent from the level determined by the preceding crop.

"(F) The payment rate for grain sorghums, oats, and, if designated by the Secretary, barley, shall be such rate as the Secretary determines is fair and reasonable in relation to the rate at which payments are made available for corn.

"(G) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2).

"(H) As used in this paragraph, the term 'nonprogram crop' means any agricultural commodity other than wheat, feed grains, upland cotton, extra long staple cotton, rice, or soybeans.

"(2)(A) Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(i) the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage that the producers were prevented from planting to feed grains or other nonconserving crops in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(ii) 75 percent of the farm program payment yield established by the Secretary; by

"(iii) a payment rate equal to 33⅓ percent of the established price for the crop.

"(B) Except as provided in subparagraph (C), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains that the producers are able to harvest on any farm is less than the result of multiplying 60 percent of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 percent of the established price for the crop for the deficiency in production below 60 percent for the crop.

"(C) Producers on a farm shall not be eligible for—

"(i) prevented planting disaster payments under subparagraph (A), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the feed grain acreage of the producers; or

"(ii) reduced yield disaster payments under subparagraph (B), if reduced yield crop insurance is available to the producers under such Act with respect to the feed grain acreage of the producers.

"(D)(i) Notwithstanding subparagraph (C), the Secretary may make a disaster payment to the producers on a farm under this

paragraph if the Secretary determines that—

"(I) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crops or from reduced yields;

"(II) such losses have created an economic emergency for the producers;

"(III) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(IV) additional assistance must be made available to such producers to alleviate such economic emergency.

"(ii) The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(d)(1)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of feed grains. The proclamation shall be made not later than November 15 of each calendar year for the crop harvested in the next succeeding calendar year, except that in the case of the 1986 crop, the proclamation shall be made as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) if the Secretary determines it necessary based on the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the quantity the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 percent nor less than 80 percent.

"(3)(A) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The individual farm program acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the acreage base established for the farm under subsection (f)(2) by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than the acreage base established for the farm under subsection (f)(2), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(e)(1) The farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable.

"(2) Notwithstanding paragraph (1)—

"(A) in the determination of yields, the Secretary shall take into account the actual yields proved by the producer; and

"(B) neither the actual yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period; or

"(B) if such data are not available, on the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(f)(1)(A) Notwithstanding any other provision of this section—

"(i) in the case of each of the 1986 through 1988 crops of feed grains, the Secretary may provide either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3) if the Secretary determines that the total supply of feed grains, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency; and

"(ii) in the case of the 1989 crop of feed grains, the Secretary may not provide either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3).

"(B) In making a determination under subparagraph (A)(i), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under the Agriculture, Food, Trade, and Conservation Act of 1985.

"(C) The Secretary shall announce any such feed grain acreage limitation program or set-aside program not later than November 15 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(2)(A) If an acreage limitation program is announced under paragraph (1), the limitation on the acreage planted to feed grains shall be achieved by applying a uniform percentage reduction (not to exceed 15 percent) to the acreage base for each feed grain-producing farm.

"(B) Producers who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm.

"(C) The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation under this paragraph if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe.

"(D)(i) For the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph, the acreage base for any farm shall be the average acreage planted to feed grains for harvest in the 5 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to feed grains for harvest shall include—

"(I) any reduced acreage, set-aside acreage, and diverted acreage; and

"(II) any acreage that producers were prevented from planting to feed grains or other nonconserving crops in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(E)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(F) If an acreage limitation program is announced under paragraph (1) for a crop of feed grains, subsection (d) shall not be applicable to such crop, including any prior announcement that may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest within the permitted

feed grain acreage for the farm as established under this paragraph.

"(3)(A) If a set-aside program is announced under paragraph (1), then as a condition of eligibility for loans, purchases, and payments authorized by this section (except as provided in subsection (g)), the producers on a farm must—

"(i) set aside and devote to conservation uses an acreage of cropland equal to a specified percentage (not to exceed 15 percent) of the acreage of feed grains planted for harvest for the crop for which the set-aside is in effect; and

"(ii) otherwise comply with such program.

"(B) The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(C)(i) If a set-aside program is established, the Secretary may limit the acreage planted to feed grains. Such limitation shall be applied on a uniform basis to all feed grain-producing farms.

"(ii) The number of acres for each farm permitted to be planted to wheat, as determined in accordance with this subparagraph, shall be referred to as 'limited farm acreage'.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary—

"(i) to correct for abnormal factors affecting production; and

"(ii) to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary determines necessary.

"(4)(A) The regulations issued by the Secretary under paragraphs (2) and (3) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5)(A) The Secretary may make land diversion payments to producers of feed grains, whether or not an acreage limitation or set-aside program for feed grains is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6)(A) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(g)(1) The Secretary may, for each of the 1986 through 1989 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, make payments available to producers who meet the requirements of this section.

"(2) Such payments shall be—

"(A) made in the form of such feed grains, respectively, owned by the Commodity Credit Corporation; and

"(B) subject to the availability of such feed grains.

"(3)(A) Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) The quantity of feed grains to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan or purchase agreement under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant feed grains for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production under subsection (f); and

"(D) otherwise complies with this section.

"(h)(1) If the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(i) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(j) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(k) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(l) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(m) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1986 THROUGH 1989 CROPS OF FEED GRAINS

SEC. 502. Section 105 of the Agricultural Act of 1949 (7 U.S.C. 1444b) shall not be applicable to the 1986 through 1989 crops of feed grains.

TITLE VI—COTTON

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, COTTON ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF UPLAND COTTON

SEC. 601. Effective only for the 1986 through 1989 crops of upland cotton, the Agricultural Act of 1949 is amended by inserting after section 103 (7 U.S.C. 1444) the following new section:

"SEC. 103A. Notwithstanding any other provision of law:

"(a)(1) The Secretary shall, on presentation of warehouse receipts reflecting accrued storage charges of not more than 60 days, make available for the 1986 through 1989 crops of upland cotton to producers nonrecourse loans for a term of 10 months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States a level that is not less than—

"(A) in the case of the 1986 crop of upland cotton, 55 cents per pound; and

"(B) in the case of each of the 1987 through 1989 crops of upland cotton, the higher of—

"(i) 85 percent of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during 3 years of the 5-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(ii) 50 cents per pound.

"(2) The loan level for any crop determined under paragraph (1)(B) may not be reduced by more than 5 percent from the loan level determined for the preceding crop.

"(3) The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year

for which such loan is to be effective, except that in the case of the 1986 crop, such determination and announcement shall be made as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985. Such level shall not thereafter be changed.

"(4)(A) Except as provided in subparagraph (B), nonrecourse loans provided for in this section shall, on request of the producer during the 10th month of the loan period for the cotton, be made available for an additional term of 8 months.

"(B) A request to extend the loan period shall not be approved in any month in which the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 percent of the average price of such quality of cotton in such markets for the preceding 36-month period.

"(5)(A) Except as provided in subparagraph (B), the Secretary shall permit a producer to repay a loan made under this subsection for a crop at a level that is the lesser of—

"(i) the loan level determined for such crop; or

"(ii) the prevailing world market price for cotton (adjusted to United States quality and location), as determined by the Secretary.

"(B) For each of the 1987 through 1989 crops of cotton, if the world market price for cotton (adjusted to United States quality and location) as determined by the Secretary, is less than 80 percent of the loan level determined for such crop, the Secretary may permit a producer to repay a loan made under this subsection for a crop at such level (not in excess of 80 percent of the loan level determined for such crop) as the Secretary determines will—

"(i) minimize potential loan forfeitures;

"(ii) minimize the accumulation of cotton stocks by the Federal Government;

"(iii) minimize the cost incurred by the Federal Government in storing cotton; and

"(iv) allow cotton produced in the United States to be marketed freely and competitively, both domestically and internationally.

"(C)(i) The Secretary shall prescribe by regulation—

"(I) a formula to define the prevailing world market price for cotton; and

"(II) a mechanism by which the Secretary shall periodically announce the prevailing world market price for cotton.

"(ii) Not later than 60 days after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985, the Secretary shall—

"(I) publish in the Federal Register proposed regulations specifying such formula and mechanism; and

"(II) invite public comment on such proposal.

"(b)(1) The Secretary may, for each of the 1986 through 1989 crops of upland cotton, make payments available to producers who, although eligible to obtain a loan under subsection (a), agree to forgo obtaining such loan in return for such payments.

"(2)(A) A payment under this subsection shall be computed by multiplying—

"(i) the loan payment rate; by

"(ii) the quantity of upland cotton the producer is eligible to place under loan.

"(B) For purposes of this subsection, the quantity of upland cotton eligible to be placed under loan may not exceed the product obtained by multiplying—

"(i) the individual farm program acreage for the crop (determined under subsection (g) or (i)(2)); by

"(ii) the farm program payment yield (determined under subsection (h)).

"(3) For purposes of this subsection, the loan payment rate shall be the amount by which—

"(i) the loan level determined for such crop under subsection (a); exceeds

"(ii) the level at which a loan may be repaid under subsection (a)(5).

"(c)(1) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of upland cotton in an amount computed as provided in this subsection.

"(2) Payments for any such crop of upland cotton shall be computed by multiplying—

"(A) the payment rate; by

"(B) the individual farm program acreage; by

"(C) the farm program payment yield for the crop (determined in accordance with subsection (h)).

"(3)(A) Except as provided in subparagraphs (B) and (C), if the producers on a farm reduce the acreage of cotton planted for harvest on the farm from the acreage base by at least the percentage recommended by the Secretary in the announcement of the national program acreage and such producers actually plant upland cotton or a nonprogram crop for harvest on at least 50 percent of the upland cotton acreage base of the farm (reduced by the percentage recommended by the Secretary)—

"(i) any portion of the upland cotton acreage base of the farm determined in accordance with subsection (i)(2)(C) (reduced by the percentage recommended by the Secretary) that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the upland cotton acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to upland cotton.

"(B) If an acreage limitation program under subsection (i)(2) is in effect for a crop of upland cotton and the producers on a farm actually plant upland cotton or a nonprogram crop for harvest on at least 50 percent of the permitted upland cotton acreage of the farm (determined in accordance with subsection (i)(2)(A))—

"(i) any portion of the permitted upland cotton acreage of the farm that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the upland cotton acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to upland cotton.

"(C) If a set-aside program under subsection (i)(3) is in effect for a crop of upland cotton, the Secretary has announced a limitation on the acreage planted to upland cotton in accordance with subsection (i)(3)(C), and the producers on a farm actually plant upland cotton or a nonprogram crop for harvest on at least 50 percent of the limited farm acreage (determined in accordance with subsection (i)(3)(C))—

"(i) any portion of the limited farm acreage that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the upland cotton acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to upland cotton.

"(4) The payment rate for upland cotton shall be the amount by which the established price per pound for the crop of upland cotton exceeds the higher of—

"(A) the average market price received by producers for upland cotton during the calendar year that includes the first 5 months of the marketing year for such crop, as determined by the Secretary; or

"(B) the loan level determined for such crop.

"(5) The established price for upland cotton shall—

"(A) in the case of the 1986 crop, not be less than $0.81 per pound; and

"(B) in the case of each of the 1987 through 1989 crops, not be less than 110 percent, nor more than 125 percent, of the average price (weighted by market and month) for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) as quoted in the designated United States spot markets during 3 years of the 5-year period ending July 31 in the year in which the established price is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

"(6) The total quantity of upland cotton on which payments would otherwise be payable to a producer on a farm for any crop under this subsection shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under subsection (d).

"(7) As used in this subsection, the term 'nonprogram crop' means any agricultural commodity other than wheat, feed grains, upland cotton, extra long staple cotton, rice, or soybeans.

"(d)(1) Except as provided in subparagraph (C), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(A) the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage that the producers were prevented from planting to cotton or other nonconserving crops in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(B) 75 percent of the farm program payment yield established by the Secretary; by

"(C) a payment rate equal to 33⅓ percent of the established price for the crop.

"(2) Except as provided in paragraph (3), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton that the producers are able to harvest on any farm is less than the result of multiplying 75 percent of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ percent of the established price for the crop for the deficiency in production below 75 percent for the crop.

"(3) Producers on a farm shall not be eligible for—

"(A) prevented planting disaster payments under paragraph (1), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the cotton acreage of the producers; or

"(B) reduced yield disaster payments under paragraph (2), if reduced yield crop insurance is available to the producers under such Act with respect to the cotton acreage of the producers.

"(4)(A) Notwithstanding paragraph (3), the Secretary may make a disaster payment to the producers on a farm under this subsection if the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crops or from reduced yields;

"(ii) such losses have created an economic emergency for the producers;

"(iii) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency; and

"(iv) additional assistance must be made available to such producers to alleviate such economic emergency.

"(B) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(e)(1) The Secretary shall establish for each of the 1986 through 1989 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established, except that in the case of the 1986 crop, such announcement shall be made as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(2) The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation factor under subsection (f) if the Secretary determines it necessary based on the latest information. The Secretary shall announce such revised national program acreage as soon as it has been made.

"(3) The national program acreage for upland cotton shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(4) The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than 10 million acres.

"(f) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor for upland cotton (not to exceed 100 percent) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(g)(1) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(2) The individual farm program acreage may not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the acreage base established for the farm under subsection (i)(2)(C) by at least the percentage recommended by the Secretary in the announcement of the national program acreage.

"(3) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than the acreage base established for the farm under subsection (i)(2)(C), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(4) In establishing the allocation factor for upland cotton, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this subsection.

"(h)(1) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding 3 years, except that the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for 1 or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available.

"(2) Notwithstanding paragraph (1)—

"(A) in the determination of yields, the Secretary shall take into account the actual yields proved by the producer; and

"(B) neither the actual yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection.

"(3) If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of—

"(A) historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period; or

"(B) if such data are not available, the Secretary's estimate of actual yields for the crop year involved.

"(4) If national, State, or county program payment yields are established, the total farm program payment yields shall balance to the national, State, or county program payment yields.

"(i)(1)(A) Notwithstanding any other provision of law—

"(i) in the case of each of the 1986 through 1988 crops of upland cotton, the Secretary may provide for any crop either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3), if the Secretary determines that the total supply of upland cotton, in the absence of such a program would be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency; and

"(ii) in the case of the 1989 crop of upland cotton, the Secretary may not provide either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3).

"(B) In making a determination under subparagraph (A)(i), the Secretary shall take into consideration the number of acres placed in the conservation acreage reserve established under the Agriculture, Food, Trade, and Conservation Act of 1985.

"(C) The Secretary shall announce any such upland cotton acreage limitation program or set-aside program not later than November 1 prior to the calendar year in which the crop is harvested, except that in the case of the 1986 crop, the Secretary shall announce such program as soon as practicable after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(2)(A) If an acreage limitation program is announced under paragraph (1), the limitation on the acreage planted to upland cotton shall be achieved by applying a uniform percentage reduction (not to exceed 20 percent) to the acreage base for each cotton-producing farm.

"(B) Except as provided in subsection (j), producers who knowingly produce upland cotton in excess of the permitted upland cotton acreage for the farm, as established in accordance with subparagraph (A), shall be ineligible for upland cotton loans and payments with respect to that farm.

"(C)(i) For the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph, the acreage base for any farm shall be—

"(I) in the case of the 1986 crop of upland cotton, the average acreage planted to upland cotton for harvest in the 2 crop years immediately preceding the year for which the determination is made;

"(II) in the case of the 1987 crop of upland cotton, the average acreage planted to upland cotton for harvest in the 3 crop years immediately preceding the year for which the determination is made; and

"(III) in the case of the 1988 crop of upland cotton, the average acreage planted to upland cotton for harvest in the 4 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to upland cotton for harvest shall include—

"(I) any reduced acreage, set-aside acreage, and diverted acreage; and

"(II) any acreage that producers were prevented from planting to upland cotton or other nonconserving crops in lieu of upland cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(D)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres determined under clause (i) is hereafter in this subsection referred to as 'reduced acreage'.

"(E) If an acreage limitation program is announced under paragraph (1) for a crop of upland cotton, subsections (e), (f), and (g) shall not be applicable to such crop, including any prior announcement that may have been made under such subsections with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest within the permitted upland cotton acreage for the farm as established under this paragraph.

"(3)(A) If a set-aside program is announced under paragraph (1), then as a condition of eligibility for loans and payments authorized by this section (except as provided in subsection (j)), the producers on a farm must—

"(i) set aside and devote to conservation uses an acreage of cropland equal to a specified percentage (not to exceed 20 percent) of the acreage of upland cotton planted for harvest for the crop for which the set-aside is in effect; and

"(ii) otherwise comply with such program.

"(B) The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(C)(i) If a set-aside program is established, the Secretary may limit the acreage planted to upland cotton. Such limitation shall be applied on a uniform basis to all cotton-producing farms.

"(ii) The number of acres for each farm permitted to be planted to upland cotton, as determined in accordance with this subparagraph, shall be referred to as 'limited farm acreage'.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary—

"(i) to correct for abnormal factors affecting production; and

"(ii) to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary determines necessary.

"(4)(A) The regulations issued by the Secretary under paragraphs (2) and (3) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5)(A) The Secretary may make land diversion payments to producers of upland cotton, whether or not an acreage limitation or set-aside program for upland cotton is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6)(A) The reduced acreage, set-aside, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(j)(1) The Secretary may, for each of the 1986 through 1989 crops of upland cotton, make payments available to producers who meet the requirements of this section.

"(2) Such payments shall be—

"(A) made in the form of cotton owned by the Commodity Credit Corporation; and

"(B) subject to the availability of such cotton.

"(3)(A) Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) The quantity of cotton to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant upland cotton for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production under subsection (i); and

"(D) otherwise complies with this section.

"(k)(1) An operator of a farm desiring to participate in the program conducted under subsection (i) shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(2) The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(l) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(m) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(n)(1) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(o) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(p) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(q) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.

"(r) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make recourse loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.).

"(s)(1) Whenever the Secretary determines that the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 percent of the average price of such quality of cotton in such markets for the preceding 36 months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited

global import quota for upland cotton subject to the following conditions:

"(A) The quantity of the special quota shall be equal to 21 days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent 3 months for which data are available.

"(B) If a special quota has been established under this subsection during the preceding 12 months, the quantity of the quota next established hereunder shall be the smaller of 21 days of domestic mill consumption calculated as set forth in subparagraph (A) or the quantity required to increase the supply to 130 percent of the demand.

"(C) As used in subparagraph (B):

"(i) The term 'supply' means, using the latest official data of the Bureau of the Census, the Department of Agriculture, and the Department of the Treasury—

"(I) the carryover of upland cotton at the beginning of the marketing year (adjusted to 480-pound bales) in which the special quota is established; plus

"(II) production of the current crop; plus

"(III) imports to the latest date available during the marketing year.

"(ii) The term 'demand' means—

"(I) the average seasonally adjusted annual rate of domestic mill consumption in the most recent 3 months for which data are available; plus

"(II) the larger of—

"(aa) average exports of upland cotton during the preceding 6 marketing years; or

"(bb) cumulative exports of upland cotton plus outstanding export sales for the marketing year in which the special quota is established.

"(D) When a special quota is established under this subsection, cotton may be entered under such quota during the 90-day period beginning on the effective date of the proclamation.

"(2) Notwithstanding paragraph (1), a special quota period may not be established that overlaps an existing quota period.".

SUSPENSION OF BASE ACREAGE ALLOTMENTS, MARKETING QUOTAS, AND RELATED PROVISIONS

SEC. 602. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342-1346 and 1377) shall not be applicable to any of the 1986 through 1989 crops of upland cotton.

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 603. Effective only with respect to the period beginning August 1, 1978, and ending July 31, 1990, the tenth sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells upland cotton for export, in no event, however, at less than (A) 115 percent of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, or (B) if the Secretary permits the repayment of loans made for a crop of cotton at a rate that is less than the loan level determined for such crop, 115 percent of the average loan repayment rate that is determined for such crop during the period of such loans, and (2)".

MISCELLANEOUS COTTON PROVISIONS

SEC. 604. Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444(a) and 1446d) shall not be applicable to the 1986 through 1989 crops.

SKIPROW PRACTICES

SEC. 605. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374(a)) is amended by striking out "1985" and inserting in lieu thereof "1989".

PRELIMINARY ALLOTMENTS FOR 1990 CROP OF UPLAND COTTON

SEC. 606. Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1379), shall be the preliminary allotments for the 1990 crop.

TITLE VII—RICE

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, RICE ACREAGE REDUCTION AND SET-ASIDE PROGRAM, AND LAND DIVERSION FOR THE 1986 THROUGH 1989 CROPS OF RICE

SEC. 701. Effective only for the 1986 through 1989 crops of rice, the Agricultural Act of 1949 is amended by inserting after section 101 (7 U.S.C. 1441) the following new section:

"SEC. 101A. Notwithstanding any other provision of law:

"(a)(1) Except as provided in paragraph (2), the Secretary shall make available to producers loans and purchases for each of the 1986 through 1989 crops of rice at a level that is not less than—

"(A) in the case of the 1986 crop of rice, $7.20 per hundredweight; and

"(B) in the case of each of the 1987 through 1989 crops of rice, the higher of—

"(i) 85 percent of the simple average price received by producers, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; or

"(ii) $6.50 per hundredweight.

"(2) The loan level for a crop of rice determined under paragraph (1)(B) may not be reduced by more than 5 percent from the loan level determined for the preceding crop.

"(3)(A) The Secretary shall permit a producer to repay a loan made under paragraph (1) for a crop at a level that is the lesser of—

"(i) the loan level determined for such crop; or

"(ii) the higher of—

"(I) 70 percent of such level; or

"(II) the prevailing world market price for rice, as determined by the Secretary.

"(B) The Secretary shall prescribe by regulation—

"(i) a formula to define the prevailing world market price for rice; and

"(ii) a mechanism by which the Secretary shall announce periodically the prevailing world market price for rice.

"(4) A loan made under this section shall be repaid not later than 9 months after the month in which the application for the loan is made.

"(5) For purposes of this section, the average price received by producers for the immediately preceding marketing year shall be based on the latest information available to the Secretary at the time of the determination.

"(6) The loan and purchase level and the established price for each of the 1986 through 1989 crops of rice shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

"(b)(1) The Secretary may, for each of the 1986 through 1989 crops of rice, make payments available to producers who, although eligible to obtain a loan or purchase agreement under subsection (a), agree to forgo obtaining such loan or agreement in return for such payments.

"(2)(A) A payment under this subsection shall be computed by multiplying—

"(i) the loan payment rate; by

"(ii) the quantity of rice the producer is eligible to place under loan.

"(B) For purposes of this subsection, the quantity of rice eligible to be placed under loan may not exceed the product obtained by multiplying—

"(i) the individual farm program acreage for the crop; by

"(ii) the yield established for the farm.

"(3) For purposes of this subsection, the loan payment rate shall be the amount by which—

"(i) the loan level determined for such crop under subsection (a); exceeds

"(ii) the level at which a loan may be repaid under subsection (a)(3).

"(c)(1) The Secretary shall make available to producers payments for each of the 1986 through 1989 crops of rice in an amount computed as provided in this subsection.

"(2) Payments for any such crop of rice shall be computed by multiplying—

"(A) the payment rate; by

"(B) the individual farm program acreage; by

"(C) the yield established for the farm for the crop (determined in accordance with paragraph (5)).

"(3)(A) Except as provided in subparagraphs (B) and (C), if the producers on a farm reduce the acreage of rice planted for harvest on the farm from the acreage base by at least the percentage recommended by the Secretary in the announcement of the national program acreage and such producers actually plant rice or a nonprogram crop for harvest on at least 50 percent of the rice acreage base of the farm (reduced by the percentage recommended by the Secretary)—

"(i) any portion of the rice acreage base of the farm determined in accordance with subsection (f)(2)(C) (reduced by the percentage recommended by the Secretary) that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the rice acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to rice.

"(B) If an acreage limitation program under subsection (f)(2) is in effect for a crop of rice and the producers on a farm actually plant rice or a nonprogram crop for harvest on at least 50 percent of the permitted rice acreage of the farm (determined in accordance with subsection (f)(2)(A)—

"(i) any portion of the permitted rice acreage of the farm that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the rice acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to rice.

"(C) If a set-aside program under subsection (f)(3) is in effect for a crop of rice, the Secretary has announced a limitation on the acreage planted to rice in accordance with subsection (f)(3)(C), and the producers on a farm actually plant rice or a nonprogram crop for harvest on at least 50 percent of the limited farm acreage (determined in accordance with subsection (f)(3)(C))—

"(i) any portion of the limited farm acreage that is devoted to conserving uses or nonprogram crops shall be considered as part of the individual farm program acreage;

"(ii) the producers shall be eligible for payments under this subsection with respect to the acreage referred to in clause (i); and

"(iii) any portion of the rice acreage base of the farm that is devoted to conserving uses or nonprogram crops shall be considered to be planted to rice.

"(4) The payment rate for rice shall be the amount by which the established price for the crop of rice exceeds the higher of—

"(A) the national average market price received by producers during the first 5 months of the marketing year for such crop, as determined by the Secretary; or

"(B) the loan level determined for such crop.

"(5) The established price for rice shall—

"(A) in the case of the 1986 crop, not be less than $11.90 per hundredweight; and

"(B) in the case of each of the 1987 through 1989 crops, not be less than 110 percent, nor more than 125 percent, of the simple average price received by producers of rice, as determined by the Secretary, during the immediately preceding 5 marketing years, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

"(6) The yield established for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the 3 preceding years. The actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the producers. If no rice was produced on the farm during such period, the yield shall be determined taking into consideration the yield of comparable farms in the surrounding area and such other factors as the Secretary determines will produce a fair and equitable yield.

"(7) The total quantity of rice on which payments would otherwise be payable to a producer on a farm for any crop under this subsection shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under subsection (d).

"(8) As used in this subsection, the term 'nonprogram crop' means any agricultural commodity other than wheat, feed grains, upland cotton, extra long staple cotton, rice, or soybeans.

"(d)(1) Except as provided in paragraph (3), if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers in an amount equal to the product obtained by multiplying—

"(A) the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage that the producers were prevented from planting to rice or other nonconserving crops in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year; by

"(B) 75 percent of the yield established for the farm by the Secretary; by

"(C) a payment rate equal to 33⅓ percent of the established price for the crop.

"(2) Except as provided in paragraph (3), if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice that the producers are able to harvest on any farm is less than the result of multiplying 75 percent of the yield established for the farm for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ percent of the established price for the crop for the deficiency in production below 75 percent for the crop.

"(3) Producers on a farm shall not be eligible for—

"(A) prevented planting disaster payments under paragraph (1), if prevented planting crop insurance is available to the producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) with respect to the rice acreage of the producers; or

"(B) reduced yield disaster payments under paragraph (2), if reduced yield crop insurance is available to the producers under such Act with respect to the rice acreage of the producers.

"(4)(A) Notwithstanding paragraph (3), the Secretary may make a disaster payment to producers on a farm under this subsection if the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the producers have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crops or from reduced yields;

"(ii) such losses have created an economic emergency for the producers;

"(iii) crop insurance indemnity payments under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.) and other forms of assistance made available by the Federal Government to such producers for such losses is insufficient to alleviate such economic emergency; and

"(iv) additional assistance must be made available to such producers to alleviate such economic emergency.

"(B) The Secretary may make such adjustments in the amount of payments made available under this paragraph with respect to an individual farm so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(e)(1)(A) The Secretary shall proclaim a national program acreage for each of the 1986 through 1989 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year.

"(B) The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) if the Secretary determines a revision is necessary based on the latest information. The Secretary shall proclaim such revised national program acreage as soon as it is made.

"(C) The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop.

"(D) If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the quantity the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 percent nor less than 80 percent.

"(3)(A) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined.

"(B) The individual farm program acreage may not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the acreage base established for the farm under subsection (f)(2)(C) by at least the percentage recommended by the Secretary in the proclamation of the national program acreage.

"(C) The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than the acreage base established for the farm under subsection (f)(2)(C), but for which the reduction is insufficient to exempt the farm from the application of the allocation factor.

"(D) In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this subsection.

"(f)(1)(A) Notwithstanding any other provision of law—

"(i) in the case of each of the 1986 through 1988 crops of rice, the Secretary may provide for any crop either for an acreage limitation program as described in paragraph (2) or a set-aside program as described in paragraph (3), if the Secretary determines that the total supply of rice, in the absence of such a program, would be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency; and

"(ii) in the case of the 1989 crop of rice, the Secretary may not provide either for an acreage limitation program as described in

paragraph (2) or a set-aside program as described in paragraph (3).

"• • • years immediately preceding the year for which the determination is made;

"(II) in the case of the 1987 crop of rice, the average acreage planted to rice for harvest in the 3 crop years immediately preceding the year for which the determination is made; and

"(III) in the case of the 1988 crop of rice, the average acreage planted to rice for harvest in the 4 crop years immediately preceding the year for which the determination is made.

"(IV) in the case of the 1989 crop of rice, the average acreage planted to rice for harvest in the 5 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to rice for harvest shall include—

"(I) any reduced acreage, set-aside acreage, and diverted acreage; and

"(II) any acreage that producers were prevented from planting to rice or other nonconserving crops in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(D)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres determined under clause (i) is hereafter in this subsection referred to as 'reduced acreage'.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary—

"(E) If an acreage limitation program is announced under paragraph (1) for a crop of rice, subsection (e) shall not be applicable to such crop, including any prior announcement that may have been made under such subsection with respect to such crop. The individual farm program acreage shall be the acreage planted on the farm to rice for harvest within the permitted rice acreage for the farm as established under this paragraph.

"(3)(A) If a set-aside program is announced under paragraph (1), then as a condition of eligibility for loans, purchases, and payments authorized by this section (except as provided in subsection (g)), the producers on a farm must—

"(i) set aside and devote to conservation uses an acreage of cropland equal to a specified percentage (not to exceed 35 percent) of the acreage of rice planted for harvest for the crop for which the set-aside is in effect; and

"(ii) otherwise comply with such program.

"(B) The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(C)(i) If a set-aside program is established, the Secretary may limit the acreage planted to rice. Such limitation shall be applied on a uniform basis to all rice-producing farms.

"(ii) The number of acres for each farm permitted to be planted to rice, as determined in accordance with this subparagraph, shall be referred to as 'limited farm acreage'.

"(D) The Secretary may make such adjustments in individual set-aside acreages under this section as the Secretary determines necessary—

"(i) to correct for abnormal factors affecting production; and

"(ii) to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, topography, and such other factors as the Secretary determines necessary.

"(4)(A) The regulations issued by the Secretary under paragraphs (2) and (3) with respect to acreage required to be devoted to conservation uses shall assure protection of such acreage from weeds and wind and water erosion.

"(B) The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(5)(A) The Secretary may make land diversion payments to producers of rice, whether or not an acreage limitation or set-aside program for rice is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

"(B) The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted.

"(C) The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(6)(A) The reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(B) The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of subparagraph (A).

"(C) The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(7)(A) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe.

"(B) The Secretary may, by mutual agreement with producers on a farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(g)(1) The Secretary may, for each of the 1986 through 1989 crops of rice, make payments available to producers who meet the requirements of this section.

"(2) Such payments shall be—

"(A) made in the form of rice owned by the Commodity Credit Corporation; and

"(B) subject to the availability of such rice.

"(3)(A) Payments under this subsection shall be determined in the same manner as provided in subsection (b).

"(B) The quantity of rice to be made available to a producer under this subsection shall be equal in value to the payments so determined under such subsection.

"(4) A producer shall be eligible to receive a payment under this subsection for a crop if the producer—

"(A) agrees to forgo obtaining a loan or purchase agreement under subsection (a);

"(B) agrees to forgo receiving payments under subsection (c);

"(C) does not plant rice for harvest in excess of the farm acreage base reduced by one-half of any acreage required to be diverted from production under subsection (f); and

"(D) otherwise complies with this section.

"(h) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(i) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(j)(1) If the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines are equitable in relation to the seriousness of the failure.

"(2) The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not affect adversely the operation of the program.

"(k) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(l) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(m) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment

Act (16 U.S.C. 590h(g)) (relating to assignment of payments) shall apply to payments under this section.".

TITLE XII—FOOD ASSISTANCE RESERVE

DEFINITIONS

SEC. 1201. As used in this title:

(1) The term "reserve" means a food assistance reserve established under section 1202(a).

(2) The term "Secretary" means the Secretary of Agriculture.

ESTABLISHMENT OF RESERVE

SEC. 1202. (a) Subject to subsection (b), the Secretary shall establish a food assistance reserve containing up to 500 million bushels of wheat and feed grains, to be used in accordance with this title.

(b) The Secretary shall include in the reserve—

(1) not less than 200 million bushels of wheat, to be used in accordance with section 1203(b); and

(2) not less than 100 million bushels of wheat, to be used in accordance with section 1203(c).

USE OF STOCKS

SEC. 1203. (a) Except as provided in subsections (b) and (c), stocks of the reserve may be made available by the Secretary to meet urgent humanitarian needs.

(b)(1) Except as provided in paragraph (2) and notwithstanding any other provision of law, stocks of wheat included in the reserve under section 1202(b)(1) may be released by the Secretary only to provide, on a donation or sale basis, emergency food assistance to developing countries, if the domestic supply of wheat is so limited that quantities of wheat cannot be made available for disposition under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) except for urgent humanitarian purposes, under the criteria established under section 401(a) of such Act (7 U.S.C. 1731(a)).

(2) Up to 300,000 metric tons of wheat included in the reserve under section 1202(b)(1) may be released from the reserve in any fiscal year, without regard to the domestic supply situation, for use under title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.) in providing urgent humanitarian relief in any developing country suffering a major disaster, as determined by the President, if the wheat needed for relief cannot be programmed for such purpose in a timely manner under the normal means of obtaining commodities for food assistance due to circumstances of unanticipated and exceptional need.

(c) Notwithstanding any other provision of law, stocks of wheat included in the reserve under section 1202(b)(2) may be released by the Secretary only for carrying out section 416 (b) or (c) of the Agricultural Act of 1949 (7 U.S.C. 1431 (b) or (c)).

(d) In connection with the use of stocks in the reserve, the Secretary may pay the cost of processing, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery.

MANAGEMENT OF STOCKS

SEC. 1204. (a) In order to establish the reserve or replenish the stocks of the reserve, the Secretary may—

(1) acquire wheat or feed grains for the reserve through purchases from producers or in the market, if the Secretary determines that such purchases will not unduly disrupt the market; and

(2) designate stocks of wheat and feed grains otherwise acquired by the Commodity Credit Corporation as stocks of the reserve.

(b) The Secretary may provide for the periodic rotation of stocks of the reserve to avoid spoilage and deterioration of such stocks.

ADMINISTRATION

SEC. 1205. (a) The Secretary may issue such rules and regulations as the Secretary determines necessary to carry out this title.

(b)(1) The funds, facilities, and authorities of the Commodity Credit Corporation shall be used by the Secretary in carrying out this title.

(2)(A) The Commodity Credit Corporation shall be reimbursed from funds made available for carrying out the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) for wheat released from the reserve that is made available under such Act.

(B) Such reimbursement shall be made on the basis of the lower of—

(i) the actual costs incurred by the Commodity Credit Corporation with respect to such wheat; or

(ii) the export market price of wheat (as determined by the Secretary) as of the time the wheat is released from the reserve for such purpose.

(C) Reimbursement under clause (i) or (ii) of subparagraph (B) shall include the actual costs incurred by the Corporation with respect to processing, reprocessing, packaging, transporting, handling, and other charges, including overseas delivery.

(D) Such reimbursement may be made from funds appropriated for such purpose in subsequent years.

(c) Any determination made by the Secretary under this title shall be final and conclusive.

REPEAL OF CERTAIN RESERVE PROVISIONS AND CONFORMING AMENDMENTS

SEC. 1206. (a)(1) Except as provided in paragraph (2), section 110 of the Agricultural Act of 1949 (7 U.S.C. 1445e) is repealed.

(2) Such section, other than subsection (f) of such section, shall be effective through the 1985 crops of wheat and feed grains, except that the Secretary may not authorize the extension of an outstanding price support loan under subsection (b) of such section.

(3) Section 209(a)(4) of the Agricultural Act of 1980 (7 U.S.C. 4002(a)(4)) is amended by inserting before the period at the end thereof the following: ", as such program existed before the amendment made by section 1206(a)(1) of the Agriculture, Food, Trade, and Conservation Act of 1985".

(b) Section 813 of the Agricultural Act of 1970 (7 U.S.C. 1427a) is repealed.

(c)(1) The Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1) is repealed.

(2) Section 202(b) of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended—

(A) by striking out "section 302(b)(1) of the Food Security Wheat Reserve Act of 1980" in the first sentence and inserting in lieu thereof "section 1202(b)(1) of the Agriculture, Food, Trade, and Conservation Act of 1985"; and

(B) in the second sentence—

(i) by striking out "from the Food Security Wheat Reserve" and inserting in lieu thereof "from the food assistance reserve"; and

(ii) by striking out "the provisions of section 302(b) of the Food Security Wheat Reserve Act of 1980" and inserting in lieu thereof "section 1204(a) of the Agriculture, Food, Trade, and Conservation Act of 1985".

(d) Section 208 of the Agricultural Act of 1980 (7 U.S.C. 4001) is repealed.

TITLE XIII—MISCELLANEOUS COMMODITY PROVISIONS

ADVANCE PAYMENTS

SEC. 1308. Effective only for the 1986 through 1989 crops of wheat, feed grains, upland cotton, and rice, section 107C of the Agricultural Act of 1949 (7 U.S.C. 1445b-2) is amended to read as follows:

"SEC. 107C. (a)(1) If the Secretary establishes an acreage limitation program for any of the 1986 through 1989 crops of wheat, feed grains, upland cotton, or rice under this Act and determines that deficiency payments will likely be made for such commodity for such crop, the Secretary may make available advance deficiency payments to producers who agree to participate in such program.

"(2) Advance deficiency payments under paragraph (1) shall be made to the producer under the following terms and conditions:

"(A) Such payments—

"(i) in the case of the 1986 crops of wheat, feed grains, upland cotton, or rice shall be made available, subject to availability, in the form of a commodity owned by the Commodity Credit Corporation in an amount not to exceed 15 percent of the total of such payments; and

"(ii) in the case of the 1987 through 1989 crops of wheat, feed grains, upland cotton, or rice may be made available in the form of a commodity owned by the Commodity Credit Corporation in such amounts as the Secretary determines appropriate.

"(B) Such payments shall be made available as soon as practicable after the end of the fifth month of the marketing year for the crop.

"(C) Such payments shall be made available in such amounts as the Secretary determines appropriate to encourage adequate participation in such program, except that such amount may not exceed an amount determined by multiplying—

"(i) the estimated farm program average for the crop; by

"(ii) the farm program payment yield for the crop; by

"(iii) 90 percent of the projected payment rate on the basis of the national weighted average market price received by producers during the first 5 months of the marketing year for the crop,

as determined by the Secretary.

"(D) If the deficiency payment payable to a producer for a crop, as finally determined by the Secretary under this Act, is less than the amount paid to the producer as an advance deficiency payment for the crop under this subsection, the producer shall refund an amount equal to the difference between the amount advanced and the amount finally determined by the Secretary to be payable to the producer as a deficiency payment for the crop concerned.

"(E) If the Secretary determines under this Act that deficiency payments will not be made available to producers on a crop with respect to which advance deficiency payments already have been made under this subsection, the producers who received such advance payments shall refund such payments.

"(F) Any refund required under subparagraph (C) or (D) shall be due at the end of the marketing year for the crop with respect to which such payments were made.

"(G) If a producer fails to comply with requirements established under the acreage limitation or set-aside program involved after obtaining an advance deficiency payment under this subsection, the producer shall repay immediately the amount of the advance, plus interest thereon in such amount as the Secretary shall prescribe by regulation.

"(3) The Secretary may issue such regulations as the Secretary determines necessary to carry out this section.

"(4) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(5) The authority provided in this subsection shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation under any other provisions of law.

"(b) If the Secretary makes land diversion payments under this Act to assist in adjusting the total national acreage of any of the 1986 through 1989 crops of wheat, feed grains, upland cotton, or rice to desirable levels, the Secretary may make at least 50 percent of such payments available to a producer as soon as possible after the producer agrees to undertake the diversion of land in return for such payments.".

NORMALLY PLANTED ACREAGE

SEC. 1302. Section 1001 of the Food and Agriculture Act of 1977 (7 U.S.C. 1309) is amended—

(1) by striking out "1985" each place it appears and inserting in lieu thereof "1989"; and

(2) by striking out "and feed grains" each place it appears and inserting in lieu thereof ", feed grains, upland cotton, and rice".

TITLE XVI—CONSERVATION

Subtitle A—Definitions

DEFINITIONS

SEC. 1601. (a) For purposes of subtitles A through D:

(1) The term "agricultural commodity" means—

(A) any agricultural commodity planted and produced in a State by annual tilling of the soil, including tilling by one-trip planters; or

(B) sugarcane planted and produced in a State.

(2) The term "conservation district" means any district or unit of State or local government formed under State or territorial law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of State or local government may be referred to as a "conservation district", "soil conservation district", "soil and water conservation district", "resource conservation district", "natural resource district", "land conservation committee", or a similar name.

(3) The term "conservation payment" means a payment made by the Secretary to an owner or operator of a farm or ranch containing eligible erosion-prone land to reimburse such owner or operator for the cost of establishing vegetative cover on such land in accordance with subtitle D.

(4)(A) The term "converted wetland" means wetland that has been drained, dredged, filled, leveled, or otherwise manipulated by any activity that results in impairing or reducing the flow, circulation, or reach of water for the purpose of, or that has the effect of, making the land suitable for the production of an agricultural commodity if—

(i) the production of such commodity would not have been possible if such action had not been taken; and

(ii) before such action was taken, the land—

(I) was wetland; and

(II) was not highly erodible land.

(B) Wetland shall not be considered converted wetland if production of an agricultural commodity on such land during a crop year—

(i) is possible as a result of a natural condition, such as drought; and

(ii) is not assisted by an action of the producer that destroys natural wetland characteristics.

(5) The term "eligible erosion-prone land" means erosion-prone land that has been devoted, or has been considered to be devoted, to the production of an agricultural commodity during at least 2 of the 3 consecutive crop years ending prior to January 1, 1986.

(6) The term "erosion-prone land" means land that—

(A) is classified by the Soil Conservation Service as class IVe, VI, VII, or VIII land under the land capability classification system in effect on the date of enactment of this Act; or

(B) has or, if used to produce an agricultural commodity, would have an excessive rate of erosion, as determined by the Secretary, based on application of the appropriate factors of the universal soil loss equation and the wind erosion equation used by the Secretary, including climate, soil erodibility, and field slope.

(7) The term "field" means such term as is defined in section 718.2(b)(9) of title 7 of the Code of Federal Regulations (as of January 1, 1985), except that any highly erodible land on which an agricultural commodity is produced after the date of enactment of this Act and that is not exempt under section 1612 shall be considered as part of the field in which such land was included on such date, unless the Secretary permits modification of the boundaries of the field to carry out subtitle B.

(8) The term "highly erodible land" means land classified by the Soil Conservation Service as class IIIe, IVe, VI, VII, or VIII land under the land capability classification system in effect on the date of enactment of this Act.

(9) The term "hydric soil" means soil that, in its undrained condition, is saturated, flooded, or ponded long enough during a growing season to develop an anaerobic condition that supports the growth and regeneration of hydrophytic vegetation.

(10) The term "hydrophytic vegetation" means a plant growing in—

(A) water; or

(B) a substrate that is at least periodically deficient in oxygen during a growing season as a result of excessive water content.

(11) The term "in-kind commodities" means commodities that are normally produced on land that is the subject of an agreement entered into under subtitle D.

(12) The term "operator" means the operator of erosion-prone land.

(13) The term "owner" means the owner of erosion-prone land.

(14) The term "rental payment" means a payment made by the Secretary to an owner or operator of a farm or ranch containing eligible erosion-prone land to compensate the owner or operator for retiring such land from crop production and placing such land in the conservation acreage reserve in accordance with subtitle D.

(15) The term "Secretary" means the Secretary of Agriculture.

(16) The term "shelterbelt" means a vegetative barrier with a linear configuration composed of trees, shrubs, and other approved perennial vegetation.

(17) The term "State" means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

(18) The term "vegetative cover" means—

(A) perennial grasses or legumes with an expected life span of 5 or more years; or

(B) trees.

(19) The term "wetland" means an area (including a swamp, marsh, bog, prairie pothole, or similar area) having a predominance of hydric soils that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances supports, the growth and regeneration of hydrophytic vegetation.

(b) The land capability class for a field shall be that class determined by the Secretary to be the predominant class under regulations issued by the Secretary.

(c) The Secretary shall develop—

(1) criteria for the identification of hydric soils and hydrophytic vegetation; and

(2) lists of such soils and such vegetation.

Subtitle B—Highly Erodible Land Conservation

PROGRAM INELIGIBILITY

SEC. 1611. (a) Except as provided in section 1612 and notwithstanding any other provision of law, following the date of enactment of this Act, any person who produces an agricultural commodity in any crop year on a field in which highly erodible land is the predominant class shall be ineligible for—

(1) as to any commodity produced during that crop year by such person—

(A) any price support or payment made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), or any other Act;

(B) a farm storage facility loan made under section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h));

(C) crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.);

(D) a disaster payment made under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.); or

(E) a loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, if the Secretary determines that the proceeds of such loan will be used for a purpose that will contribute to excessive erosion of highly erodible land; or

(2) a payment made under section 4 or 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b or 714c) during such crop year for the storage of an agricultural commodity acquired by the Commodity Credit Corporation.

EXEMPTIONS

SEC. 1612. Section 1611 shall not apply to—

(1) any person who produces an agricultural commodity in any crop year on a field in which highly erodible land is the predominant class if all the commodities so

produced by such person during such crop year were—

(A) produced on land that was cultivated to produce any of the 1981 through 1985 crops of such commodities;

(B) planted before the date of enactment of this Act;

(C) planted during any crop year beginning before the date of enactment of this Act; or

(D) produced—

(i) in the case of any area within a conservation district, under a conservation system that has been approved by a conservation district after the district has determined that the conservation system is in conformity with technical standards set forth in the Soil Conservation Service technical guide for such district; or

(ii) in the case of an area not within a conservation district, under a conservation system determined by the Secretary to be adequate for the production of such agricultural commodity on any highly erodible land subject to this Act;

(2) any loan described in section 1611 made before the date of enactment of this Act; or

(3) any person who produces an agricultural commodity on any highly erodible land during any crop year if such land was planted in reliance on a determination made by the Soil Conservation Service that such land was not highly erodible land, except that this paragraph shall not apply to any agricultural commodity that was planted on any land after the Soil Conservation Service determines that such land is highly erodible land.

CONSERVATION SYSTEMS ON EXEMPTED HIGHLY ERODIBLE LAND

SEC. 1613. (a) Notwithstanding any other provision of law, the Secretary shall require that, as a condition of eligibility for a loan, purchase, or payment authorized for any agricultural commodity under any program carried out by the Secretary or the Commodity Credit Corporation, any person who produces an agricultural commodity on highly erodible land must use a conservation system determined to be appropriate for such land by—

(1) in the case of land within a conservation district, such district; or

(2) in the case of land not within a conservation district, the Secretary.

(b) This section shall apply to land beginning with the later of—

(1) the 1988 crop year; or

(2) the date that is 2 years after the date such land is mapped by the Soil Conservation Service for purposes of classifying such land under the land capability classification system.

SOIL SURVEYS

SEC. 1614. (a) The Secretary shall, as soon as is practicable after the date of enactment of this Act, complete soil surveys on those private lands that do not have a soil survey suitable for use in determining the land capability class for purposes of this subtitle.

(b) In carrying out subsection (a), the Secretary shall, insofar as possible, concentrate on those localities where significant amounts of highly erodible land are being converted to the production of agricultural commodities.

ADMINISTRATION

SEC. 1615. (a) In carrying out this subtitle, the Secretary shall use the services of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)).

(b) The Secretary shall establish, by regulation, an appeal procedure under which—

(1) a person who produces an agricultural commodity on land classified as class IIIe, IVe, VI, VII, or VIII land under the land capability classification system applicable under this subtitle may seek review of such classification; and

(2) a person who is adversely affected by any determination made under this subtitle may seek review of such determination.

(c) The authority provided by this subtitle shall be in addition to, and not in place of, other authority granted to the Secretary and the Commodity Credit Corporation.

REGULATIONS

SEC. 1616. Not later than 180 days after the date of enactment of this Act, the Secretary shall issue such regulations as the Secretary determines are necessary to carry out this subtitle, including regulations that—

(1) define the term "person";

(2) govern the determination of persons who shall be ineligible for program benefits under this subtitle, so as to ensure a fair and reasonable determination of ineligibility; and

(3) protect the interests of tenants and sharecroppers.

Subtitle C—Wetland Conservation

PROGRAM INELIGIBILITY

SEC. 1621. (a) Except as provided in section 1622 and notwithstanding any other provision of law, following the date of enactment of this Act, any person who produces an agricultural commodity in any crop year on converted wetland shall be ineligible, as to any commodity produced during that crop year by such person, for—

(1) as to any commodity produced during that crop year by such person—

(A) any price support or payment made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), or any other Act;

(B) a farm storage facility loan made under section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h));

(C) crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.);

(D) a disaster payment under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.); or

(E) a loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, if the Secretary determines that the proceeds of such loan will be used for a purpose that will contribute to the conversion of wetland; or

(2) a payment made under section 4 or 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b or 714c) during such crop year for the storage of an agricultural commodity acquired by the Commodity Credit Corporation.

EXEMPTIONS

SEC. 1622. (a) Section 1621 shall not apply to—

(1) any person who, during any crop year, produces an agricultural commodity on converted wetland, if the conversion of such wetland was commenced before the date of enactment of this Act;

(2) any person who produces an agricultural commodity on—

(A) land that has been converted to artificial wetland, in an area that was not wetland, for a purpose such as stockwater, fish production, irrigation (including subsurface irrigation), a settling basin, cooling, rice growing, or flood control; or

(B) wetland created as a result of irrigation or an irrigation system; or

(3) any loan made before the date of enactment of this Act.

(b) The Secretary may exempt a person from section 1621 for any action associated with the production of an agricultural commodity on converted wetland if the effect of such action, individually and in connection with all other similar actions authorized by the Secretary in the area, on the hydrological and biological aspect of wetland is minimal.

ADMINISTRATION

SEC. 1623. (a) The Secretary shall establish, by regulation, an appeal procedure under which—

(1) a person who produces an agricultural commodity on land determined to be converted wetland may seek review of such determination; and

(2) a person who is adversely affected by any determination made under this subtitle may seek review of such determination.

(b) The Secretary shall consult with the Secretary of the Interior on such determinations and actions as are necessary to carry out this subtitle, including—

(1) the identification of wetland;

(2) the determination of exemptions under section 1622; and

(3) the issuance of regulations under section 1624.

REGULATIONS

SEC. 1624. Not later than 180 days after the date of enactment of this Act, the Secretary shall issue such regulations as the Secretary determines are necessary to carry out this subtitle, including regulations that—

(1) define the term "person";

(2) govern the determination of persons who shall be ineligible for program benefits under this subtitle, so as to ensure a fair and reasonable determination of ineligibility; and

(3) protect the interests of tenants and sharecroppers.

Subtitle D—Conservation Acreage Reserve

CONSERVATION ACREAGE RESERVE

SEC. 1631. (a) During the 1986 through 1990 crop years, the Secretary shall establish and carry out a conservation acreage reserve programs to assist owners and operators of farms and ranches containing eligible erosion-prone land.

(b) In carrying out such programs, the Secretary shall provide assistance to such owners and operators to make changes in their cropping practices and land-use systems in order to—

(1) convert eligible erosion-prone land on farms or ranches normally devoted to the production of agricultural commodities to less intensive uses (such as pasture, permanent grass or legumes, or trees); and

(2) place such land in the conservation acreage reserves established under this subtitle.

(c) The Secretary shall enter into contracts with owners and operators of farms and ranches containing eligible erosion-prone land to place in a long-term conservation acreage reserve—

(1) during the 1986 crop year, not less than 9, nor more than 30, million acres;

(2) during the 1986 through 1987 crop years, a total of not less than 13, nor more than 30, million acres; and

(3) during the 1986 through 1988 crop years, a total of not less than 17, nor more than 30, million acres; and

"(4) during the 1986 through 1989 crop years, a total of not less than 25, nor more than 30, million acres.".

(d) For the purpose of carrying out the long-term conservation acreage reserve, the Secretary shall enter into contracts of not less than 7, nor more than 15, years.

(e)(1) In addition to the acreage required to be placed in the conservation acreage reserve under subsection (c), during the 1986 crop year, the Secretary shall enter into contracts with owners and operators of farms and ranches containing eligible erosion-prone land to place in a short-term conservation acreage reserve 15 million acres of eligible erosion-prone land.

(2) For purposes of carrying out this subsection, the Secretary shall enter into contracts during crop year 1986 for the 3 crop years 1986 through 1988.

(3) Payments under a contract entered into under this subsection shall be made in in-kind commodities pursuant to the provisions of section 1634(d)(3) of this subtitle and in such amounts as are agreed on and specified in the contract.

DUTIES OF OWNERS AND OPERATORS

SEC. 1632. (a) Under the terms of a contract entered into under this subtitle, during the term of such contract, an owner or operator of a farm or ranch must agree—

(1) to implement a plan approved by a conservation district (or in an area not located within a conservation district, a plan approved by the Secretary) for converting eligible erosion-prone land normally devoted to the production of an agricultural commodity to a less intensive use (as defined by the Secretary), such as pasture, permanent grass or legumes, or trees, substantially in accordance with a schedule outlined in the plan;

(2) to place eligible erosion-prone land subject to the contract in the conservation acreage reserves established under this subtitle;

(3) not to use such land for agricultural purposes, except as permitted by the Secretary;

(4) to establish approved vegetative cover on such land;

(5) on the violation of a term or condition of the contract at any time the owner or operator has control of such land—

(A) to forfeit all rights to receive rental payments and conservation payments under the contract and to refund to the Secretary any rental payments and conservation payments received by the owner or operator under the contract, together with interest thereon as determined by the Secretary, if the Secretary determines that such violation is of such nature as to warrant termination of the contract; or

(B) to refund to the Secretary, or accept adjustments to, the rental payments and conservation payments provided to the owner or operator, as the Secretary considers appropriate, if the Secretary determines that such violation does not warrant termination of the contract;

(6) on the transfer of the right and interest of the owner or operator in land subject to the contract—

(A) to forfeit all rights to rental payments and conservation payments under the contract; and

(B) to refund to the United States all rental payments and conservation payments received by the owner or operator, together with interest thereon as determined by the Secretary,

unless the transferee of such land agrees with the Secretary to assume all obligations of the contract, or enters into a new contract with the Secretary, in accordance with section 1635(a);

(7) not to conduct any harvesting, grazing, or haying, or otherwise make commercial use of the forage or trees, on land subject to the contract, unless it is expressly permitted in the contract or under subsection (e);

(8) not to adopt any practice specified by the Secretary in the contract as a practice that would tend to defeat the purposes of this subtitle; and

(9) to comply with such additional provisions as the Secretary determines are desirable to carry out this subtitle or to facilitate its administration.

(b) The plan referred to in subsection (a)(1) shall set forth—

(1) the conservation measures and practices to be carried out by the owner or operator during the term of the contract; and

(2) the commercial use, if any, to be permitted on the land during such term.

(c)(1) To the extent practicable, at least 10 percent of the total acreage placed under contracts entered into under subsections (c) and (d) of section 1631 of this subtitle shall be devoted to shelterbelts in areas prone to wind erosion.

(2) An owner or operator may not devote more acreage to shelterbelts established under this subtitle than is consistent with effective wind erosion control practices in the area, as determined by the Secretary.

(d) A portion of the contracts entered into under subsections (c) and (d) of section 1631 of this subtitle shall be made with owners and operators who agree to plant trees as the vegetative cover required under subsection (a)(4).

(e)(1) Except as provided in paragraphs (2) and (3), the Secretary may designate a State, or part of a State, as an area in which an owner or operator holding a contract entered into under this subtitle may be permitted, on an individual basis, to conduct haying or grazing, subject to such terms and conditions as the Secretary may prescribe, on land subject to such contract.

(2) Haying or grazing may be permitted under paragraph (1) only during the 6 principal nongrowing months of a year.

(3) The Secretary may not designate a State, or part of a State, under paragraph (1) for more than 1 year at a time.

DUTIES OF THE SECRETARY

SEC. 1633. In return for a contract entered into by an owner or operator under section 1631, the Secretary shall—

(1) share not more than 50 per centum of the cost of carrying out those conservation measures and practices set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest;

(2) for a period of years not in excess of the term of the contract, pay a rental payment in an amount necessary to compensate for—

(A) the conversion of eligible erosion-prone land normally devoted to the production of an agricultural commodity on a farm or ranch to a less intensive use; and

(B) the retirement of any cropland base and allotment history that the owner or operator agrees to retire permanently; and

(3) provide conservation technical assistance to assist the owner or operator in carrying out the contract.

PAYMENTS

SEC. 1634. (a) In determining the amount of rental payments to be paid to owners and operators for converting eligible erosion-prone land to less intensive uses, the Secretary may consider, among other things, the amount necessary to encourage owners or operators of eligible erosion-prone land to participate in the conservation acreage reserve programs.

(b) The amounts payable to owners or operators in the form of rental payments under contracts entered into under this subtitle may be determined through—

(1) the submission of bids for such contracts by owners and operators in such manner as the Secretary may prescribe; or

(2) such other means as the Secretary determines are appropriate.

(c)(1) In determining the acceptability of contract offers, the Secretary shall give priority to those offers that will result in the lowest cost to the Federal Government when calculated on the basis of all relevant factors, including—

(A) the rate of compensation necessary to encourage owners or operators of eligible erosion-prone land to participate in the conservation acreage reserve programs;

(B) the extent of erosion on, and the productivity of, the land that is the subject of the contract;

(C) the number of acres of eligible erosion-prone land removed from production each year;

(D) the amount of funds made available to carry out this subtitle;

(E) the extent to which eligible erosion-prone land may contribute to off-site damages; and

(F) the potential benefits to wildlife.

(2) In determining the acceptability of contract offers, the Secretary may establish different criteria in various States and regions of the United States to determine the extent to which erosion may be abated.

"(3) The Secretary shall provide payment of obligations incurred by the Secretary under a contract as follows:

"(A) any cost-sharing obligation shall be paid as soon as possible after the obligation is incurred; and

"(B) any annual rental payment obligation shall be paid as soon as practicable after October 1 of each calendar year, or, at the discretion of the Secretary, at any time prior to such date during the year for which the obligation is incurred."

"(d)(1) Notwithstanding any other provision of law, the annual rental payment under a contract entered into under subsections (c) and (d) of section 1631 of this subtitle shall be made—

"(A) for the first year in which the contract is in effect, in cash; and

"(B) for any subsequent year in which the contract is in effect (i) in in-kind commodities in such amounts as are agreed on and specified in the contract, except that such payment shall be made in cash to the extent that the use of commodities is limited under paragraph (2)."

(2) The Secretary may use a commodity acquired by the Commodity Credit Corporation to make such payment only if the Secretary makes a finding that the use of such commodity will not displace to a significant degree the usual marketings of such commodity.

(3) If such payment is made with in-kind commodities, such payment shall be made by the Commodity Credit Corporation—

(A) by delivery of the commodity involved to the owner or operator at a warehouse or other similar facility located in the county in which the eligible erosion-prone land is located or at such other location as is agreed to by the Secretary and the owner or operator;

(B) by the transfer of negotiable warehouse receipts; or

(C) by such other method, including the sale of the commodity in commercial markets, as is determined by the Secretary to be appropriate to enable the owner or operator to receive efficient and expeditious possession of the commodity.

(4) If stocks of a commodity acquired by the Commodity Credit Corporation are not readily available to make full payment in kind to the owner or operator, the Secretary may substitute full or partial payment in cash for payment in kind.

(f) The Secretary and an owner or operator who enters into a contract under this subtitle may agree to have a rental payment provided for a particular year or conservation payments, or both, made under a contract—

(1) on the determination of compliance with the terms and conditions of the contract; or

(2) in advance of the determination of compliance with the terms and conditions of the contract.

(g) If an owner or operator who is entitled to a payment under a contract entered into under this subtitle dies, becomes incompetent, is otherwise unable to receive such payment, or is succeeded by another person who renders or completes the required performance, the Secretary shall make such payment in accordance with regulations prescribed by the Secretary and without regard to any other provision of law, in such manner as the Secretary determines is fair and reasonable.

(h)(1) The total amount of rental payments, including rental payments made in the form of in-kind commodities, made to an owner or operator under this subtitle for any fiscal year may not exceed $50,000.

(2) Such rental payments received by an owner or operator shall be in addition to, and not affect, the total amount of payments that such owner or operator is otherwise eligible to receive under this Act or the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).

CONTRACTS

SEC. 1635. (a) If during the term of a contract entered into under this subtitle an owner or operator of land subject to such contract sells or otherwise transfers the ownership or right of occupancy of such land, the new owner or operator of such land may—

(1) continue such contract under the same terms or conditions;

(2) enter into a new contract in accordance with this subtitle; or

(3) elect not to participate in the program established by this subtitle.

(b)(1) The Secretary may modify a contract entered into with an owner or operator under this subtitle if—

(A) the owner or operator agrees to such modification; and

(B) the Secretary determines that such modification is desirable—

(i) to carry out this subtitle;

(ii) to facilitate the practical administration of this subtitle; or

(iii) to achieve such other goals as the Secretary determines are appropriate, consistent with this subtitle.

(2) The Secretary may modify or waive a term or condition of a contract entered into under this subtitle in order to permit all or part of the land subject to such contract to be devoted to the production of an agricultural commodity during a crop year, subject to such conditions as the Secretary determines are appropriate.

(c)(1) The Secretary may terminate a contract entered into with an owner or operator under this subtitle if—

(A) the owner or operator agrees to such termination; and

(B) the Secretary determines that such termination would be in the public interest.

(2) At least 90 days before taking any action to terminate under paragraph (1) all conservation acreage reserve contracts entered into under this subtitle, the Secretary shall provide written notice of such action to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

ADMINISTRATION

SEC. 1636. (a)(1) During each of the fiscal years ending September 30, 1986, and September 30, 1987, the Secretary shall use the facilities, services, authorities, and funds of the Commodity Credit Corporation to carry out this subtitle.

(2) During the fiscal year ending September 30, 1988, and each fiscal year thereafter, the Secretary may use the facilities, services, authorities, and funds of the Commodity Credit Corporation to carry out this subtitle, except that the Secretary may not use funds of the Corporation for such purpose unless the Corporation has received funds to cover such expenditures from appropriations made to carry out this subtitle.

(b) In carrying out this subtitle, the Secretary may utilize the services of the Soil Conservation Service and the Forest Service, the Fish and Wildlife Service, State forestry agencies, State fish and game agencies, land-grant colleges, local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h), soil and water conservation districts, and other appropriate agencies.

(c) In carrying out this subtitle at the State and county levels, the Secretary shall consult with, to the extent practicable, the Fish and Wildlife Service, State forestry agencies, State fish and game agencies, land-grant colleges, soil-conservation districts, and other appropriate agencies and groups.

(d) In carrying out this subtitle, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under the program established by this subtitle.

(e)(1) Except as provided in paragraph (2), for the purpose of any other program administered by the Secretary, if an owner or operator diverts acreage from the production of an agricultural commodity under a contract entered into under this subtitle, any cropland base or allotment history with respect to such acreage shall be retired.

(2) Paragraph (1) shall not prohibit an owner or operator from establishing a cropland base or allotment history on such acreage under law applicable on the expiration of such contract.

(f) The authority provided by this subtitle shall be in addition to, and not in place of, other authorities available to the Secretary and the Commodity Credit Corporation.

REGULATIONS

SEC. 1637. Not later than 180 days after the date of enactment of this Act, the Secretary shall issue such regulations as the Secretary determines are necessary to carry out this subtitle.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1638. There are authorized to be appropriated without fiscal year limitation such sums as may be necessary to carry out this subtitle.

Subtitle E—Other Conservation Provisions

CONSERVATION EASEMENTS

SEC. 1641. (a) The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 349. (a) For purposes of this section:

"(1) The term 'governmental entity' means any agency of the United States, a State, or a unit of local government of a State.

"(2) The term 'highly erodible land' means such term as defined in section 1601(a)(8) of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(3) The term 'wetland' means such term as defined in section 1601(a)(19) of such Act.

"(4) The term 'wildlife' means fish or wildlife as defined in section 2(a) of the Lacey Act Amendments of 1981 (16 U.S.C. 3371(a)).

"(b) Subject to subsection (c), the Secretary may acquire and retain an easement in real property, for a term of not less than 50 years, for conservation, recreational, and wildlife purposes.

"(c) Such easement may be acquired or retained for real property if such property—

"(1) is wetland or highly erodible land;

"(2) is determined by the Secretary to be suitable for the purpose involved;

"(3)(A)(i) secures any loan made under any law administered by the Farmers Home Administration and held by the Secretary; and

"(ii) the borrower of such loan is unable, as determined by the Secretary, to repay such loan in a timely manner; or

"(B) is administered under this title by the Secretary; and

"(4) was row cropped in each year of the 3-year period ending on the date of the enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(d) The terms and conditions specified in each such easement shall—

"(1) specify the purposes for which such real property may be used;

"(2) identify the conservation measures to be taken, and the recreational and wildlife uses to be allowed, with respect to such real property; and

"(3) require such owner to allow the Secretary, and any person or governmental entity designated by the Secretary, to have access to such real property for the purpose of monitoring compliance with such easement.

"(e) Any such easement acquired by the Secretary shall be purchased from the borrower involved by canceling that part of the aggregate amount of such outstanding loans of the borrower held by the Secretary under laws administered by the Farmers Home Administration that bears the same ratio to the aggregate amount of the outstanding loans of such borrower held by the Secretary under all such laws as the number of acres of the real property of such borrower that are subject to such easement bears to

the aggregate number of acres securing such loans.

"(f) If the Secretary elects to use the authority provided by this section, the Secretary shall consult with the Director of the Fish and Wildlife Service for purposes of—

"(1) selecting real property in which the Secretary may acquire easements under this section;

"(2) formulating the terms and conditions of such easements; and

"(3) enforcing such easements.

"(g) The Secretary, and any person or governmental entity designated by the Secretary, may enforce an easement acquired by the Secretary under this section.

"(h) This section shall not apply with respect to the cancellation of any part of any loan that was made after the date of the enactment of Agriculture, Food, Trade, and Conservation Act of 1985.".

(b)(1) The last sentence of section 335(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985(c)) is amended by inserting ", other than easements acquired under section 349" before the period at the end thereof.

(2) The second sentence of section 1001 of the Agricultural Act of 1970 (16 U.S.C. 1501) is amended—

(1) by striking out "perpetual"; and

(2) by inserting "for a term of not less than 50 years" after "easements".

(c) Any part of a loan canceled under section 339 of the Consolidated Farm and Rural Development Act shall not be included in income, and shall not have any effect on any tax attributed to any taxpayer or property, for purposes of the Internal Revenue Code of 1954.

DRY LAND FARMING

SEC. 1642. The first sentence of section 7(a) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590g(a)) is amended—

(1) by striking out "and" at the end of clause (5); and

(2) by inserting before the period the following:

", and (7) the promotion of energy and water conservation through dry land farming".

AGRICULTURAL CONSERVATION PROGRAM

SEC. 1643. Section 8(d) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(d)) is amended by adding at the end thereof the following new paragraph:

"To be eligible to receive a payment or grant of aid made under the agricultural conservation program authorized by sections 7 through 15, 16(a), 16(f), and 17 of this Act and sections 1001 through 1008 and 1010 of the Agricultural Act of 1970 (16 U.S.C. 1501 through 1508 and 1510), a producer must use such payment or grant in accordance with a conservation plan approved by (1) the soil and water conservation district or districts in which the land described in the plan is situated, or (2) in areas where such district or districts does not exist or fails to act on the approval of such plan, the Secretary of Agriculture. In order to receive such approval, such plan must ensure that soil loss levels on lands subject to such plan do not exceed the soil loss tolerance levels determined by the Secretary of Agriculture. The Secretary of Agriculture shall provide technical assistance to producers to assist producers in preparing such plans.".

SOIL AND WATER RESOURCES CONSERVATION

SEC. 1644. (a) Subsection (d) of section 5 of the Soil and Water Resources Conservation Act of 1977 (16 U.S.C. 2004(d)) is amended to read as follows:

"(d)(1) An appraisal required by this Act shall be completed not later than December 31, 1979, December 31, 1984, December 31, 1994, and December 31, 2004.

"(2) In the case of an appraisal due to be completed after December 31, 1984, the Secretary may supplement the preceding appraisal in lieu of preparing a new appraisal.

"(3) The Secretary may make such additional interim appraisals as the Secretary considers appropriate.".

(b) The second sentence of section 6(a) of such Act (16 U.S.C. 2205(a)) is amended by striking out "and responsibilities" and inserting in lieu thereof ", responsibilities, and priorities".

(c) Subsection (b) of section 6 of such Act (16 U.S.C. 2005(b)) is amended to read as follows:

"(b)(1) A program plan required by this section shall be completed not later than December 31, 1979, December 31, 1984, December 31, 1994, and December 31, 2004.

"(2) In the case of a program plan due to be completed after December 31, 1984, the Secretary may supplement the preceding program plan in lieu of preparing a new plan.".

(d) Section 7(a) of such Act (16 U.S.C. 2006(a)) is amended by striking out "and at each 5-year interval thereafter during the period this Act is in effect" and inserting in lieu thereof ", 1984, 1994, and 2004,".

(e) Section 10 of such Act (16 U.S.C. 2009) is amended by striking out "1985" and inserting in lieu thereof "2005".

SOIL CONSERVATION SERVICE

SEC. 1645. (a) Congress finds that—

(1) the well-being of the United States is dependent on efficient and productive agriculture, that requires a fertile and well cared for soil resource base and a plentiful water supply;

(2) the Soil Conservation Service assists individuals, groups, organizations, cities and towns, and county and State governments to reduce the costly waste of land and resources and to use these national assets;

(3) the Soil Conservation Service, since its establishment in 1935 within the Department of Agriculture, has diligently carried out its missions of soil and water conservation, natural resource surveys, and community resource protection and development;

(4) the Soil Conservation Service—

(A) provides vitally needed technical and financial assistance to achieve its conservation objectives on non-Federal land; and

(B) is assisted in this work through its partnership with over 3,000 conservation districts covering more than 2 billion acres in all 50 States, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States;

(5) it is estimated that 67 percent of all cropland acres in the United States is in need of conservation treatment;

(6) the annual rate of erosion on the 413 million acres of cropland in the United States exceeds the maximum rate of loss with which indefinite and prosperous productivity can be maintained;

(7) the continued efforts of the Soil Conservation Service are required to combat this serious national problem; and

(8) the water resources of the United States have moved to the forefront of national concern requiring the continued establishment of—

(A) watershed projects;

(B) techniques for the improvement of water quality, including the reduction of sediments, organic wastes, pesticides, and salts; and

(C) improved irrigation systems and management, as planned and designed by the Soil Conservation Service.

(b) It is the sense of Congress that—

(1) the vital work of the Soil Conservation Service be vigorously pursued to address the serious soil and water problems still confronting the United States; and

(2) adequate support and funding be continued for the Soil Conservation Service and its necessary programs.

SOFTWOOD TIMBER

SEC. 1646. Section 608 of the Agricultural Programs Adjustment Act of 1984 (7 U.S.C. 1981 note) is amended to read as follows:

"SOFTWOOD TIMBER

"SEC. 608. (a)(1) Notwithstanding any other provision of law, the Secretary of Agriculture (hereafter in this section referred to as the 'Secretary') shall implement a program under which a delinquent loan made or insured under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.), or a portion thereof, may be reamortized with the use of future revenue produced from the planting of softwood timber crops on land that—

"(A) was previously used to produce an agricultural commodity or as pasture; and

"(B) secures a loan made or insured under such Act.

"(2) Accrued interest on a loan reamortized under this section may be capitalized and interest charged on such interest.

"(3) Payments on such reamortized loan may be deferred until such softwood timber crop produces revenue or for a term of 45 years, whichever comes first.

"(4) Repayment of such reamortized loan shall be made not later than 50 years after the date of reamortization.

"(b) The interest rate on such reamortized loans shall be determined by the Secretary, but not in excess of the current average yield on outstanding marketable obligations of the United States with periods to maturity comparable to the average maturities of such loans, plus not to exceed 1 percent, as determined by the Secretary and adjusted to the nearest one-eighth of 1 percent.

"(c) To be eligible for such program—

"(1) the borrower of such reamortized loan must place not less than 50 acres of such land in softwood timber production;

"(2) such land (including timber) may not have any lien against such land other than a lien for—

"(A) a loan made or insured under the Consolidated Farm and Rural Development Act to secure such reamortized loan; or

"(B) a loan made under this section, at the time of reamortization or thereafter, that is subject to a lien on such land (including timber) in favor of the Secretary; and

"(3) the total amount of loans secured by such land (including timber) may not exceed $1,000 per acre.

"(d)(1) To assist such borrowers to place such land in softwood timber production, the Secretary may make loans to such borrowers for such purpose in an aggregate amount not to exceed $100,000 per borrower.

"(2) Any such loan shall be secured by the land (including timber) on which the trees are planted.

"(3) Such loans shall be made on the same terms and conditions as are provided in this section for reamortized loans.

"(e) The Secretary shall issue such rules as are necessary to carry out this section, in-

cluding rules prescribing terms and conditions for—

"(1) reamortizing and making loans under this section; and

"(2) entering into security instruments and agreements under this section.

"(f) There are authorized to be appropriated such sums as are necessary to carry out this section.".

AUTHORIZATION OF LOAN AMOUNTS

SEC. 1715. (a) Subsection (b) of section 346 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1994(b)) is amended to read as follows:

"(b)(1)(A) For each of the fiscal years ending September 30, 1986, through September 30, 1988, real estate and operating loans may be insured, made to be sold and insured, or guaranteed in accordance with subtitles A and B, respectively, from the Agricultural Credit Insurance Fund established under section 309 in an amount equal to $4,000,000,000, of which not less than $520,000,000 shall be for farm ownership loans under subtitle A.

"(B) Subject to subparagraph (C), such amount shall be apportioned as follows:

"(i) For the fiscal year ending September 30, 1986—

"(I) $2,000,000,000 for insured loans, of which not less than $260,000,000 shall be for farm ownership loans; and

"(II) $2,000,000,000 for guaranteed loans, of which not less than $260,000,000 shall be for guarantees of farm ownership loans.

"(ii) For the fiscal year ending September 30, 1987—

"(I) $1,500,000,000 for insured loans, of which not less than $195,000,000 shall be for farm ownership loans; and

"(II) $2,500,000,000 for guaranteed loans, of which not less than $325,000,000 shall be for guarantees of farm ownership loans.

"(iii) For the fiscal year ending September 30, 1988—

"(I) $1,000,000,000 for insured loans, of which not less than $130,000,000 shall be for farm ownership loans; and

"(II) $3,000,000,000 for guaranteed loans, of which not less than $390,000,000 shall be for guarantees of farm ownership loans.

"(C) For each of the fiscal years referred to in subparagraph (A), the Secretary may transfer not more than 25 percent of the amounts authorized for guaranteed loans to amounts authorized for insured loans.

"(D) For each of the fiscal years ending September 30, 1986, through September 30, 1988, emergency loans may be insured, made to be sold and insured, or guaranteed in accordance with subtitle C from the Agricultural Credit Insurance Fund in such amounts as are necessary to meet the needs resulting from natural disasters.

"(2)(A) For each of the fiscal years ending September 30, 1986, through September 30, 1988, loans for the production and distribution of ethanol in rural areas may be guaranteed in accordance with section 310B from the Rural Development Insurance Fund established under section 309A in the amount of $150,000,000.

"(B) For the fiscal year ending September 30, 1986, water and waste facility loans may be insured, or made to be sold and insured, in accordance with section 306 from the Rural Development Insurance Fund in the amount of $75,000,000.".

(b) Section 346(e)(1) of such Act is amended—

(1) by striking out "20" each place it appears and inserting in lieu thereof "25"; and

(2) by striking out "fiscal year 1984" and inserting in lieu thereof "each fiscal year".

(c) Section 346 of such Act (as amended by subsection (b)) is amended—

(1) by striking out subsection (d); and

(2) by redesignating subsection (e) as subsection (d).

On page 31, beginning with line 16, strike out all through and including line thru page 66, and insert in lieu thereof the following:

GRANTS FOR INTERNATIONAL TRADE DEVELOPMENT CENTERS

SEC. 113. (a)(1) The Secretary of Agriculture (hereafter in this section referred to as the "Secretary") may establish and carry out a program to make grants to States for the purpose of paying the costs of construction, employing personnel, acquiring equipment, and taking other action relating to the establishment and operation of international trade development centers, or the expansion of existing international trade development centers, in the United States to enhance the exportation of United States agricultural products and related products.

(2) Such grants shall be based on a matching formula of 50 percent Federal and 50 percent non-Federal funding.

(b) In making grants under subsection (a), the Secretary shall give preference to States that intend to utilize as sites for international trade development centers land-grant colleges and universities (as defined in section 1404(10) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103(10)) that—

(1) operate agricultural programs;

(2) have existing international trade programs that use an interdisciplinary approach and are operated jointly with State and Federal agencies to address international trade problems; and

(3) have a communications system that can be used on an international basis to conduct conferences or trade negotiations.

(c) Such centers may—

(1) through research, establish a permanent data base to address the problems faced by potential exporters, including language barriers, interaction with representatives of foreign governments, transportation of goods and products, insurance and financing within foreign countries, and collecting international marketing data;

(2) be used to locate permanent or temporary exhibits that will stimulate and educate trade delegations from foreign countries with respect to United States agricultural products and related products;

(3) be made available for use by State and regional entities for exhibits, trade seminars, and negotiations involving such products; and

(4) carry out such other activities relating to the exportation of such products, as the Secretary may approve.

(d) There are authorized to be appropriated such sums as are necessary to carry out this section.

Subtitle B—Public Law 480 and Related Programs

AGRICULTURAL TRADE POLICY

SEC. 120. (a) The first sentence of section 2 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691) is amended by inserting "to use foreign currencies accruing under this Act to foster and encourage the development of private enterprise in developing countries; to enhance food security in developing countries through local food production;" after "agricultural production;".

(b) Congress finds that additional steps should be taken to use the agricultural abundance produced by American farmers—

(1) to relieve hunger and promote long-term food security and economic development in developing countries in accordance with the development assistance policy established under section 102 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151-1); and

(2) to promote United States agricultural trade interests.

SALES FOR FOREIGN CURRENCIES

SEC. 121. (a) Section 101 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1701) is amended to read as follows:

"SEC. 101. (a) In order to carry out the policies and accomplish the objectives set forth in section 2, the President is authorized to negotiate and carry out agreements with friendly countries to provide for the sale of agricultural commodities—

"(1) for dollars on credit terms;

"(2) to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms that permit conversion to dollars at the exchange rate applicable to the sales agreement; or

"(3) for foreign currencies for use under section 108 on terms that permit conversion to dollars.

"(b)(1) Except as provided in paragraph (2), for the fiscal year ending September 30, 1986, and each fiscal year thereafter, sales for foreign currencies for use under section 108 under agreements entered into under this title shall be made at an annual level of—

"(A) not less than the higher of—

"(i) 25 percent of the aggregate value of all sales of agricultural commodities made under this title; or

"(ii) 500,000 metric tons; and

"(B) not more than 50 percent of the aggregate value of all such sales.

"(2)(A) For each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, except as provided in subparagraph (B), the President may reduce the minimum level of sales for foreign currencies prescribed under paragraph (1)(A) if—

"(i) there is an insufficient number of approved financial intermediaries that have entered into agreements with the Secretary of Agriculture to carry out the program provided for in section 108;

"(ii) there are insufficient requests made by such intermediaries for loan funds to utilize the foreign currencies generated by such sales; or

"(iii) the Secretary requires additional time to implement such program.

"(B) The President may not reduce the minimum level of sales for foreign currencies under subparagraph (A) below an annual level of less than—

"(i) for the fiscal year ending September 30, 1986, 5 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year;

"(ii) for the fiscal year ending September 30, 1987, 10 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year; and

"(iii) for the fiscal year ending September 30, 1988, 15 percent of the aggregate value of all sales of agricultural commodities made under this title during such fiscal year.

"(c) Agreements for sales for foreign currency in a developing country for use under section 108 may not be entered into to the

extent that such agreements would generate currency in amounts that cannot be productively used and absorbed in the private sector of such country.

"(d) Sales for foreign currencies for use under section 108 under agreements entered into under this title shall be made on such terms and conditions as are specified in such agreements.".

(b) Section 103 of such Act (7 U.S.C. 1703) is amended—

(1) by inserting ", in section 108," after "section 104" in subsection (b);

(2) by striking out "for dollars on credit terms" in the last sentence of subsection (d);

(3) in subsection (m)—

(A) by inserting "except as provided in section 108," after the subsection designation;

(B) by striking out the semicolon and inserting in lieu thereof a period; and

(C) by adding at the end thereof the following: "In carrying out this subsection, the President shall require that foreign currencies to be used under section 108 that are acquired under an agreement for the sale of commodities be convertible to dollars during the period beginning 10 years after the date of the last delivery of such commodities and ending 30 years after the date of such delivery. Such agreement for sale shall establish a schedule for such conversion but need not specify the exchange rate for such conversion;";

(4) by striking out "for dollars on credit terms" and "for cash dollars" in subsection (n);

(5) by striking out "Take" in subsection (o) and inserting in lieu thereof "take";

(6) by striking out "Assure convertibility" in subsection (p) and inserting in lieu thereof "except as provided in section 108, assure convertibility"; and

(7) by striking out "Assure convertibility" in subsection (q) and inserting in lieu thereof "except as provided in section 108, assure convertibility".

(c) The first sentence of section 105 of such Act (7 U.S.C. 1705) is amended by striking out "section 104" and inserting in lieu thereof "sections 104 and 108".

(d) Section 106(a) of such Act (7 U.S.C. 1706(a)) is amended by adding at the end thereof the following new paragraph:

"(3) Payment for sales made for foreign currencies that are to be used under section 108 under an agreement entered into under this title shall be made on such terms as are specified in such agreement.".

(e) Such Act is amended by inserting after section 107 (7 U.S.C. 1707) the following new section:

"SEC. 108. Notwithstanding any other provision of law:

"(a) As used in this section:

"(1) The term 'developing country' means a country that is eligible to participate in a sales agreement entered into under this title.

"(2) The term 'financial intermediary' means a bank, financial institution, cooperative, nonprofit voluntary agency, or other organization or entity, as determined by the Secretary, that has the capability of making and servicing a loan in accordance with this section.

"(3) The term 'Secretary' means the Secretary of Agriculture.

"(b) In order to foster and encourage the development of private enterprise institutions and infrastructure as the base for the expansion, promotion, and improvement of the production of food and other related goods and services within a developing country and pursuant to an agreement for the sale of agricultural commodities entered into under this title, the Secretary may enter into an agreement with a financial intermediary located or operating in such country under which the Secretary shall lend to such financial intermediary foreign currency that accrues as a result of commodity sales to such country under a sales agreement entered into under this title after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985.

"(c) To be eligible to obtain foreign currency under this section, a financial intermediary must enter into an agreement with the Secretary under which the intermediary agrees to use such currency to make loans to private individuals, cooperatives, corporations, or other entities within a developing country, at reasonable rates of interest, for the purpose of financing—

"(1) productive, private enterprise investment within such country, including such investment in projects carried out by cooperatives, nonprofit voluntary organizations, and other entities found to be qualified by the Secretary;

"(2) private enterprise facilities for aiding the utilization and distribution, and increasing the consumption of and markets for, United States agricultural commodities and the products thereof; or

"(3) private enterprise support of self-help measures and projects.

"(d) An agreement entered into under this section shall specify the terms and conditions under which the foreign currency shall be used and subsequently repaid to the Secretary, including the following terms and conditions:

"(1) A financial intermediary shall, to the maximum extent feasible, give preference to the financing of agricultural related private enterprise with the funds provided under this section.

"(2)(A) A financial intermediary shall repay a loan made by the Secretary under this section, plus accrued interest, at such times and in such manner as will permit the Secretary to convert such foreign currency to dollars in accordance with the schedule for such conversion.

"(B) A financial intermediary may repay a loan made under this section prior to the repayment date specified in such agreement.

"(3) To be eligible to receive financing from a financial intermediary under this section, an entity or venture must—

"(A) be owned, directly or indirectly, by citizens of the developing country, except that up to 25 percent of such ownership interest may be held by citizens of the United States; and

"(B) not be owned or controlled, in whole or in part, by the government or any governmental subdivision of the developing country.

"(4)(A) The rate of interest charged on funds loaned by the Secretary to a financial intermediary under this section shall be such rate as is determined by the Secretary and the intermediary.

"(B) In the case of a cooperative or nonprofit voluntary agency that is acting as a financial intermediary, the Secretary may charge a lower rate of interest on funds loaned to such intermediary under this section than is charged to other types of intermediaries to defray the startup costs of becoming a financial intermediary.

"(5) No currency made available under this section may be used to promote the production of agricultural commodities or the products thereof that will compete, as determined by the Secretary, in world markets with similar agricultural commodities or the products thereof produced in the United States.

"(6) The Secretary may not require a developing country to guarantee the repayment of a loan made to a financial intermediary under this section as a condition of receipt of such loan.

"(e)(1) All currencies repaid by financial intermediaries under agreements entered into under this section shall be deposited and accounted for in accordance with section 105.

"(2) Currencies repaid by financial intermediaries shall, as determined by the Secretary—

"(A) be used to finance additional productive, private enterprise investment under agreements with financial intermediaries entered into under this section;

"(B) be used for the development of new markets for United States agricultural commodities;

"(C) be used for the payment of United States obligations (including obligations entered into pursuant to other laws of the United States); or

"(D) be converted to dollars.

"(3) Section 1306 of title 31, United States Code, shall apply to currencies used for the purpose specified in paragraph (2)(C).

"(f)(1) Any agreement entered into under this section shall be subject to periodic audit by the Secretary to determine whether the terms and conditions of the agreement are being fulfilled.

"(2) Not later than 180 days after the close of each fiscal year, the Secretary shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the activities carried out under this section during the preceding fiscal year, including an evaluation of the impact of investment under this section on the development of agricultural related private enterprise in each participating country.

"(g) The Secretary may provide agricultural technical assistance to further the purposes of this section, including the funding of market development activities. To the maximum extent practicable, the Secretary shall use at least 5 percent of the foreign currencies obtained for use under this section from sales of agricultural commodities made under agreements entered into under this title after the date of enactment of the Agriculture, Food, Trade, and Conservation Act of 1985 to carry out such assistance.".

MINIMUM QUANTITY OF AGRICULTURAL COMMODITIES DISTRIBUTED UNDER TITLE II

SEC. 122. Section 201(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721(b)) is amended by striking out clauses (1) through (3) and inserting in lieu thereof the following new clauses:

"(1) for each of the fiscal years ending September 30, 1986, and September 30, 1987, shall be 1,900,000 metric tons, of which not less than 1,425,000 metric tons for nonemergency programs shall be distributed through nonprofit voluntary agencies, cooperatives, and the World Food Program; and

"(2) for the fiscal year ending September 30, 1988, and each fiscal year thereafter, shall be 1,700,000 metric tons, of which not less than 1,275,000 metric tons for nonemergency programs shall be distributed

through nonprofit voluntary agencies, cooperatives, and the World Food Program;".

VALUE-ADDED, PROCESSED, AND PROTEIN-FORTIFIED PRODUCTS

SEC. 123. Section 201 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721) is amended by adding at the end thereof the following new subsection:

"(c) In distributing agricultural commodities under this title, the President shall—

"(1) consider—

"(A) the nutritional assistance to recipients and benefits to the United States that would result from distributing such commodities in the form of processed and protein-fortified products, including processed milk, plant protein products, and fruit, nut, and vegetable products;

"(B) the nutritional needs of the proposed recipients of the commodities;

"(C) the cost effectiveness of providing such commodities, for purposes of selecting commodities for distribution under nonemergency programs; and

"(D) the purposes of this title; and

"(2) ensure that at least 75 percent of the quantity of agricultural commodities required to be distributed each fiscal year under subsection (b) for nonemergency programs be in the form of processed or fortified products or bagged commodities.".

FOOD ASSISTANCE PROGRAMS OF VOLUNTARY AGENCIES

SEC. 124. (a) Title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 207. (a)(1) If requested by a nonprofit voluntary agency or cooperative, an agreement with the agency or cooperative for nonemergency assistance under this title may provide for the use by the agency or cooperative of foreign currency proceeds, generated from the sale of commodities made available under the agreement, for purposes specified in subsection (b).

"(2) Such agreements shall provide, in the aggregate for each fiscal year, for the use of foreign currency proceeds under this subsection in an amount that is not less than 5 percent of the aggregate value of the commodities distributed under nonemergency programs under this title for such fiscal year.

"(3) Section 103(c) shall apply to sales of agricultural commodities to generate foreign currencies under this subsection, unless the Secretary of Agriculture, in consultation with the Administrator of the Agency for International Development, waives the application of this paragraph.

"(b)(1)(A) Foreign currency proceeds generated under subsection (a) shall be used by a nonprofit voluntary agency or cooperative for activities carried out by the agency or cooperative that will enhance the effectiveness of the food assistance program carried out pursuant to the agreement.

"(B) Such activities may include food for work programs, local program management, local agricultural and cooperative development projects, and outreach projects to provide food to people with the greatest nutritional need, if such activities are directly related to the food assistance program of the agency or cooperative.

"(2) Foreign currency proceeds under subsection (a) may not be used—

"(A) to defray personnel or administrative costs incurred by a United States cooperating sponsor, distributing agency, or recipient agency, other than a local cooperative;

"(B) to defray the costs of construction or maintenance of an edifice owned or operated by a church or any other edifice used for sectarian purposes; or

"(C) to replace resources otherwise available to a nonprofit voluntary agency or cooperative, as determined by the President.

"SEC. 208. (a) In the case of an agreement with a nonprofit voluntary agency for nonemergency assistance under this title, subject to subsection (b), the President is encouraged to approve multiyear agreements to make agricultural commodities available for distribution by the agency, if the agency requests a multiyear agreement.

"(b)(1) Such agreements shall be subject to the availability each fiscal year of the necessary appropriations and agricultural commodities.

"(2) Subsection (a) shall not apply to an agreement that the President determines should be limited to a single year because of the past performance of the nonprofit voluntary agency or because the agreement involves a new program of assistance.

"(c) In carrying out a multiyear agreement pursuant to this section, a nonprofit voluntary agency may not be required to obtain annual approval from the United States Government in order to continue its assistance program pursuant to this agreement, unless the President determines that exceptional and unforeseen circumstances have occurred that require such approval.

"SEC. 209. (a) Agreements with nonprofit voluntary agencies under this title may authorize such agencies to establish local food reserves.

"(b) If authorized to establish a local food reserve pursuant to subsection (a), a nonprofit voluntary agency may deposit in such reserve agricultural commodities made available under this title—

"(1) for later use in providing immediate food assistance in case of a famine or other food shortage emergency; or

"(2) if the nonprofit voluntary agency determines that the immediate use of the agricultural commodities for food assistance purposes would be a disincentive to local agricultural production and that the commodities should be held for use at a later time.

"SEC. 210. (a) A nonprofit voluntary agency requesting a nonemergency food assistance agreement under this title shall include in such request a description of the intended uses of any foreign currency proceeds that would be generated with the commodities provided under the agreement.".

(b)(1) It is the sense of Congress that the President is encouraged to invite representatives of nonprofit voluntary agencies participating in programs under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) and other concerned nonprofit voluntary agencies, and to designate appropriate executive branch officials to participate in a task force to study the means of providing food assistance under such Act to people with the greatest nutritional need in the recipient countries.

(2) If a task force is established under paragraph (1), the task force should report to Congress by February 15, 1986, on further steps that could be taken to provide food under such Act to such people.

(c)(1) Sections 207, 208, and 209 of the Agricultural Trade Development and Assistance Act of 1954 (as added by subsection (a)) shall apply with respect to agreements entered into after September 30, 1985.

(2) Section 210 of the Agricultural Trade Development and Assistance Act of 1954 (as added by subsection (a)) shall apply with respect to agreements entered into after December 31, 1985.

FOOD FOR DEVELOPMENT PROGRAM

SEC. 125. Section 302(c)(1)(C) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1727a(c)(1)(C)) is amended by striking out "15" and inserting in lieu thereof "10".

EXTENSION OF PROGRAM

SEC. 126. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1736c) is amended—

(1) by striking out "1985" in the first sentence and inserting in lieu thereof "1989"; and

(2) by striking out "Agriculture and Food Act of 1981" in the second sentence and inserting in lieu thereof "Agriculture, Food, Trade, and Conservation Act of 1985".

COMMODITY DONATIONS ABROAD

SEC. 127. (a) Subsection (b) of section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431(b)) is amended to read as follows:

"(b)(1) As used in this subsection, the term 'eligible commodities' means agricultural commodities and the products thereof acquired by the Commodity Credit Corporation through price support operations, that the Secretary determines meet the criteria specified in subsection (a).

"(2) The Secretary may furnish eligible commodities for carrying out title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.), as approved by the Secretary and for such purposes as are approved by the Secretary.

"(3)(A) Commodities may not be made available for disposition under this subsection in quantities that will reduce the quantities of commodities that traditionally are made available through donations to domestic feeding programs or agencies.

"(B) Subject to paragraph (9)(B)(v), sections 103(c) and 401(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1703(c) and 1731(b)) shall apply with respect to commodities furnished under this subsection.

"(C) The requirement for safeguarding usual marketings of the United States shall not be used to prevent the furnishing under this subsection of any eligible commodity for use in countries that—

"(i) have not traditionally purchased the commodity from the United States; or

"(ii) do not have adequate financial resources to acquire the commodity from the United States through commercial sources or through concessional sales arrangements.

"(4) Section 203 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1723) shall apply to commodities furnished under this subsection.

"(5) Agreements may be entered into under this subsection to provide eligible commodities in installments over an extended period of time.

"(6) As soon as possible after the beginning of each fiscal year, the Secretary shall estimate and announce the types of eligible commodities, and the amounts thereof, that the Secretary anticipates will become available for distribution under this subsection during such fiscal year.

"(7) To the maximum extent practicable, expedited procedures shall be used in implementing this subsection.

"(8) The cost of commodities furnished under this subsection, and expenses incurred under section 203 of the Agricultural Trade Development and Assistance Act of

1954 (7 U.S.C. 1723) in connection with such commodities, shall be in addition to the level of assistance programmed under such Act and may not be considered expenditures for international affairs and finance.

"(9)(A) Eligible commodities furnished under this subsection may be sold or bartered with the approval of the Secretary solely as follows:

"(i) Sales and barter that are incidental to the donation of the commodities.

"(ii) Sales and barter, the proceeds of which are used to finance the distribution, handling, and processing costs of the donated commodities in the importing country or other activities in the importing country that are consistent with providing food assistance to needy people.

"(iii) Sales and barter of commodities donated to intergovernmental organizations, insofar as they are consistent with normal programming procedures in the distribution of commodities by such organizations.

"(iv) Sales and barter of commodities used for payments pursuant to paragraph (4).

"(B)(i) If requested by a nonprofit voluntary agency or cooperative, an agreement with the agency or cooperative for commodities made available under this subsection may provide for the use by the agency or cooperative of foreign currency proceeds, generated from the sale of commodities made available under the agreement, for the purposes specified in clause (iii).

"(ii) The Secretary shall ensure, to the extent practicable, that such agreements provide, in the aggregate for each fiscal year, for the use of foreign currency proceeds under this subsection in an amount that is not less than 5 percent of the aggregate value of the eligible commodities furnished to such agencies and cooperatives under this subsection for such fiscal year.

"(iii)(I) Foreign currency generated under this subparagraph shall be used by a nonprofit voluntary agency or cooperative for activities carried out by the agency or cooperative that will enhance the effectiveness of the food assistance program being carried out pursuant to the agreement.

"(II) Such activities may include food for work programs, local program management, local agricultural and cooperative development projects, and outreach projects designed to provide food to people with the greatest nutritional need, if such activities are directly related to the food assistance program of the nonprofit voluntary agency or cooperative.

"(iv) All foreign currency proceeds generated pursuant to an agreement under this subparagraph shall be expended within 1 year after the end of the period of the agreement.

"(v) Section 103(c) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1703(c)) shall apply to sales of agricultural commodities made to generate foreign currencies under this subparagraph, unless the Secretary of Agriculture, in consultation with the Administrator of the Agency for International Development, waives the application of this subparagraph.

"(vi) Foreign currency proceeds generated under this subsection may not be used—

"(I) to defray personnel or administrative costs incurred by a United States cooperating sponsor, distributing agency, or recipient agency, other than a local cooperative;

"(II) to defray the costs of construction or maintenance of an edifice owned or operated by a church or any other edifice used for sectarian purposes; or

"(III) to replace resources otherwise available to a nonprofit voluntary agency or cooperative, as determined by the President.

"(10)(A) In carrying out this subsection, during each fiscal year, the Secretary shall furnish to nonprofit voluntary agencies, cooperatives, and the World Food Program for distribution in developing countries not less than 400,000 metric tons of eligible commodities that are available for distribution under this subsection.

"(B) Subparagraph (A) shall not apply in any fiscal year to the extent that the Secretary determines and reports to Congress (together with the reasons therefor) that—

"(i) there have not been sufficient requests made by nonprofit voluntary agencies, cooperatives, and the World Food Program for commodities under this subsection for uses that would effectively carry out the purposes of title II of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1721 et seq.); or

"(ii) a limitation in paragraph (3) prevents the use of commodities pursuant to this paragraph.

"(C) If the quantity of eligible commodities available for distribution under subparagraph (A) for a fiscal year is less than 400,000 metric tons, such subparagraph shall not require the Secretary to purchase additional commodities to satisfy such subparagraph.".

(b) Section 416(b)(9)(A) of the Agricultural Act of 1949 (as added by subsection (a)) shall become effective on October 1, 1985.

FOOD FOR PROGRESS

SEC. 128. (a) Section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding any other provision of law:

"(1)(A) In order to use the food resources of the United States more effectively in support of countries that have made commitments to introduce or expand free enterprise elements in their agricultural economies through changes in commodity pricing, marketing, input availability, distribution, and private sector involvement, commodities and the products thereof acquired by the Commodity Credit Corporation that the Secretary determines meet the criteria specified in subsection (a), may be furnished by the Secretary to carry out agreements entered into by the President under paragraph (2).

"(B) Not more than 500,000 metric tons of commodities may be furnished under this subsection in each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

"(C) The Commodity Credit Corporation may purchase agricultural commodities and the products thereof for use under this subsection if—

"(i) the Commodity Credit Corporation does not hold stocks of such commodities and the products thereof; or

"(ii) Commodity Credit Corporation stocks are insufficient to satisfy commitments made in agreements entered into under this subsection and such commodities and the products thereof are needed to fulfill such commitments.

"(D) No funds of the Commodity Credit Corporation in excess of $30,000,000 (exclusive of the cost of commodities) may be used to carry out this subsection unless authorized in advance in appropriation Acts.

"(2)(A)(i) The President may enter into agreements with developing countries to furnish commodities and the products thereof made available under paragraph (1) to such countries to promote the implementation of private, free enterprise agricultural policies for long-term agricultural development.

"(ii)(I) Such commodities shall be furnished under this subsection on such terms and conditions as the President considers are in the public interest and will promote the objectives of this subsection.

"(II) Agreements may provide for commodities to be furnished on a multiyear basis.

"(B) In determining whether to enter into agreements with countries for the furnishing of commodities under this subsection, the President shall consider whether a potential recipient country—

"(i) is carrying out, or is committed to carry out, policies that promote economic freedom, private, domestic production of food commodities for domestic consumption, and the creation and expansion of efficient domestic markets for the purchase and sale of such commodities, including policies that may provide for—

"(I) access, on the part of farmers in such country, to private, competitive markets for their products;

"(II) market pricing of commodities to foster adequate private sector incentives to individual farmers to produce food on a regular basis for the domestic needs of the country;

"(III) establishment of market-determined foreign exchange rates;

"(IV) timely availability of production inputs, such as seed, fertilizer, or pesticides, to farmers;

"(V) access to technologies appropriate to the level of agricultural development in the country; and

"(VI) construction of facilities and distribution systems necessary to handle perishable products; and

"(ii) is able to use the quantity of commodities being considered for donation without disruption of the internal market of the country for domestically produced agricultural commodities and the products thereof.

"(3) An agreement entered into under this subsection shall prohibit the resale or transshipment of the donated agricultural commodities to other countries.

"(4) In entering into agreements with countries for the donation of agricultural commodities and the products thereof under this subsection, the President shall take reasonable precautions to avoid displacement of any sales of United States agricultural commodities and the products thereof that would otherwise be made to such countries.

"(5)(A) Section 203 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1723) shall apply to agricultural commodities furnished under this subsection.

"(B) The cost of the commodities furnished under this subsection, and the expenses incurred in connection with furnishing such commodities, shall be in addition to the level of assistance programmed under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) and may not be considered expenditures for international affairs and finance.

"(6)(A) The President shall carry out the duties imposed on the President under this subsection through the National Security Advisor in the Executive Office of the President.

"(B) The National Security Advisor, with the approval of the Secretary, may use per-

sonnel of the Department of Agriculture in carrying out this subsection.

"(8) Within 120 days after the close of each fiscal year in which an agreement entered into with a country under this subsection is in effect, the President shall report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the status of such agreement and the progress being made to implement private, free enterprise agricultural policies for long-term agricultural development in such country.".

(b) The amendment made by this section shall be effective during the period beginning October 1, 1985, and ending September 30, 1989.

SPECIAL ASSISTANT FOR AGRICULTURAL TRADE AND FOOD AID

SEC. 129. (a)(1) The President shall appoint, by and with the advice and consent of the Senate, a Special Assistant to the President for Agricultural Trade and Food Aid (hereafter in this section referred to as the "Special Assistant").

(2) The Special Assistant shall serve in the Executive Office of the President.

(3) As an exercise of the rulemaking power of the Senate, any nomination to the position of Special Assistant shall be—

(A) submitted to the Senate for confirmation; and

(B) referred to the Committee on Agriculture, Nutrition, and Forestry.

(4) The Special Assistant shall—

(A) serve at the pleasure of the President;

(B) be entitled to receive the same allowances as a chief of mission; and

(C) have the rank of Ambassador Extraordinary and Plenipotentiary.

(b) The Special Assistant shall—

(1) assist and advise the President in order to improve and enhance food assistance programs carried out in the United States and foreign countries;

(2) coordinate and streamline the manner in which food assistance programs are carried out by the Department of Agriculture and the Agency for International Development, in order to improve their overall effectiveness;

(3) make recommendations to the President on measures to be taken to increase use of United States agricultural commodities and the products thereof through food assistance programs;

(4) advise the President on agricultural trade;

(5) serve as a member of the Development Coordination Committee;

(6) serve as Chairman of the Food Aid Subcommittee of such Committee; and

(7) issue to departments and agencies of the Federal Government policy guidelines on basic issues of food assistance policy, to the extent necessary to assure the coordination of food assistance programs, consistent with law, and with the advice of such Subcommittee.

(c) The Special Assistant may—

(1) solicit information and advice from private and governmental sources and recommend a plan to the President and Congress on measures that should be taken—

(A) to promote the export of United States agricultural commodities and the products thereof; and

(B) to expand export markets for United States agricultural commodities and the products thereof;

(2) develop and recommend to the President national agricultural policies to foster and promote the United States agricultural industry and to maintain and increase the strength of this vitally important sector of the United States economy; and

(3)(A) appraise the various programs and activities of the Federal Government, as they affect the United States agricultural industry, for the purpose of determining the extent to which such programs and activities are contributing or not contributing to such industry; and

(B) make recommendations to the President and Congress with respect to the effectiveness of such programs and activities in contributing to such industry.

(d) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Special Assistant for Agricultural Trade and Food Aid.".

Beginning on page 35 of the amendment, strike line 9 through the end of the amendment and insert the following in lieu thereof.

SEC. 131. (a) The Congress finds and declares—

(1) that a productive and healthy agricultural industry and a strong and active United States maritime industry are vitally important to the economic well-being and national security objectives of our Nation;

(2) that both industries must compete in international markets increasingly dominated by foreign trade barriers and the subsidization practices of foreign governments;

(3) that increased agricultural exports and the utilization of United States merchant vessels contribute positively to the United States balance of trade and generate employment opportunities in the United States.

(b) It is therefore declared to be the purpose and policy of the Congress in this subtitle—

(1) to enable the Department of Agriculture to plan its export programs effectively, by clarifying the ocean transportation requirements applicable to such programs;

(2) to take immediate and positive steps to promote the growth of the cargo carrying capacity of the United States merchant marine;

(3) to expand international trade in United States agricultural commodities and products and to develop, maintain, and expand markets for United States agricultural exports;

(4) to improve the efficiency of administration of both the commodity purchasing and selling and the ocean transportation activities associated with export programs sponsored by the Department of Agriculture; and

(5) to stimulate and promote both the agricultural and maritime industries of the United States and encourage cooperative efforts by both industries to address their common problems.

EXEMPTION OF CERTAIN AGRICULTURAL EXPORTS FROM THE REQUIREMENTS OF THE CARGO PREFERENCE LAWS

SEC. 132. The requirements of section 901(b)(1) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)(1)), and the Joint Resolution of March 26, 1934 (46 U.S.C. 1241-1), shall not apply to any export activities of the Secretary of Agriculture or the Commodity Credit Corporation.

(1) under which agricultural commodities or the products thereof acquired by the Commodity Credit Corporation are made available to United States exporters, users, processors, or foreign purchasers for the purpose of developing, maintaining, or expanding export markets for United States agricultural commodities or the products thereof at prevailing world market prices;

(2) under which payments are made available to United States exporters, users, or processors or, except as provided in section 133(b)(6), cash grants are made available to foreign purchasers, for the purpose described in clause (1);

(3) under which commercial credit guarantees are blended with direct credits from the Commodity Credit Corporation to reduce the effective rate of interest on export sales of United States agricultural commodities or the products thereof;

(4) under which credit or credit guarantees for not to exceed 3 years are extended by the Commodity Credit Corporation to finance or guarantee export sales of United States agricultural commodities or the products thereof; or

(5) under which agricultural commodities or the products thereof owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services, but only if such materials, goods, equipment, or services are of a value at least equivalent to the value of the agricultural commodities or products exchanged or bartered therefor (determined on the basis of prevailing world market prices at the time of the exchange or barter), but nothing in this subsection shall be construed to exempt from the cargo preference provisions referred to in section 132 any requirement otherwise applicable to the materials, goods, equipment, or services imported under any such transaction.

SHIPMENT REQUIREMENTS FOR CERTAIN EXPORTS SPONSORED BY THE DEPARTMENT OF AGRICULTURE

SEC. 133. (a)(1) In addition to the requirement for United States-flag carriage of a percentage of gross tonnage imposed by section 901(b)(1) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)(1)), 25 per centum of the gross tonnage of agricultural commodities or the products thereof shipped under the agricultural export programs subject to such section and specified in subsection (b) shall be transported on United States-flag commercial vessels.

(2) In order to achieve an orderly and efficient implementation of the requirement of paragraph (1)—

(A) an additional quantity equal to 10 percent of the gross tonnage referred to in paragraph (1) shall be transported in United States-flag vessels in calendar year 1986;

(B) an additional quantity equal to 20 percent of the gross tonnage shall be transported in such vessels in calendar year 1987; and

(C) an additional quantity equal to 25 percent of the gross tonnage shall be transported in such vessels in calendar year 1988 and in each calendar year thereafter.

(3) In implementing the requirements of paragraph (1), the Secretary of Transportation shall give due consideration to the availability of United States-flag vessels to transport the commodities referred to in such paragraph.

(b) This section shall apply to any export activity of the Commodity Credit Corporation or the Secretary of Agriculture—

(1) carried out under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) carried out under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431);

(3) carried out under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1);

(4) under which agricultural commodities of the products thereof are—

(A) donated through foreign governments or agencies, private or public, including intergovernmental organizations; or

(B) sold for foreign currencies or for dollars on credit terms of more than ten years;

(5) under which agricultural commodities or the products thereof are made available for emergency food relief at less than prevailing world market prices;

(6) under which cash grants are made available to foreign purchasers for the purpose of enabling such purchasers to acquire United States agricultural commodities or the products thereof if the cash grants are in amounts that result in the purchaser (after receipt of such grants) paying less than the prevailing world market price for such commodities; or

(7) under which agricultural commodities owned or controlled by or under loan from the Commodity Credit Corporation are exchanged or bartered for materials, goods, equipment, or services produced in foreign countries, other than export activities described in section 132(5).

(c)(1) The requirement for United States-flag transportation imposed by subsection (a) shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1241(b)).

(2)(A) In order to carry out effectively the requirements of this subtitle, the Secretary of Transportation shall, to the maximum extent practicable within the requirements of this section and section 901(b) of the Merchant Marine Act, 1936, administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a flexible manner, giving due consideration to historical trading patterns and to divisions in United States international shipping trades between bulk and liner service to particular geographic areas.

(B) The Secretary of Transportation shall also administer this subtitle and section 901(b) of the Merchant Marine Act, 1936, in a manner which preserves to the greatest extent practicable the mean historical port range share of cargoes subject to United States-flag transportation requirements under this section exported from the Atlantic, Gulf, Pacific, and Great Lakes port ranges.

After "ranges." on page 8, line 2 of the Cochran amendment as incorporated into the Steven amendment insert the following: "In addition, the Secretary of Transportation, in administering this subsection, and section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)), and consistent with such subtitle and section, shall take such steps as may be necessary and practicable to preserve during calendar years 1986, 1987, 1988, and 1989 the percentage share, or metric tonnage of bagged, processed or fortified commodities, whichever is lower, experienced in calendar year 1984 as determined by the Secretary of Agriculture, of waterborne cargoes exported from Great Lake Ports pursuant to Title II of the Agricultural Trade Development Act of 1954 (7 U.S.C. 1721 et Seq.)."

(d) As used in subsection (b), the term "export activity", shall not include inspection or weighing activities, other activities carried out for health or safety purposes, or technical assistance provided in the handling of commercial transactions.

(e)(1) The prevailing world market price as to agricultural commodities or the products thereof shall be determined under this subtitle in accordance with procedures established by the Secretary of Agriculture. The Secretary shall prescribe such procedures by regulation, with notice and opportunity for public comment, pursuant to section 553 of title 5, United States Code.

(2) In the event that a determination of the prevailing world market price of any other type of materials, goods, equipment, or service is required in order to determine whether a barter or exchange transaction is subject to subsection (b)(6) or (b)(7), such determination shall be made by the Secretary of Agriculture in consultation with the heads of other appropriate Federal agencies.

MINIMUM TONNAGE

SEC. 134. (a)(1) For fiscal year 1986 and each fiscal year thereafter, the minimum quantity of agricultural commodities that may be exported under programs subject to section 133 shall be the average of the tonnage exported under such programs during the base period defined in subsection (b), discarding the high and low years.

(2) The President may waive the minimum quantity for any fiscal year required under paragraph (1) if he determines and reports to the Congress, together with his reasons, that such quantity cannot be effectively used for the purposes of such programs or, based on a certification by the Secretary of Agriculture, that the commodities are not available for reasons which include the unavailability of funds.

(b) The base period utilized for computing the minimum tonnage quantity referred to in subsection (a) for any fiscal year shall be the five fiscal years beginning with the sixth fiscal year preceding such fiscal year and ending with the second fiscal year preceding such fiscal year.

FINANCING OF SHIPMENT OF AGRICULTURAL COMMODITIES IN UNITED STATES-FLAG VESSELS

SEC. 135. (a) The Secretary of Transportation shall finance any increased ocean freight charges incurred in any fiscal year which result from the application of section 133(a). The amount to be financed by the Secretary shall be an amount of the total frieght charges incurred from the application of such section in such fiscal year equal to a fraction of the total ocean freight differential incurred in connection with the export activities specified in such section in such fiscal year, the numerator of such fraction to be equal to the percentage in excess of 50 of the tonnage of agricultural commodities or the products thereof that are shipped on United States-flag vessels, and the denominator of such fraction to be equal to the total percentage of such tonnage so shipped.

(b)(1) If in any fiscal year the total cost of ocean freight and ocean freight differential for which obligations are incurred by the Department of Agriculture and the Commodity Credit Corporation on exports of agricultural commodities and products thereof under the agricultural export programs specified in section 133(b) exceeds 20 percent of the value of such commodities and products and the cost of such ocean freight and ocean freight differential on which obligations are incurred by such Department and Corporation during such year, the Secretary of Transportation shall reimburse the Department of Agriculture and the Commodity Credit Corporation for the amount of such excess. For the purpose of this subsection, commodities shipped from the inventory of the Commodity Credit Corporation shall be valued as provided in section 403(b) fo the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1733(b)).

(2)(A) The National Advisory Commission on Agricultural Export Transportation Policy established under section 136 shall include in its final report to the President and the Congress recommendations for any changes in the provisions of paragraph (1) that would help assure that the cost of ocean freight and ocean freight differential incurred by the Department of Agriculture and the Commodity Credit Corporation on the agricultural export programs specified in section 133(b), is not increased above historical levels as a result of the extra demand for United States-flag vessels caused by this subtitle.

(B) After taking into consideration the recommendations of the Commission referred to in subparagraph (A), the President may, by proclamation, provide requirements for the assumption by the Department of Transportation of a portion of the cost of ocean freight and ocean freight differential that would otherwise be incurred by the Department of Agriculture and the Commodity Credit Corporation on a different basis than that set forth in paragraph (1) in order to accomplish the objectives of subparagraph (A). The provisions of paragraph (1) shall be inapplicable on and after the effective date of the proclamation.

(c) For the purpose of meeting those expenses required to be assumed under subsections (a) and (b), the Secretary of Transportation shall issue to the Secretary of the Treasury such obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of Transportation with the approval of the Secretary of the Treasury. Such obligations shall be at a rate of interest as determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such obligations during the month preceding the issuance of such obligations of the Secretary of Transportation. The Secretary of Treasury shall purchase any obligations of the Secretary of Transportation issued under this subsection and, for the purpose of purchasing such obligations, the Secretary of the Treasury may use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, after the date of the enactment of this Act and the purposes for which securities may be issued under such chapter are extended to include any purchases of the obligations of the Secretary of Transportation under this subsection. All redemptions and purchases by the Secretary of the Treasury of the obligations of the Secretary of Transportation shall be treated as public-debt transactions of the United States.

(d) There is authorized to be appropriated annually for each fiscal year, commencing with the fiscal year beginning October 1, 1986, an amount sufficient to reimburse the Secretary of Transportation for the costs, concluding administrative expenses and the principal and interest due on the obligations to the Secretary of the Treasury incurred under this section. Reimbursement of any such costs shall be made with appropriated funds, as provided in this section, rather than through cancellation of notes.

(e) Notwithstanding the provisions of this section, in the event that the Secretary of

Transportation is unable to obtain the funds necessary to finance the increased ocean freight charges resulting from the requirements of subsections (a) and (b) and section 133(a), the Secretary of Transportation shall so notify the Congress within 10 working days of the discovery of such insufficiency.

NATIONAL ADVISORY COMMISSION ON AGRICULTURAL EXPORT TRANSPORTATION POLICY

SEC. 136. (a) There is hereby established an advisory commission to be known as the National Advisory Commission on Agricultural Export Transportation Policy (hereafter in this subtitle referred to as the "Commission").

(b)(1) The Commission shall be composed of 16 members.

(2) Eight members of the Commission shall be appointed by the President.

(3) The chairman and ranking minority members of the Senate Committee on Agriculture, Nutrition, and Forestry, of the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science, and Transportation, of the House Committee on Agriculture, and of the House Committee on Merchant Marine and Fisheries shall serve as members of the Commission.

(4)(A) Four of the members appointed by the President shall be representatives of agricultural producers, cooperatives, merchandisers, and processors of agricultural commodities.

(B) The remaining four members appointed by the President shall be representatives of the United States-flag maritime industry, two of whom shall represent labor and two of whom shall represent management.

(c)(1) The members of the Commission shall elect a Chairman from among its members.

(2) Any vacancy in the Commission shall not affect its powers but shall be filled in the same manner in which the original appointment was made.

DUTIES OF THE COMMISSION

SEC. 137. (a) It shall be the duty of the Commission to conduct a comprehensive study and review of the ocean transportation of agricultural exports subject to the cargo preference laws referred to in section 132 and to make recommendations to the President and the Congress for improving the efficiency of such transportation on United States-flag vessels in order to reduce the costs incurred by the United States in connection with such transportation. In carrying out such study and review, the Commission shall consider the extent to which any unfair or discriminatory practices of foreign governments increase the cost to the United States of transporting agricultural commodities subject to such cargo preference laws.

(b)(1) The Commission shall submit an interim report to the President and the Congress not later than one year after the date of the enactment of this subtitle and such other interim reports as the Commission considers advisable.

(2) The Commission shall submit a final report containing its findings and recommendations to the President and the Congress no later than two years after the date of the enactment of this subtitle.

(3) Sixty days after the submission of the final report, the Commission shall cease to exist.

(c) The Commission shall include in its reports submitted pursuant to subsection (b) recommendations concerning the feasibility and desirability of achieving the following goals with respect to the ocean transportation of agricultural commodities subject to the cargo preference laws referred to in section 132:

(1) Ensuring that the timing of commodity purchase agreements entered into by the United States in connection with the export of such commodities, and the methods of implementing such agreements, are such as to minimize cost to the United States.

(2) Ensuring that shipments of such commodities are made on the most modern and efficient United States-flag vessels available.

(3) Ensuring that shipments of such commodities are made under the most advantageous terms available, including—

(A) charters for full shiploads;

(B) charters for intermediate or long term;

(C) charters for consecutive voyages and contracts of affreightment; and

(D) adjustment of rates in the event that vessels used for shipments of such commodities also carry cargoes on return voyages.

(4) Reduction and elimination of impediments, including delays in port, to the efficient loading and operation of the vessels employed for shipment of such commodities.

(5) Utilization of open and competitive bidding for the ocean transportation of such commodities.

INFORMATION AND ASSISTANCE TO BE FURNISHED TO THE COMMISSION

SEC. 138. (a) Each department, agency, and instrumentality of the United States, including independent agencies, shall furnish to the Commission, upon request made by the Chairman, such statistical data, reports, and other information as the Commission considers necessary to carry out its functions under this subtitle.

(b) The Secretary of Agriculture and the Secretary of Transportation shall make available to the Commission such staff, personnel, and administrative services as may reasonably be required to carry out the Commission's duties.

COMPENSATION AND TRAVEL AND SUBSISTENCE EXPENSES OF COMMISSION MEMBERS

SEC. 139. Members of the Commission shall serve without compensation in addition to compensation they may otherwise be entitled to receive as employees of the United States or as Members of Congress, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission.

AUTHORIZATION OF APPROPRIATIONS

SEC. 140. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TERMINATION OF SUBTITLE

SEC. 141. The operation of this subtitle shall terminate 90 days after the date on which a notification is made pursuant to section 135(e), except with respect to shipments of agricultural commodities and products subject to contracts entered into before the expiration of such 90-day period, unless within such 90-day period the Secretary of Transportation proclaims that funds are available to finance increased freight charges resulting from the requirements of sections 133(a) and 135 (a) and (b).

EFFECT ON OTHER LAWS

SEC. 142. This Act shall not be construed as modifying in any manner the provisions of section 4(b)(8) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(b)(8)) or chapter 5 of title 5, United States Code.

"AVAILABILITY OF VESSELS

"SEC. . Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. 1241) is amended by inserting the following after the first sentence in subsection (b):

No United States-flag commercial vessel shall be deemed to be available for the transportation of cargoes subject to Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. 1241) and the Joint Resolution of March 26, 1934 (48 Stat. 500, 46 U.S.C. 1241-1) unless such vessel has been certified by the Secretary of the Navy, upon the recommendation of the Chief of Naval Operations, as being necessary to carry out the defense of the United States and its allies.".

NOTICES OF HEARINGS

SELECT COMMITTEEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs has rescheduled a markup on November 7, 1985, in Senate Russell 385, beginning at 10 a.m., on the following bills:

Nomination of Ross Swimmer to be Assistant Secretary of Interior for Indian Affairs;

S. 1724. A bill to authorize the Cherokee Nation of Oklahoma to design and construct hydroelectric power facilities at W.D. Mayo Lock and Dam.

S. 1684. A bill to declare that the United States holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouria, Pawnee, Ponca & Tonkawa Indian Tribes of Oklahoma.

S. 1728. A bill to authorize the Cherokee National of Oklahoma to lease certain lands held in trust for up to ninety-nine years.

S. 1298. A bill to coordinate and expand services for the prevention, identification and treatment of alcohol and drug abuse among Indian youth; and,

S. 1621. A bill to amend Title 25, United States Code, relating to Indian education programs; and,

S. 1396. A bill to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation, to remove clouds from the titles to certain lands, and for other purposes.

Those wishing additional information should contact the committee at 224-2251.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. McCLURE. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition and Forestry be authorized to meet during the session of the Senate on Thursday, October 31, to hold a hearing to examine the condition of the farm credit system.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Govern-

mental Affairs be authorized to meet during the session of the Senate on Thursday, October 31, 1985, in order to conduct a hearing on S. 1209, to establish a commission to prevent infant mortality.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EMPLOYMENT

Mr. McCLURE. Mr. President, I ask unanimous consent that the Employment Subcommittee of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, October 31, to hold a hearing on the impact of trade on employment.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. McCLURE. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, October 31, 1985, in closed executive session in order to conduct a meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PREPAREDNESS

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Preparedness, of the Committee on Armed Services, be authorized to meet during the session of the Senate on Thursday, October 31, 1985, in open, later becoming closed, session, in order to conduct a hearing on the Department of Defense Oversight Ammunition Requirement Production Base, and Future Direction.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on Thursday, October 31, to conduct a meeting on the extension of daylight saving time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SOVIET AND EASTERN EUROPEAN RESEARCH AND TRAINING ACT

● Mr. SIMON. Mr. President, I am pleased that the Senate agreed last week to restore full funding for a vital research and training program in Soviet area studies. I introduced the Soviet and Eastern European Research and Training Act (title VIII) in 1983 in the House, while Senator LUGAR introduced it in the Senate. We planned this to be a 10-year program, and so I am especially glad that the Senate adopted the Lugar-Simon amendment on the State Department appropriation bill.

What we are talking about here is $4.8 million to expand our Soviet bloc studies and research capability. The number of academic and policy experts in this area has always been small, and many expect that it will shrink still further if the necessary funds are not available. This is one of the most important educational assistance programs ever funded by Congress, because on it rests our Nation's ability to maintain and improve professional expertise on the Soviet system. Clearly, this is one area where we can't afford to "wing it" and make uninformed judgments about Soviet behavior.

This is an investment in the future. The National Council for Soviet and East European Research recently prepared a progress report for the Department of State Advisory Committee, which administers title VIII. In it the National Council notes that they received 148 applications from 102 institutions in 33 States, amounting to some $13.4 million in proposals. More than 100 of these proposals were deemed worthy of support, but many of these will not be funded because the initial outlay was far more modest. Now the good work already begun under this program can continue.

To cite the National Council:

> As a measure of the need for research support within the profession, (the proposals) provide eloquent testimony that the gap between current resources and the needs of the profession and the nation is manifest, compelling, and altogether too great. It speaks for the wisdom and importance of Title VIII, and for full appropriations.

I commend my colleagues for having joined with Senator LUGAR and myself in restoring the full appropriation.●

COSPONSORSHIP OF S. 1220, RENEWABLE ENERGY AND CONSERVATION TRANSITION ACT OF 1985

● Mr. D'AMATO. Mr. President, I rise today to reiterate my support for Federal tax reform. I believe it is absolutely necessary that we pursue the administration's goal of a tax system that is both fair and simple. The proposed policies with respect to energy tax credits, however, seem to fall short of this goal.

For this reason, Mr. President, I rise in cosponsorship of S. 1220, the Renewable Energy and Conservation Transition Act of 1985, championed by my distinguished colleague from Oregon.

I support this bill because I believe tax reform, with respect to energy technology, must accomplish several goals: Reform must provide equitable treatment among competing energy technology; it must provide for a balanced and sustainable energy future; it must improve energy security with reduced payments for imported oil; and it must provide jobs while still protecting the environment.

Renewable energy sources have clearly demonstrated their value in a balanced U.S. energy policy. They now provide almost 10 percent of the Nation's prime energy, with tax incentives totalling close to $1 billion annually. This is compared to approximately $28 billion spent annually in Federal tax credits given to the more conventional energy technologies.●

CONFERENCE ON HUMAN RIGHTS IN GUATEMALA

● Mr. SIMON. Mr. President, on October 2, a group of us sponsored a conference on Human Rights in Guatemala. I would like to thank my cosponsors Senator TOM HARKIN, and the Washington Office on Latin America [WOLA] for a most successful meeting.

The keynote speaker was Lord Avebury, Chairman of the British Parliamentary Human Rights Group and author of the report on Guatemala entitled, "Bitter and Cruel." Among the distinguished speakers were representatives from the Council on Foreign Affairs, the International Human Rights Law Group, America's Watch, and the Mutual Support Group for Relatives of the Disappeared [Grupo do Apoyo Mutuo]. Afternoon workshops were held on the up-coming Guatemalan elections, the Indian situation, trade unions, the church and refugees.

Elections will be held in Guatemala on November 3 to select the first civilian government in that country since 1966. This conference was intended to provide a framework for evaluation of the election itself, the prospective government, and its effect on the human rights situation there.

U.S. foreign aid to Guatemala was suspended in 1977, due in large part to the deplorable human rights violations in that country. We welcome the prospect of democratic civilian rule in Guatemala. Congress has encouraged this effort by making renewed foreign aid availabile only upon establishment of a civilian government.

But the clear message from this conference was to proceed with great care in our evaluation of the changing situation in that country in the coming year. We will be watching its progress carefully, hoping that the historical pattern of human rights abuses will be broken, and that Guatemala will be firmly set on the road to true democracy.

I would like to thank the participants in the Conference for their help in understanding the problems of that country, and to congratulate them on most successfully bringing this important issue into sharp focus.

I would also like to include Senator HARKIN's luncheon address to the Conference and my own welcoming remarks. I ask that these two statements be printed in full in the RECORD.

The statements follow:

REMARKS BY SENATOR PAUL SIMON AT THE CONFERENCE ON HUMAN RIGHTS IN GUATEMALA

Thank you for your kind introduction, Sharon. I am here today for the same reason as you—because we share a common concern for the future of the people of Guatemala. We want to see the United States act as an effective advocate for social change and observance of human rights in that country.

We all know that the recent history of Guatemala is brutal and tragic. According to the Commission for Human Rights in Central America, since 1965 about 38,000 Guatemalans have been slain in political violence or have disappeared. There are living victims of torture as well.

As a member of the Subcommittee on Refugees, I am all to well aware of the extent of the Guatemalan refugee problem. Today, there are at least 45,000 officially recongized Guatemalan refugees who have fled the political violence and repression of their homeland; 24,000 are living in Mexico alone. And there are hundreds more who are not recognized as refugees, but have been forced to flee their homes.

This is a seminal moment in the modern history of Guatemala. Elections are scheduled to take place this November and a civilian government will be seated in January.

Those elections have been described as the single hope of the Guatemalan people. They have led many, both inside and outside of Congress, to take a new look at the situation in Guatemala. This year Congress has conditioned future aid to Guatemala on assumption of power by a freely elected civilian government, as well as demonstrated progress in human rights.

In order to judge future progress we must make a frank and realistic assessment of the current situation. That is why this conference is particularly necessary and appropriate. We are here, conscious of the past, to assess the present, so that we may act wisely in the future.

Contemporary Guatemala is a paradox. A return to forms of democracy has begun; elections for the Constituent Assembly took place last January; a new Constitution has been written; and eight parties have agreed to participate in the upcoming Presidential elections. I was also heartened by the statement of the six Vice Presidential candidates that visited Washington last week that they believed that the elections would be fair and free.

But if there is cause for hope there is also cause for caution and skepticism. There are reports that, after a brief decline, political violence in Guatemala is again on the rise. This Spring, two leaders of the Mutual Support Group, Guatemala's only human rights group, were brutally murdered. In the small Indian town of Patzun, more than 100 Indians have been killed or have disappeared since the beginning of the year. Faculty and students of the National University have been murdered. In short, Guatemala still has a consistent and continuing human rights problem.

Guatemala still has the most unequal distribution of land of any nation in Central America. In their most recent human rights report, "A Nation of Prisoners," America's Watch claims: "Guatemala still forcibly recruits its citizens into civil patrols and forcibly relocates others into so called 'model villages'." Under those circumstances I think that we should be circumspect and vigilant about changing our past policies too rapidly.

Some analysts fear that the elections will not change the human rights situation. They say that the army will remain the real power in the countryside and that counter-insurgency will override any other consideration. One thing is certain—without social reforms and true assumption of power by a civilian regime, elections will be a chimera, and repression will remain the only means of assuring social peace.

The great Venezualan Democratic leader Romulo Bettancourt once said that, "the nations of Lation America are the only countires in the world that are occupied by their own armies". Since then the winds of change have swept much of Latin America. Peru and Argentina are but two examples of countries that have made a successful transition from military to civilian government through wise and courageous political leadership.

Today Guatemala has a similar opportunity to make a transition. The elections provide an opening for change, but, to quote the Archbishop of Guatemala they are "a small hope, not a miracle or a big chance".

Guatemala is still a country that is literally occupied by its own army and it is still a country with a bitter history of institutionalized violence. But it is also a country in which a seed of democracy has been planted. By continuing to advocate human rights, and by continuing to push for economic, not military, aid perhaps we can help that seed to grow.

REMARKS BEFORE WOLA LUNCHEON ON GUATEMALA

(By Senator Tom Harkin)

Before beginning my remarks, I would like to extend my appreciation to this luncheon's featured guests, Lord Avebury, Chairman of the British Parliamentary Group on Human Rights, and Patt Derian, former Assistant Secretary of State on Human Rights under the Carter administration. Lord Avebury's report on Guatemala, "Bitter and Cruel,' has been an invaluable document for those in Congress concerned with the human rights situation.

I extend a special note of thanks to Reggie Norton and Joe Eldridge, my longtime friend and director of the Washington office on Latin America, for sponsoring today's conference and luncheon.

Since my last visit to Guatemala, I have been impressed and saddened by its extremes.

It is a country which has enjoyed one of the strongest and most productive economies of Latin America, yet four out of five of its children are undernourished, and its illiteracy rate is one of the highest in the hemisphere.

Its land is the richest in the region, yet it is the most unevenly distributed in all Latin America.

The beauty and richness of its Indian culture have attracted thousands of tourists, yet its military has pursued a policy of genocide against its indigenous population.

Guatemala, despite its natural richness and beauty, has imprisoned more than half its population.

Today, Guatemala poses a special contradiction. At a time when upcoming presidential elections may offer the promise of a democracy and the return of civilian rule, death squads stalk the streets of its capital and leaders of only human rights organizations have been brutally killed in recent months.

It is our task to weigh the promise of Guatemala's elections against the everyday terror of Guatemala's present before deciding upon the administration's request for higher levels of aid to that country.

I do not intend to predict the outcome of the presidential election or prospects for democracy. But I would caution that our hopes for Guatemala's future should be tempered by the tragedy of its past.

Twenty years ago, Guatemala elected its first civilian president since a coup a decade earlier. Moderate Guatemalans hoped that Mendez Montenegro would institute necessary social reforms. Our State Department saw in Montenegro a "willing partner" with whom we could "talk and accomplish things."

Our Government sent Guatemala $16 million in military aid, a planeload of green berets to train its armed forces, and nearly $3 million to instruct its national police force.

But Mendez Montenegro brought bloodshed, not social reform, to Guatemala. In the decade and a half since the election of Mendez, more than 30,000 people were abducted, tortured and assassinated. By 1980, Guatemala had become a country where—and I quote from a former government official—"death or exile is the fate of those who fight for justice."

When I think of Guatemala today, I am reminded of an interview conducted with an Indian living in a small village near Huehuetenango in northern Guatemala. The young man spoke of his townspeople's fear when the army entered his village in the early 1980's.

They buried their Bible, because the army had accused the local Catholic priest of being a Communist.

They buried their metal hoes, because the army accused peasants of using them to assist the guerrillas in destroying roads into their village.

And the young man even buried his Montgomery Ward catalogue, because it contained pictures of hunting rifles and men in green camoflage pants and hunting jackets.

I am also reminded of the remarks of a Guatemalan priest who said of the army, "they are mightier than God. They are everywhere, they see everything, they know everything."

I leave you with the wisdom of the Archbishop of Guatemala, a man who spent many years with the Indians in the highlands and who now courageously speaks for human rights in his country. To the archbishop, the elections offered "small hope," not "a miracle or big change."

Hope, at least temporarily, has been reborn for those who have not shared the vast natural resources that God gave to Guatemala.

Hope is there for the Indians who were once the owners of Guatemala, but are now its guests.

And there may be hope that its labor leaders and human rights groups like the mutual support group may express their concerns without fear of retribution from the military and its death squads.

We can help make those hopes a reality and foster democracy, but not by providing arms and police training to those who have massacred thousands of unarmed civilians.●

A FOND FAREWELL TO DOROTHEA R. KINGSBURY

● Mr. MOYNIHAN. Mr. President, when a good friend and colleague moves on, there are always mixed feelings. Today, my assistant Dot Kingsbury will retire. She has been with me since 1980. During these years, she has earned our respect through her hard work and keen mind, and our affection through her warmth and kind manner.

Dot helps manage the flow of correspondence in and out of my office. As every Member of this body knows, mail is the life blood of a Senate office. Through it, we communicate with our constituencies and colleagues. In my office, the receipt of 5,000 or even 10,000 pieces of mail in a single week is not unusual. Keeping track of all that paper is an enormous and taxing endeavor, but one that Dot seems to accomplish almost effortlessly. Her mnemonic prowess astounds us as often as it assists us. Dot is regularly able to recall the content and date of letters that crossed her desk in months and even years past.

Mr. President, we say a sad but very fond farewell to Dot Kingsbury today, and wish her a happy and healthy retirement. She will be greatly missed.●

1985 CONGRESSIONAL CALL TO CONSCIENCE

● Mr. WILSON. Mr. President, I rise today just a few weeks before the historic summit meeting in Geneva to once again join my colleagues in the 1985 Congressional Call to Conscience Vigil for Soviet Jewry. I would sincerely like to thank my fellow Senators who have already participated in this important effort. What is said here on the floor will be heard by both oppressor and oppressed, and we must continue to support these people whose rights and freedoms have not yet been recognized. I ask that the subject of human rights and freedoms is not overlooked when President Reagan and Secretary General Gorbachev meet next month. It cannot be; it is inextricably tied to all of the issues and disagreements between the superpowers, as well as among all of the nations of the world. Personal freedom is priceless, and we in this country all too often take that freedom for granted. We cannot condone the suppression of freedom, which is why vigils such as this are worthwhile and necessary. We must use our freedom to speak out, in the hope that those who hear us will heed our call for freedom.

When I addressed the Senate last, I mentioned the Lev Shapiro family, a family which I have adopted. The Shapiros are refuseniks; that is, they have continually been refused the right to leave the Soviet Union. They maintain a traditional Jewish home despite the consequences. One such consequence, a recent development in their case, involves their 7-year-old daughter Naomi. Naomi has been denied enrollment in a school which teaches English at an advanced level, and where her 11-year-old brother, Israel, is already a student. The headmaster of the school turned her away, allegedly with the remark, "We don't want to teach children of traitors." Lev then complained to the education authorities in Moscow, who instructed the headmaster to accept Naomi as a pupil. According to the latest information, the headmaster has again refused. A lawsuit was filed, and the Shapiros lost the case. Lev Shapiro has also repeatedly been harassed by the press, which has printed an account of the whole affair, calling Shapiro a friend of the West.

The claims made against Shapiro are unwarranted. The Shapiros have already endured many hardships as a result of their beliefs and are becoming more and more isolated from other citizens as a result of their treatment. Their talents are being wasted; their contributions to the world are being prevented by an oppressive system. My fellow Members, let this vigil not go unnoticed. We must speak out and be heard. It is not enough to be contented with the freedoms we have if we do not help others in their efforts to attain it, no matter where they may be. Let our freedom serve as a catalyst for change and an example to those who have a hard time understanding the definition of the word.●

OVERSELLING THE STRATEGIC DEFENSIVE INITIATIVE

● Mr. KERRY. Mr. President, recently, an organization called the Coalition for SDI has put commercials on television telling the American people that star wars is an attempt to build a peace shield which will protect our children and our homes from Soviet nuclear missiles.

The advertisement has the following text:

> I asked my daddy what this star wars stuff is all about. He said that right now we can't protect ourselves from nuclear weapons. That's why the President wants to build the peace shield. It would stop missiles in outer space, so that they couldn't hit our house. Then nobody could win a war. And if nobody could win a war, there's no reason to start one. My daddy's smart.

Mr. President, this advertisement plays on our people's justifiable fear of nuclear weapons and pretends that star wars can protect us in a war by building a peace shield which would stop missiles in outer space, so that they couldn't hit our house.

The idea that we can survive an all-out nuclear attack as a result of a peace shield is a fantasy, and to suggest it in this form, in a narration by a child, aiming it at our children, is a disgrace.

Yet it is the logical outcome of statements by the President of the United States and his Secretary of Defense that such systems can be built to make nuclear weapons impotent and obsolete.

This fantasy is denied even by those within the administration who are responsible for developing the SDI program. For example, the head of the Strategic Defense Initiative Office, General James Abrahamson, told Science magazine in August 1984 that "a perfect astrodome defense against ballistic missiles is not a realistic thing."

Yet the President and Secretary of Defense Weinberger continue to sell the SDI program to the American people as if the program will allow the United States to save lives, rather than avenge them by replacing the reality of mutual assured destruction with one of mutual assured survival.

The President and the Secretary of Defense continue to say that SDI can make nuclear weapons impotent and obsolete, and even that SDI will eliminate our need to keep, maintain, and modernize offensive nuclear weapons. (See Secretary of Defense Weinberger, Omni, August 29, 1983).

Former Secretary of Defense James Schlesinger has said that the idea that we can stop relying on our offensive nuclear weapons for deterrence is immoral. He says it is immoral to pretend that SDI can end our need to deter war with offensive nuclear weapons, when we know that just isn't true.

The fact is, while this administration has talked glibly about mutually assured, no one knows how many millions would die if the United States was subjected to a nuclear attack, even if we went ahead with full-scale deployment of star wars. We never will now, because among other things we could never test the system under realistic wartime conditions ahead of time. It would all be one roll of the dice. Maybe the defenses would work—maybe they wouldn't, and millions of us would die.

Mr. President, the United States has never been subjected to such an attack, and part of the reason for that is that we could destroy the Soviet Union if they tried it. That is why deterrence has meant mutually assured survival in the 40 years since Hiroshima and Nagasaki. That is why Jim Schlesinger says all this talk about eliminating the need to keep, maintain and modernize offensive nuclear weapons is immoral.

This administration claims that it can make nuclear weapons impotent and obsolete by convincing the Soviets to engage in massive reductions in offensive weapons, while phasing in defense weapons through some kind of arms agreement. Yet this Administration has charged the Soviets with cheating on every arms control treaty

51-059 O-87-31 (Pt. 21)

they'd ever signed. The Soviets say they are firmly opposed to star wars. Why should we believe that they will join the United States in slashing the offensive weapons that currently provide them with deterrence? Will they not build more then ever, since their own security will be so much at stake?

Secretary of Defense McNamara used to say that 400 nuclear weapons detonated on the Soviet Union would be sufficient to eradicate the Soviet Union. How many warheads must hit the United States to destroy us? Let us make the optimistic assumption that star wars defenses can protect us against 99 percent of all Soviet warheads, that the Soviets hit us with only 1 percent of their entire force. Under that incredibly optimistic assumption, 90 warheads would get through today, Mr. President. That is more than enough to destroy our major cities and millions upon millions of Americans. But the Soviets would not be constrained from building additional nuclear weapons, doubling or tripling or quadrupling the warheads targeting our Nation. So we could have 99 percent effective defenses that still allowed 180 or 360 or more warheads through to hit American soil.

No one can say today that the Soviet Union will not be capable after we deploy a star wars system of building enough nuclear delivery systems to make certain that they can continue to destroy our civilization.

While the President and the Secretary of Defense continue to sell the fantasy that we can put up a peace shield to protect our families from nuclear weaponry, the reality is that with or without star wars, we cannot protect ourselves and our children from nuclear weapons except by ending the nuclear arms race. You cannot do that by building more weapons, even ones sold as a defensive shield.

You can only end the arms race with arms control.

The President has an extraordinary opportunity to achieve dramatic reductions in offensive nuclear weapons, while tightening the limits on defensive systems already contained in the ABM Treaty, rather than to make a treaty impossible by insisting that the field testing and deployment of star wars defenses is not on the table.

Mr. President, I ask that the lead editorial in today's Boston Globe, entitled "Lasers In Thin Air," which discusses the smoke and mirrors sales pitch being used by the administration to justify the SDI Program, be entered into the RECORD

The article follows:

[From the Boston Globe, October 30, 1985]

LASERS IN THIN AIR

To market the Strategic Defense Initiative, the Reagan administration is announcing supposed technological breakthroughs to create the impression that success will be right around the corner if Congress only keeps the money flowing.

Technical feats have little relevance to the crucial problem of "star wars," which is how the development of space weapons will complicate military and political decisionmaking. The feats make the nuclear balance more dangerous. Moreover, some are not even relevant to the technical issues.

The smoke-and-mirrors sales pitch was exemplified by defense Secretary Weinberger's announcement that a low-power laser had been focused sufficiently to pass through atmospheric distortions and hit a target in space. The test proved less than Weinberger suggested. The real problem that prevents zapping missiles with lasers was not even approached.

A laser capable of disabling a missile by burning a hole in it would have to be of extremely high energy. But high-energy lasers defeat themselves by heating the air they pass through. As air is heated it thins, and a laser beam cannot stay focused in thin air. It spreads—"blooms," in technical jargon—like pellets scattering from a shotgun.

The test Weinberger touted succeeded because it did not involve a high-energy laser. Low-energy lasers have been hitting targets in space for 15 years. They do not generate intense heat and do not "bloom"—but they could not burn a hole in rice pudding, much less a missile.

Weinberger obscured that point by adding that another rocket booster had been demolished by a laser at the White Sands Proving Ground. About a month earlier, the Pentagon had released photographs of scrap metal flying impressively after the test.

In that test, the target was a stationary rocket booster blasted with a high-energy laser at the point-blank range of six-tenths of a mile. That is too close for the "blooming" effect to have been a factor.

Even a straightforward technical success will at best demonstrate only a fragment of a system that is extremely complex. The system will be worthless unless all parts function to near-perfection.

"Star wars" advocates have to explain how fallible human beings propose to perfect the system without having had a chance to test it in a realistic environment.

What confidence could there be in space defenses unless they had been rigorously tested in realistic scrimmages? What good are tests unless they are conducted in what the Pentagon calls a "nuclear environment," with warheads flying and machines and men cracking, as both are wont to do?

SOCIAL SECURITY TRUST FUND DISINVESTMENT

● Mr. MOYNIHAN. Mr. President, tomorrow, Treasury Secretary James A. Baker III, as managing trustee of the Social Security Trust Funds, will redeem some $17 billion in Federal securities held by the trust funds. The Secretary will so do, because we have not yet managed to raise the statutory debt limit, and the Treasury is thus precluded from issuing new Government securities to raise sufficient cash to cover the monthly Social Security checks to be issued tomorrow.

According to the Treasury's own estimates, the Social Security [OASDI] trust funds will lose $9 million in interest income, as a result of having to "disinvest" or cash-in these securities tomorrow, rather than over the normal period of 4 to 5 days—as would happen were there no debt ceiling pressures. Many other questions remain, however. Analysis by the Congressional Budget Office suggests that the disinvestment procedures brought into play by the debt limit pressures could cost the Social Security Trust Funds as much as $1.5 billion over the next 5 years.

These are matters which deserve—demand—more careful examination and analysis. To so do, Senator ARMSTRONG, chairman of the Senate Finance Subcommittee on Social Security and Income Maintenance, has agreed to hold hearings next week.

One matter of special concern to me is the cost to the funds of turning-in some of OASDI's long-term bonds for cash, because when these funds are replaced they may well have to be reinvested at a lower interest rate. Approximately $17 billion in long-term bonds will have to be redeemed tomorrow, bonds that have been earning 10⅜ and 10¾ percent interest for the trust funds. Once we raise the debt limit, as we shall and must do, daily investment of Social Security moneys in short-term certificates of indebtedness will resume. On June 30, 1986, all those certificates will be redeemed and invested in long-term bonds. But here's the problem. If the interest rate on long-term bonds on June 30 of next year is less than 10⅜ and 10¾ percent—and such the markets, not the Congress, will determine—then there will be a long-term and substantial loss of interest income for the OASDI trust funds.

CBO estimates that if long-term interest rates are 9 percent on June 30, 1986, the cost to the OASDI funds could reach $1.5 billion over the next 5 years. If long-term rates are 10 percent on that date, the interest loss would be $500 million. Of course, if longer interest rates should rise to 11 percent by next June 30, the trust funds could gain some $600 million over the same 5 years.

These are numbers that matter.

Another issue which this body and the subcommittee should examine is the lack of timely investment of trust fund moneys. The Treasury claims that the debt limit has prevented the Department from investing all incoming Social Security receipts since September. The Treasury Department has insisted, however, that such will not cost the OASDI trust funds any interest income, because of the special authority it holds under normalized tax transfers, a provision of the 1983 Social Security amendments. This authority, according to the Treasury, will allow the Department to restore any interest losses arising from this particular lack of investment. The subcommittee needs to establish that this

authority does exist as claimed, and that the restoration of lost interest by Treasury will follow.

It is clear, that such authority does not exist for the supplementary medical insurance trust fund [SMI]—part B of Medicare. On November 1, which is to say tomorrow, some $2.5 billion in SMI funds will lie uninvested, and the fund will be losing substantial amounts of interest. This interest losses could only be corrected by congressional action.

Assistant Treasury Secretary John Niehenke has assured me that the administration will prepare legislation to restore to the Social Security trust funds the $9 million or so of interest income lost by the 1-day disinvestment, and will present this legislation at the committee hearing next week. We will certainly explore there whether additional legislation will be required as well, to address other potential losses to the trust funds.

Many questions about the procedures the Treasury will follow, and their implications for the trust funds, must be explored. I am pleased that the hearings will provide the opportunity to so do.●

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT OF 1985

The Senate continued with the consideration of the bill (S. 1714).

Mr. DOLE. Mr. President, based on the statement by the distinguished Senator from Montana, unless there is some objection on the other side, I would send a motion to the desk.

Mr. BYRD. Will the Senator yield?

Mr. DOLE. I yield.

Mr. BYRD. The Senator has a motion. I would suggest he go ahead with it. I have no indication that there will not be a request at this time. The distinguished majority leader is certainly within his rights.

MOTION TO RECOMMIT WITH INSTRUCTIONS

Mr. DOLE. Mr. President, I send a motion to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] moves that S. 1714 be recommitted to the Committee on Agriculture, Nutrition, and Forestry with instructions to report back forthwith.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 939 TO MOTION TO RECOMMIT WITH INSTRUCTIONS

Mr. DOLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 939.

In lieu of the instructions proposed insert the following: "to be reported back forthwith in status quo with the following amendments: at the end of the bill insert "Intermediate Export Credit."

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 940

Mr. DOLE. Mr. President, I send another amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 940.

The legislative clerk proceeded to read the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading be dispensed with.

Mr. BYRD. Mr. President, I object for the time being.

The PRESIDING OFFICER (Mr. ABDNOR). The objection is heard.

The legislative clerk resumed reading the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that we temporarily suspend the reading of the amendment for the purpose of making an announcement and that no Member's right be waived to request further reading of the amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, a number of Members have asked if we would have additional rollcall votes tonight. They have been calling on both sides, some in the dining room. I wanted to announce that there will be no more rollcall votes tonight. We are trying to clear one matter for tomorrow morning and we are just one phone call away from that. But, in fairness to my colleagues who have been making the inquiries, I can now announce there will be no more rollcall votes tonight.

I ask that the clerk resume the reading of the amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk resumed reading the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with for the purpose of obtaining a unanimous consent request and that no Member waive his right to ask that reading of the amendment be continued.

The PRESIDING OFFICER. Is there objection? If not, without objection, it is so ordered.

ORDERS FOR FRIDAY

RECESS UNTIL TOMORROW AT 8:45 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes it business today, it stand in recess until the hour of 8:45 a.m., Friday, November 1, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Following the recognition of the two leaders, I ask unanimous consent that the following Senators be recognized for not to exceed 15 minutes each: Senator THURMOND, Senator WILSON, Senator DOLE, and Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERIOD FOR ROUTINE MORNING BUSINESS

Mr. DOLE. Following special orders, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 9:45 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. After morning business, it is the intention of the majority leader to turn to consideration of H.R. 2965, the State-Justice-Commerce appropriations bill. At about 1 p.m., it is my intention for the Senate to resume consideration of S. 1714, the farm bill.

Again, based on information I have received from the managers of the State-Justice-Commerce Department bill and the manager on this side on the farm bill, I expect that we could have rollcall votes throughout the day on Friday.

I also say that it could be that tomorrow, we will be faced with the debt ceiling extension. It is my understanding that the conference broke up in disagreement. There will be votes tomorrow in the House and they will be sending us a brief extension of the debt limit. As far as I am concerned, they may as well save that brief extension.

It had been our hope that the House would act and dispose of the entire issue by tomorrow evening. I do not believe I could have any success in encouraging Members, maybe on either side, to have another extension of the debt ceiling. That is a possibility tomorrow. I advise Members that I understand that the House will go into session at 11 a.m. tomorrow. I am not certain when they will vote, but it is quite likely we could be around here in the late afternoon waiting to dispose of that matter. I do not want any Member to leave town not knowing that is a possibility.

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT OF 1985

The Senate continued with consideration of the bill (S. 1714).

Mr. DOLE. Mr. President, I ask unanimous consent to have printed in the RECORD an explanation of the amendment that is being read, which includes cost savings and the highlights of the bill, including the TOP program—Target Option Program—for wheat. I think it might be helpful to Members if that is placed in the Record.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LUGAR/DOLE COMPROMISE

SAVES $7.6 BILLION 8+.6 BILLION—BUDGET MARK UNDER JANUARY BASELINE

For feed grains, cotton, and rice, freeze the 1986 target price at the 1985 level and authorize the Secretary of Agriculture to reduce levels by no more than 5 percent annually for 1987, 1988, and 1989. The target price levels would not be below 110-125 percent of the 5-year average market price.

WHEAT

For 1986 through 1988, target prices would be tied to a specific acreage reduction percentage. Producers choose their own target price and corresponding acreage reduction (ARP) as follows:

Wheat

(replaces wheat referendum)

ARP (percent)	1986	1987	1988	1989
10			3.80	[1] $3.72 MI
15	4.20	3.95	3.95	
20	4.38	4.15	4.15	
25	4.60	4.35	4.35	
30	4.85	4.60	4.55	
35	5.15	4.85		
40	5.50	5.20		

[1] No ARP

In crop year 1989, set target prices at 110-125 percent of a 5 year average of past prices, or at 85 percent of the 1985 target price, whichever is higher.

Total savings on target prices: $2.3B.

Retain the committee-approved maximum acreage set-asides of 15 percent for feed grains, 20 percent for cotton, and 35 percent for rice for the 1986 through 1988 crop years. Authority for set-asides would terminate beginning with the 1989 crop for wheat, feed grains, cotton, and rice.

Savings: $0

Require the establishment of a 3-year 15 million acre emergency conservation reserve. Cropland eligible for the reserve must be classified as erosion prone. (Payments for entering the reserve would be made using CCC-owned surplus commodities) (No cost: CBO)

Savings: $0

Alter the conservation reserve program to require the Secretary to enter no more than 9 million acres in 1986, 4 million acres in 1987, 4 million acres in 1988, and 8 million acres in 1989. The committee-approved bill had required 10 million acres in 1986, 10 million in 1987, and 5 million in 1988.

Savings: $2.3B

Require a 50 percent cost sharing in establishing the appropriate cover crops for the conservation reserve.

Require that target price deficiency payments be calculated on a 12-month average price instead of the current 5-month average market price.

Savings: $1.0B

Require the Secretary to issue advanced deficiency payments for the 1986 crop with 15 percent of the advanced coming from in-kind payments.

Savings: $0

Reduce the intermediate term export credit program from $1 billion in direct credits annually to $500 million annually in loan guarantees.

Savings: $1.3B

Reduce from 25 percent to 20 percent the Secretary's authority to transfer FmHA guaranteed loan funds into direct loan funds.

Savings: $300M.

Interest savings: $400M.

Mr. BYRD. Mr. President, I no longer insist on the reading of the amendment. I think if the majority leader wishes to let the Senate go out, we will have no further objections to dispensing with the reading of the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the amendment (No. 940) is printed in routine morning business under amendments submitted.

Mr. DOLE. Mr. President, let me indicate before we recess that I am hopeful that we can have a vote on this amendment tomorrow. I think most of the Members on both sides, whether they are for or against the amendment, want a farm bill. If we take a look at the so-called fall logjam, we have all these balls in the air. We indicated if the reconciliation measure came back to us we would set aside the farm bill. There is no question that when the debt ceiling matter is before us, we shall have to set aside the farm bill.

It is my view that if we can act decisively on this amendment tomorrow, we can bring the farm bill debate to a close. If not, it is not a threat or speculation, but a reality that probably by sometime next week, we are going to be back on reconciliation and all bets are off for the American farmer. The same is true if we get into another extended debate on Gramm-Rudman-Hollings with respect to the debt ceiling. I hope we can make some progress tomorrow.

Mr. President, there being no——

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. DOLE. I yield to the Senator from Montana.

Mr. MELCHER. I thank the Senator for yielding.

It is my understanding that there is a desire by the majority leader to go to another appropriations bill tomorrow morning.

Mr. DOLE. Because there is another morning farm credit hearing in the Senate Agriculture Committee and most of the members of the Agriculture Committee who would be active in the floor debate feel that is an important issue.

Mr. MELCHER. I certainly agree with the majority leader on that point, but I think perhaps the majority leader is inferring that everybody understands these 165 pages that were dropped on the desk and will be ready for a vote. I just want to say this: It is common sense that Senators want to know what they are voting on.

For the various commodities that are involved and with the various changes in the other parts of the bill that are not directly identified or directed at commodities themselves, they are going to want to know what their producers think. I do not want to see us in a prolonged stalemate here on the Senate floor, but I think it is apparent that this is a complicated amendment and I would not ask Senators who are interested in what is in the bill under any condition to be ready to vote tomorrow afternoon.

I know the majority leader has a task to move legislation along through the Senate and get it out of Congress so the President can sign it, but the constant remarks that are made by the majority leader are misleading I think to a lot of people in that somehow we are being dilatory around here when we are going to look at 165 new pages in an amendment to a bill that is pretty long itself. I hope the majority leader can refrain from indicating that because the Senators on this side—and I assume there are some on that side; I know I get questions from that side from individual Senators—have some decency and regard for their understanding of what is in the particular amendment. Can the majority leader tell me what he hopes to do for next week?

Mr. DOLE. Mr. President, I am not going to start a debate tonight at 9 o'clock, but I heard that same statement from the Senator from Montana in July. I have listened to it for 6 months in the Agriculture Committee. The American farmers would like us to pass a farm bill. We cannot delay and delay and delay. We delayed too long in convenience to the Senator from Montana. I think it is time we worry about the American farmer. We are going to try to pass the bill. Obviously, if the Senator is indicating there will be no votes tomorrow, he can certainly prevent them. But we are going to be here. We are going to try to get votes tomorrow. This is not complicated. It has been in the farm bill itself for weeks. Some of the language is the very language the Senator from Montana proposed last night. All this talk about being so complicated

just does not wash anymore. If this bill had never been brought up on the floor, that would be one thing.

We discussed these same issues all spring, all summer, and now we are here in the fall. Every time we bring up the farm bill the Senator from Montana is here to do one thing: complain about the rush.

Maybe the Montana farmers are in good shape. Maybe they do not want a farm bill. But I am a little tired of hearing all this talk on the Senate floor when farmers in my State are demanding action. We can delay as long as the Senator wants, but I want the Kansas farmers to understand the reason for the delay. We are ready to vote. We are ready to vote tonight. There is nothing complicated about this amendment. We can go on and on and on and on, but it serves little purpose.

The point I am making to the Senator from Montana, if he worries about farmers, if he does not want to cost them millions and millions of dollars more, he will let us vote on this bill. We are going to get tied up in the reconciliation, we are going to get tied up in the debt ceiling, and we are going to be back here after Thanksgiving still working on the farm bill.

If that gives the Senator from Montana pleasure and if that makes his farmers happy, that is all right. But it does not make this Senator's farmers happy. I think sooner or later we are going to have to decide who is the self-appointed protector of the farmer.

I understand that the Senator from West Virginia wants the yeas and nays.

Mr. BYRD. Mr. President, does the Senator yield to me for the purpose of asking for the yeas and nays?

Mr. DOLE. I yield.

Mr. BYRD. Mr. President, the yeas and the nays have been ordered on the motion to recommit and on the first-degree amendment thereto. Am I correct?

The PRESIDING OFFICER. That is correct.

Mr. BYRD. They have not been ordered on the second-degree amendment?

The PRESIDING OFFICER. That is also correct.

Mr. BYRD. I ask for the yeas and the nays on the second-degree amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. I thank the majority leader.

RECESS UNTIL 8:45 A.M. TOMORROW

Mr. DOLE. Mr. President, I move that the Senate stand in recess until 8:45 a.m. on tomorrow, Friday.

Mr. MELCHER. Mr. President, will the majority leader yield for a question?

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to; and, at 9 p.m., the Senate recessed until tomorrow, Friday, November 1, 1985, at 8:45 a.m.

NOMINATIONS

Executive nominations received by the Senate October 31, 1985:

THE JUDICIARY

Deanell Reece Tacha, of Kansas, to be U.S. circuit judge for the 10th circuit vice a new position created by Public Law 98-353, approved July 10, 1984.

EXTENSIONS OF REMARKS

LANDMARK COLLEGE CONVOCATION—LEARNING DISABILITIES AWARENESS MONTH

HON. CHARLES McC. MATHIAS, JR.

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Thursday, October 31, 1985

● Mr. MATHIAS. Mr. President, the month of October was designated as Learning Disabilities Awareness Month by Senate Joint Resolution 191 adopted on September 19, 1985. On this last day of the month I want to place before the Senate two speeches that deliver the message that the resolution was intended to encourage.

Mrs. Mathias has called my attention to these speeches that she heard on October 4 at the first Convocation of Landmark College, of which she is a trustee. She herself was forced to overcome the problems of learning disability and so she could fully appreciate the thoughts expressed by John Meyers, publisher of Time magazine. Because of her own experience she found the words of a student, Keith Promisel, very touching and profoundly moving. She says that "above all else, it is the new found presence of this young man—his new sense of self—that brings tears to my eyes."

John Meyers speaks to the learning disabled in confident and encouraging terms, but he also speaks to all Americans who care for the future of their country. He says:

In our zeal to create the better mathematician, better scientist, better technician, better student * * * we must not ignore the better person.

Preparing a student, to my mind is no more important than preparing a person—a person whose influence for good in our society is not based on scholarship alone, but on his relationship with his fellow human beings.

Mr. Meyers saluted the courage of students at Landmark College and elsewhere who "believe enough in yourself even though all your school life your hopes have eluded you, your confidence has abandoned you, your mind seems to have betrayed you."

Keith Promisel is one of the courageous young people about whom John Meyers was talking. He followed with his own story of pain and hope and ultimate success. An important element of his achivement was the example and help of his sister, Sonda, who showed him the way and led him to discover Landmark. He says.

During a period of about a year, I had to reorganize my thoughts about myself. I felt relieved to know there was an explanation for my difficulties, but I also felt bitter at the system through whose cracks I had fallen. And I felt scared about the prospect of coping with this disability."

He concludes with joy and confidence:

We lead the way into the future for other students with the same affliction. And hopefully, learning day-by-day to surmount our obvious difficulties, we may also help to provide a mirror in which we may see not only our disabilities, but our immense potential as well.

These speeches, one from a concerned and compassionate citizen and the other from a learning disabled student who is overcoming the disability convey a powerful message. They describe the enormous cost of ignoring learning disability and the reward of finding a way to surmount is obstacles.

I know that all Senators are concerned with this problem and will find these speeches of great interest and value. I ask that they be placed in the RECORD.

The material follows:

JOHN MEYERS SPEECH—LANDMARK COLLEGE CONVOCATION

Not only am I honored to be your speaker, I am grateful for the opportunity it gives me to address this audience and what it represents.

The occasion today is an experience of personal significance to each of us. For some, fulfillment . . . for some, promise . . . for others, challenge.

For me, it is a chance to express many of my own feelings about what we celebrate here . . . not the new facilities, the beautiful campus, the unique programs, the impressive classrooms—not the institution—but the size of its dream:

To set free those bright young minds whose potential might otherwise go unused; whose will to learn might otherwise go unnoticed.

I am sharing your beginning—and I must confess that I have spent a good deal of time wondering how I should begin my remarks to say something that holds meaning for so special and varied a group—students, parents, faculty, administration, members of the board, friends and supporters of the school.

I'll begin by asking you to remember just two words: "CARING" . . . and "COURAGE." Because to my mind, it is these two qualities more than any others that represent what this school is all about.

It was these two qualities that were needed to accomplish what we dedicate here. And it is these two qualities that will be demanded to achieve what we hope for here.

Long after we leave the celebration and congratulations and well-wishing—perhaps when the history of this college and its beginnings are recorded—these two words—CARING and COURAGE—will still serve to define both its spirit and its expectations.

What do I mean by courage?

For any young person entering any college or university today the experience can be intimidating, and often overwhelming.

Not only must they cope with the demands of their studies, most of them have never been so conscious of being individuals on their own. They are half-way between boy and man, between girl and woman. And if that weren't dilemma enough, are concerned with and caught up with the same dilemmas that we and the world face. They are confronted with choices and questions—but their questions: "Who am I?" "Where am I going?" "Why should this or that be?"

Now imagine adding to all this, the burden of being a young person with a learning problem. The dream of college becomes a nightmare of frustrations. The demands and challenges must seem insurmountable.

What strength of character . . . what depth of wanting . . . what determination . . . what courage must it take to pursue the thought of a college career? To believe enough in yourself even though all your school life your hopes have eluded you, your confidence has abandoned you, your mind seems to have betrayed you?

Few of us can imagine the cost to one's self-esteem that a learning disability exacts.

But most of us can imagine how much courage it takes to retrieve it.

You students who are entered here must never doubt your courage—or yourself—for that is what got you here. And here is where with courage, your hopes may be rekindled . . . your confidence regained . . . your pride restored.

Here is where courage is matched with caring.

Those who support your will to learn are more than teachers of skills, coaches of language, solvers of problems—they are allies in your struggle . . . sharing your defeats, the frustrations, the painful progress.

This union of caring and courage, this bond between teacher and student occured to me when I noticed a short article on the sports page of the New York Times just a week or two ago (maybe you saw it)—about the football team of Eastern Oregon State College who was beaten 86 to 0.

What was remarkable (besides the score), and the point of the article, was the attitude of the losing players. What might have been a humiliating experience was instead a kind of pride at their individual efforts.

One of the players said: "Everybody tried to do the job. We tried to keep each other up. We told each other 'Don't give up.'" Eventually the idea was to disregard the scoreboard and seek smaller victories. The defensive end siad: "For me, I thought I had a pretty good game. You can look at the score and say 'that's awful,' but we did a lot of positive things."

86 to 0. But what triumph of spirit.

With that kind of courage and caring, that kind of attitude, there are no failures.

Unfortunately life is not a game. And the world these young people face is not so caring. Once graduated, what then?

It has always been hoped by every American generation, that the next generation

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

will reshape society while serving its needs. That won't be easy.

Rarely, I think, have the American people ever had so much at one time to worry over, cope with, be frustrated by, or angry at. A confusion of problems—some immense, all complex and none easily resolved.

Almost every week, we find we must concern ourselves not just with the sudden stone dropped into the pond, but with the ripples it causes. The complexities and anxieties are enough to dismay the wisest of thinkers, discourage the finest of minds.

At a commencement address a few years ago, Woody Allen said: "The history of mankind is at a crossroads. One path leads to disillusionment and despair—the other leads to total extinction. I hope we have the wisdom to make the right choice."

Now, I'm not *that* pessimistic—but I am concerned.

The genuine, but complex problems that our society faces—the complex and often confusing events that are taking place all over the world, require more than the public outcry . . . the private opinion . . . the political statement . . . the simplistic solution. And, I am concerned about the major role that education must play in our approach to an uncertain future.

Much has been said, studied, reported and written about the quality of our education. I applaud, as we all must, our resolve to "stem the tide of mediocrity."

But, at the same time, I must confess I am bothered by how this nation perceives the whole purpose of education, bothered by the reasons that are given for wanting to improve our schools . . . and the most highly publicized reasons were that the quality of our education posed a threat to our economic and technological progress.

Nothing about the threat to the minds of our youth . . . their appreciation of knowledge, their enlightenment, their perception, their vision . . . and even their wonder.

No where in all the projections, outlooks, statistics, patterns and educational trends, is there any indication of the kind of individual . . . the sort of person . . . we want to make up this highly educated, future technological society.

What will be his sense of values . . . his sense of responsibility . . . his ethics and morals . . . his attitudes and sentiments . . . and what wil be his character?

Somehow it disturbs me to think that technological and economic threats from abroad are the only alarms which will arouse us as a nation to overhaul our system of education, as well as our attitudes about education.

Certainly in this highly technological age, we should be disturbed or alarmed if our colleges and universities are not training graduates capable of coping, much less managing or governing in our complex society.

But the problems that confront us . . . as enormous as they are . . . should not obscure those deeper problems which plague our society and our world.

In our zeal to create the better mathematician, better scientist, better technician, better student . . . we must not ignore the better person.

Preparing a student, to my mind, is no more important than preparing a person . . . a person whose influence for good in our society is not based on his scholarship alone, but on his relationship with his fellow human beings.

Colleges and universities are not just institutions to educate a quantity known as the student body. They are places of learning for each, single, separate, individual, person . . . with his or her own thoughts and feelings and promise. Places of discovery—not just of knowledge—but of one's self as a human being.

There is still considerable power to the idea that a student should be primarily educated not to hold a job, or to memorize literary monuments, or even to think like Aristotle . . . but simply to develop the potentialities of her or his own self.

I am not qualified to debate the age-old question of the humanities versus the sciences . . . but I'm certainly qualified enough to wonder why it has to be one or the other.

Therefore, I suppose my concern is twofold.

Who will develop our sciences . . . manage our technology . . . maintain our economic strength?

And who will inspire us to eliminate malice . . . encourage us to battle intolerance . . . who will set standards for an enlightened new society . . . who will articulate fundamental human needs?

If, as some will suggest, teaching morals and values is not the responsibility of a school, then let it be a gift from the school. A course without a classroom.

Certainly the responsibility for learning a sense of values belongs in the home—but just as surely it belongs in this place—a home away from home where a good part of a young person's waking hours are spent, sharing the company—and the ideas—of his or her peers, and those who instruct or coach them.

Those who leave here will have battled adversity—and in their new found self-respect, self-reliance, self-determination they will have learned something of human values.

Like each student who attends here, this place has an identity. If I might take the liberty of paraphrasing something from Thornton Wilder's "Our Town" which you may remember:

"This is Landmark College . . . on River Road . . . the town of Putney . . . State of Vermont . . . The United States of America . . . Continent of North America . . . Western Hemisphere . . . The Earth . . . The Solar System . . . The Universe . . . The Mind of God."

You have a very specific place in our world and a very specific purpose. Henry Luce's father, himself an educator and missionary, always said that the purpose of education is to make a person feel at home in the universe.

That is not too far from the noble aim of this institution. And on this occasion of its dedication, we citizens and parents could dedicate ourselves to aiding that purpose.

All it takes is caring . . . and courage.

Thank you.

Keith Promisel Speech—Landmark College Convocation

The mirror is an amazing object. It provides us a means of seeing ourselves. Society is a kind of mirror in this regard, for we see ourself through its perceptions and values. I, like most, have been looking into mirrors for the better part of my life, and for most of that time I never doubted I was seeing a true image. It is difficult to understand, especially when you are young, that the distortion or deficiency you see in yourself may be partly a distortion in the mirror.

During each of my earlier school years I would start out all "gung ho." Excited at the possibility of success, I would put all my effort into studying and paying attention in class. However, the work soon became increasingly difficult. By progress report time, I would be failing at least fifty percent of my classes. I remember rifling through the mail to intercept this news of failure. The image I felt projected on to me was of a lazy troublemaker. Perhaps I partly believed it. Frustrated and a bit angry, I would say to myself, "Hey, I could acquire this label with hardly any effort." And minimal effort is what I ended up producing.

While in high school, I was as unsuccessful. My sophomore GPA was well below a passing mark. You can't imagine the pain and frustration I felt when I finally realized that I had been passed from one grade to the next, pushed from one place to another, just because an educational system, which did not understand my problems or potential, also did not want to deal with me. I also realized that at the rate I was then going, I would probably fail out of college within six months. It was at this juncture of my life that I anxiously looked into the mirror of society's values and perception to see if I wasn't missing something. Was I really insufficiently dedicated to my studies? Was it that simple? Was I really a loser compared to my sister Julie, who always did everything well? After twelve years of schooling, my parents had me tested to see if I had a learning disability, and it was discovered that I in fact did have a form of dyslexia, specifically a visual/perceptional problem.

During a period of about a year, I had to reorganize my thoughts about myself. I felt relieved to know there was an explanation for my difficulties, but I also felt bitter at the system through whose cracks I had fallen. And I felt scared about the prospect of coping with this disability. I also began to reach out for help. Despite my high school GPA of 1.85, I attended a local junior college for a semester in a special education program. They used what is known as the "by-pass" method. If I couldn't read, I would listen to a tape and all my tests were taken untimed. After a semester, I received a 3.0 GPA, but what good is a "B" average if you can't read?

It was through my little sister, who was attending Landmark School West in Los Angeles, that I discovered The Landmark College Preparatory Program and heard of the new Landmark College. It was at the Landmark School this summer that I found a new mirror, a new way of seeing both the weaknesses and the strengths I was not sure I had. In the perceptions of this educational community, I finally managed to see reflected the possibility of success. The gains I made helped me feel as if I could really acquire those skills I had earlier simple bypassed. Even the ability to pick out the main idea from a cluster of details in a paragraph made me realize the progress I made over the summer. It is this progress that makes me feel good to be here at Landmark now.

But how did others come to be here? Well, I know of one student in this audience who graduated from high school without the ability to read. With apparently no other option, he worked for five years in a plastic tubing company. However, his presence here now represents a stubborn refusal to accept the verdict that a slower or different learning style means his potential contribution to society is severely limited.

I could go on providing examples. Suffice it to say that all of us, although our stories may differ, probably find comfort and confidence in the mirror presented here at Land-

mark College. This mirror does not reveal a self that may avoid hard work; it does reveal selves capable of accomplishment. It is as liberating to experience a truer reflection of what we always know about ourselves, and what we knew we could accomplish through hard work, as it feels good to escape from the distortions of a carnival house of mirrors.

All the students you see here today know that Landmark College doesn't have the number one football team in the nation. We did not come here to participate in certain measures of prestige. Even our population is small—especially in the female sector. But we do know that we are a leader in a way other universities and colleges aren't. From President James Olivier to all the faculty and students, we lead the way into the future for other students with the same affliction. And hopefully, learning day-by-day to surmount our obvious difficulties, we may help to provide a mirror in which we may see not only our disabilities, but our immense potential as well.

Thank you.●

BIZARRE HANDLING OF MEDVID CASE A BLOT ON AMERICAN HONOR

HON. FRED J. ECKERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. ECKERT of New York. Mr. Speaker, many of us in the Congress are today dismayed and distressed about the tragic case of Miroslav Medvid, the Ukrainian seaman who attempted to defect to the United States by jumping off a Soviet ship anchored near New Orleans last week. Some of us are demanding that the President and the Attorney General conduct a full investigation into the bizarre handling of this case and that, pending the outcome of this investigation, we detain that Soviet ship holding Seaman Medvid. Because of the disgusting inept performance of some U.S. Government authorities, Seaman Medvid was forcibly returned to the ship after twice jumping into a river to try to escape from that ship, and before ever being provided an interpreter so that he could understand his rights, and, thus, Soviet KGB agents were given the opportunity to interrogate and intimidate him with threats against family and friends back in Ukraine, leading him to state—with Soviet officials glaring at him—that he really did not wish to defect.

Mr. Speaker, this latest U.S. blundering of a Soviet bloc defection is, like the case of Lithuanian Seaman Simas Kudirka and Soviet Ballerina Ludmilla Vlasova, a blot on American honor.

As we ponder the seriousness of this latest tragic case, Mr. Speaker, it may help all of us to have a greater appreciation for the fundamental issue of individual freedom at stake here if we read the very moving story about the case of Simas Kudirka which was written by Kenneth Y. Tomlinson for the August 1975 issue of Reader's Digest:

A MAN CALLED SIMAS

(By Kenneth Y. Tomlinson)

In the gray waters off Martha's Vineyard, on the morning of November 23, 1970, a Soviet fishing ship lay moored alongside the U.S. Coast Guard cutter *Vigilant.* Inside the Soviet vessel, American and Russian representatives would soon be holding talks on the longstanding dispute over Soviet fishing practices in the North Atlantic. On the decks of the two ships, the atmosphere was lighthearted. Laughing, gesturing seamen threw souvenirs back and forth, seemingly oblivious to the political differences which divide their nations. Except for one: Simas Kudirka, a 40-year-old radioman on the Soviet ship, stood back, watching the exchange without emotion.

Kudirka's mind snapped to attention when a Coast Guard sailor began heaving American magazines to the Soviet deck. Two young seamen picked up these precious souvenirs and walked away. And then something happened which would change Kidirka's life. His ship's political commissar—actually a KGB agent—watched as the seamen took the magazines below. Then Simas heard him say, "Those two will never go to sea again."

Kudirka was consumed with bitterness. One tiny misstep, and the lives of two young people were ruined. How long would it be before his own two children faced a similar fate? And how could he help them as long as he remained bound by the chains of Soviet oppression? Suddenly, all his years of rage against Soviet tyranny exploded in a new resolve. He would reach freedom—and then somehow provide a means of escape for his family. And the time to act was now.

In the twilight of early evening, the deck of the Soviet ship seemed clear. Kudirka climbed over the railing and hurled himself across nearly ten feet of water to the *Vigilant.* His hands grabbed the railing, his feet thumped against the ship's side. With a thrust of his strong legs, he propelled himself up to the deck. Seconds later, he burst onto the bridge of the *Vigilant.* "Good evening," he said to Coast Guard officers. After a moment of stunned silence, they greeted him warmly.

In the hours that followed, Simas told the Americans of the miseries of life under the Soviets and tried to explain in his limited English how the Russians had enslaved his native Lithuania after World War II. It never occurred to him that political asylum would be refused. But then the American ship's captain, his face filled with anguish, stood before him. He said he had orders from his superiors. Simas was to be returned to the Soviets.

Kudirka tried to explain what would happen to him. He begged, he pleaded, but his words could not change the captain's orders. Later that night, six Soviets surrounded him on the deck of the American ship and began pounding him with their fists. "Oh, God, help me," Kudirka cried, but no one did. The savage beating continued until he was subdued and bound. His flight to freedom was over.

A special Coast Guard inquiry later identified the man responsible for Kudirka's return: Rear Admiral William B. Ellis, commander of the First Coast Guard District in Boston. Anxious not to offend the Soviets and thereby disrupt the fishing negotiations, Admiral Ellis had rejected Kudirka's plea for asylum. "They are not barbarians. Get the guy back aboard," the admiral ordered. Officers on the *Vigilant* rationalized that the decision was based on high-level considerations of détente. In fact, it flouted every American principle and law regarding political asylum. To avoid court-martial proceedings over their role in the Kudirka affair, Admiral Ellis and his chief of staff were allowed by the Coast Guard to retire.

A CHANCE TO SPEAK

Simas Kudirka was charged with treason and jailed in Vilnius, the capital of Lithuania. From his cell window he looked out on the street where, a quarter of a century before, tens of thousands of Lithuanians had been marched on their way to Soviet prisons in Siberia. For 25 years he had lived with memories of friends slaughtered because they resisted the Red army, of teachers who had disappeared in the night. All that time, deep inside, he had yearned to defy the communists. As his trial approached, he determined to speak out at last.

Kudirka hid his intention well, holding his temper through endless interrogations by KGB agents. He was but a simple man, he insisted, curious to see the United States, where his grandfather once lived. But at his trial, in a speech which lasted for hours, he condemned the tyranny of Soviet rule: "I thought at sea I would forget the tragedy of my people. But even in the fleet, I found injustice, and in the end I discovered I could no longer live without freedom."

Kudirka was sentenced to ten years at hard labor and sent to the Potma prison complex in Mordovia, 300 miles southeast of Moscow.

Word of Kudirka's trial had reached even this remote camp and, when he arrived, some 40 men who still dared to resist gathered to greet him. Kudirka had seen deprivation in his life, but nothing to compare with this sight. Mecys Kybartas, 46, a victim of the communist conquest of Lithuania, who had been in Soviet prisons for 23 years, led the group. His hollow face was deeply lined; his arms no thicker than twigs. "The food here would not be eaten by animals," Kudirka was told, and he soon realized how true that was. The potatoes and cabbage leaves had long ago spoiled; the meat, when meat was served, was but pieces of lungs and sex organs.

Kudirka was assigned to the prison's cement works. The work was long and hard. But it was not the labor which bothered Simas in these early months. Signs of countless deaths from years gone by were everywhere. When prisoners dug trenches in the camp, they frequently struck human bones.

HOLD ON!

In October 1971, Kudirka's wife, Gene, was permitted to visit him. Kudirka told her of a resolve that had been growing within him. While he still had the strength, he must do something to protest Soviet tyranny, must give up thoughts of release and join the resistance within the prison. "Please, Simas, no," she begged. "You alone cannot redeem the world. I need you. Your family needs you!" He led her to a window overlooking the series of fences enclosing the concentration camp. "Is this to be the future of the next generation and the next?" he asked. "No, my dear wife, I have seen to much."

In deepest secrecy, the prison resisters formulated an appeal to the International Red Cross. It spelled out the inhuman conditions under which they lived, and charged that the Potma prison was designed to "transform human beings into animals." Kudirka and eight others signed it, and

then the appeal was smuggled out of the camp.

(Early the following spring, in a letter from his wife, Kudirka would learn that their smuggled words had indeed reached the West.)

Despite incredible hardships, these were exhilarating days for Simas Kudirka. Dissidents in the camp—the Jews, the Baptists, the Ukrainian or Baltic nationalists—were all united in the spirit of protest. Kudirka found a special friend in Nikolai Budulak-Sharigin, a Ukrainian falsely arrested on spy charges in 1969. Budulak had lived in London for many years and, even in baggy prison garb, he carried himself in straight-backed British style. He addressed prison authorities as "my dear fellows" and always somehow, managed to have a clean handkerchief in his pocket. Budulak taught Kudirka the words of Rudyard Kipling's poem "If"—words which were to sustain him often in the months ahead. . . .

If you can force your heart and nerve and sinew
To serve your turn long after they are gone,
And so hold on when there is nothing in you
Except the Will which says to them: 'Hold on!' . . .

Well aware that the United Nations Universal Declaration of Human Rights, signed by the Soviets, prohibited every condition under which they were imprisoned. Budulak and Kudirka mapped plans to commemorate Human Rights Day. Secretly, Budulak made a blue flag from a piece of underwear, painted on it the white U.N. seal and draped it with black cloth. In the pre-dawn hours of December 10, 1971, Kudirka hung the flag atop a telegraph pole.

Other protests followed. Then, one day in July, a Soviet army lieutenant colonel arrived in the camp. Shortly thereafter, 250 prisoners—including Kudirka and Kybartas, but not Budulak—were marked for transfer. "Remember, Simas," Budulak said, as they shook hands for the last time, "even if you have to walk alone, make sure you walk."

FROST ON THE WALLS

At 2 p.m., under a hot summer's sun, guards led Kudirka to the waiting train and jammed him into a car with a hundred others. The car was like a sealed oven; soon they all were gasping for air. For three horrible days and nights—during which one man died—the train barreled eastward to a prison in the Urals. "You had it good in Mordovia," they were told on arrival. "They put up with your silly protests. But the thaw with the West will not help you here."

Indeed, it did not. Medical care rarely was offered even to the sickest of prisoners. When winter sent temperatures plummeting below zero, prisoners shivering in cotton coats watched frozen sparrows drop from the sky. KGB agents constantly harassed Kudirka, confiscating copies of his writings, poems and protests. He spent a total of 70 days in solitary confinement in a small isolation cell often so cold that frost covered the walls. And his once strong body wasted to little more than 120 pounds.

But at least he was alive. Others were not so fortunate. In the spring of 1973, Mecys Kybartas was taken to the prison hospital. Although he was dying of lung cancer, doctors would give him no medication for the pain. Nor could the KGB resist one last chance to torment him. If he would renounce his role as a partisan 25 years before, they promised him freedom to return home. His reply was a whisper: "Get out of my sight, you pitiful plague of humanity." A few days later he was dead.

Only occasional letters from home gave Simas comfort in these days. There was one from his mother which touched him most of all. She wrote that late one night a stranger—a young Lithuanian student—appeared at the door of her house. "We are Simas' friends," he said. And he pressed 100 rubles into her hand.

SITDOWN STRIKE

Sarunas Zukauskas, a Lithuanian medical graduate, arrived at the camp in the spring of 1974. "I know a lot about you," he said to Kudirka. Zukauskas was the youth who had raised the money for his mother. He had now been sentenced to six years for, among other things, "aiding the family of a dangerous offender."

Dr. Zukauskas' fervent spirit revitalized resistance. On June 20, 1974, a 19-year-old prisoner was beaten by a Soviet officer. The prison doctor examined the youth and declared that the physical signs of the beating were birthmarks. When Zukauskas heard the story, he stormed to the prison headquarters demanding treatment for the prisoner and punishment for the officer. The Soviets reacted by placing the prisoner in solitary confinement. The following morning, in protest, nearly 50 prisoners refused to go to work.

Within days, however, a swarm of Soviet authorities descended on the prison. Ringleaders of the resistance—including Kudirka and Zukauskas—were thrown into the prison stockade. Kudirka's trial, held in a horse barn, lasted 15 minutes. The prison court ruled that "humane rehabilitation" had failed with Simas Kudirka. He was sentenced to three years in Vladimir, a prison for incorrigibles.

All this while, Simas Kudirka had not been forgotten in America. Long after the national furor over the Vigilant incident had died, two Lithuanian-born housewives—Grazina Paegle of Locust, N.J., and Daiva Kezys of New York City—led a campaign to pressure Congressmen and State Department officials to intervene in the Kudirka case. Time and again they were turned away. Only a miracle could produce Kudirka's release, they were told.

On July 23, 1983, such a miracle occurred. An elderly woman in Lithuania wrote her sister in Connecticut of meeting Simas' mother at a marketplace in Bliovskius. The letter went on to say what no one on this side of the Atlantic had known—that Kudirka's mother had been born in Brooklyn and gone to Lithuania at a tender age. If true, this meant she was an American citizen. But Mrs. Paegle and Mrs. Kezys needed proof. Finally, a priest at St. Mary of the Angels church in Brooklyn found the faded baptismal certificate dated September 29, 1906. Not until three months later, after government agents had authenticated the document, was Kudirka's mother recognized as a U.S. citizen.

But what of Simas? For months the women haggled with bureaucrats in Washington over their claim that Simas, too, was a U.S. citizen because of his birth to single American parentage. Then, on July 17, 1974, Kudirka's citizenship was officially declared in Washington. Suddenly, powerful members of Congress and the executive branch began appealing to the Soviets for Kudirka's release. And now the housewives and diplomats had a new element on their side. The Kremlin was trying to conciliate Congress to gain approval of trade concessions.

But when news reached the United States that Simas had been transferred to Vladimir, the joy felt by Mrs. Paegle and Mrs. Kezys turned to apprehension. They knew well the reputation of this prison.

FINAL TORMENT

Kudirka was thrown into a cell with five other newly arrived dissidents. After three weeks, the youngest of the five, Mikhail Jacysin, a 24-year-old Ukrainian nationalist was called out for what was supposed to be a physical examination. When he was returned to the cell, he stood motionless and glassy-eyed for several moments. Then he broke into uncontrollable sobs and began pounding on the door, screaming over and over, "They will not make me into a swine!"

As the days passed, Jacysin's condition worsened. He began hiding under the cell's table and refusing his food. One prisoner, a veteran of Vladimir, believed prison authorities had given Jacysin drugs to induce insanity and show the others what could be done to them.

Just before daybreak one morning, Kudirka was awakened by a loud thump. He opened his bleary eyes to see Jacysin lying motionless on the floor. "Oh, my God," Kudirka said. "I think he's dead."

The five massaged Jacysin, and slowly warmth began returning to his body. They got him to his bed, but his body began contorting in spasms. They screamed for the guards, but no one came.

When the spasms ended, Jacysin walked to the latrine and sat. Suddenly he whirled around, reached into the toilet with his hands and began smearing excrement over his face. The other prisoners grabbed him and washed him off.

Around 9:30 a.m., the door swung open and seven officials, including the prison's psychiatrist, stood before them. "Now we are ready to go, aren't we?" the psychiatrist said softly to Jacysin. Like an obedient animal, the young Ukrainian rose quickly and walked from the cell.

Vladimir was to bring more deep sorrow to Simas. He was standing at his cell window when, for the first time in two years, he saw his friend, Budulak. His skin was as gray as the faded uniform he wore, and his posture was no longer erect. "Oh, God," Simas thought. "What have they done to him?"

For Kudirka, it all ended almost as suddenly as it had begun on the Soviet ship four years before. On August 23, 1974, he was summoned to the warden's office and told he was to be released. Six hours later he was on a train to Moscow, and in a few days he was back in Lithuania, where he learned of the incredible events which had led to his release.

On November 5, 1974, Kudirka and his family were allowed to leave the Soviet Union. But not until he saw the towers of New York City as his plane made its descent into Kennedy Airport did he truly sense that he had reached freedom.

Simas Kudirka is currently writing a book about his experiences to warn the West that, despite détente, the Soviets continue to engage in the massive betrayal of human rights. A truly modest man, Kudirka is uncomfortable when speaking about himself. "I have lived among giants," he says. "It is about those people, and the conditions under which they live, that I must speak."

One of those giants was Nikolai Budulak-Sharigin, whose strong voice, quoting Kipling, will echo forever in Simas Kudirka's heart:

If you can bear to hear the truth you've spoken,
Twisted by knaves to make a trap for fools,
Or watch the things you gave your life to, broken,
And stoop and build 'em up with worn-out tools . . .
Yours is the Earth and everything that's in it,
And—which is more—you'll be a Man, my son!

EMPLOYER SANCTIONS AND THE PUERTO RICAN COMMUNITY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GARCIA. Mr. Speaker, Mr. Philip Boneta, of the Puerto Rican Legal Defense and Education Fund, has done an outstanding analysis of the discriminatory effect that employer sanctions—part of immigration legislation pending in Congress—would have on the Puerto Rican community.

In his analysis, Mr. Boneta has rightly pointed out that employer sanctions would not be simply a problem for Mexican-Americans but for all persons who are suspected of being "foreign" because of their accent or appearance. I commend Mr. Boneta's paper to my colleagues in the hope that they will take time to examine his findings.

EMPLOYER SANCTIONS—THE DISCRIMINATION RISK ON THE PUERTO RICAN COMMUNITY

(By Philip L. Boneta, Esq. Puerto Rican Legal Defense & Education Fund, Inc.)

The Puerto Rican population in the United States is unique to the Hispanic population in general. While some Hispanics in the United States may be native-born citizens, it is always a fact that Puerto Ricans, no matter where they are located (abroad, on the mainland or in Puerto Rico) are native-born United States citizens. Yet, they share the same culture, customs, habits and language as all Hispanics in America.

Because of this common similarity, the Puerto Rican may appear "foreign-born" and is not easily distinguished from other Hispanics in the United States. It is the opinion of the Puerto Rican Legal Defense and Education Fund, Inc., the Commonwealth of Puerto Rico and the Puerto Rican Bar Association that the proposed employer sanctions provision in H.R. 3080 would greatly increase the incidence of employment discrimination affecting Puerto Rican community as a whole.[1] The high risk of such discrimination is not acceptable to this citizen community. Furthermore, the proposed procedure for remedying such discrimination is also not acceptable.

It seems quite backwards, that the Hispanics should continue to suffer discrimination in employment and yet Congress is devising another bill (employer sanctions) that in our opinion is, per se, a discrimination statute.

Clearly, employer sanctions is not an anti-discrimination statute like that of other statutes (i.e., Title 7 of the Civil Rights Act) which prohibits discrimination in some fashion. Even if you add provisions dealing with the prohibition of discrimination to employer sanctions, it still is per se a discrimination statute.

A review of the proposed statute (H.R. 3080) reveals that it creates a means for an employer to discriminate against foreign looking employees: even Puerto Ricans can look foreign. H.R. 3038 creates a binding obligation on the employer to scrutinize job applicants and encourages discrimination at will.

Congress' approach to immigration reform reverses 20 years of efforts to eliminate discrimination on factors other than an individual's qualifications to do the job. It requires an employer to look at factors that today are not legally impermissible. The risks which will be created for the Puerto Rican/Hispanic community will result in subjective and uncontrolled discretion in hiring to the detriment of the Puerto Rican and/or other Hispanic citizens.

Moreover, the creation of the Office of Special Counsel in the Justice Department for the purpose of investigating and prosecuting any charges of discrimination due to an unlawful immigration-related employment practice will not cure the evil that the employer sanctions provision will perpetrate on our Puerto Rican community. This remedy does not cure the injury, but in fact encourages an employer to discriminate.

The proposed after-the-fact protectional system is an ineffective method for handling cases dealing with employment discrimination, even if at a later time the individual discriminated against receives back-pay, retroactive seniority and the position. The process for obtaining relief, if at all, is subject to lengthy investigations, public hearings and appeals before one's rights are ultimately vindicated.

It has been our experience that many Puerto Ricans just do not file complaints about discrimination in employment even though they are discriminated against. It seems that there are not enough advocates to represent them or that they simply do not know or understand what to do in these situations. Also, it has become very expensive and difficult to prove a civil rights violation. In fact, the New York State Governor's Advisory Committee for Hispanic Affairs in its recent Report, "New York State Hispanics: A Challenging Minority" seems to agree with this position.

The report dealing with New York State Division of Human Rights (p. 251) states:

"Hispanics are still an 'out group' whose different characteristics have been historically discriminated against in this society. During the public hearings, there was not one testimony presented by a Hispanic person that does not reflect this underlying feeling of discrimination."

The statistics revealed by this Report for Puerto Ricans/Hispanics filing discrimination complaints are shocking. Between January 1981 to June 1983, there were 16,000 complaints of discrimination made to the New York State Division of Human Rights. Of these, 1,246 were filed by Hispanics which is only 7 percent of the total number.

Even these figures are low when you consider the N.Y.S. Division of Human Rights received 400 percent more complaints from Black New Yorkers than from Hispanic New Yorkers. Regarding these statistics, the Governor's Advisory Committee for Hispanic Affairs expressed the view that Puerto Ricans are not aware of their rights and that these figures are unrepresentative of the true number of actual cases of discrimination that occur in the Puerto Rican community in general. Under these circumstances, the imposition of the employer sanctions as provided for in H.R. 3080 is truly unfair.

Moreover, the Puerto Rican community is aware of H.R. 3080's proposal to utilize the Social Security numbers ("SSN") as a means of identification. It has been suggested that an employer may be able to call to verify the SSN prior to employing an individual. On its face, this system seems simple, but in practice, it creates a "national identification card" under the guise of the SSN, for the Puerto Rican and Hispanic community alone. This is not acceptable insofar as this system would violate the right to privacy, to which we, as Puerto Rican citizens, are entitled. We are aware of the abuses of the national identification card system in Latin America. We do not want that to occur in the United States.

Other risks that would be created if a SSN system became operative under the employer sanctions provisions must also be considered. For example, the high degree of common names is great within the Hispanic population throughout Latin America and United States. How long must the Puerto Rican await for vindication for discrimination resulting from identity of name? A claim of discrimination could take years to settle. And even then, it might not be found to constitute discrimination and certainly not intentional discrimination by an employer acting pursuant to H.R. 3080's employer sanctions provisions.

It should also be observed that many individual citizens, including Puerto Ricans, have lost their Social Security ("SS") card and do not recall their number. The unnecessary delay associated with securing a duplicate SS card places the individual in jeopardy insofar as the Puerto Rican remains without a job or a possible remedy.

The same delay problem is also true for the receipt of a "birth certificate" from Puerto Rico, which has been recommended as a form of identification. If the individual does not have a relative to depend upon (or burden) in Puerto Rico to obtain said certificate, then the Puerto Rican would have to rely upon the Commonwealth of Puerto Rico for assistance. Yet, that office is already overburdened with requests for such certificates, and would not be capable of handling all of the requests for assistance which might be generated from some 3½ million Puerto Ricans on the United States mainland, in addition to the million Puerto Ricans residing on the island. Nor is the use of a United States passport, another suggested form of identification viable. This proposal seems to ignore the fact that Puerto Ricans have the right to travel freely within the United States. Or are we not United States citizens after all?

Overall, employer sanctions under either the Senate (S. 1200) or the House of Representatives' proposal (H.R. 3080) seems to create what President Ronald Reagan has consistently fought long and hard to do, namely to "keep the government off the people's backs." Apparently, employer sanctions will not only be on the backs of employers, but also on the backs of United States citizens.

For the above reasons, the Puerto Rican Legal Defense and Education Fund, Inc., the Commonwealth of Puerto Rico, and the

[1] Especially in light of the recent U.S. Supreme Court ruling in *INS* v. *Delgado*, —— U.S. ——; 80 L.Ed. 2d 247 104 S. Ct. —— (1984) under which an entire work force may be questioned without regard for their rights as citizens of the United States.

Puerto Rican Bar Association urge the defeat of the proposed employer sanctions provisions as unworkable and imposing an undue burden on Puerto Rican citizens of the United States.

In the opinion of the Puerto Rican Legal Defense and Education Fund, Inc., the Commonwealth of Puerto Rico and the Puerto Rican Bar Association for the Puerto Rican Community, employer sanctions will have an adverse risk of employment discrimination on the Puerto Rican population. You cannot afford to take any more risks at the expense of the Puerto Ricans. For these reasons, we respectfully request that H.R. 3080 employer sanctions, as proposed, be defeated and not enacted into law.

A TERRORIST TERRORIZED

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. LAGOMARSINO. Mr. Speaker, the kidnaping of Ines Duarte Duran, daughter of Salvadoran President Jose Napolean Duarte was a contemptible terrorist act. Those Marxist guerrillas responsible for that act have attempted to justify their actions as reported in a recent commentary on Radio Venceremos, the guerrilla's clandestine radio station.

I urge my colleagues to read this commentary to understand better the twisted logic and terrorist mentality motivating the Marxist guerrillas fighting the Duarte government in El Salvador.

VENCEREMOS COMMENTARY

While some people think that the capture of a Christian Democratic official who is linked with the regime's psychological war apparatus, and is the daughter of the regime's leader, is a terrorist action, but other people do not share this opinion. Is this an act to counter the state terrorism which has been indiscriminately unleashed by the regime or not? Does this action follow the inexorable principle that there is no action without a reason? Has this happened to Napolean Duarte because he is an extremely kind, innocent man who is free of guilt concerning 70 murders [as heard], missing people, and torture? Why is Duarte the head of the regime's terrorism, the crimes, and the repression which prevails in the country? We repeat, had this happened to Napoleon Duarte because he is an extremely kind, innocent man who is free of guilt concerning the 60,000 murders, missing people, and torture?

Duarte, Rey Prendes, Guevara Lacayo, and the top echelon of the Christian Democratic regime have cried disconsolately because a woman, a mother, a daughter has been captured. They had never stopped to think about the thousands of missing mothers, the thousands of assassinated women, the 60,000 martyrs assassinated mercilessly [words indistinct] pact between the Christian Democratic Party and the genocidal Army. Who thought about those thousands and thousands of Salvadoran women and mothers? Who cries for the teachers, union members, and students who have been assassinated, tortured, and reported missing from the regime's jails?

So now, after 60,000 murders and 6,000 missing people, the killers, the torturers demand respect for one of their accomplices' rights. So now, the regime's officials who thought it was legitimate to capture and disappear the FMLN militants and the activists of the people's movement; who thought it was legitimate to bomb and strafe the civilian population to achieve peace in the country, now demand respect for one of their own party members. The terrorists are now terrorized because someone has captured an official of the psychological war apparatus that terrorizes the people; they are really terrorized. Frankly, what did these Christian Democrats expect? They are at the head of a regime which is at war; they are the ones who get the dollars to wage the war; they are the ones who say that they are going to annihilate the people's movement; the Christian Democrats are the ones who participate in the political masquerade of a counterinsurgency plan. They are the head of a regime that is waging a war but they do not want to become involved in a war.

They shout, become angry, and feel terrified because the war caught up with them. They act as if a divine mandate had marked them to wage a war without suffering the consequences. The illusion of being immune to war supports their dreams of grandeur but the truth is that the war catches up with criminals just as it catches up with the military forces and the torturers. The truth is that the Duartist logic is quite stupid because it is based on an alleged right to be immune to the war. What did they expect? They [words indistinct] humble peasant families. They order the arrest of the FMLN militants' mothers; they issue orders so that captured FMLN fighters are [words indistinct] and dismembered; they order the capture and torture of the movement's leaders.

What did they expect us to do? Did they expect us to remain impassive? No sir, these are new times. Because their crimes against the people are so heartless and bloodthirsty, the people launched a war, armed themselves, and prepared themselves to legitimately counterattack their aggressors. Since 1960, the situation where criminals felt immune to the people's reprisals and justice is over. This is nothing new; we warned them, we told them that they would pay and that we would take reprisals for those crimes.

Of course, there are people like Duarte or Rosas Chaves who expect us to turn the other cheek for the Duartist terrorism. No sir, that is over! Today, the people's adage of "he who lives by the sword, dies by the sword" becomes a reality; and the criminals and terrorists are terrified by the consequences derived from their crimes and terrorism. They are so terrified that they are surprised because they have become our main enemy.

Napoleon Duarte and the Christian Democratic Party are only part of our enemy. The main enemy is Yankee imperialism, the U.S. imperialism which places and removes its pawns according to its interests; the oligarchs and the Army were its former pawns. The U.S. imperialism's new pawns are the Christian Democratic Party and the Army; they are certainly our main enemy. The capture of Christian Democrat Ines Duarte has undoubtedly raised two types of opinions.

One opinion is that of the terrorists who have become terrified; another opinion, that of the people in general. There can be no more than two types of opinions about this event in this country, where the people live within the framework of 60,000 assassinations perpetrated by the Christian Democratic Party, where the Christian Democratic Party has caused more than a fifth of the civilian population to become displaced or seek asylum abroad; in this country where practically one member out of every peasant family has been assassinated, reported missing, or imprisoned by the Christian Democrats.

First, we have those who simply do not care if the president's daughter has been captured; second, we have the people, who are happy because the war has caught up with the president. There are also the soldiers, who physically suffer the ravages of a war which is alien to their interests; they rejoice as they rejoiced when Domingo Monterrosa died.

This is the general reaction of the majority; the people are happy because the war is strongly affecting the war criminals. Even some Christian Democrat leaders have admitted that the kidnapping was a brilliant blow. In fact, this incident has uncovered, and put on the front burner, the problems of human rights violations, missing people, and the legal status of those serving sentences in the jails.

It could be said that this has been only a small act of justice; a small act of that legitimate justice that the peoples and history are demanding against the criminals and terrorists. Those who tortured Yaneth Samour Hasbun, Tony Handal, Carlos Portillo, Saul Villalta, and many other patriots, must not think that their crimes will go unpunished. Those who assassinated, as well as those who harbored the assassins of Msgr. Romero must not think that their crime will go unpunished. The people may take their time, but they will not forget.

Within the international framework the Christian Democrats have tried to use the incident to help Jose Napoleon Duarte's sad image. For truth's sake, we must say that rhetoric and formal diplomatic condemnation is one thing but what is truly thought and believed about this incident is something else. In fact, after the (?initial) words we begin to see the real and effective effects of this operation.

The recognition for the actions legitimacy is measured by the participation of other countries in this matter. What the world has seen is the fact that Duarte controls nothing in his country; that he no longer feels safe out in the country or in the city; that he no longer feels safe even when he is surrounded by 50,000 soldiers or with the millions of U.S. dollars.

It is being rumored that Jose Napoleon Duarte does not feel safe. Was Duarte not responsible for presenting his regime as a stable one, a regime that respects human rights? What has become evident are the deep contradications between the government and the Army. The arrests, tortures, disappearances, and the regime's clandestine jails have become evident.

Ines Duarte's capture has raised the curtain on Duarte's farce regarding an alleged democratization and pacification and has placed in the foreground the ruthless and criminal [word indistinct] terrorism. They are now paying for their crimes. The main terrorist is truly terrorized and he is getting his family out of the country and preparing for an evacuation. He is preparing himself, like all self-worshipping dictators, to escape the weight of the people's justice.

DON'T PUSH SOUTH AFRICA TO THE WALL

HON. JACK FIELDS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. FIELDS. Mr. Speaker, I am pleased to provide the record of this House with an editorial opinion by Ms. Karen Elliott House, foreign editor for the Wall Street Journal. Ms. House wisely cautions our approach to dealing with the current situation in South Africa, and demonstrates the inherent contradictions of what passes for U.S. policy.

DON'T PUSH SOUTH AFRICA TO THE WALL
(By Karen Elliott House)

PRETORIA.—It's a whole lot easier to exert public political pressure than it is to fashion political solutions.

Nowhere is this so evident as in South Africa today, where the U.S. is trying to put the political and economic screws to the white Afrikaner government to speed the dismantling of apartheid and force the sharing of political power with the country's black majority.

But two weeks of travel throughout South Africa indicates the pressure isn't working. Indeed, it's having precisely the opposite effect. America's political structures and economic sanctions have simply served to harden the attitudes of those who hold power, to raise unrealistic expectations among those who seek power, and to damage the economic fortunes and futures of the great majority of South Africans caught in between.

There is little doubt that this society and its abhorrent system of apartheid are going to change. Even the most hard-line Afrikaners see the handwriting on the wall and are talking about reaching accommodations that will leave them segregated in some white "homeland" enclave much like those apartheid has created for the blacks. Less militant whites—and there are many more of these—hope for a multiracial society inevitably ruled by the black majority, but with some protection for white and other minorities. The only real issue here is *when* such change will take place, not *whether*, and the when is a matter of years, not generations. Yet in its rush to hasten change, America risks pushing the South African economy further along a downward spiral so that there will be little left for the victors to inherit.

CLINGING TO SURVIVAL

Already the signs of suffering are everywhere as South Africa's economy, plagued by continued drought and depressed gold prices, grinds to a virtual standstill. In New Brighton, the bleak, black township near Port Elizabeth, a black man in his 40s has fashioned a makeshift outdoor barber shop from two pieces of rusted metal.

It's midafternoon and the wind is whipping garbage down the unpaved streets as the barber finally gets to shear the head of his first customer. In a good week, the barber earns 20 rand, or about $8, barely enough to buy a bit of food for himself, his wife and five children. Until a year ago when the construction firm where he worked closed, he earned 200 rand a month. The barber is just one of many clinging to survival in an area where black unemployment is estimated at 60%.

The government has announced a 600 million rand employment program and promises sharp jumps in spending for better black schools and housing. But if these promises are to become a reality, South Africa's economy must grow—and grow faster than the population, which is increasing 3% a year.

Businessmen and government officials all agree that the maximum economic growth possible without foreign investment is 3%. In other words, just enough to preserve the status quo; not enough to improve the lot of blacks.

To the extent that a bigger slice of the pie for blacks comes at the expense of whites—and it must if the pie isn't expanding—racial tensions are bound to rise. Sanctions and disinvestment cripple the economy, and the greatest pain is borne by its weakest and most marginal members—who are black. This obviously breeds frustration, anger and violence. The violence erodes international confidence in the economy, leading to further reductions in investment that lead to more layoffs, more anger and more violence.

In short, it's easier to sit in America and argue the moral justification for applying economic pressure to South Africa than it is to walk through the streets of New Brighton or Soweto and see the mounting practical effects.

Beyond all this, the U.S. insistence on economic sanctions and disinvestment also is hardening the right wing, which, like it or not, holds the reins of power in South Africa. Enlightened self-interest should lead the government to continue and accelerate reforms. And, in fact, it has. The decisions over the past two years to give the vote to coloreds and Indians, to legalize mixed-race marriages and to allow black labor unions all are due more to internal economic realities than to external pressure. "They [the Afrikaner establishment] discovered they couldn't run the country alone," says Zach de Beer, a director of Anglo American Corp. and a consistent critic of apartheid.

Undeniably, South African President P.W. Botha is a man of limited vision. And he shows little understanding of the seriousness of the economic situation. During a recent interview he repeatedly insisted that the continuing decline of the rand isn't the result of dwindling international confidence in South Africa but rather the result of a rising dollar. (In recent weeks, of course, the dollar has been declining.)

But from all appearances and in the view of many thoughtful South Africans, Mr. Botha is a spent force. He has gone as far as he can go with admittedly limited reforms, which still don't tackle the heart of this humiliating system of racial segregation. Now he wastes his time being bitter that instead of praise, he receives only increased pressure from America. The betting is he'll step aside in a year or so. Given pressures inside the ruling National Party, as well as those from its liberal opponents and the business community, more significant reform seems inevitable though probably still slower than Americans and black victims of apartheid would like.

Regardless, Americans should resist the impulse to try to force a faster pace of change. Already, righteous rhetoric in Congress and presidential pronouncements about the impending doom of apartheid are creating unrealistic expectations among blacks.

And that worries even apartheid's more ardent opponents. "Blacks are getting the idea that external pressure and the ungovernability of the townships will give them victory just around the corner," says Helen Suzman, a tiny but tough woman in her 60s who is the longest-sitting member of Parliament and the grande dame of anti-apartheid. "The risk is that Western powers are inadvertently encouraging blacks to launch violence against whites, and then the government is really going to unleash its terrible power on these kids."

A young black man on the Student Representative Council of Peninsula Technical Institute near Capetown says, "We're going to bring down this oppressive, capitalist regime faster than anyone thinks." Why is he so confident? "America is with us," he replies.

But America isn't with them. The Marines aren't going to land in Soweto or New Brighton or any other black township if the South African defense forces, mightiest in all Africa, are unleashed on blacks. All they can expect is a rush to the television cameras by congressmen, Reagan administration officials and American businessmen to deplore from a safe distance the killings of blacks.

Another reason for the U.S. to forswear more sanctions—and sanctimonious rhetoric—is that, historically, pressure hasn't worked very well. Rhodesia survived nearly 15 years of sanctions. Israel has survived more than 30 years of economic and political pressures from much of the world. Whether it's the Soviet Union or Taiwan, Iran or Nicaragua, no national power structures have proved very vulnerable to economic and political pressures from outsiders. Perhaps if every nation in the world refused any commerce or contact with white South Africa the regime would collapse quickly, but that seems farfetched in a real world in which even black African nations are openly or surreptitiously trading with South Africa.

The U.S. also should drop its insistence that the white government negotiate with terrorists. It's hypocritical to ask South Africa to negotiate with the African National Congress, which vows the violent overthrow of the white government, when the U.S. doesn't press Israel to negotiate with the Palestine Liberation Organization, because it vows the destruction of Israel. Clearly America isn't standing on principle. It's simply letting domestic politics dictate foreign policy. American Jews and their supporters oppose talks with the proviolence PLO. American blacks and their supporters favor talks with the pro-violence ANC. The point isn't that consistency is necessarily an absolute virtue, but rather that negotiating with terrorists is generally a mistake. Like Yasser Arafat, exiled ANC leader Oliver Tambo, safe in Zambia, repeatedly call for youths to give their lives for the struggle.

INHERIT THE RUINS

The more the U.S. insists on negotiations with the ANC, the more it strengthens the violent extreme and undermines the moderate middle. Indeed, already Mr. Tambo is greeted as a hero at various international gatherings. South African businessmen traipse to Lusaka, Zambia, for a word with the exiled leader, who pointedly repeats his determination to dismantle not just apartheid but capitalism as well. Meanwhile, Chief Mangosuthu Buthelezi, leader of Africa's largest black tribe, the Zulus, is shunned by many South African businessmen and most international groups. Why? Basically, because he's a moderate who, while opposing apartheid, doesn't believe it

makes sense to destroy the country in order to inherit the ruins a little faster.

Once the U.S. insists the ANC is the legitimate voice of black Africans, then the ANC becomes the only group with whom the Pretoria government can negotiate if it wants to retain some measure of international approval and investment. Yet the ANC has made it clear it isn't interested in sharing power, just seizing power.

Finally, America must be true to its belief that it is the rights of the individual that are sacred, rather than the interests of any particular group. South Africa long ago made the mistake of structuring its society on the rights, or lack of them, of racial groups. The U.S. shouldn't participate in schemes that simply transfer power from one racial group to another, while still guaranteeing no protection for the individual—regardless of color.

JAPANESE TRADING PRACTICES

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. REGULA. Mr. Speaker, I would like to bring to the attention of my colleagues an article that appeared in Newsweek magazine this week. It echoes bluntly the warnings that many of us have been given about the effect of Japanese trading practices.

Japan has received a free trade ride for too long. As it is apparent from this article, America is not the only victim of Japan's trade blitz. On the contrary, the United States is one of the few countries powerful enough to fight back. As Newsweek grimly pointed out, things are very bad and will only get worse unless "immediate and genuine" changes are forthcoming from Japan.

Japan has no intention of or incentive to change. It is up to the United States to take the initiative and bring Japan back to the reality of free world responsibilities.

I ask my colleagues to heed the warnings in this article and recognize that it is up to us alone to avert worldwide disaster. When Japan will not act, America must.

[From Newsweek, Nov. 4, 1985]

JAPAN MUST JOIN THE WORLD

(By Rich Thomas)

For all but the first years of the postwar era, the efficient Japanese have been aggressively expanding their export markets overseas—while keeping their own island society all but closed to outside traders. "The Japanese are still not really ready to join the world," says Edwin O. Reischaure, the former U.S. ambassador to Japan and Asian specialist at Harvard. "They still feel themselves very separate. They realize the need to join the world intellectually, but they still need to make that step."

The time to make that step has now run out. The brutal fact is that Japan's economic nationalism, its phobia against imports and its economic export monoculture, has achieved such enormous "success" that it is now threatening the economy of the entire world—particularly the Third World—and the United States alone is no longer large enough or strong enough to control the damage. Without an immediate and genuine change by Japan, the world financial system could well collapse, less developed debtor nations could plunge into default and chaos and the world could slide into recession.

American preoccupation with the problems of Japanese auto, electronics and other imports has obscured these frightening global prospects. Congress and U.S. economic exports have long been mesmerized by the political and human difficulties caused in this country by the explosion of Japanese export surpluses—from $12 billion in 1982 to an anticipated $50 billion this year. But the U.S. economy is still rich and expanding and at this point, at least, it is able to absorb any lumps delivered by the Japanese over the long haul.

Overseas, though, it is a different story. Japan's export offensive has hit particularly hard in African and Latin America—and its trade surplus with the world's lesser developed countries will hit $15 billion this year. At the same time, alone among all of the developed countries, Japan remains unyielding in its determination to keep manufactured imports of any consequence away from its shores—and it is this trade wall that is the primary cause of today's world wide crisis. In effect, Japan has become a mammoth siphon sucking funds and final demand out of poorer countries. These are funds that the United States, by way of its own huge trade deficits with the nonoil producers among the lesser developing countries, is fruitlessly trying to pump back in.

TAXING IMPORTS

What must be done before disaster strikes? President Reagan—who keeps hoping that a friendly Japanese Prime Minister Yasuhiro Nakasone will voluntarily reduce Japan's trade surpluses—clearly must act where Japan will not. Simply put, Reagan and Congress should impose a temporary fee or surcharge on Japanese imports—in effect, a tariff—calculated to keep Japan's trade surplus with the United States at current levels. The fee would amount to an import surcharge of 20 percent of the value of all of the cars, television sets, VCR's and other wonderful products that Japan exports to the United States. It is to be hoped that levy would raise about $15 billion next year, based on the level of this year's Japanese-U.S. trade. But the money would not go to the United States; it would instead go to the Third World countries that are suffering most from Japan's one-way trade policies. To keep it as neighborly as possible, the funds could be paid as a joint U.S.-Japanese grant, divided up among the LDC's in direct proportion to their external debt positions. There would, of course, be a downside to the surcharge; the price of Japanese imports would increase at least modestly in this country, adding to the rate of domestic inflation. But ideally, the measure would be temporary, in effect only until the Japanese imposed long-range measures that would serve to raise their imports into more reasonable balance with their sales.

Most important, action by President Reagan would send a message that years of cajolery have not: either Japan changes or the world economy is in serious trouble. Reagan should couch his message in the calmest rhetoric possible—this is not a moral lesson but a simple economic one. Former U.S. Ambassador Reischauer, while identifying the problem, is still counseling U.S. patience with Japan. But a mounting Third World debt crisis that is clearly beyond U.S. control is saying something else: time has run out for Japan to join the world.

CITIES CAN'T FIND OR CAN'T AFFORD INSURANCE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. FLORIO. Mr. Speaker, the Subcommittee on Commerce, Transportation and Tourism is receiving daily reports of how the scarcity and high cost of liability insurance is hampering businesses and professionals in the private sector.

There are signs that the insurance crisis is also affecting the public sector. Local officials are being forced to raise taxes in order to pay drastically increased premiums, cut back on certain services for which coverage is unavailable or unaffordable and, in some cases, provide services without any insurance.

The following article highlights the problems local governments are facing in their efforts to deal with this far reaching insurance crisis.

[From the Washington Post, Aug. 5, 1985]

DILEMMA FOR CITIES: PAY RISING INSURANCE FEES OR FACE HIGHER RISK

(By Caryle Murphy)

It hasn't been a good year for those in the risk management business.

When Mary de Campli, Alexandria's risk manager, got the bills in June for two liability insurance policies covering the city's public officials and law enforcement officers, the bills came to $233,000—a 400 percent increase over what the city paid last year.

"And we're not done yet; the year's not over," said de Campli, who estimates that when all polices are renewed this year, the city's total bill will be $400,000, compared with $223,000 last year.

About the same time, Virginia's Director of Risk Management Charles F. Scott was soliciting bids on a liability insurance program for state employees and "came in absolutely dry," without a single bid for a policy that cost the state $871,000 last year.

"I've never seen anything like this," Scott said.

In an insurance market that seems to grow warier each day, local governments are facing enourmous price increases and even policy cancellations at a time when they also find themselves increasingly battling multimillion-dollar liability suits.

"Almost daily we get calls from state organizations [looking for insurance] . . . . It's pretty clear it's a nationwide problem," said Donald Jones, assistant executive director of the National League of Cities.

As a result, local government officials are facing tough decisions on whether to pay the huge increases for coverage or opt for more risky self-insurance programs. In some cases, they are going without liability insurance altogether.

Local government officials say not having insurance is chancy at best, considering the increasing number of lawsuits against governments that include claims for slips and falls, property damage, civil rights violations, employment discrimination, antitrust violations, rezonings, false arrest and injuries resulting from environmental accidents.

"Cities nationwide are experiencing a veritable explosion in municipal liability," D.C.

Corporation Counsel Inez Smith Reid told the D.C. City Council in May when she asked for an additional $1 million for the District's $5 million fund to cover settlements and judgments that the city is expected to pay this year. From 1975 to 1983, the amount the corporation counsel paid in such settlements rose from $1.7 million to $5.2 million.

Reid cited, as the kind of case that localities must be insured against, the recent one in which a D.C. Superior Court jury awarded $250,000 in damages to a 15-year-old girl who five years ago was lured out of an unsupervised Southeast Washington classroom and sexually assaulted.

In a celebrated 1983 case, a U.S. District Court jury in the District awarded $5 million to Alvin Biscoe, who lost both legs after he was hit by a car being chased by two Arlington County police cars in 1979. The award was later reduced to $4.3 million.

A soon-to-be-released study done by the Wyatt Co., an actuarial consulting firm, and the International City Management Association found that public officials across the country had a 50 percent increase in lawsuits filed against them in the last three years.

In 1982, 14 percent of the localities surveyed had suits pending against them; the largest settlement that year was $230,000, and the largest claim sought by a litigant was $40 million, according to the Wyatt Co.'s Jim Swanke, who conducted the survey.

Three years later, 28 percent of the officials surveyed were facing suits; the largest settlement was just under $2 million, and the larger claims range from $100 million to $200 million, Swanke said.

The impact that rising insurance costs and court settlements have on local governments is difficult to measure, but as Natalie Wasserman, executive director of the Public Risk and Insurance Management Association (PRIMA), said: "The taxpayer is going to have to bear the burden. . . .Eventually, who pays? It's the public."

A report on the financial health of American cities issued in March by the Advisory Commission on Intergovernmental Relations noted that at least four localities had been forced into bankruptcy by large court awards. It warned that the trend toward high court judgments "appears likely to cause more [financial] emergencies in the future."

At one time, the principle of "sovereign immunity" protected governments from such lawsuits by individuals; but since the early 1960s, the courts and state legislatures have eroded that protection. Local government officials are renewing pressures on state legislators to put mandated ceilings on court judgments. Already, 28 states have such caps, and PRIMA's Wasserman said that the other states "are going to have to take a look at caps."

Most local governments buy a number of different policies to cover their automobile fleets, public officials and police force, water treatment and sewage facilities, and bus systems. Many of the policies are acquired through a competitive bidding process.

But along with other insurance shoppers—doctors, day-care centers, restaurants and universities—local governments this year are feeling the repercussions of an insurance market that is feeling the pinch from the industry's most devastating year since 1906, the year of the San Francisco earthquake.

"It was a very, very bad year," said Mavis Walters, senior vice president of the Insurance Services Organization (ISO). The property and casualty insurance industry suffered a 1984 pretax loss of $3.8 billion when investment income failed to cover its payouts, she said. ISO estimates that in 1985, demand for insurance will outstrip what the industry can supply by $7.2 billion, Walters said.

Some insurance companies, seeking to recoup losses caused by what they say were previously artifically low rates, are withdrawing entirely from the more risky and more litigious areas, which include local government liability and environmental accidents, industry officials said.

The increasing litigation has elicited warnings from the London-based insurance giants on whom the American insurance industry depends to back up its financial risks. When these so-called "reinsurers" are reluctant to lend their financial backing to U.S. companies, it decreases the capacity of those companies to offer insurance here.

Lloyd's of London Chairman Peter Miller told the National Association of Insurance Commissioners in Kansas City, Mo., last month: "We can no longer live with the uncertainty engendered by the vagaries of the American legal system as it stands today."

One such uncertainty is the courts' expanding interpretation of responsibility for damages resulting from long-term environmental accidents. In recent years, courts have been ruling that insurance companies cannot escape responsibility for damages from an environmental pollution that may take years to detect, such as toxic waste dumps or leaks from underground storage tanks.

As a result, local government officials are being told that environmental coverage will no longer be part of their general liability policies. If customers want it, they must buy a separate policy at much higher prices.

Local governments that foresaw the current price crunch and reduced their dependence on purchased insurance by going for a self-insured program are weathering the present crisis best, officials said, and are quickly being joined by other municipalities.

The Virginia Municipal League's financial director, Margaret Nichols, said a league-sponsored self-insured "pool" has acquired 23 new members from among the state's school boards, counties and cities since last April. Until then the program had attracted only 18 members since it was launched a year ago, she said.

But even self-insurers are not immune from current price increases. To guard against catastrophic losses, it is traditional for self-insured localities to buy "excess" insurance on the market. The costs of such policies have risen astronomically.

Baltimore, which has been self-insured for property losses for 15 years, saw its excess insurance coverage costs leap from $315,800 last year to $1.7 million this year, according to Douglas Pierson, insurance analyst for the city.

Dallas, which has been self-insured for three years, decided to go without its "excess" policy altogether after the cost went from $157,000 in 1984 to $1.5 million this year, said Mark Ferraro, Dallas' risk manager.

"Basically, it means that we have no place to turn if we have a catastrophic loss," Ferraro said.

THE NEGLECT OF FOREIGN STUDIES IN AMERICAN UNIVERSITIES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. HAMILTON. Mr. Speaker, I wish to bring to the attention of the House a recent speech by a former colleague, John Brademas, now president of New York University. Many of you will remember that during his 22 years in the Congress, John Brademas worked hard for Federal funding to support education, libraries, museums, and the arts and humanities.

In his remarks at Ball State University in Muncie, IN, on October 24, 1985, he addressed the alarming cost to the United States of the neglect of foreign studies in American universities and colleges.

His observations deserve our attention as we consider the role of Congress in supporting education. He warns that, in particular, there is a serious shortage of educated experts on Asia, sub-Saharan Africa, the Middle East, the Soviet Union and Eastern Europe. Such lack of understanding of other cultures not only has harmed the conduct of U.S. foreign policy in recent years, it also has hindered the performance of U.S. business in key countries, like Japan.

Certainly, some of the problem rests within our system of education. During the last 20 years many schools eliminated foreign language, geography, and history requirements, and only recently have begun to reinstate them. Yet, the Congress can help, as it has through the Fulbright Program, student exchange, the Soviet and Eastern European Research and Training Act, and other programs.

I encourage my colleagues to read this speech which presents a thoughtful and disturbing portrait of the state of international education in the United States.

The text of the speech follows:

REMARKS OF DR. JOHN BRADEMAS, PRESIDENT, NEW YORK UNIVERSITY

I am deeply honored to have been asked to deliver at Ball State University in my native Indiana, the twelfth Stephen J., Sr., and Beatrice Brademas Lecture.

This is for me a kind of family reunion. You should know that it was early in this century that at the age of 21, my later father, Stephen J. Brademas, left Calamata, Greece, eventually to settle in South Bend, Indiana. Here, in Mishawaka, my father met my mother, Beatrice Goble Brademas; they married and she, now 84, is with us this morning.

Also here today are two others of the four Brademas children, my brother Tom, with his wife, Carol; my sister, Eleanor, with her husband, Dick Keb; and a niece, Cindy Porman, and a nephew, Jeff Brademas. My brother Jim, a professor at the University of Illinois, had to be in Texas today and so could not join us.

That a lecture series should have been established in my parents' name and in the state in which they made their home and, moreover, at a university with which my

family has had so many links would have greatly pleased my father, and you yourself can judge how my mother feels on this occasion.

That this series was the result of the inspiration and tenacity of purpose of a young scholar who had become a family friend and an honorary member of our family would also have gratified my father.

Therefore, on behalf of all of us in the Brademas family, I want to express our gratitude to Professor John Koumoulides for without his energy and effort these lectures would not have been possible.

Indeed, I hope that everyone at Ball State University appreciates the outstanding intellectual resource that is yours in John Koumoulides. For not only, excepting your speaker tonight, has John brought to this campus some of the most eminent scholars in the world but he himself is a prolific researcher and writer in a number of fields touching on the history and civilization of Greece.

And one of the other reasons I'm glad to be at Ball State University is that my late grandfather, William C. Goble—my mother's father—taught here and my mother was a student here. And I count myself privileged to have been awarded some years ago an honorary degree by this university.

Let me salute your distinguished president, John E. Worthen, who came to his post a little over a year ago. As a fellow university president, I can tell Dr. Worthen that his training in psychology should help him now just as I felt well prepared for academic life by my former career as a practicing politician!

It was 26 years ago that I became the first native-born American of Greek origin to take a seat in the Congress of the United States. During twenty-two years of service there, I took part in writing most of the legislation now on the statute books to support education at all levels as well as the arts and humanities, libraries and museums.

Since July of 1981, I have been president of New York University, the largest private university in the nation, with 46,000 students in fourteen schools and divisions, an annual budget of over $700 million, and located in the commercial, cultural and communications capital of the world, New York City.

Because my university is where it is; because what happens in New York City has such a powerful impact not only on our own country but the entire world; and, moreover, because of the importance of the subject, I should like today to direct my comments to the theme of international education—learning about the rest of the world.

First, let me say why I see a pressing need for greater investment in research and studies about other countries, cultures, languages and peoples from our own.

Then, I want to discuss the responsibility of the Federal government and of colleges and universities to support international education.

Finally, I shall single out for special comment both classical and contemporary Greek studies in the United States. In doing so, I want to say something of the role that philhellenism—love of things Greek—has played in stimulating American interest in Greek life and culture.

It must be obvious to us all that none of the challenges of our time is more urgent—or more difficult—than building a structure of relationships among the nations of the world that will prevent war and encourage peace.

Surely one of the ways—I do not assert the only way—to achieve this objective is through the use of human reason, and that means education.

We know that the globe on which we live is, in the scheme of things, small and interdependent.

Terrorism in the Middle East, conflict in Central America, the threat of civil war in the Philippines, tensions on Cyprus and in the Eastern Mediterranean—are all developments that reach far across international borders.

In the present day, how well are we preparing Americans to understand other nations, other cultures, other peoples?

In my view, we are not doing very well.

There is simply no question that the people of the United States, in whose hands, for better or for worse, lies much of the responsibility for building a peaceful and stable world, must do a far better job than we have been doing of learning about the peoples who populate other parts of this planet.

Six years ago, let me recall, a 25-member Commission on Foreign Language and International Studies, chaired by James A. Perkins, former President of Cornell University, reported to President Carter on what the Commission described as America's "scandalous incompetence" in foreign languages.

The Commission members declared themselves "profoundly alarmed" by the results of their inquiry. Here are just three of their findings:

1. Over 40 percent of twelfth graders were unable to place Egypt correctly on a map while over 20 percent were equally ignorant of the locations of France or China.

2. Only 15 percent of American high school students studied a foreign language, down from 24 percent in 1965.

3. There were 10,000 English-speaking Japanese business representatives on assignment in the United States but fewer than 900 American counterparts in Japan, and of those, only a handful had a working knowledge of Japanese.

As we all know, over the last three years there has been a veritable wave of reports on the performance of American schools, colleges and universities. Most of these studies deplore our deficiencies in teaching modern foreign languages and about other countries and cultures.

Allow me first to cite the report of a group that I chaired in 1983, the Subcommittee on Graduate Education of the National Commission on Student Financial Assistance. This 12-member bipartisan Commission was created by Congress to review student aid programs and offer suggestions for improving them. What were some of our findings?

Our Commission was disheartened to learn that between 1969 and 1978, Federal expenditures for university-based foreign affairs research declined from $20.3 million annually to $8.5 million.

Our Commission also took note of a report of the National Council on Foreign Language and International Studies, of which I am a member. The Council found a serious lack in this country of experts on the cultures, economies and foreign policies of Asia, sub-Saharan Africa, the Middle East, the Soviet Union and Eastern Europe.

In preparing our report on graduate education, my Commission colleagues and I spoke to two former directors of the CIA. Both William Colby and Admiral Stansfield Turner blamed our lack of expert knowledge about Vietnam and Iran for serious intelligence shortcomings in those countries, and both men said our ignorance of Latin America appeared "almost boundless."

Not surprisingly our Commission unanimously recommended that Federal Funds for research, instruction and graduate study in a wide range of languages and cultures be significantly increased, and that Federal support for American scholars to study abroad also be expanded.

Last November, William J. Bennett, then Chairman of the National Endowment for the Humanities and now Secretary of Education, issued a report that assailed the state of the humanities on American campuses. This document cited a sharp decline since 1966 in college entrance and graduation requirements in foreign languages.

In February, the Association of American Colleges issued its report on the baccalaureate degree. The AAC Committee called our "foreign language incompetence" a "national embarrassment" and included "international and multicultural experience" as one area in its minimum required program of study.

Beyond these studies and surveys, there are two other recent reports that have focused exclusively on international education.

The first, "Critical Needs in International Education: Recommendations for Action," was produced by the National Advisory Board on International Education Programs, a panel of educators, government and business leaders and others. The report declares, "Our nation's indifference to foreign languages and cultures is unique among the advanced industrial countries and our performance in these areas lags behind that of many developing countries."

The second study, "Beyond Growth: The Next Stage in Language and Area Studies," was prepared by the Association of American Universities for the Department of Defense. The research team, headed by Dr. Richard Lambert of the University of Pennsylvania, explained that "Secretary of Defense Caspar Weinberger chose language and area studies along with mathematics and science as one of the domains of higher education he felt was in greatest jeopardy of decline and of greatest interest to the nation and the Department of Defense."

The AAU study finds "vital gaps" in both research and teaching in language and area studies. Existing financial aid programs are not producing an adequate supply of persons knowledgeable about other countries. Students need to be trained better and longer.

Of interest to the friends of Greece here today is a summary, appended to the AAU report and prepared by William B. Bader of SRI International, of the nation's needs in Western European studies.

Bader observes that "far fewer Americans today endeavor to understand the intricacies of European affairs than twenty years ago," and goes on to point out the neglect of the countries of Southern Europe in favor of the study of the United Kingdom, France and Germany. Bader says that the academic community has too few people who qualify as experts on contemporary Greece with, he charges, none in the United States government.

Whatever the reasons for the troubled state of international studies in this country, it seemed clear at one time that we were as a nation willing to take steps to overcome our ignorance.

The Soviet launching of Sputnik in 1957 shocked us into a reevaluation of the quality of American education. Our response was the National Defense Education Act, an effort, advocated by President Eisenhower and supported by a Democratic Congress, to regain our international leadership in science and technology. Through Title VI of NDEA, we sought to strengthen our capacities in foreign languages and area studies.

I regret to say, however, that we have consistently failed to provide adequate funds for these programs.

If you will allow me a personal reminiscence, I recall that the International Education Act of 1966, of which I was author in Congress and which authorized grants to colleges and universities in the United States to support study and research about foreign countries and cultures and important issues in international affairs, was also ignored in the appropriations process.

Although President Lyndon Johnson signed this Act into law nearly two decades ago, Congress never voted one penny to turn our sound intentions into effective action.

Yet I believe that had these commitments to international studies some of us sought been implemented, the United States might have been far better prepared to deal with problems our country has suffered in Iran, Vietnam, Central America and elsewhere.

But America's colleges and universities are themselves not without blame. In the 1960s many of them responded to student demands for greater flexibility and "relevance" in their studies by eliminating foreign language requirements.

Today it is distressing to see how the present Administration in Washington has embarked on a drive to slash funds for our schools, colleges and universities and other institutions of education and culture—including monies for programs crucial to international studies and research.

The Reagan Administration has for the past three years tried to eliminate Federal support for Title VI, which is now part of the Higher Education Act.

So even as many of us have been working to defeat the Administration's attempts, equally wrongheaded and dangerous to reduce or eliminate student aid for hundreds of thousands of college and university students, we have also had to struggle against efforts to weaken our capacity to prepare more people knowledgeable about other areas of the world.

Now I do not want to sound wholly alarmist or negative; I see several signs of hope.

In 1981 Republicans and Democrats in Congress joined in a successful fight to prevent drastic cuts in the Fulbright academic exchanges and several companion programs. This crisis proved conclusively that there is a strong and vocal constituency in America in support of such efforts.

And in each of the past two years and once again this year, Congress has fended off Mr. Reagan's determination to kill funds for title VI international education programs.

Indeed, in recent years, Federally financed education exchanges have undergone a dramatic shift in fortune. This year, the Administration requested $159 million for the Fulbright and other exchange programs administered by the United States Information Agency, an increase of 22 percent over current levels.

Beyond these developments, I have been heartened by some other initiatives.

Many universities—including Harvard, the University of Pennsylvania, Emory, Middlebury College and the University of Massachusetts—are reinstituting language and other international studies requirements for graduation.

A recent Modern Language Association study indicated that, in a reversal of a 12-year trend, enrollments in foreign language courses at American colleges and universities are now on the upswing.

I am pleased to say that both NYU and Ball State are in the vangard of this return to rigor.

Not only must all NYU undergraduate arts and science students achieve competency in a foreign language, but since 1981, our students must take at least an introductory course in a non-western culture.

I understand that one of the achievements of President Worthen's first year at Ball State has been to create a Center for International Programs. The new Center will attract more foreign students, strengthen international offerings and expand foreign exchange programs.

Exciting as these efforts may be, as an American of Greek ancestry, I have been particularly interested in the proliferation of Greek studies on American campuses.

So let me now discuss with you the growth of Greek studies. I shall first speak briefly of the classical Greek heritage and its transmission from ancient Greece to modern times and then look at Greek studies in this country.

Although the great creative period of ancient Greece spanned but four centuries, the eighth through the fifth centuries B.C., Greek thought and civilization have shaped our world for millennia.

One need only read "The Legacy of Greece," edited by the classicist M.I. Finley of Cambridge University, to understand how pervasive and persistent the influence of Greece on Western civilization has been.

Says one contributor to this book, Professor R.R. Bolger, "When one considers our indebtedness to ancient Greece, one is struck by the variety of the elements that were borrowed." He cites, for example, the Pythagorean theorem, the dramatic unities, the three orders of architecture and the legend of Oedipus.

Think of the several names and enduring works: the epics of Homer; the poetry of Sappho; the histories of Herodotus and Thucydides; the philosophy and politics of Plato and Aristotle.

Bolger goes on to show that in literature, art and philosophy, virtually all later ages followed Greek models. The Romans, of course, borrowed substantially but even the Dark and Middle Ages learned from Greece. Bolger finds Greek strands in Augustine's "City of God," in the early Christian hymn writers and in the Carolingian poets. Avicenna, the greatest of medieval Arab thinkers, looked to Aristotle and it was from Greek sources that the famous tales of the "Thousand and One Nights" flowed.

Yet it was not until the Renaissance that the passion the Romans had felt for Greece was rekindled throughout Europe. With the thirteenth century came a flowering of philhellenism. The first person to recognize the genius of Homer and Plato was Petrarch. Ronsard read Pindar; Racine, Euripides; and John Milton studied a number of Greek writers. Lucian influenced Erasmus, Rabelais, Ben Jonson and Cervantes; Plutarch inspired Montaigne and Shakespeare.

The teaching and learning of the classics became in the eighteenth century a cornerstone of higher education in England. The University of Cambridge awarded prizes for proficiency in classical studies. As Bolger says, "Ability to reproduce a passage from Burke in the style of Demosthenes, to make Hume write as Thucydides had written, emerged as the hallmark of scholarly achievement." Tests of such capacities were adopted for examinations at Oxford after 1800 and at Cambridge after 1824. The nineteenth-century champion of classical education was, of course, Matthew Arnold.

Having sketchily traced the Hellenic threads in European civilization, I should like now to look at philhellenism and Greek studies in the United States.

If love of Greece shaped other cultures for two thousand years, philhellenism was a central force in the young American republic. Certainly the great American universities, like their European counterparts, revered the classics. Classical Greek studies flourished at my alma mater, Harvard, since its founding nearly 350 years ago, in 1636, and at Princeton since its establishment in the following century.

And to qualify for admission to the "full classical and scientific course" of New York University in 1832, the governing Council required students to "be acquainted with a Greek grammar" and to "have read . . . the Greek New Testament, the books of Xenophon and two books of the Iliad."

Beyond the impact of Greece on American intellectual life, our Founding Fathers looked to ancient Greece for guidance in devising our system of government.

In an address at the Center for Hellenic Studies in Washington, the distinguished American writer Archibald Macleish noted:

"What is philosophically true of 'all men' in Jefferson's preamble [to the Declaration of Independence] had been historically true of every man—or at least of every citizen—in Pericles' Athens. The citizens of Athens were not subjects of the state: they were men inviolable in their quality as men. And so, in Jefferson's Declaration, should the Americans be."

When the promise of America swept across the ocean, it provided an example for many other peoples, including the Greeks themselves. And so, in 1821, my ancestors declared their independence from the Ottoman Empire.

The subsequent War of Independence captured the American imagination, fueled a resurgence of philhellenism and changed the course of Greek studies in this country. Statesmen, scholars and writers were fired by the Greek cause.

Speeches were made before Congress by President James Monroe and Senators Daniel Webster and Henry Clay. Like Byron and Shelley in Europe, dozens of American poets such as William Cullen Bryant elegized the Greeks.

Several Americans actually fought alongside the Greek insurgents. Among them was Dr. Samuel Gridley Howe, a professor at Harvard. In his book, "An Historical Sketch of the Greek Revolution," published in 1828, he expressed the sentiment of many American intellectuals: "The Greek Revolution was one of the most important, and certainly the most interesting political event of our age."

It was then, not surprisingly, at this time, that we saw the beginning of modern, in addition to classical, Greek studies at colleges and universities in the United States.

Let me again cite Harvard. As I have indicated, scholars, students and public officials, inspired by the Greek War of Independence, produced a burst of philhellenic writing. These materials were a significant factor in

the development of the Modern Greek Collection of the Harvard University Library, which today is a resource for neohellenic studies unequalled outside Greece.

Then, as now, both Americans of Greek descent and those who were not supported Greek studies. Among the early benefactors of the Harvard Greek collection were the Greek-American scholar, Evangelinos Apostolides Sophocles, and American philhellenes, Cornelius Felton and Edward Everett.

Even as Harvard was building its Greek library collection, it began in the 1820s to offer courses in the modern Greek language. Later in the nineteenth century, under the aegis of Evangelinos Sophocles, Harvard became a world center for the study of modern Greek. Professor Sophocles wrote the first modern Greek grammar and first modern Greek lexicon. Yet his attempts to establish a permanent program in neohellenic studies failed.

The truth is that although courses on classical Greece have thrived in the United States, modern Greek studies have not taken hold until recent years.

Several factors have stimulated a new interest in contemporary Greece. First, the works of modern Greek writers such as Nikos Kazantizakis, Constantine Cavafy and the Nobel Laureates in poetry George Seferis and Odysseus Elytis, became available in English.

Second, in what has been called the "Roots" syndrome, Greek-Americans, like other ethnic groups, began to feel a new pride in their identity. And finally, more and more Americans have been travelling to Greece.

In a climate more conducive to neohellenic studies, American colleges and universities have begun to offer courses and lectures on contemporary Greece.

And, as Charles C. Moskos explains in his book, "Greek Americans," "The driving force behind such efforts has been due to Greek-born scholars who have settled in this country, second-generation Greek-American professors and modern Greek literary critics of non-Greek origin."

The first formal attempt to bring modern Greek studies to American campuses was the Center for Neo-Hellenic Studies founded in 1965 at the University of Texas by George Arnakis. The Center, like many later efforts, a one-man enterprise, did not survive after the death of Professor Arnakis.

Hopes for building a sustained interest in contemporary Greek society and culture advanced significantly with the formation in 1968 of the Modern Greek Studies Association. MGSA is an organization of approximately 600 scholars, students and philhellenes devoted to the encouragement of the study of modern Greece both here and abroad.

The principal activities of the Association include the publication of a biannual Journal of Modern Greek Studies and the sponsorship of symposia. The symposia, held every two years, deal with such themes as the Greek War of Independence, forces shaping modern Greece and contemporary Greek literature.

To the non-Greeks among you, I note that two of the five presidents of MGSA have been Americans who are not of Greek origin.

The first MGSA president, my close friend Professor Edmund Keeley of Princeton University, has done as much as anyone in this country to make Americans aware of modern Greek literature. A former Fulbright scholar in Greece, whose brother, Robert, has just become United States Ambassador to Greece, Professor Keeley has produced definitive translations of Cavafy, Seferis, Elytis and several other modern Greek writers. Another former non-Greek president of MGSA is Peter Bien, a professor of English at Dartmouth.

Both these ardent philhellenes have poignantly described the struggle to develop modern Greek studies as an academic discipline.

Professor Keeley writes in 1976: "Working in modern Greek literature is a lonely enterprise; few know its riches, very few teach the subject, even fewer come to the literature as scholars or critics, especially in the United States. . . ."

Professor Bien says in 1978: "For seventeen years I have been sneaking modern Greek works into my course by hook or by crook in no less than three departments . . . we who profess neglected literatures are beggars in our universities."

Fortunately the situation for neohellenic studies has brightened in recent years, with several encouraging signs of progress:

First, the George Seferis Chair of Modern Greek Studies was created at Harvard in 1975, the first such endowed professorship in the United States. As you all know, the establishment of such chairs elevates the prestige of a discipline, helps attract and retain first-class scholars, and ensures the continuation of courses in a particular field. I understand that Boston University, Queens College, Rutgers University and Indiana University all hope to create chairs in Greek studies as well.

Second, there has been a sharp upsurge in enrollments in Greek language courses at American colleges and universities, from nearly 700 students, both undergraduate and graduate, in 1977 to almost 1,000 students in 1983, an increase of over 40 percent.

Finally, there are more programs and courses in neohellenic studies on American campuses. I should mention efforts here at Ball State as well as at Barnard College, Dartmouth, Harvard, Kent State, Ohio State, Princeton, Queens College, Regis College, San Francisco State, the University of Florida and the University of Minnesota.

It is not surprising that the largest such program is at Queens College in New York City. For there are 450,000 Greek-Americans in New York, nearly 100,000 of whom live in Astoria, an area in the borough of Queens. The 2,000 Greek-American students at Queens College provide a natural constituency for its Byzantine and modern Greek studies program. Although many of the nearly 600 students who annually enroll in these courses at Queens College are of Greek descent, many are not.

I think it still more surprising—and splendid!—that Ball State University and, with but two Greek-American families, the town of Muncie, have been so responsive to Greek studies. The Hellenic studies program and these Brademas Lectures have, as I have said earlier, attracted the world's preeminent scholars of classical and contemporary Greece.

I don't have to look far to find the people who have made these activities so successful. One, of course, is John Koumoulides but I must also applaud the generous philhellenes who comprise the Friends of Greek Studies at Ball State.

Certainly, what you are doing here and the kind of programs of which I have been speaking at other colleges and universities in this country are helping in important ways prepare Americans for work and life in a world that will never be narrow again.

Now I have spoken today of the need for international education in the United States and of the advances we have made generally, with particular attention to encouraging Greek studies.

Before I conclude, I should like to make two final points.

First, each of you must enter the battle that continues to be waged in Washington, D.C. over support of our schools, colleges and universities, including international studies and research. None of us can afford the luxury of disdain for political discourse.

For we need to remind President Reagan that when he attacks education, he is really threatening both our prospects for a growing and more competitive economy and the security of the United States in a dangerous world.

This President, who has placed economic prosperity and a strong national defense at the top of his agenda, apparently fails to see the close connection between the achievement of these goals and the health of the schools, colleges and universities of the United States.

The second point I shall make is still briefer: Give to Greek studies—your time, attention and enthusiastic support.

Let me close my remarks by saying simply that it must be evident that so perilous is our common life on this precious Earth that we must, all of us, commit every fiber of our minds and spirits to the quest for a stable peace and a world of freedom and justice.

ONE FOR THE GOOD GUYS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial printed in the Ventura County Star Free Press. The editorial grants much deserved praise to the finely executed capture of the hijackers of the *Achille Lauro*. I would like to express my pride in the chain of command, including President Reagan, the intelligence operatives, our Mediterranean fleet and the F-14 pilots, who were responsible for the arrest of these terrorists. Let this incident be a warning to all terrorists that the United States is prepared to protect her countrymen and her allies against any terrorist attack.

[From the Ventura County Star Free Press, Oct. 11, 1985]

GOOD FOR US

This is a day to say, "Well done, America."

The well planned and well executed military operation that resulted in the capture of the four Palestinian pirates, suspected in the murder of an American citizen on the cruise ship Achille Lauro, has not only given a lesson to terrorists everywhere but also has given a lift to the American spirit.

For more times than we like to remember, the United States has been obliged to sit on its hands, seemingly powerless to act, after terrorist incidents against our people. Our national pride has suffered. But this time, there was something we could do to bring

the offenders to justice—and we did it. Did it very well indeed.

Whether the pirates will be brought to trial in Italy, where they are now held and under whose flag the Achille Lauro sails, or whether they will be extradited to this country remains to be decided in legal diplomatic consultations between the two nations. In either country, we can expect that the full due process of law will be exercised—another lesson to terrorists who rule by the gun rather than by the law.

So this is a day for feeling good. Good for our intelligence operatives. Good for our Mediterranean fleet. Good for those F-14 pilots. Good for the commander-in-chief. Good for us.

CIVIL RIGHTS COMMISSION

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. DELLUMS. Mr. Speaker, yesterday, the New York Times printed a letter from my distinguished colleague from California, Representative DON EDWARDS, concerning the sad demise of the U.S. Commission on Civil Rights under the current administration.

Mr. EDWARDS presented a compelling indictment of this administration's calculated indifference to the needs and rights of all minorities in our society. I commend this letter to my colleagues and to the American people for thoughtful reflection and constructive action to redress this indifference and injustice.

[From the New York Times, Oct. 30, 1985]

CIVIL RIGHTS COMMISSION, FROM WATCHDOG TO LAP DOG

(By Don Edwards)

To the EDITOR:

From Robert Pear's article on disagreement within the United States Commission on Civil Rights over the meaning of equality (Oct. 14) one might think it is fine for the commission to be a debating society for its members and that the debates are based on factual research. Nothing could be farther from the truth.

The commission was established in 1957 to serve as the Federal Government's independent watchdog over civil-rights matters and to monitor Federal laws and policies with respect to discrimination or denials of equal protection of the laws. For 25 years, the commission met its mandate well, exposing discrimination throughout the country and evaluating administrations both Republican and Democratic.

In 1983, when President Reagan insisted on firing commissioners who criticized his enforcement policies not just in affirmative action, but also on such issues as the tax exemption for Bob Jones University and his opposition to strengthening the Voting Rights Act, the real issue was whether the commission would retain its independent watchdog function. We have our answer. Not a single monitoring report or statement on enforcement in any Federal agency has been published since the commission was reconstituted in 1983. One of its major functions has simply ceased.

As we examine the handiwork of the reconstituted commission, keep in mind that it is no longer an independent body, but is now simply an arm of the Reagan Administration. As Clarence M. Pendleton, Jr., commission chairman, told the Eagle Forum the Phyllis Schlafly group, last Feb. 15: "I am proud to be on President Reagan's team. It is an honor to develop civil rights policy with other distinguished Americans, gentlemen like Brad Reynolds, Clarence Thomas and Edwin Meese."

Consistent with the policy goals of the Administration, the commission has replaced state advisory committee members who insisted on reporting on civil-rights problems in their states that called Administration policy into question. On the rare occasion when the commission does issue statements, they coincide with Administration policy, including opposition to the Civil Rights Restoration Act and pay equity as a means of ending wage discrimination.

Perhaps most tragic, the commission has abandoned its role as a fact-finding investigatory agency on civil rights. The majority of the commission has developed a habit of announcing conclusions on subjects under consideration before any investigation takes place. We know what the results of studies will be before they've even begun. For example, Chairman Pendleton, Vice Chairman Morris B. Abram and Linda Chavez, staff director, first announced their opposition to comparable worth and then commissioned a study. Not surprisingly, the study also rejected comparable worth.

It strains reason to claim intellectual rigor for the single report issued by the commission over the last 20 months. Such a claim flies in the face of such objective assessments as that done by the General Accounting Office on the comparable-worth report. After a lengthy analysis, the G.A.O. found that the commission defined comparable worth differently from advocates of comparable worth, and rejected the concept based on that different definition. Furthermore, G.A.O. found that the report was filled with distortions, inconsistencies and mistakes of fact.

The American taxpayers deserve a Civil Rights Commission that will be an independent watchdog to see that the laws are enforced so that we may someday achieve true equal opportunity in our society. Our nation also deserves a commission that will restrain its penchant for announcing conclusions until some honest fact gathering is done. Unfortunately, we now have neither, and a debating society, however eloquent the debaters, is no substitute for a strong, independent Civil Rights Commission.

TAX REFORM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GINGRICH. Mr. Speaker, in all likelihood when the House Ways and Means Committee has completed its version of tax reform the House will have the option of a simple yes or no vote. By voting against the Ways and Means bill, we will not be voting against tax reform, we will be voting to make them write a better bill. I would urge my colleagues to review the following article from the Atlanta Journal and Constitution. Hopefully we will learn from this experience and not be destined to repeat these same mistakes in the future.

[From the Atlanta Journal and Constitution, Oct. 19, 1985]

THINGS FOR TAX CODE TINKERERS TO REMEMBER

(By Louis Rukeyser)

As we watch Ronald Reagan's fading tax-overhaul plan become the policy debacle of his second term, here are seven things to remember—to save embarrassment all around—the next time we tinker with the tax code.

"Reform" isn't reform just because the politicians call it that. The noble word repeatedly falls from the lips of lawmakers of all stripes and, indeed, repeatedly appears in the titles of their tax bills. This year's "reform" becomes next year's "to be reformed." The correct word is "change," gang.

To get the benefits of reducing taxes, you have to reduce taxes. In 1981, the president had a nice, clear program: cut taxes. The wiseacres said from the start it couldn't be done, but they were wrong, and once the cuts were in place, the country finally got a powerful economic recovery. The big-government clowns have been upset about this ever since, and have talked the current White House staff into believing that anything more meaningful than "revenue neutrality" this time around would be downright sinful. Translation: they can't wait to start raising your taxes again.

To encourage savings and investment, you have to encourage savings and investment.

INCOME REDISTRIBUTION

Reagan's original 1981 program correctly assumed that the tax code should be aimed at economic growth; his new version is a conventional hodgepodge of income redistribution and higher business taxes.

If you change the rules on long-term business investment every year, you will retard long-term business investment. It's fashionable to carp at U.S. executives for focusing narrowly on the next quarter, as opposed to the next generation—but how can you blame them too much when Congress makes it clear, year after year, that the long-term rules in such key areas as depreciation are likely to be altered dramatically every time the legislators assemble?

When a politician tells you something is "fairer," button your wallet pocket. Most people are understandably willing to believe that the "fairest" thing would be to take money from somebody else and give it to them. That may be human nature, but it is, alas, not economic sense. The more successful American tradition seeks not to redistribute your neighbor's earnings but to give you the chance to augment your own.

"LOOPHOLE" IS MISUSED

"Loophole" is the third most cynically misused word in this debate, beaten only by "reform" and "fairness." "Loophole," in the English language, refers to a means of evading a law. What are usually miscalled "loopholes" in the tax code are, in fact, provisions specifically enacted by Congress to accomplish agreed social or economic purposes. When they benefit the person talking, he or she thinks they are marvelously ligitimate incentives; when they benefit someone else, they are a disgrace to the human race.

We can simplify and reduce people's taxes, but we can't do it with mirrors. History, including our own, suggests that a top tax rate no higher than 25 percent would do more than all the alleged "reforms" to cause most tax "shelters" to wither of their

own obsolescence. History suggests that we can realistically and speedily get down to such a top rate, too, if we insist that politicians halt the demagoguery of paranoia and resentment. For if you really want to reduce the American people's taxes, you have to start by reducing the American government's spending. And wouldn't that be the loveliest "reform"of all?

PROBLEMS IN THE PHILIPPINES

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GARCIA. Mr. Speaker, yesterday's hearings in Congress on the Philippines pointed out some of the severe problems confronting that nation. What the best course of action for the United States to take, remains to be seen. It is clear, however, that the status quo—that is, President Marcos' rule by decree—is no longer an alternative.

I am submitting an article by Washington Post reporter David B. Ottaway on the present crisis in the Philippines for the RECORD. The more we know about that troubled nation, the better we will be able to decide our own best course of action.

[From the Washington Post, Oct. 27, 1985]

A DIPLOMATIC DILEMMA—PHILIPPINE CRISIS BEDEVILS UNITED STATES

(David B. Ottaway)

The Philippine crisis bedeviling the United States presents the threat of a geopolitical castastrophe in the Far East for which American diplomacy has no ready antidote.

The Reagan administration, haunted by the prospect of an Iranian-style diplomatic debacle, is debating whether to keep prodding President Ferdinand Marcos to make substantial reforms, or to begin distancing the United States from him in hopes of preserving the U.S position in the Philippines for the long term.

The debate inside the administration is strongly influenced by intelligence reports that Marcos is gravely ill and probably has no better than a 50 percent chance of living until the next Philippine elections, scheduled for 1987.

For now, the United States is relying on diplomatic persuasion, epitiomized by the recent mission of Sen. Paul Laxalt (R-Nev.) to Manila in an effort to persuade Marcos to mend his ways before his country collapses beneath a growing communist insurgency.

But this is a temporizing tactic. The main unresolved issue, officials say, is whether to continue trying to nudge, cajole and squeeze Marcos toward meaningful reforms or to give up on him. The latter course would, in effect, aid non-communist domestic opponents trying to oust Marcos in favor of a government that could more effectively fight the growing communist insurgency on the island republic.

The debate within the administration is mirrored in Congress, where views are just as divided, mostly along partisan lines. Rep. Gerald B. Solomon (R-N.Y.), a close friend of Marcos, argues that abandoning Marcos could provide what his critics say they are trying to avoid for the United States.

"We have to be very careful about pulling the rug out from under Marcos," he said. "We tried to do it in Iran with the shah on human rights. Had we been a little more patient with the shah, maybe we wouldn't have the same situation we have today in Iran."

Many Democrats, on the other hand, argue that the time has come for a dramatic break with Marcos and the administration's tactic of "quiet diplomacy," because "the negative trends are moving faster than the positive ones," as Rep. Dave McCurdy (D-Okla.), a member of the House Select Committee on Intelligence, puts it.

"Gradualism isn't going to work. We have to look at reasonable, constructive alternatives to the Marcos regime—a moderate, noncommunist regime," he said.

Marcos suffers from an often incurable, recurring sickness known as "systemic lupus erythematosus," according to intelligence and congressional sources. The disease affects the cell structure of the body and attacks organs, particularly the kidneys. Marcos has survived three debilitating bouts, the latest from November to March. He may have had a kidney transplant, although he has vehemently denied it.

Each time, Marcos has recovered—but each time to "a lower plateau," according to one U.S. official. During his "downs," he is almost incapacitated, said the official, who asserted that Marcos is "hardly able to operate his government.

A congressional source who has investigated Marcos' health said the Philippine leader has virtually destroyed his presidency as a functioning institution and has taken to ruling mainly by "capricious decree." This source said Marcos may die within six months.

"The best course [for U.S. policy] is to let nature take its course," the source said.

To what degree Marcos' illness is the driving concern behind the Reagan administration's sudden activism toward the Philippines is unclear. There also have been recent U.S. intelligence reports that the spreading communist insurgency, led by the New People's Army, is leading the country steadily toward "catastrophe."

The nightmare frightening administration policymakers is the possibility of a strategic reversal in the balance of power in the Pacific if the United States loses its two biggest bases abroad, Clark Air Force Base and Subic Bay Naval Base, both in the Philippines, and the Soviet Union takes them over—precisely the fate of the former U.S. base at Cam Ranh Bay in Vietnam.

Calls for the United States to get out of Clark and Subic are coming from noncommunist quarters in the Philippines as well as from the communist insurgents. U.S. officials fear that the bases will become identified with Marcos, making it all but impossible for any successor government in the Philippines, even an anticommunist one, to allow the United States to keep them after Marcos is gone.

Parallels between Marcos and the late shah of Iran haunt this administration debate. "Everybody has a fear of Iran and what it did to the Carter administration," said one administration official. "It may not go the way Iran went, but it could go just as sours."

The Carter administration tried to deny it had a problem in Iran until both the shah and the U.S. position in Iran were too far gone to salvage. That experience has had a powerful impact on the Reagan administration, which openly acknowledged long in advance of the denouement that it has a potential foreign policy disaster on its hands.

"The Philippines has been on the president's horizon ever since 1983," said one official, referring to the murder of opposition leader Benigno S. Aquino on Aug. 21 of that year, an event that set off the first alarms in the White House and led to a Reagan refusal to meet with Marcos ever since.

U.S. foreign policy analysts in and out of the administration agree that the U.S. dilemma today over how to handle Marcos differs in many ways from the Carter administration's Iranian problem.

Marcos' position in Philippine history and society is different from what the shah's was in Iran. Internal conditions of the two countries are also vastly different, and there is no Philippine equivalent of the Islamic fundamentalism that stirred the Iranian masses.

But there do seem to be three clear similarities.

Both countries were, at the moment of crisis, crucial to U.S. geopolitical interests in a key region of the globe. And Marcos demonstrates a stubborn refusal to appreciate the seriousness of his situation similar to the shah's—a stubbornness that hardens whenever Marcos is pressed to make reforms that risk loosening his tight grip on power.

The Marcos message that "all is under control" was repeated to Laxalt last week in Manila. Marcos reportedly asked whether his regime had "an image problem" in the United States, and needed a good public relations firm in Washington to set things right.

This same message was brought to Washington this week by his acting foreign minister, Pacifico A. Castro, who said in an interview Monday, "We are doing all the reforms necessary and called for by our people."

U.S. "experts" misperceived what was unfolding in South Vietnam, Cambodia and Laos, Castro said, suggesting that the same misperception is affecting U.S. policy in the Philippines. "It could be we are going through the same syndrome," he said.

A third similarity between the cases is the terminal illness of the leader. The Carter administration, however, did not realize that the shah suffered from serious cancer. According to Gary Sick, the National Security Council expert on Iran during the Carter administration, the misbegotten belief that the shah was in good health was important to the administration's decision to keep supporting him.

"We know Marcos is going to pass on in a relatively short time. The question is how to position yourself. That is the real difference [that] affects the whole underlying philosophy of how you deal with the situation," Sick said.

Another difference between the two cases, according to Sick, is the initial responses of the two administrations to their respective crises. During the past year, he noted, there has been a steady stream of high-ranking U.S. officials and members of Congress to Manila bringing messages of deep concern or even blunt statements of U.S. displeasure with Marcos' performance.

Not so in U.S. dealings with the shah. As late as November 1978, just three months before his final flight from Tehran, President Jimmy Carter's national security affairs adviser, Zbigniew Brzezinski, was phoning the shah, encouraging him "to toughen up" his stand against the opposition with the assurance that "we are prepared to back you whatever you do," Sick said.

The effectiveness of the Reagan administration's full-court diplomatic press on

Marcos is unclear. Everyone seems to agree some reforms are taking place. But, as one U.S. official involved in the process said, "It's a struggle every step of the way."

Some administration analysts say they feel that there is a "reasonable chance" of achieving the current U.S. goal of free and fair local elections next May, followed by a presidential contest in 1987 when a Philippine vice president also will be chosen. Others are distinctly gloomy about such prospects.

As one administration official put it, "We can't make major progress before a new government is in place."

LEGISLATION TO ESTABLISH MARITIME AGREEMENTS WITH MAJOR U.S. TRADING PARTNERS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. BIAGGI. Mr. Speaker, I am today introducing legislation that would require the President to negotiate and enter into bilateral maritime shipping agreements with our major foreign trading partners. This legislation would require maritime agreements with approximately 25 major U.S. trading partners, each of which accounts for over 1 percent of the total waterborne U.S. import and export trade. This legislation ensures that the maritime agreements formulated contain essential procompetitive elements to preserve the free flow of commerce with these nations.

The U.S. merchant marine is at the lowest point in its history. Although the United States remains the world's largest trading nation, less than 6 percent of all U.S. oceanborne foreign trade is carried on U.S.-flag vessels. We are becoming increasingly dependent on the vessels of other nations to carry our trade.

The Congress historically has recognized the U.S. merchant marine as the fourth arm of defense. Our fleet is vitally necessary to assure adequate sealift capability in time of national emergency. Nevertheless, over the last several years it has been allowed to decline to the point where its continued existence is threatened. Moreover, this decline is occurring in the face of actions by other nations to increase their fleets and carve out large portions of the world's shipping trades for their own vessels, particularly Soviet bloc nations.

The U.N. Code of Conduct for Liner Conferences entered into force in 1983. The Liner Code allows the contracting parties to reserve for their own flag vessels much of their trade with another nation. In most cases, access by vessels of third nations to trade between codist countries will be restricted to 20 percent.

The United States opposes the code because of flaws in many of its provisions. Regardless of the merits or demerits of the code, however, its entry into force leaves U.S. shipping and trade vulnerable to the shipping policies of other nations. Because the access of third nation vessels will be restricted in the trade of codist countries, our open, noncodist trade will be viewed as a dumping ground for excess tonnage. Additionally, the ability of U.S. vessels to compete for cargo in foreign-to-foreign trades will be limited. The entry into force of the Liner Code requires the United States to enact a shipping policy that adequately responds to these developments and at the same time ensures continued competitive access to shipping trades.

The legislation I have introduced today is carefully constructed to reflect these competing interests and to reflect criticisms voiced in the past regarding the anticompetitive potential of bilateral shipping agreements. My bill requires maritime agreements between the United States and any nation that accounts for at least 1 percent of total U.S. waterborne trade, or any nation that requests a maritime agreement with the United States. These agreements will allocate cargo shares to be reserved to the vessels of the United States and the trading partner. However, the cargo allocated between the United States and the other nation cannot exceed 33⅓ percent of the total U.S. waterborne trade with that country.

The bill also requires that several essential provisions must be included in each maritime agreement to ensure that competitive freight rates are maintained in the trade. For instance, at least one-third of the cargo is open to the vessels of other nations, and the United States and the trading partner may not restrict the access of any third-flag vessels to that cargo. Moreover, the United States may not restrict U.S.-flag vessels from competing in the maritime agreement trade, as long as those vessels are in compliance with other U.S. laws. Additionally, conference shipping agreements in the trade must comply with the provisions of the maritime agreement and may not allow for the pooling of profits by the shipping lines in that conference. If a conference does not comply with the provisions of the maritime agreement, it is subject to strict penalties and sanctions under the Shipping Act of 1984.

The bill also includes an enforcement mechanism to ensure that our trading partners accept an agreement containing these procompetitive elements. If, after 2 years, a trading partner refuses to enter into an agreement, one-third of the cargo in that trade is reserved to U.S. vessels and the Federal Maritime Commission is required to undertake an investigation to ensure that U.S. vessels have competitive access to the trade. If the investigation uncovers unfair practices that discriminate against U.S. vessels, the trading partner will be subject to sanctions, including denial of access to U.S. ports.

This legislation is an important step in developing a comprehensive maritime policy adequate to respond to international practices, and ensuring the growth and vitality of a U.S. merchant marine with the necessary national defense capability. I urge my colleagues to join me in supporting this legislation.

ONE FOR THE GOOD GUYS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial printed in the Santa Maria Times. This editorial gives much deserved praise to the finely executed capture of the hijackers of the *Achille Lauro*. I would like to express my pride in the chain-of-command, including President Reagan, the intelligence operatives, our Mediterranean Fleet and the F-14 pilots, who were responsible for the arrest of these terrorists. Let this incident be a warning to all terrorists that the United States is prepared to protect her countrymen and her allies against any terrorist attack.

THE GIANT AWAKENS

Hurrah! The sleeping giant sleeps no more! The United States once again has shown that the world can take us for granted only for so long before retribution strikes. We must applaud President Reagan and his staff for planning and carrying out the successful mission that seized the terrorists who killed an American aboard a seajacked liner.

We must add our congratulations to the friendship extended by Italy, and the strengthened NATO partnership this action has forged.

Egypt, on the other hand, can't be congratulated for any part of its action. Despite a carefully-worded message from the State Department, we still must condemn Egypt's action in covering up the act, for lying about the whereabouts of the terrorists, for having negotiated and made a deal with them. It was only because of top-ranked intelligence work that we were able to discover that the terrorists were still in Egypt even after that country's president has said they had left.

There are a number of salutatory points about this episode. One, already mentioned, is that our intelligence apparatus apparently is functioning well once again. That is absolutely vital to our national security. Another is that we still have friends in the Mediterranean, and that they have as similar resolve in dealing with terrorism. Thirdly, and most importantly, we have demonstrated to the world that, when sufficiently provoked, we will strike back. That message was too long in coming, as we noted here Thursday. Now that it has been sounded, we must not return to hibernation.

Terrorism has been with us forever. It is now an accepted practice by many of the dissident groups and nations in this world. Many use it simply to provide bravado, while others use it as a calculated means of advancing their own goals. The North Vietnamese were masters of this ploy, with Ho Chi Minh saying that it followed his master plan that if you can't get the hand of oppression withdrawn, try cutting off a finger at a time.

The acts focus great attention through the world media. And that focus falls on those nations, who like us, are—or were—reluctant to retaliate. As we pointed out here Thursday, this is a situation where an economically and militarily-weak nation can

tweak the noses of giants. Our previous hand-wringing stance only played in the hands of these despots.

Now it is a different game. Now that we have proven capable of acting, we must not waver from this policy in the future.

A TRIBUTE TO BENNIE VINTON

HON. PAUL B. HENRY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. HENRY. Mr. Speaker, today I rise to pay tribute to an outstanding veteran of the Vietnam war, Mr. Bennie Vinton. Mr. Vinton is being honored this year as the State of Michigan's Veteran of the Year, and his accomplishments that led to the award are truly remarkable.

Mr. Bennie Vinton, now a resident of Belmont, MI, has been a lifelong resident of the Grand Rapids area, attending Creston High School before entering the U.S. Army on February 14, 1962. Mr. Vinton subsequently served with distinction in Vietnam as a staff sergeant class E-6, from October 1967 until he was wounded in April 1968. On April 30, 1969, he was honorably discharged from the Army.

Faced with the animosity which often, sadly, confronted Vietnam veterans, Mr. Vinton contacted the Vietnam Veterans of America for information about how he could help veterans, like himself, who were proud of what they had done for the United States. He returned to Grand Rapids and founded a local chapter of the VVA. He then formed five other local chapters, resulting in Michigan's becoming the third State with a chartered Vietnams Veterans organization. The Vietnam Veterans of America has been fortunate to have had the services of Mr. Vinton as president of local chapter No. 18, chairman of the State board of directors, and member of the national executive advisory committee and the national board of directors' economic affairs committee. I might add that he was offered other positions at the national level which he turned down, preferring to focus his commitment to "grassroots" level work.

Mr. Vinton is currently employed as a Disabled Veterans Outreach counselor by the Grand Rapids, MI, Employment Securities Commission Office. His contributions to his work have included many after-hours visits to veterans' groups, which have resulted in his placing more disabled veterans into jobs than any other counselor in our State. He has been honored twice as Michigan's Disabled American Veterans' Disabled Veterans Outreach Program Award winner, and was national runnerup last year. He also has been honored by the U.S. Department of Labor.

In addition to his involvement with the Vietnam Veterans of America, Mr. Vinton is also a member of the Disabled American Veterans, AMVETS, the American Legion and the Veterans of Foreign Wars. However, his community service is not limited to veterans' affairs. Mr. Vinton founded a youth center in a poverty-stricken area of Grand Rapids. He is also a volunteer for the American Red Cross and for St. Jude's Children's Research Hospital, and he gives presentations to school groups about his experiences.

Mr. Speaker, I ask that all Members of the House of Representatives join me in honoring and thanking an extraordinary individual, Mr. Bennie Vinton, Michigan's 1985 Veteran of the Year.

QADHAFI: HE WENT TO THE CUPBOARD AND THE CUPBOARD WAS BARE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. BROOMFIELD. Mr. Speaker, again, Colonel Qadhafi is in the news. This time it doesn't involve a terrorist operation, however. It concerns the Libyan economy. Recent reports reveal that the economy of Libya is suffering and Qadhafi isn't doing much to help it. Qadhafi appears to have spent so much time meddling in the affairs of others that he forgot about his own country.

With the decline in the demand for Libyan oil, the Libyan Government is having difficulty keeping alive many of its social programs and its overseas involvements. As we all know, Qadhafi has interfered in the affairs of his neighbors for years. Not too many years ago, the Egyptians responded to Libyan threats with a brief military clash with that country. Qadhafi assisted the former Ugandan dictator, Idi Amin, in some of his notorious exploits and provided ample assistance to the Polisario, who are still clashing with the Moroccan Government. Qadhafi also managed to involve himself in the civil war in Chad and laid claim to a mineral rich area along Chad's northern border.

In the terrorism area, Qadhafi is without equal. He succeeded in assassinating many of his opponents in Europe, and mined the Red Sea to discourage maritime traffic through the Suez Canal. He plotted against Tunisia and sent a band of attackers against Gafsa, a small town in the southern part of that country. He has welcomed terrorists from all over the world and eagerly trains them in his secret desert terrorist training camps.

The economic plight of Libya is serious enough for that Government to begin sending home guest workers. Over 30,000 Tunisian guest workers were sent home en masse by the colonel. He would not permit them to take their belongings nor could they withdraw their savings from Libyan banks. After toiling in the heat of Libya as loyal guest workers, the poor Tunisian laborers were rudely escorted to the Tunisian border and thrown out of that country.

In many respects, the Libyan revolution has failed. That country is armed to the teeth with Soviet-supplied weaponry. The economy is in shambles and the Libyan people are growing unhappy with their leader. There are numerous reports that a number of attempted coups have been tried against the colonel. He has signed in an attempt to establish legitimacy and win friends in the Arab world.

Even among his Arab brothers, he is ill regarded. All in all, Qadhafi's government has been a disaster. He has spent billions on his foreign plots and international involvements, but has neglected his own people in the process. The Libyan people deserve a better government.

With these observations in mind, I commend the following Washington Post article about Libya's economy to my colleagues in the House.

QADDAFI'S LIBYA: SHELVES ARE BARE—6 YEARS INTO THE REVOLUTION, TRIPOLI LOOKS DESERTED

(By Nadra Saouli)

TRIPOLI, LIBYA.—Libya is celebrating the 16th anniversary of its revolution this month in sparkling style, with nighttime parades, fireworks displays and chanting crowds echoing slogans broadcast over loudspeakers.

But as day breaks, a duller reality is revealed. The streets of Tripoli are practically empty and lined with boarded-up shops. The few left open are often short of food and other basic goods.

Since 1980, small traders have been banned because they are "sources of profit," anathema to Col. Muammar Qaddafi's revolutionary ideals. Only a few crafts, such as watchmaking, are still allowed. Barbers are tolerated, but not women's hairdressers.

Cafes are out of bounds except for meetings of the local people's committees. This rule seems to be respected, even though there are no soldiers on the streets.

At a street corner, a 7-year-old boy wearing a white uniform and black beret is directing traffic. He is a member of a people's committee and acts as a traffic policeman in his spare time.

Slogans written on the walls of Green Square, near the harbor, offer some of Qaddafi's thoughts for public contemplation: "Trade is a form of exploitation." "The people's committees are working to satisfy society's needs." And, by way of clarification, "Needs and demands are two different things."

These slogans, taken from the Libyan leader's revolutionary guide, the Green Book, have displaced the portrait of Qaddafi that once dominated the square.

The modern city center is usually empty, apart from a few foreign cars left over from more prosperous times. To find crowds one has to go to parts of Tripoli that have bakeries. Many have been forced to close for lack of help since Libya expelled 30,000 Tunisian workers last month. People line up all day to get a loaf of bread.

The grocery sections of Tripoli's eight state-subsidized stores are almost empty. No rice, sugar or flour is available—but there are shelves upon shelves of tea from China and insecticides from Italy.

Whenever new goods come in, people rush to the shops and buy large quantities to hoard until the next delivery.

Peasants still manage to bring fresh vegetables to Tripoli to sell, but fruit from abroad is regarded as a luxury in this desert country. Fighting broke out the last time a load of bananas arrived from Somalia.

In a society where the family is still an important social institution, people often

can rely on relatives who belong to the people's committees to obtain certain articles, but foreign workers are not so lucky.

Experts say there is hardly any money in circulation in Libya. Individuals do not have the right to invest money. The Libyans have found a way around this, however. A group of people get together, and each contributes a certain amount each month. A year later, one of them invests all the money on behalf of the group, paying back his partners as profits are made.

The disappearance of foreign cigarettes from the shops in the past months has led to a rash of trips to Rome or Malta, with returning Libyans carrying cartons of cigarettes.

The travelers also bring back "luxury" items unavailable in Libya, such as chocolate, perfumed soap, gold and antennas that can pick up foreign television broadcasts.

Libya has three television channels. One broadcasts Qaddafi's speeches, plus serials from Syria and Lebanon. Egyptian films, which are very popular with Libyans, have not been shown since the two countries broke off relations in 1979.

The second channel shows foreign films and serials, while the third, "revolutionary" channel is used by the people's committees to "spread the spirit of the revolution." It has few viewers.

A LOOK AT MEXICO

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GARCIA. Mr. Speaker, the Christian Science Monitor has been running a series of articles on Mexico by reporter Dennis Volman. Part 2 of the series which appeared in the Monitor on October 29, discussed the relationship between Mexico's political and economic problems. I am submitting that article for my colleagues' perusal.

The article follows:

MEXICO: THE ULTIMATE DOMINO?

A COUNTRY IN TROUBLE LOOKS FOR SOLUTIONS

(By Dennis Volman)

The visit was going to be a routine one.

The government public relations woman was bringing in a foreign journalist to see a prominent local businessman in this provincial town. The large, solidly built, middle-aged shoe manufacturer supported the ruling party. There was nothing about the interview, therefore, that promised the unexpected.

But instead of singing the praises of the government, the manufacturer launched into a ripping attack on the ruling party's corruption, inefficiency, and inability to handle the economic crisis.

What then were his solutions to this sad state of affairs?

I don't know, he answered. I only know that the country is in trouble.

MEXICO'S WOES

The severe economic crisis afflicting Mexico since 1982 has brought on a mood of national introspection and questioning.

"No one is sure they have the answers anymore," says one young foreigner working with development projects in Mexico. "The crisis has caused a new political opening. New voices, such as the private sector and the opposition parties, are participating in the debate. . . .

"When the crisis hit, it seemed that the old model fell apart. Today people are asking basic questions about which road Mexico should take."

Mexico's huge $96 billion debt adds sobering immediacy to the debate. And making matters worse still for an oil-producer like Mexico is the latest round of oil price cuts.

Faced with these, Mexico will have the greatest difficulty paying interest on its debt, let alone beginning to pay back the principal.

As if that were not enough, September's earthquake caused what most experts believe is a minimum of $5 billion in damage. That, too, has somehow to be paid for.

But those who hoped Mexico's mood of anxious questioning would have an impact on the midyear elections were disappointed. Instead, the dominant note struck by the ruling Institutional Revolutionary Party (PRI) was business as usual—with traditional Mexican electoral fraud widely regarded as having occurred yet again.

The optimists have not given up hope of political reform. Now that the PRI has made clear once again that it is fully in charge, these observers say, the party may yet attempt to come to an understanding with the main opposition party, the right-wing PAN (National Action Party), in order to keep it within the electoral system. The optimists stress that coopting the opposition has been a traditional PRI tactic.

Meanwhile, the debate continues, centering on two issues:

1. Whether there should be changes in the political arrangements by which the PRI has ruled Mexico for more than 50 years.

2. What economic road to take out of the present debt-burdened slump.

THE POLITICAL DEBATE

Among the broad range of diplomats, politicians, academic analysts, and Mexicans-in-the-street, interviewed for this series there was consensus: that in order to survive, the system evolved by the PRI must be adapted; that the PRI will have to give a much larger political voice to the opposition parties.

"PRI can, for the next five or 10 years, continue to be the dominant party," says a prominent Mexican political scientist, "but in a time when it doesn't have many economic goodies to distribute, it can't be the only one [with any political power]."

As its name suggests, the PRI (Institutional Revolutionary Party) institutionalized the 1910 revolution, making it part of the establishment. Many of its critics charge that in doing so it ceased to represent the interests of the majority of the Mexican people, who are poor, and—during the current economic crisis—are getting poorer.

Few doubt that the PRI could win a presidential election if it were held now. But the party support is becoming increasingly apathetic.

Indeed, disenchantment with the PRI is almost universal.

It arises both from the economic crisis and from reports of massive high-level corruption in past administrations, and at least continuing lower-level corruption in this one.

People continue to vote for the PRI out of a combination of inertia, habit, and fear. They also feel a lingering sense of being incorporated into the system through membership in PRI-dominated labor unions, peasant movements, or community organizations. Most important, they vote for the PRI because they don't see the opposition as a viable alternative.

Most Mexicans still view PAN, the largest of the relatively small opposition parties, as overly right-wing, pro-US, and dominated by business interests. And they mistrust the radicalism of most left-wing parties.

Largely because of PRI's control over the nation, neither right- nor left-wing parties have been able to convince most Mexicans that they have any hope of winning.

Nevertheless, the PRI retains enough of its old populist traditions to frighten the upper classes and the private sector. This was especially true during the 1970s and early '80s, when the ruling party reacted to the economic crisis with radical measures such as the nationalization of the banking system.

"The private sector now wants to change the rules of the game," says Juan Molinar, a Mexican political scientist who works in a research institute attached to the National Autonomous University of Mexico.

"The bank nationalizations so frightened it that the business sector now wants some insurance against any further unilateral actions by the President."

This could mean, Mr. Molinar said, both a diminishing of the almost unlimited power of the president and greater participation of the business sector in government and party decisionmaking.

Businessmen, like many others in the Mexican ruling elite, are now waiting to see whether the PRI will give the opposition greater opportunities for working within "the system," as it's called in Mexico. If not, say Molinar and other Mexican political scientists, businessmen will turn more and more to the right-wing PAN.

For instance, in the northern states of Nuevo León and Sonora (where reports of electoral cheating in the midyear elections were especially strong), PRI could try to reconcile PAN voters to often fraudulent PRI victories by inundating those states with money and by attempting to run honest pro-business administrations there. In one way or another the aim would be to co-opt much of the local PAN support while giving it more of a role in "the system."

Many academic and diplomatic analysts say the only alternative to co-opting the opposition in this way would be increased repression, which would be damaging to both sides.

The snag, according to one analyst close to the PRI, is that if the PRI tries to be more flexible with the opposition, it may offend large chunks of its traditional power base.

Many peasants and workers strongly oppose any further concessions to the PAN, which they perceive as reactionary and pro-Yankee.

THE ECONOMIC DEBATE

President Miguel de la Madrid Hurtado's economic policies also risk taking the PRI a further step away from its base of peasant and worker support. His policies have two cardinal points:

Paying back Mexico's debts.

Opening up the country to foreign investment.

Coping with the foreign debt has forced Mexico to accept a modified International Monetary Fund-type of austerity plan. Budget deficits and government spending have been cut and an attempt has been made to hold down inflation. In the process, the income of an already poor population has been further eroded.

Over the last three years the average per capita income in Mexico has decreased by more than 10 percent, says Carlos Tello, a respected economist and academic who served as minister of planning and budget under President de la Madrid's predecessor, Jose López Portillo. For those at the lower end of the wage scale, income decreased 35 to 40 percent from 1982 to 1984.

As a result, Mr. Tello says, income distribution has become still more unequal in a country that already has one of the most unequal income distributions in Latin America—even worse than that of Brazil.

In his efforts to rebuild Mexico's battered economy, President de la Madrid is turning to export markets and foreign investment. If Mexico is to become a successful exporter, says Don Wyman, an American economist at the San Diego Center for US-Mexican Relations, its productive structure will have to be completely modernized.

"The money has to come from somewhere" Mr. Wyman says. "Foreign private banks will not lend any more to Mexico, and it is doubtful that governmental and multilateral financial organizations, will do so in the amounts necessary. Private foreign investment is the only available source of foreign capital."

But many US and Mexican economists and political scientists are skeptical about the ability of de la Madrid's policies to get the country's economy going again and bring some benefits to the majority of the population.

Critics say the President's focus on exports makes Mexico increasingly dependent on other countries, principally the United Sates, at a time when international economic prospects are not good.

These critics point to government figures released in the beginning of May which show US investments in Mexico dropping last year. These critics also point out that this increased dependence on the US and the Mexican private sector makes it much harder to carry out the structural changes essential to Mexico's economy.

They say that as long as the de la Madrid administration is committed to paying off Mexico's foreign debt, the resulting drain on the Mexican economy will prevent it from recovering.

"What Mexico is actually facing is a crisis in its style of development and an exhaustion of its model of economic growth," Mr. Tello says. "Only by assuming that this is the case will Mexico be able to overcome its present crisis and avoid recurrent and increasingly severe recessions."

IN SEARCH OF A NEW MODEL

People like Tello and Rolando Cordero, an economist who is a leader of the most moderate wing of the leftist United Socialist Party of Mexico, which he represents in the National Assembly, recommend a totally different model of development for Mexico—a model that would start with the agricultural sector.

Mexico, they stress, should produce most of the basic grains it consumes. Besides raising its production of corn, beans, and rice, they would expand agriculture to provide jobs and a minimum standard of living for rural Mexicans so they would not feel compelled to migrate to already overcrowded cities.

According to one politically, moderate US academic who is an expert on Mexican agricultural problems, this would require more than financial investment to bring education, seeds, fertilizer, irrigation, and marketing systems to the countryside. It would also require a redistribution of power.

The peasants will never get the resources they need unless they have the poliitcal power to press for them, this analyst maintains. Nor will they become truly productive unless they control some of the daily decisions affecting production. And yet this US academic is pessimistic about the possibility of such a redistribution of power taking place under the present Mexican system.

Messrs. Tello and Cordero would also change the focus of Mexican industry. They would concentrate on light industries and on producing the goods Mexico needs for its own development.

Instead of producing or importing toasters and other consumer goods for a relatively small middle- and upper-class elite, they say, Mexico should produce such essentials as wire to help electrify the countryside.

The principal problem with the system, according to these critics, is that it does not produce enough jobs, especially in the countryside. Consequently, Mexico City has become inundated with landless, jobless peasants looking for employment. The capital's population is expected to rise from 18 million to 30 million by the year 2000.

Many academic experts are sympathetic to the proposals of Tello and Cordero. But they doubt that the necessary shifts in political power and economic policy can be achieved. Such plans would completely alienate both Mexican businessmen and the Reagan administration, these experts say.

Hence, the consensus is that for the next 10 years there will be no "real" solution to Mexico's problems; that, barring a major international economic crisis, the Mexican system can probably survive for 5 to 10 years with some social turbulence but without very great changes.

Under these circumstances, most analysts believe that Mexico will stand or fall largely on what happens within its own borders, in the US, and in the global economy. These factors, rather than events in Central America, as seen as crucial elements in Mexico's future.

KEN PEDERSEN, DIRECTOR, NASA INTERNATIONAL AFFAIRS DIVISION

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. FUQUA. Mr. Speaker, under congressional mandate, the National Aeronautics and Space Administration has developed an extensive program of international cooperation which has opened an unprecedented range of space activities to foreign participation. Over the years, the United States has signed over 1,000 agreements with more than 100 nations for cooperative space activities. In history's largest international space project, 10 nations designed, built, and paid for spacelab, a billion-dollar science and technology laboratory which fits into the shuttle's cargo bay. Spacelab has been symbolic of the spirit of cooperation with other nations and has been at the core of NASA's international programs since the agency's inception in 1958.

The tradition of NASA's successful cooperative ventures with other nations has continued over the last 6 years under the leadership of Ken Pedersen, the highly respected Director of NASA's International Affairs Division. When President Reagan directed NASA to build the space station in January 1984, he emphasized foreign participation for the purposes of strengthening peace, building prosperity, and expanding freedom for all those who share our goals of exploring exciting new frontiers in space; Ken Pedersen has laid the groundwork for such cooperation on the space station.

Recently, Ken was appointed NASA's Assistant Associate Administrator for External Relations. He will spend the next year on sabbatical as research professor at the Georgetown University School of Foreign Service. I am one of many who will sorely miss Ken's intricate knowledge of NASA's activities in the international arena as well as his ability to respond in an enthusiastic manner to any questions or concerns my colleagues in the Congress and, in particular, the members of the Committee on Science and Technology have had over the years. I know my colleagues will join with me today in thanking Ken for a job well done and in wishing him well as he pursues his research endeavors in the halls of academia.

AGAINST GRAMM-RUDMAN

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. EDGAR. Mr. Speaker, I rise today to urge my colleagues to join me in opposing the so-called Gramm-Rudman budget plan as passed by the Senate last week.

Many well-founded objections have been raised to the legislation. It makes little economic sense. It gives too much power to the President. It is probably unconstitutional.

But my major beef with Gramm-Rudman is that once again, just as with tax reform Reagan style, lower- and middle-income Americans are targeted for sacrifice, but no incentives exist to ensure that wealthy individuals and corporations contribute their fair share.

Mr. Speaker, all of us are committed to action on the budget and trade deficits, but the urgency of the moment is no reason to shirk our responsibilities and turn over our duties to the executive branch. It is no reason to check our brains at the door. And most of all, it is no reason to sell our constituents, their jobs, and the American economy down the river.

We stand at a historic juncture for our form of government and for our Nation. It is a turning point, where we must decide if the Federal Government is to be a responsive partner committed to balanced economic growth, fairness, and a strong national defense, or whether it will be a skeleton body unable to adequately respond to the demands of a complex economy and the needs of a diverse society.

In my home State of Pennsylvania, if Gramm-Rudman passes, we all know who will get hurt:

The veteran in Erie whose pension is threatened.

The unemployed steelworker in Pittsburgh whose training funds are cut.

The family in Altoona whose schoolchildren see education programs decline.

The senior citizen in Philadelphia, struggling to pay medical bills, who gets hit hard when Medicare and Medicaid are scaled back.

The coal miner in Scranton whose black lung benefits are slashed.

Gramm-Rudman provides the incentives to cut those programs vitally needed by most Americans, but fails to call for sacrifice by everyone. Amtrak and highway funding, education and student aid, unemployment assistance and job retraining, Medicare and pensions, food stamps and aid to families with dependent children, environmental protection and health and safety in the workplace—mainstream services that all Americans depend upon—that's the target of Gramm-Rudman.

Furthermore, the hands of Congress will be tied should joblessness and recession plague our Nation's economy. Responsiveness to these conditions is severely restricted by Gramm-Rudman, and once again it will be lower- and middle-income working Americans who will lose their jobs and who will suffer from these restrictions. Balance and stable economic growth—in all segments of our Nation's economy—should be the ultimate goal of responsible budgeting. Gramm-Rudman undercuts congressional ability to foster long-term prosperity.

Rather than adopt this meat-ax approach, we could take substantive actions that would truly attack the deficit problem while preserving our Government's commitment to the American people and to balanced, long-term economic growth.

We could, for example, invest Federal funds more wisely by creating a Federal capital budget. We could adopt a "pay-as-you-go" plan for any additional spending which would permit no spending increases above inflation except for defense and a few select programs for poor people, for which there have to be offsetting tax increases. We could provide for a 2-year budget cycle, making it easier to achieve our budget deadlines and giving Congress more time for oversight of the programs funded under the budget.

We could limit the growth of military spending by eliminating weapons systems that are unnecessary, costly, and add little to our security and by enacting legislation to eliminate fraud and abuse in the purchasing of military spare parts by the Pentagon. For example, yesterday an overwhelming majority of the House voted to hold the line of military spending.

We could eliminate wasteful spending by opposing the waste of hard-earned tax dollars on "porkbarrel" projects.

We could, through tax reform, get rid of unfair tax shelters and close abusive loopholes and we could make sure that everyone contributes a fair share to the goal of reducing the budget deficits that are strangling our Nation's economy and its workers.

We could through this balanced program get the Federal deficit under control within the next 5 years, the same amount of time taken by Gramm-Rudman.

But we are only fooling ourselves by adopting simplistic solutions to the budget deficits. The American people know it. The President knows it. We all know it. Let's come to grips with reality: Gramm-Rudman is unwise, unfair, and unworkable. Let's not make a mistake that we will regret for the next 20 years. Let's vote it down.

THE IMPORTANCE OF THE JOB TRAINING PARTNERSHIP ACT

HON. JOHN McCAIN

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. McCAIN. Mr. Speaker, I consider the Federal Government's responsibility to provide for its citizens collective defense to be one of the highest priorities it has. I believe it is very important for all Members to participate in, and to be recorded on all votes which affect the national defense. With this in mind, it was with deep regret that I missed three votes yesterday on the Defense appropriations bill for 1986. Had I been present, I would have voted against the Frank amendment, both times, and I would have voted in favor of final passage.

However, I was not able to cast these votes yesterday because I was back in my district, accompanying Secretary of Labor William Brock as he toured several centers involved in the Job Training Partnership Act [JTPA]. The JTPA Program was initiated in 1982 to replace the CETA Program. It was designed to take advantage of greater local involvement and increased flexibility in the hope that JTPA would have a better track record in providing real long-term job training than did CETA. If my State is any indication, it certainly has.

One of the centers we visited was the Maricopa County Skill Center. Its Arizona Dislocated Worker Assistance Center was co-recipient of the National Alliance of Business' "Distinguished Performance Award" for its outstanding service. This program was originally expected to serve 750 people and place 375 into unsubsidized employment. Instead, it served 1,000 and placed 940 at an average wage of $8.31 per hour. This is far above the national average of 68 percent. In fact, after 6 months, job retention exceeds 80 percent, something unheard of in the CETA Program.

Mr. Speaker, unfortunately, we cannot afford to rest on our laurels. The copper industry, once a mainstay in my home State of Arizona, continues to suffer. The semiconductor industry, lead by corporations like Motorola and Intel, is suffering a serious downturn. These and other factors will result in 2,500 workers in Maricopa County being affected by plant closures and mass layoffs as a result of import competition.

It is imperative that the Federal Government maintain its commitment to the JTPA Program, particularly the title III Dislocated Worker Program. We must ensure as smooth a transition as possible for those workers who need to learn new skills to participate in our Nation's work force. I know Secretary Brock has been a strong supporter of JTPA and I hope he continues to be. I believe our tour yesterday presented him with clear and convincing evidence on the benefits of this program. In an era of decreasing Federal expenditures, JTPA is clearly a program that costs the Government less because it exists, than would be the cost if it did not.

SOUTH FLORIDA'S EFFORTS FOR A SAFER HALLOWEEN

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. SMITH of Florida. Mr. Speaker, today I rise to recognize "Kids Day," an event which will take place in south Florida this Halloween. Kids Day, a celebration of the American family focused on children, displays the genuine commitment which the south Florida community has in protecting its children. Kids Day also will include a solicitation of funds which will benefit child abuse and child protection programs.

Kids Day is an effort to provide a safe alternative to Halloween. Halloween, unfortunately has steadily deteriorated from a national child celebration to a night of worry and anxiety for parents. The evening of Halloween has provided the criminal element with an opportunity to exploit the vulnerability of our children on the street. Reports of tampering with candy and treats have been increasing in recent years. Razor blades in apples and poisoned candy found in "trick or treaters" grab bags on Halloween are now commonplace. The unpredictable events associated with "Mischief Night" also create havoc. Halloween is no longer an evening of costumes and candy, but an evening of potential harm, loss, and injury.

I hope that, with the implementation of the Kids Day project, this year will be different. With the staging of planned activities on a favorite children's holiday, families now have a safe alternative to what has become a night of crime and malicious mischief. Kids Day signifies an earnest consolidation of efforts by business and labor and by public officials and private citizens.

Kids Day will act as an umbrella for the coordination of 21 separate events which will take place throughout south Florida. These events include: Parties at shopping malls, reduced admission and free popcorn at movie theaters, parties at teen discos and boys' clubs, and several elaborate haunted houses. Within my district specifically, parties will be held at the Hollywood Mall and the teen disco "Celebration," and there will be with store to store "Trick or

Treating" at the Broward Mall and reduced admission at the Broward Mall Theaters.

These events all are geared to focus on the good-natured spirit of Halloween. Not only will these celebrations be fun, but they will, at the same time, be raising money to benefit those children who are victims of abuse. It is anticipated that all costs associated with the actual activities and events of Kids Day celebration will be underwritten by corporate and private sector financing. The money will be donated to five selected south Florida charities which include: Kids in Distress, Outreach Broward, Charlee Homes, the Early Childhood Development Association, and the Boys' Club of Broward County. All proceeds from the fund raising activities of Kids Day will go to these identified south Florida charities. These charities provide education and awareness programs for children, counseling services, and food and shelter.

I sincerely applaud the efforts of all those involved with this most worthwhile project. I would particularly like to recognize Mrs. Toni Siskin, chairperson of the Broward County School Board and the chairperson of the South Florida Steering Committee, for her personal dedication to this cause.

Kids Day is definitely a positive step towards combating the dangers of: Contaminated and poisoned candy, and child abuse and molestation which have come to be associated with this holiday. It is also a fresh approach toward regaining the good-natured fun which Halloween was meant to represent. Additionally, it is an effective vehicle for raising funds which will help ensure a generation of healthy adults for the future.

I wish the South Florida Steering Committee the best of luck with Kids Day and hope that it will provide fun and safe celebrations for years to come.

CONGRESS MUST MAINTAIN FEDERAL SUPPORT FOR FAMILY PLANNING SERVICES

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. LOWRY of Washington. Mr. Speaker, I would like to bring an important editorial that appeared in yesterday's Washington Post to the attention of my colleagues. The editorial, which is entitled "New Threats to Family Planning," underscores the falseness of the argument that links federally funded family planning services with abortion. Although in some instances, abortion services are provided, independently, by agencies that receive Federal family planning funds, family planning and abortion are separate and distinct services.

The effective use of quality, title X family planning services helps to prevent unwanted pregnancies and thereby limits the number of abortions performed in our Nation. I support choice in the matter of abortion. However, family planning services can eliminate the need to make this difficult choice. Any effort to decrease, end, or redefine title X funding would be extremely shortsighted.

The editorial follows:

NEW THREATS TO FAMILY PLANNING

Opponents of family planning programs, flushed with success in disrupting programs in developing countries, have turned their attack on domestic programs. Again their strategy is to label a vote in favor of family planning a vote in favor of abortion. In fact, the programs in question do not involve abortion. But since only the bravest congressmen are willing to run the risk of being associated, however unfairly, with a "pro-abortion" vote, this strategy has been successful in diluting the solid majority support that family planning programs actually enjoy.

No federally supported family planning clinic provides or recommends abortions—a fact recently reconfirmed by the General Accounting Office after a congressionally authorized review. But this finding does not satisfy groups such as the American Life League that oppose most widely used methods of contraception and which insist that "in practice they [the clinics] encourage abortion." They are promoting an amendment . . . denying federal aid to any group that informs pregnant women that abortion is a legal option or that, in a separate facility and with nongovernment funds, performs abortions.

Family planning agencies, which include state and local health departments and hospitals as well as clinics run by nonprofit groups, say they could not accept money on these terms. To do so, they say, would be to violate medical ethics by withholding relevant information from a patient. Some also question the constitutionality of such a prohibition on the free flow of information. Moreover, denying funds to agencies that, independently, perform abortions would deny funds not only to the many Planned Parenthood Federation and other independent clinics—a favorite target of the Far Right—but also to many state hospitals and clinics, some of which are under court order to provide abortion services to low-income women.

It would be an unforgivable act of political cowardice if Congress, out of fear that its action would be misrepresented, were to disrupt the carefully built network of family planning services—a network that actually prevents hundreds of thousands of abortions every year. While many people in this country have serious misgivings about abortion under various circumstances, the great majority support family planning for themselves and for others. Congress needs to start giving this subject the serious attention it deserves instead of running for cover every time someone whispers "abortion."

THE 45TH WEDDING ANNIVERSARY OF GEORGE AND LEONA MURPHY

HON. CHARLES A. HAYES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. HAYES. Mr. Speaker, I rise today to honor George and Leona Murphy, two residents of the city of Chicago, who will celebrate their 45th wedding anniversary on November 2, 1985. Mr. and Mrs. Murphy were married at the St. Raphael Catholic Church in Chicago in November 2, 1940.

The Murphy's are the proud parents of five beautiful children, George III, Leah, Michael, Raymond, and William. They are also the proud grandparents of five grandchildren, George IV, Gia, Cherise, Peter, and Rachel.

The love and dedication that the Murphy's have shared throughout their years together should serve as an example for many of our young people today, that marriages can succeed if two people put their heart into it. I am certain their marriage has been a shining example to their children, their friends and their neighbors, of what marriage is all about. Forty-five years for many of us is a lifetime. For the Murphy's, it has been a lifetime of love, love for each other, and love for their family.

Mr. Speaker, I know that my distinguished colleagues in the U.S. House of Representatives will join me in wishing George and Leona Murphy not only a very very happy 45th wedding anniversary, but also many more years of harmony and happiness together.

TRIBUTE TO SONNY BLISS

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today in tribute to Sonny Bliss, the President of First Housing of Queens County, NY, who will be honored by the Electchester Athletic Association on Sunday, November 3, at its fourth annual awards breakfast.

George Foster of the New York Mets will be on hand to present awards to the children who participated in the 1985 athletic association season, and Sonny Bliss will be honored as he prepares to enjoy his retirement after 30 years of dedicated efforts on behalf of Electchester.

Ever since he helped organize the development's first football team in 1956, Sonny Bliss has generously donated his time and energy to the young people of Electchester through the athletic association. As the athletic director of this organization from 1960 through 1972, he organized a baseball team and coordinated sponsors for all of the association's activities. Because of Sonny Bliss' outstanding leadership, the Electchester Athletic Association now runs excellent programs in basketball, soccer, softball, and other sports.

Sonny Bliss understands that youngsters can learn important values of cooperation and fair play through sports. His enthusiastic support of athletic achievement in Queens County has paid off in a program that has been tremendously successful. His commitment has led him to an involvement in other local sports activities as well—he has umpired high school and community college baseball games for the last 23 years.

Mr. Speaker, the enthusiasm and strength that Sonny Bliss has given to the cause of sports in New York makes us in Queens very proud. We recognize that he has followed the American ideal of volunteerism and community support, and he is responsible for countless happy memories of those who were once youngsters in Queens. I call now on all of my colleagues in the U.S. House of Representatives to join me in praising Sonny Bliss on this joyous occassion, and in wishing him a long and happy retirement.

NATIONAL RADIOLOGICAL TECHNOLOGY WEEK

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. MURTHA. Mr. Speaker, I recently received a letter from a constituent and representative of Lee Hospital, a facility in my congressional district, that brought to my attention the observence of National Radiological Technology Week. The week of November 4 through 10 commemorates the discovery of the x ray in 1895 and the astronomic advances that radiology has brought to the medical field.

Demographically speaking, the 12th Congressional District of Pennsylvania is highly comprised of older Americans, a group that rely heavily upon quality medical care and facilities. In an area where health care directly affects so great a portion of the population the importance of professional excellence is immeasurable.

I, therefore, find it appropriate during this week to express the greatest of appreciation to the medical professionals in the radiological departments of Lee Hospital and the equally fine medical facilities of the Cambria-Somerset-Westmoreland area of Pennsylvania.

EXCHANGE CLUB OF WHITE PLAINS HONORS EDWARD F. BEANE

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. DioGUARDI. Mr. Speaker, tomorrow evening, the Exchange Club of White Plains will hold their annual president's ball honoring Edward F. Beane. The proceeds from this affair will go toward the Exchange Club Child Abuse Prevention Center.

The reported cases of child abuse in this country are on the rise. I believe that there is no greater victimization than that of a child. Our children are the most vulnerable individuals in our society and one of our Nation's greatest commitments should be to provide for their safety.

The Exchange Clubs of White Plains and Westchester are making a tremendous contribution to this goal. Their Child Abuse Center has not only tended to the needs of abused children, but has also developed programs that will go a long way toward preventing further abuse. Organizations such as this deserve our recognition and admiration. I am very proud to be the Representative of the Exchange Club of White Plains and wish them the continued success in their valiant fight against child abuse.

A TRIBUTE TO PAT ALLOCCO

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. COURTER. Mr. Speaker, Morris Township, NJ, will soon be honoring Patrick J. Allocco, who has spent a lifetime serving his community.

Pat's work with Morris Township as a zoning officer, plumbing inspector, construction official, and chairman of the Sewer Committee, to name just a few of his responsibilities, has been carried out with the utmost professionalism and the highest concern for the Township's residents. He has been a model civil servant and will hopefully be emulated by more Government officials in the future. Pat has also courageously served his country in World War II and the Korean war.

I join with Morris Township in wishing Pat all the best in the years to come and thank him for a job well done. Pat's wife Josephine, and his son, Pat, Jr., have every right to be proud and to look forward to enjoying Pat's retirement with him.

ACTIONS OF SANDINISTA GOVERNMENT DEPLORABLE

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GOODLING. Mr. Speaker, I rise today to deplore the action taken by the Sandinista government of Nicaragua to curtail civil liberties. It is obvious that the Sandinistas fear their citizens' growing sense of discontent and the influence of the Catholic Church, rather than North American intervention, as Ortega states. The Nicaraguan Government is curtailing civil liberties in order to silence dissent and thus achieving a main goal of any totalitarian regime.

SALUTE TO LOS ANGELES TRADE TECHNICAL COLLEGE

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. MARTINEZ. Mr. Speaker, I rise today to salute Los Angeles Trade-Technical College on the occasion of its 60th anniversary. I am especially pleased to mark this event, for I myself attended Trade-Tech in 1959. Thus, I am personally aware of the educational opportunities this school has offered and of the significant contributions it has made to Los Angeles and the Nation.

Founded as the Frank Wiggins Trade School by the Los Angeles Board of Education in 1925, the school initially enrolled 3,877 students. Later renamed Los Angeles Trade-Technical College, it became part of the Los Angeles Junior College district in 1969. Over half a million students, many from Los Angeles' minority communities, have attended this fine institution.

Throughout its history, Trade-Tech has grown and changed to meet the needs of its students and of the Nation. During the Great Depression, the school ran a federally funded vocational training program for the unemployed. As the Nation's problems changed from fighting unemployment to fighting World War II, the school responded to this new challenge. Its War Production Training Program enrolled over 14,000 participants in classes conducted around the clock. Most recently, the school's focus has again changed, as students receive training in the high-technology skills that the Nation needs to compete economically abroad.

Los Angeles Trade-Technical College today offers almost 90 occupational programs to its more than 12,000 students, making it one of the largest vocationally oriented community colleges in the country. Under the leadership of President Thomas L. Stevens, Jr., it enters its seventh decade prepared to respond to any new educational challenges it may face. I congratulate the faculty, administration, and students of Los Angeles Trade-Technical College on this important milestone in their school's history.

DICK HOWSER—WORLD CLASS MANAGER

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. FUQUA. Mr. Speaker, all of America has taken to its heart the courageous performance by the Kansas City Royals on the baseball diamond. Demonstrating perseverance and grit, the Royals fought their way back from a two-game deficit to win the World Series in seven tense, exciting games.

While the whole team has gained admiration and affection of Americans everywhere, I want to point out that the manager, Dick Howser, is a Floridian. His athletic career developed in Florida. He attended and played baseball for Florida State University. After a career of playing and coaching in the major leagues, he returned to FSU to manage the Seminole baseball team. Now he is back in the majors in "Royal" style.

We know Dick Howser as a good and decent individual. He has demonstrated that a gentleman can manage world champions. I want to congratulate my good friend on this splendid victory and on setting an excellent example for the young people of this Nation.

GRAMM-RUDMAN

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. NIELSON of Utah. Mr. Speaker, the Gramm-Rudman proposal to put the Federal Government on a real budget—like everyone else—is absolutely essential in order to come to grips with the deficit problem. This amendment is attached to a bill which would raise the debt ceiling to $2 trillion. People have joked that we have to put an end to the spiraling deficit simply because no one knows what comes after a trillion.

We are currently borrowing $143 billion a year simply to pay for the deficits. The spending restraints of our current budget process are obviously not working. Now is the time to reform the process and put the Nation on the long path to a balanced budget.

It is true that Gramm-Rudman will force tough decisions, but we need to face those decisions today and not put them off until tomorrow. Every American should realize how large deficits affect them. They affect our economic recovery. They make it difficult for our manufacturers and farmers to compete in world markets. They slow industrial expansion and they mean fewer jobs for American Workers.

I have heard some worries about Gramm-Rudman that I believe are unnecessary. I have heard that Gramm-Rudman will devastate social programs or the defense program or some other part of the budget. However, the President would administer an across-the-board reduction only if Congress fails to do its job. The President is compelled to maintain congressionally established priorities and must treat all programs evenly. So, Congress will still face the tough decisions on spending priorities. Gramm-Rudman will simply make it much more difficult for Congress to continue the spending habits that are leading this country toward bankruptcy.

TRIBUTE TO NESTLE FOOD CORP. IN FIGHT AGAINST MULTIPLE SCLEROSIS

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. DioGUARDI. Mr. Speaker, I rise today to draw the attention of my colleagues to the fine efforts of the Nestle Food Corp. in the fight against multiple sclerosis [MS]. Mr. C. Alan MacDonald, that company's president, has lent a great deal of time to the fight against MS. On November 2, a dinner will be held in my district that Mr. MacDonald and the Nestle Food Corp. organized to raise funds for the National Multiple Sclerosis Society. These funds will allow much needed research to continue. When we reach out to give of ourselves to help others, we reaffirm American values at their best. I think this effort deserves our recognition.

In addition, I wish to publicly offer my personal appreciation to Ms. Myrna Popper for bringing these fine activities to my attention and to the attention of many others by serving on the committee that has reached out to the community in an effort to raise as much funds as possible at this event. With the many problems this country faces, it is heartening to see people giving of themselves to help others. This is what made America great, and this is what will keep America great.

A TRIBUTE TO HAROLD D. SHAPIRO

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. MRAZEK. Mr. Speaker, it is my pleasure to call to the attention of the Congress and our Nation the accomplishments and achievements of Harold D. Shapiro of East Hill, NY.

Harold Shapiro, the executive vice president of Commander Oil Corp., is honored this year with the coveted Theodore Roosevelt Distinguished Service Award by the Nassau County Council, Boy Scouts of America. Mr. Shapiro's tireless efforts on behalf of the Boy Scouts of America reflect upon his commitment to our country and his dedication to our young people.

Mr. Speaker and my colleagues, in these times when our Nation seeks direction and leadership, the contribution of Harold Shapiro represents more than just his service to an organization. Mr. Shapiro's legacy will be the inspirational dedication he demonstrates in his work. The example he sets for his fellow citizens can be followed in every course of action.

I have spoken on the floor of the House of Representatives on many occasions on behalf of the interests and concerns of the citizens of New York's Third Congressional District. It is indeed a particular pleasure for me to speak of the great contributions of one of our leading citizens and call the attention of the Congress to the work of Harold D. Shapiro.

AGAINST ARMS SALE TO JORDAN

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Ms. MIKULSKI. Mr. Speaker, I support the recent decision to delay from now until March 1, 1986, the proposed sale of advanced arms to Jordan.

This delay is helpful, but I want to emphasize my continued opposition to the proposed sale of up to $1.9 billion worth of advanced arms to Jordan. According to the State Department, the primary purpose of this proposed sale is to enhance Jordan's antiaircraft capabilities. This so-called defensive air defense package threatens the very basis of Israel's security by providing Jordan with offensive weapons that undermine the cornerstone of Israel's security, its air superiority.

The proposed arms package gives to Jordan weapons that can weaken Israel's Air Force and its ability to defend Israel's borders. Without adequate air support, Israel's frontline ground forces could be overwhelmed by the numerically superior Arab armies.

Once Jordan has acquired a sophisticated air defense system, the Jordanian military would have the capabilities required to participate in a combined surprise attack on Israel. At the same time, Jordan would be able to provide a secure base for expeditionary forces from other Arab countries.

Israel is especially vulnerable to attacks from Jordan because Israel shares its longest border with Jordan and because the Jordanian border is in such close proximity to targets in Israel.

Israel's margin of air superiority has been maintained for more than 20 years through its employment of aircraft superior to those available to the opposing Arab forces. This proposed sale would provide for the first time a bordering Arab country an aircraft equal in technology to the best Israeli fighter.

Arms sales have rarely advanced the peace process. The Camp David accords were achieved without a major arms sale to Egypt. For 35 years, the selling of sophisticated weapons has failed to bring peace to the Middle East.

I commend Prime Minister Shimon Peres of Israel for his offer to hold talks with Jordan's King Hussein without preconditions, and at any location. President Reagan deserves credit for his willingness to hold such talks here in Washington. King Hussein himself has given some indications that such a negotiation process might come about. While I remain cautiously optimistic, the fact remains that Jordan has yet to come to the negotiating table.

I have therefore cosponsored a resolution which expresses congressional disapproval of this arms sale to Jordan. Peace requires more than good intentions. Jordan must demonstrate through its actions that it truly wants peace with Israel. This proposed arms sale does nothing for peace. I oppose it and encourage my colleagues to do the same.

DON RITTER ON THE REAL MEANING OF PEACE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. COURTER. Mr. Speaker, our colleague from Pennsylvania, DON RITTER, is one of the House's most articulate advocates of the American foreign policy that is both moral and strong. In a recent essay he set forth the differences between the varieties of what we call "peace" and explained why that word means more than an absence of war. His observations are worthy of the widest audience, and I want to put them before my colleagues. The article follows:

[From the Washington Times, Oct. 24, 1985]

PEACE, YES, BUT BY WHOSE DEFINITION?

(By Don Ritter)

The setting was a sumptuous state-sponsored dinner at a 400-year-old church in Havana, Cuba, which had been converted into a restaurant. A man who was part of a group of U.S. "peace activists" opposed to administration policy in Central America rose and proposed a toast. "To peace," he said. "To peace with liberty," I added. He and the others with him continued to toast "to peace."

The debate in America and Europe today is not over war vs. peace. Nobody wants war and everyone wants peace. The crucial, yet unformed, debate is over the meaning of the word "peace."

If peace is taken as the absence of any large-scale war, nuclear or otherwise, then there are entirely different policy options than if a definition of "peace" also embodies the twin concepts of human freedom and human rights.

If real peace is inseparable from freedom and human rights, then the American people must come to grips with the historical record and current activities of our chief rival in the definition of peace, the U.S.S.R.

Coming to grips doesn't eliminate creative diplomacy and dialogue. We can and should negotiate with adversaries to reduce the dangers of direct conflict, but we should do so without any illusions about achieving a peace that embodies freedom and human rights, since that kind of peace doesn't exist for Soviet people at home, nor for Soviet charges abroad.

Lately, Soviet leaders won't even talk about this. In a bizarre incident on French TV recently, Party General Secretary Milhail Gorbachev berated a journalist for just asking about "100,000" Soviet political prisoners. . . . Period, no answer. That came shortly after Mr. Gorbachev blandly stated that Jews have it better in the U.S.S.R. than anywhere else. Several days later, when Dan Rather again asked about political prisoners. Mr. Gorbachev curtly stated that the subject had already been covered by his response on French TV.

Closer to home, the American people are genuinely confused by peace activists who oppose U.S. government policy in Central America but are silent on the institutionalized violations of human rights by Sandinistas or Salvadoran terrorists. The latter evidently do not qualify as death squads. My discussions with peace activists in Nicaragua indicate they supported the violent overthrow of the Somoza government. Is this an objective witness for peace?

Peace activists urged an end to the Vietnam War which resulted in a tragedy at least as great as the war itself. Yet most were silent on a post-war holocaust in Cambodia and the death, misery, and enslavement in South Vietnam. To this day, they have not owned up to the fact that the end of the war did not bring peace.

The attempt to bring human rights to South Africa is important for peace activists of all stripes, but so is resistance to organized Soviet genocide in Afghanistan. Why is there no outcry from peace activists against a Soviet policy that is far more responsible for events in Afghanistan than is a U.S. policy for those in South Africa? Where are the symbolic arrests at the Soviet Embassy? Where is the worldwide movement for trade sanctions against the Soviet Union?

If the West eventually weakens and accepts nuclear first-strike dominance by the Soviets, that won't be peace.

If the West accepts the use of Soviet proxy troops (Cubans) to guard the Marxist palaces of Ethiopia and Angola and allows freedom fighters to wither away, that isn't peace.

Is an occupied Cambodia without resistance and a conquered South Vietnam "at peace?" To be more blunt, is Poland at peace?

With the Helsinki process crushed inside the U.S.S.R., are the people of the Soviet Union at peace? Is a prisoner in a jail at peace?

While people active in the peace movement may be sincere in their quest, they simply ignore the reality of what they, themselves, would accept as living "in peace."

To have effective discussions about peace with the Soviets, Americans must decide for themselves what the word peace really means, and not just to our own leaders but to Soviet leaders, too. We all know the outcome of the last time the West rejoiced in having achieved "peace in our time."

If Americans want real peace for the world, which means peace with freedom and human rights, we need to ask Mr. Gorbachev in Geneva about the slaughter of innocent Afghans. We need to ask about the Helsinki monitors who, like Ukrainian poet Vasyl Stus, have died in labor camps. We need to ask why Anatoly Scharansky is imprisoned. And we need to ask why one Nobel Peace Prize winner, Andrei Sakharov, can't communicate with his own family while another, Bishop Desmond Tutu, can hold internationally televised press conferences.

Peace demands first a more agreed-upon definition of the word. For starters, how about our peace activists consulting with the unofficial peace movement in the U.S.S.R.?

Last time I heard it was in exile, dead, or simply out of business.

DAVID BRODY

HON. PAT SWINDALL

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. SWINDALL. Mr. Speaker, today I would like to acknowledge a man who many here in Washington know not only as a friend but as one of the top professionals in his field. David Brody has been a lobbyist with the Anti-Defamation League since 1949. His approach to lobbying is unquestionably a big part of his success and uniqueness as a lobbyist. At this point, I would like to enter in the RECORD a recent article from "National Journal" magazine which accurately describes the contributions which David has made to the many people involved in the legislative process of Congress.

The article is as follows:

MAKING MATCHES MEANS ACCESS

Most Washington lobbyists boast about having connections. David A. Brody takes pride in making them.

The veteran Washington representative of the B'nai B'rith Anti-Defamation League is an inveterate matchmaker who wends his way through the capital's power circles on the lookout for people who ought to know one another.

No sooner do his antennae pick up a nugget of conversational information about somebody's past or present interests than the next words out of his mouth are invariably, "I'd like to put you together with. . . ."

The very next day, if not later the same day, Brody will be on the telephone proposing a luncheon involving himself and the two people he wants to bring together. Invariably, they are people who would have gotten together on their own at some point but, as Brody said in an interview, he finds that it advances his long-term interests if he can be the "facilitator or catalytic force."

"I do it so that the two people will know each other, so they will not be strangers when they need to deal with one another. Both parties usually welcome it," he explained. Those involved may run the gamut from Members of Congress, White House aides and ambassadors to reporters, fund raisers and constituents.

Twenty years at his job has taught Brody that at some point, his gestures of good will are likely to be returned in some form. "It's not so much that people are beholden to me, as it's a matter of providing greater access for me," he said, stressing the golden word of the lobbyist's trade—access.

The autographed pictures on the wall of Brody's office attest to his success in gaining assess at the very highest levels. They also attest to his skill at hearing what people say and sensing what makes them tick and what their current concerns are.

"In this town, so many people talk rather than listen," explained Brody, giving away a major secret of his success. It also helps to be quick-witted enough to put information to immediate use. "If I happen to be in a Member's office and a name comes up, we'll often set up a lunch right then."

Brody is constantly on the lookout for likely connections, two Members of Congress who haven't met each other yet, a reporter who is starting out a project involving principals he hasn't met, new arrivals at the Israeli Embassy who need to meet the people they will be dealing with in Washington.

"It's just a matter of having almost an intuitive sense about people's needs," Brody said. "I guess it is just a matter of knowing how to relate to people. I will occasionally bring Members of Congress together whose views may be divergent. In bringing them together, they find that they are able to work together on other issues."

Those other issues, with luck, may turn out at some point to be the very ones upon which Brody is lobbying. And, even if their votes do not always go his way, Brody at least gets a chance to have his say. In 1981, when Congress approved the sale of military aircraft to Saudi Arabia, Brody recalled, "a number of good friends of mine voted for the sale, but I still had the opportunity to sit down and talk to the principal—to the man who cast the vote."

That statement is also revealing. In lobbying, as in matchmaking, the permanence of relationships is important. Accordingly, significance attaches to Brody's reference to "good friends" who voted against his position. They still are his good friends, and maybe next time they will be with him.

Besides putting his lunch hour to regular use, Brody and his wife, Bea, entertain at their home, throwing dinner parties that may bring anywhere from a dozen to three dozen Washington notables together to trade information and get to know one another better.

"From time to time, press people are invited to my parties at home as friends," Brody explained. What goes on is not intended for publication, Brody noted, but it is recognized "a reporter may pick something up at a party." But, he added, "the story won't be that I had that group of people to dinner."

Brody added that he has never hesitated to bring politicians and journalists together in a social setting. "I don't draw any lines," he said. "When I find it useful to play that catalytic role, I do it." With reference to the politicians, he observed, "I think they welcome the opportunity too, otherwise they wouldn't agree to it."

To the best of his recollection, Brody over the years has never become a matchmaker in the romantic sense. He says that he knows of no marriages that have resulted between people he has brought together and quickly adds in a businesslike tone that "if it has happened, that would not be the purpose that the meeting started out with."

There is more than a bit of a Horatio Alger aspect to Brody's career. The man who now wines, dines and facilitates friendships among the high and mighty started out in life as the son of an immigrant garment worker who entered this country through Ellis Island. He grew up in Brooklyn, attended public schools and ended up studying law at Columbia University on a scholarship. He came to Washington in 1940 to work as a lawyer for the government and has been with the Anti-Defamation League since 1949.

Brody said he has developed his skills as a lobbyist-social connecter as he has gone along. "I like to say that the things I do, I never learned in law school." Nonetheless, the 69-year-old lobbyist makes it clear that he enjoys what he does. "I have no plans to retire," he said.

The matchmaker is obviously well matched to his calling.

DEFENSE SPENDING FOR FISCAL YEAR 1986

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GUNDERSON. Mr. Speaker, three major goals directed the House, last June, in its consideration of the Department of Defense Authorization Act for fiscal year 1986. Those goals included: first, providing for the national security of the United States; second, achieving a defense authorization consistent with efforts to reduce the Federal deficit; and third, weaning the United States away from an over-reliance on expensive strategic weapons systems. For the first time in recent memory, the House succeeded in realizing these goals. For the first time in 3 years, I was able to cast a vote in support of a defense authorization bill.

To ensure that the security interests of the United States were protected, the House carefully constructed a bill that provided for continued research, development, test, and evaluation programs, civil defense initiatives, all important operations and maintenance work, and the modernization of necessary weapons systems. The House reaffirmed its commitment to a strong and viable defense for the Nation.

Recognizing the need to involve the Pentagon in efforts to reduce the Federal deficit, the authorization bill froze defense spending at the fiscal year 1985 level, without an adjustment for inflation. By freezing defense at the fiscal year 1985 level, a brake was finally applied to uncontrolled spending that had resulted in a 51-percent increase in inflation-adjusted budget authority for defense since 1980.

Spending for strategic weapon systems rose nearly 1,400 percent between fiscal year 1980 and fiscal year 1985, while spending for conventional systems increased 376 percent. Investment costs absorbed by these weapons rose from 21.5 percent of investment in fiscal year 1980 to 46 percent in fiscal year 1985. Strategic systems are certainly important, but the fact is that events in Afghanistan, El Salvador, Angola, and Mozambique have provided sufficient evidence that strategic systems cannot be counted on to halt foreign aggression. The importance of adequate military staffing and an availability of conventional supplies cannot be lost in the rush to purchase high-technology high-cost strategic hardware. By refusing to fund 31 weapons programs, the House made it clear that it was determined to reintroduce a proper balance between strategic and conventional spending.

Unfortunately, the bill that came out of the conference committee in no way resembled the original bill approved by the House. By providing an inflation-adjustment, conferees added almost $10 billion to the bill. Ten additional MX missiles were authorized. SDI funding went up by $250 million. Funding was provided for 22 of the 31 weapons programs for which money was previously refused by the House.

It is difficult to understand how at the same gime that Congress is considering deficit-reduction legislation requiring sacrifice on the part of all Americans, the defense authorization conference report could be rushed through the House by voice vote. Provided the opportunity, I would have, most assuredly, recorded my opposition to the defense authorization conference report.

The defense appropriation bill for fiscal year 1986 passed the House on Wednesday. While not agreeing with each and every provision included in the measure, I must applaud the Appropriations Committee for offering a bill that effectively incorporated the basic goals and priorities that had been discarded when the authorization bill went to conference. Among other provisions, the bill denies the $10 billion inflation-adjustment and freezes spending at the fiscal year 1985 level. I was pleased to cast my vote in support of the bill, and now call on those appointed to the conference on this bill to please respect and uphold the important messages communicated by the House in its passing of the measure.

We must protect the freedoms that those who have come before us worked so hard to gain. But, real security comes from a combination of sufficient military readiness to deter attack, a healthy economy and the well-being of our citizens. The defense appropriation passed by the House goes a long way toward achieving that security.

HUMAN RIGHTS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. WOLF. Mr. Speaker, I join my colleagues today in expressing my concern about human rights abuses in the Soviet Union and surrounding nations. In these remaining days before the Geneva summit, it is most appropriate for all Members of Congress to indicate their concern about this issue and support for any efforts by the President to bring discussion of human rights to the bargaining table in Geneva. It is important in any bilateral exchange with the Soviets to make it unequivocally clear that their abuses of individual rights have a serious detrimental effect on United States-U.S.S.R. relations.

I have been tracking specific human rights issues recently, including religious freedom, slave labor, and the individual cases of Father Gheorghe Calciu and Vladimir Khailo.

This past July, I traveled to Romania with my House colleagues TONY HALL and CHRIS SMITH to investigate reports of human rights violations and religious repression in that country. Our trip was taken to give us a firsthand view of the situation as Congress reviews United States policy regarding renewal of most-favored-nation trade status for Romania.

It was clear that religious freedom is supressed there. Lay leaders from various churches have been put in rubber suits, filed with water and beaten with rods and left for dead; 20,000 Bibles have been recycled for use as toilet paper; and three churches have been bulldozed or partially demolished in the past year alone.

Upon our return, we wrote the Romanian Minister of Foreign Affairs and noted that while there is value to continued economic

ties between our two countries, we believe ensuring human rights and religious freedoms is a moral responsibility we cannot shirk and is the foundation for any meaningful bilateral relationship.

We listed several specific examples of human rights violations and asked the minister to take immediate action to correct them. Our first concern was for the immediate emigration of Father Gheorghe Calciu, a Romanian Orthodox priest who has been imprisoned, beaten, and threatened with death over four decades in Romania.

In September, I joined Representatives HALL and SMITH at a news conference sponsored by the Commission on Security and Cooperation in Europe—Helsinki Commission—to welcome Father Calciu to the United States. We were relieved and grateful for his safe emigration to the West following pleas to the Romanian Government by many Members of Congress and the efforts over many years of the United States and Western governments and international human rights organizations and religious groups.

While pleased about this particular case, we remain concerned about the daily human rights abuses in Romania. To call attention to these continuing problems, Representatives HALL, SMITH, and I have joined as sponsors of H.R. 3599, legislation to suspend the valued most-favored-nation trade status for Romania for 6 months pending improvements in Romania's dismal human rights record.

An additional disturbing human rights issue is the use of slave labor to produce goods in the Soviet Union. Hearings before the House Treasury, Postal Service Appropriations Subcommittee this spring revealed alarming statistics about goods made by forced labor in Soviet Union—there are an estimated 4.5 million convict laborers in the U.S.S.R. and much of the Soviet economy is built on the backs of those men, women, and children who toil in nearly 2,000 Soviet prisons and forced-labor camps.

I became concerned when questioning Treasury and Customs officials that the United States has become an unwitting accomplice in these human rights violations by our lack of enforcement of existing statutes prohibiting the importation of products made by forced labor.

To call attention to this problem, Representative STENY HOYER joined my effort to amend the fiscal year 1986 Treasury, Postal Service appropriations bill to bar the Treasury Department from using funds that may in some way result in the nonenforcement of an existing ban on importation of goods made by slave labor. This provision was approved by the conference committee yesterday.

I would also like to mention an individual case of a Russian Baptist man, Vladimir Khailo. I first was made aware of this case last year by some of my constituents who are members of the human rights organization, Amnesty International.

This case is a clear example of the pervasive Soviet use of psychiatric "treatment" as an instrument of political repression. According to reports, Mr. Khailo has been forcibly confined to a psychiatric hospital in Voroshilovgrad. He was arrested there on November 14, 1980, but the exact charge against him has not been made public. On December 1, 1980, a court ordered him forcibly confined for an indefinite period to a special psychiatric hospital designated for those "who represent a special danger to society," although there is no evidence to suggest that Mr. Khailo posed such a threat.

The report further states that Mr. Khailo has been harassed for 15 years and that his children were discriminated against in school. In 1977, his children stopped attending school for fear of victimization. In response to their oppressive situation the Khailos applied for permission to emigrate in 1974 and again in 1977 without success.

Mr. Khailo is a former fire brigade employee who is married with 15 children. He belongs to a Baptist congregation which refuses to accept state restrictions on religious practice. These restrictions include: Control of the content of sermons, the appointment of clergy and religious education.

It appears that the treatment Mr. Khailo has received is an attempt to discourage his peaceful attempts to practice his religion and to emigrate from the U.S.S.R. These events are of concern to me since I believe freedom of religion is the legitimate right of every citizen. Additionally, contrary to their action on this case, the Soviet Union is party to the Universal Declaration of Human Rights which provides for the freedom to emigrate.

In my correspondence with Soviet leaders, I have requested that the Khailo family be allowed to emigrate to the West. I will continue to make appeals on behalf of Vladimir Khailo and his family.

Additionally, I will continue to monitor other human rights abuses in the Soviet Union and other nations and would urge my colleagues to do the same. It is vital that we continue voicing our concerns and opposition to the human rights abuses in the Soviet Union and Eastern Europe. It is also important in our efforts in the Congress and as a Nation which has long symbolized the principle of freedom for the oppressed of thie world that we constantly keep in mind the victims—those who suffer each day because of the policies of repression.

We as Americans and the other nations of the free world can never turn our backs on the struggles of our fellow man. We must continue in our determination to seek justice and must never waver as long as there are people in our world who are denied basic principles of human rights and freedom of speech and religion.

STAFF OF NORTH DADE SOCIAL SECURITY OFFICE GETS THE JOB DONE RIGHT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. LEHMAN of Florida. Mr. Speaker, efficient and competent government service often receives less attention than horror stories about bureaucratic delays, poor management, and careless, inconsiderate workers. That is why I am particularly pleased to bring to the attention of my colleagues the exceptional record compiled over the past year by the employees of the Social Security Administration in its North Miami Beach, Hialeah, and Little River offices serving the people of North Dade County.

The Social Security Administration sets performance goals consisting of 96 different categories for each of its district operations. These goals, when met, insure a high level of service to the public in crucial areas such as the speed of processing retirement, survivor, disability, and SSI claims; accuracy in benefit computations, payment, and evidence-gathering; and precision in maintaining computer records.

Under the direction and guidance of District Manager Errol J. Simmons, the North Miami District offices met or exceeded every one of these 96 performance goals in the past year. This is a remarkable achievement on its own merit, but even more noteworthy because only 15 other districts of the 103 in the entire Southeast region were able to claim this distinction.

Many of our constituents rely heavily on Social Security benefits in their day-to-day lives, and mistakes or delays in benefits can cause great hardship. It is a comfort to many to have dedicated people in this program who take their responsibilities seriously and who do their jobs so well.

Mr. Speaker, I would like to offer my congratulations to District Manager Errol Simmons, Branch Managers Dorrith Leipziger, and Carol Woodel and their entire staffs, whose names are printed below, for a job well done. We appreciate your efforts and hope you will keep up the good work.

MIAMI NORTH OFFICE

Maria Barr, CR, James A. Behanna, OS; Charles Branch, CR; Sara Cecil, CR; Dorothy Clark, FR; Marcia Clarke, CR; Claire Davis, DRT; Gregg Davis, CR; Stephanie DeLise, ADM; Shirley Edwards, Sec.; Elizabeth Fassig, OS; Betty Felder, DRT; Helen Garcia, DC; Cindy Gore, Summer Aide; Bernice Green, CR; Gloria Jackson, DC; Johanna Kakanis, DRT; Neil Katz, FR; Valerie Kurz, CR; Sharon Larkin, CR; Alberta Mazzaro, DC; Patricia McAuliffe, CR; Alphonso McCray, OS; Rena McNair, CR; Willie Mae McNeill, DRT; Susan Medina, CR; Carolyn Moore, DRT; Elaine Murin, CR; Barbara Nemeroff, CR; Charles Nunez, SR; Ana Owens, SR; Deborah Peters, CR; Carlton Robinson, CR; Freenis Sample, CR; Errol Simmons, DM; Gregory Thornton, DC; Juan Travieso, CR; William Tutt, SR; Vernon Urquhart, DC; Martha Vera, Data

Transcriber; Mamie Wiener, Clerk; Kimberly Wilson, Clerk.

HIALEAH OFFICE

Harris, CR; Grace V. Macauley, CR; Sara W. Milkes, CR; Raquel Pineiro, CR; R. Lynn Reynolds, DRT; Neil S. Rosenbert, CR; Brenda L. Saenger, CR; Neri Saiz De La Mora, Secretary; Pamela M. Spann, SR; Lillian F. Toboz, CR; Carol M. Woodel, BM.

REGARDING H.R. 505, AS AMENDED

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. SHELBY. Mr. Speaker, H.R. 505, as a whole, is a good bill. Its comprehensive provisions would result in necessary improvements in the VA Medical Care System.

I know that the chairman of the full committee, the Hon. G.V. (SONNY) MONTGOMERY, the chairman of the Hospitals and Health Care Subcommittee, Hon. BOB EDGAR, and the ranking minority member, Hon. JOHN PAUL HAMMERSCHMIDT worked hard to iron out the differences between the House and Senate-passed bills, and I appreciate the importance of the provisions contained in this measure.

However, I wish to voice my disappointment over a provision that was dropped which would have authorized the purchase of a medical facility that is located in an urban area and is suitable for furnishing both hospital and nursing home care services to veterans. There is a property in Mobile, AL, that could have been purchased under this provision. It was a commonsense provision which could have served to better allocate our scarce VA monetary resources.

Mr. Speaker, the acquisition of this property in Mobile makes good sense to me. For some time now, the VA and medical district 10 have developed statistical data to support the construction of a new VA hospital in the Florida Panhandle.

The acquisition of this existing facility versus the construction of a new one in Fort Walton Beach, FL, would be the most economical way to go for taxpayers—$69,000 per bed in the existing Providence Hospital as compared to more than $400,000 per bed for new construction. It would meet the VA's longstanding policy of locating hospitals adjacent to or close as possible to approved schools of medicine. The University of South Alabama School of Medicine in Mobile is the only such school on the Gulf Coast between New Orleans, LA, on the west and Tampa, FL, on the southeast. To my knowledge, this longstanding policy would be violated for the first time if a hospital was constructed at Fort Walton Beach.

The largest concentration of veterans in South Alabama-Florida Panhandle is in the Mobile area. On first brush, it would appear that construction of a new VA hospital in the Florida Panhandle would be to serve retired military personnel rather than the veterans in true need of a health care facility.

Additionally, more than 50 percent of all veterans residing in the central gulf coast would be within 1 hour or less by car to the Providence Hospital site in Mobile.

Mr. Speaker, I can't understand why this provision was dropped. Although the potential acquisition of existing facilities will be studied hereinafter, the Providence Hospital in Mobile may no longer be available. I believe that the omission of the provision to purchase this facility is detrimental to good management and budgetary savings.

THE DUNCAN-GREGG SUBSTITUTE FINANCING PACKAGE FOR THE REAUTHORIZATION OF SUPERFUND

HON. JUDD GREGG

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 31, 1985

Mr. GREGG. Mr. Speaker, the most important aspects of any proposal for the financing of Superfund are the adequacy of funding, stability of the funding sources, adherence to the "polluter pays" tradition, and the provision for trade neutrality. In my judgment, the Superfund financing package which was reported out of the Committee on Ways and Means last week is deficient in all of these key areas. I have, therefore, joined with my colleague, Mr. DUNCAN, the ranking minority member on the Ways and Means Committee, to propose an alternate funding package which corrects these deficiencies.

In terms of adequacy and stability of funding, all of the proposals which will be considered on the House floor are designed to provide $10 billion for the Superfund during the period 1986–90; however, only the Duncan-Gregg approach contains a mechanism to guarantee that full funding is achieved. The revenue raised by the other proposals is derived from taxes imposed at fixed rates. These rates are set on the basis of a series of assumptions concerning prices, inflation and general economic conditions during the next 5 years. If, as has happened in the past, these assumptions are not accurate, there could be significant revenue shortfalls. The Duncan-Gregg amendment, however, contains provisions for a reevaluation and adjustment of the taxes half way through the authorization period and, if necessary, annually thereafter.

Another aspect of the stability question arises from the possibility of significant tax base erosion due to decreases in taxable waste volume over the 5-year reauthorization period. The waste-end tax is designed to provide an incentive for waste management practices, such as recycling, incineration, and other methods of detoxification treatment, which decrease the amount of waste destined for disposal; but there is little experience with such taxes to serve as the basis for reliable prediction of the size of the tax base and, thus, the revenues, over time. To compensate for this undetermined decrease in revenue, the Duncan-Gregg proposal provides for a more stable, waste-related tax to replace the waste-end tax during the last 2 years of the reauthorization period, with rates adjusted to make up for any anticipated shortfalls.

In addition to assuring that the financial needs of all of the authorized Superfund programs are met, the Duncan-Gregg amendment provides effective fiscal control. In the unlikely event that the tax revenues are greater than anticipated, or that enhanced cost-efficiency allows all of the programmatic needs to be met at less than anticipated costs, the EPA Administrator and the Secretary of the Treasury could, through joint certification to the Congress, postpone imposition of the Superfund surcharge. I would emphasize, however, that no portion of this financing package should be construed as discretionary, and any postponement decision would be subject to full congressional oversight with ample opportunity for legislative override, if necessary.

Because the Duncan-Gregg amendment retains the reliance on feedstock, petroleum and waste-end taxes in the early years of the reauthorization, and imposes a waste-related tax having a broader base during the latter years, the entire package places the tax burden directly on those industries which are most clearly related to waste generation and disposal. By contrast, the committee bill deviates significantly from the "polluter pays" principal since it derives a large portion of its revenue from a tax levied at a uniform rate on all segments of industry, regardless of their involvement with the hazardous waste problem.

Other proposals, which would finance the expanded Superfund through a waste-end tax and large increases in chemical feedstock and petroleum taxes, adhere more closely to the "polluter pay" concept, but impose an unacceptable burden on a

narrow segment of American industry. Because these taxes cannot be readily offset by increases in import tariffs or rebates on exports, they produce a serious anti-competitive effect on one of the few segments of domestic industry which still has a positive international trade balance. This is simply unacceptable in a time when we are devoting so much of our national effort to the restoration of our position in the international marketplace.
